1. Anat.: A portion of the brain situated beneath the posterior lobes of the cerebrum, and about one-seventh the size of the latter, from which it is protected by the tentorium cerebelli. It is composed of grey matter on the surface and white in the interior. In shape the cerebellum is oblong and flattened, largest from side to side, and divided into two hemispheres, separated on the upper surface by the superior veriform process; on the under surface there is a deep fissure termed the valliculus or valley, corresponding with the medulla oblongata. On making a vertical incision the arbor vitae cerebelli is seen, the white central substance resembling the trunk of a tree with branches, branchlets, and leaves. Nearer the commissure than to the lateral border is a yellowish grey dentated line, the corpus rhomboidem, or ganglion of the cerebellum. The cerebellum is associated with the rest of the brain by three pairs of rounded peduncles or cords, the superior proceeding forwards and upwards to the testes, forming the anterior part of the lateral boundaries of the fourth ventricle with the valve of Vieussens between them; the middle, the largest, are lost in the pons varolii, and the inferior descend to the posterior part of the medulla oblongata, and form the inferior portion of the lateral boundaries of the fourth ventricle.

2. Physiol.: It is connected with the powers of motion, and is largest in those animals which require the combined effort of a great variety of muscles to maintain their usual position and execute their ordinary movements. It does not appear to affect voluntary power, or reflex movements, but chiefly combined motor action. According to Dr. Ferriar the cerebellum is the co-ordinating centre for the muscles of the eyeball. In the system of phrenologists, first propounded by Gall, it is the organ of the sexual instinct, and Dr. Carpenter says it seems not improbable that the lobes of the cerebellum are the parts specially concerned in the regulation of muscular movements, whilst the central portion may be the seat of the sexual sensations. This view is, however, not generally held.

Chem.: A fatty acid, extracted by means of ether from the matter of the brain after it has been exposed to the action of boiling alcohol. When pure it is white and crystalline.

çer-ëb-ri-form, a. [Lat. cerebrum = the hair, and forma = form, appearance.] Resembling the brain; brain-like.

çer-ë-brin, s. [Lat. cerebr(um) = the brain, and Eng. suff. -in (Chem.)]

Chem.: C<sub>17</sub>H<sub>33</sub>NO<sub>3</sub>, a light amorphous powder, without taste or smell; it swells up like starch when boiled with water, and is converted, by boiling with dilute acids, into a saccharine substance and other products. (Fowles.)

çer-ë-bri-tis, s. [From Lat. cerebr(um) = the brain, and Lat. & Gr. suff. -itis, denoting inflammation.]

Med.: Inflammation of the substance of the brain. Cerebritis may be either acute or chronic. The acute form of the disease runs a very rapid course and usually terminates fatally. The symptoms are as follows, viz., a deep-seated, violent, oppressive, and persistent pain in the head, with some feverishness and vomiting, pallor of the face, low and irregular pulse, depression of spirits, confusion of thought, then convulsions, loss of sensation, paralysis, coma, and death. Chronic cerebritis, to which the term ramollissement or softening of the brain is frequently applied, is usually of a local or partial character, and is consequently much slower in its progress. This form of the disease, which may or may not be a sequence of the acute, is characterised by certain well-marked symptoms such as loss of memory, falling intellectual powers with a consciousness of the decline, dull and protracted pain in the head, tingling or numbness in different parts of the body, impairment of the faculties of sight and hearing, and paralysis slowly increasing. Cerebritis is usually associated with meningitis, or inflammation of the membranes of the brain, and is then called Encephalitis. When this complication occurs the symptoms just described ser of a more marked character. [BRAIN-FEVER.]

çer-ë-brö, in compos. [From Lat. cerebrum = the brain.] Pertaining to the brain, as cerebro-spinal (q.v.).

**cerebro-spinal, a.**

† The cerebro-spinal axis: The brain and spinal cord. Also called the cerebro-spinal centres and the cerebro-spinal system.

çer-ë-bröid, a. [Lat. cerebr(um) = the brain; Gr. eidos (eidos) = form, appearance.] Belonging to the brain.

† çer-ë-bröp-a-thý, s. [Lat. cerebrum = the brain, and Gr. páthos (pathos) = suffering, affection; páσχω (paschō) = to suffer.]

Med.: A hypochondriacal condition verging upon insanity, occasionally occurring in those whose brains have been overtaxed. (Dun-glison.)

\* çer-ë-bröse, a. [Lat. cerebrosus, from cerebrum = the brain.] Brainsick, mad. (Scott.)

\* çer-ë-brös-ý-tý, s. [Eng. cerebro(s); suff. -ity.] Brainsickness, madness.

\* çer-ë-bröt, s. [Lat. cerebro = the brain.] The same as CEREBRO ACID (q.v.).

çer-ë-brüm, çer-rö-brüm, s. [Lat. cerebrum = the brain.]

1. Anat.: The higher and front portion of the brain, as opposed to the cerebellum, the hinder and lower portion. The cerebrum is composed of a number of convolutions externally, and divided superiorly by the great longitudinal fissure, containing the falx cerebri, and marking the original development of the brain (q.v.),

BRAIN OF MAN. 1 Cerebrum. 2 Cerebellum.

into two symmetrical halves, which are connected by a broad band of white substance, the corpus callosum. If either hemisphere be cut through, a centre of white substance will be found surrounded by a grey border, following the zigzag of the sulci and convolutions. Each hemisphere is divided into an anterior, middle, and posterior lobe; the anterior rests on the roof of the orbit, and is separated by the fissure of Sylvius from the middle lobe, which lies in the middle fosse of the base of the skull, and is separated from the posterior at the ridge of the petrous bone; the posterior rests on the tentorium. On the middle line of the corpus callosum is the raphe, a linear depression, and a section on each side of it exposes the ventricles (q.v.) extending from one end of the hemispheres to the other.

2. Physiol.: According to Dr. Ferrier — (1) The anterior portions of the cerebral hemispheres are the chief centres of voluntary motion and of the active outward manifestations of intelligence. (2) Individual convolutions are separate and distinct centres; and in certain groups of convolutions are localised the centres for various movements—e.g., eyelids, face, mouth, tongue, ear, neck, hand, foot, and tail of animals. (3) The action of the hemisphere is in general crossed; but certain movements of the mouth, tongue, and neck are bilaterally co-ordinated from each cerebral hemisphere.

I. Ordinary Language:  
I. Lit.: Roman Mythol.: The daughter of Saturn and Ops, and the goddess of Corn and Tillage. She is generally represented with ears of corn on her head, and holding in one hand a lighted torch, and in the other a poppy, her sacred flower.

2. Fig.: Applied to corn.

"This ground with Bacchus, that with Ceres suits, That other loads the trees with happy fruits."  
*Dryden: Virgils; Georgic I. 61.*

II. Astron.: An asteroid, the first found. It was discovered by Piazzi on January 1, 1801. Having observed it at Palermo, in Sicily, he called it Ceres, after the old tutelary divinity of that island. [I.] Under favourable circumstances it has been seen by the naked eye as a star of the seventh magnitude, but more generally it looks like one of the eighth magnitude, only the light has a red tinge, and a haze is round the planet as if it had a dense atmosphere.

Bot., &c.: Producing wax. (*R. Brown*, 1874.)

**çer-in**, **çer-ine**, s. [Lat. *cera* = wax, and Eng. suff. *-in*, *-ine* (Chem.).]

1. Chem.: A substance composed of fine crystalline needles, deposited whilst cooling, when wax has been boiled in alcohol. It is composed of carbon 48, hydrogen 50, and oxygen 2. It forms 70 to 80 per cent of beeswax. It is white, analogous to wax, fusible at 134° F. When treated with caustic alkali ley it is converted into margaric acid and *ceruine*.

2. Min.: A brownish-black mineral, a variety of Allantite (q.v.), found in East Greenland, generally massive, and rarely crystallized in four-sided prisms. It is composed of silica 35.4, protoxide of cerium 29.9, oxide of iron 25.4, alumina 4.1, lime 9.2. Sp. gr., 3.5-4.0.

**çer-in-ite**, s. [From Lat. *cera* = wax, and Eng. suff. *-in*, *-ite* (Min.).] [CERIN.]

Min.: A white or yellowish-white mineral akin to Henlandite, but massive with a waxy luster. Found in the trap of the Bay of Fundy.

**çer-in-thê**, s. [Lat. *cerinthe*, *cerintha*; Gr. *κερίνη* (*kerinthe*) = the plant called *Cerinthé major* (see def.).]

Bot.: A small genus of borage-worts. The species are mostly European. Two, *Cerinthé major* and *minor*, have been long cultivated in gardens under the name of Honey-wort.

**çer-in-thi-ans**, s. pl. [From *Cerinthus*, their founder, who flourished about A.D. 88.]

Eccles. Hist.: A heretical sect, followers of Cerinthus, a Jew by birth, who attempted to unite the doctrines of Christ with the opinions of the Jews and Gnostics. He believed that the Demiurge, or Creator of the World, who was not the Supreme Being, was also lawgiver of the Jewish nation. He having fallen off in character, God sent Christ, an æon, to enter into a certain Jewish man called Jesus, to subvert the power of the Demiurge, who, irritated, produced the crucifixion. The æon Christ shall again return to the man Jesus, and reign with his followers in Palestine for 1,000 years. Cerinthus is believed to have been born before the crucifixion of Our Lord, and St. John is said by Irenæus to have written his Gospel in opposition to his doctrines. The act did not continue long.

**çer-î-ôp-ôr-a**, s. [The first element is prob. Gr. *képas* (keras) = a horn; the second is Gr. *πόρος* (poros) = a passage.]

Type-founding: One of the fine lines of a letter, especially one of the fine cross-strokes at the top and bottom of capitals. (*Savage*.)

**çer-î-se**, s. & a. [Fr. *cerise* = a cherry, from Lat. *cerasus*.]

A. As subst.: A cherry colour; a light bright red.

B. As adj.: Of the colour of cerise.

**çer-ite** (1), s. [Named by the discoverers after the planet Ceres, and suff. *-ite* (Min.).]

Min.: A mineral, a siliceous oxide of cerium, of a brown or cherry-red colour, slightly translucent, and brittle. It is found in Sweden.

**çer-ite** (2), s. [CERITHIUM.]

Palæont.: Any individual of the genus Cerithium or the family Cerithiidae.

**çer-î-thî-î-dæ**, s. pl. [From Mod. Lat. *cerithium*, and Lat. fem. pl. adj. suff. *-idæ*.]

Zool.: A family of gastropodous mollusca, section *Holocatomata* (Sea-snails). The shells are long and spiral, with many whorls and a horny operculum. They are widely distributed, but most abundant in tropical seas.

**çer-rith-î-ôid**, a. & s. [Mod. Lat. *cerithium*; *-oid*.]

A. As adj.: Belonging to or resembling the genus Cerithium.

B. As subst.: Any individual of the Cerithiidae.

**çer-îth-î-ûm**, s. [From Gr. *κεράτιον* (*keration*) = a little horn, dimin. of *κέρας* (keras) = a horn.]

Zool. & Palæont.: The typical genus of the family Cerithiidae (q.v.). 136 recent species are known, and 460 fossil, the latter from the Trias onward till now.

**çer-î-ûm**, s. [Named by the discoverers after Ceres.]

Chem.: A metal (Sym. Ce.; At. Wt., 92) found with two other metals, lanthanum and didymium, in cerite. Powdered cerite is made into a thick paste with concentrated sulphuric acid, and heated nearly to redness. The mass is then treated with water, saturated with H<sub>2</sub>S, filtered, acidified with HCl, and precipitated by oxalic acid. This precipitate heated in the air to redness gives a brown powder of the mixed oxides. Nitric acid dissolves the oxides of lanthanum and didymium, and leaves the oxides of cerium. The oxides of lanthanum and didymium are separated by the repeated crystallization of their sulphates (see *Watts's Dict. of Chemistry*). Cerium is obtained by reducing its chloride with sodium as a grey powder which decomposes water slowly. It dissolves in dilute acids with evolution of hydrogen. Cerous oxide, CeO, obtained by igniting the carbonate or oxalate, is a greyish-blue powder, which, in the air, oxidises into ceroso-ceric oxide, Ce<sub>2</sub>O<sub>4</sub>, a yellowish-white powder. The salts of the former are colourless, those of the latter brown-red or yellow.

**cerium carbonate**, s. Min.: Lanthanite (q.v.).

**çer-nu-ôus**, a. [Lat. *cernuus* = stooping.]

Bot.: Drooping, hanging, pendulous.

**çer-ô-grâph**, s. [CEROGRAPHY.] A writing on wax; an encaustic painting.

\* **çer-ô-grâph-îc**, \* **çer-ô-grâph-î-cal**, a. [Eng. *cerograph(y)*; *-ic*, *-ical*.] Of or pertaining to cerography.

\* **çer-ôg-raph-ist**, s. [Eng. *cerograph(y)*; *-ist*.] One who practises or is skilled in cerography.

\* **çer-ôg-raph-ÿ**, s. [Gr. *κερογραφία* (*kero-graphia*) = painting with wax; *κερός* (*keros*)

= wax; γραφία (graphia) = writing, painting; γραφίδω (graphidō) = to write.]

- 1. The act or art of writing on wax.
- 2. The art of engraving on copper covered with a thin film of wax, from which stereotype plates are taken. (Μάζον.)

**çer-ô-lite**, s. [Gr. κηρός (kēros) = wax, and λίθος (lithos) = a stone.]

*Min.*: A greenish or yellowish-white mineral; transparent or translucent. Comp.: Silica, 47.34; magnesia, 29.84; water, 21.04; hardness, 2-2.5. Sp. gr. 2.3-2.4. Lustre vitreous or resinous. It occurs at Frankenstein, in Silesia. It feels greasy to the touch, whence its name. (Dana.)

**\* çer-ô-ma**, s. [Lat. ceroma; Gr. κηρώμα (kērōma) = ointment for athletes; κηρός (kēros) = to anoint, to wax' over; κηρός (kēros) = wax.] That part of the ancient gymnasia and baths in which athletes used to anoint themselves.

**\* çer-ô-mān-cy**, s. [Gr. κηρός (kēros) = wax, and μαντεία (manteia) = prophecy, divination.] A method of divination, formerly practised, by dropping melted wax into water and observing the figures formed.

**† çer-rōon**, s. [SEROON.] A bale or package made of akins. (Webster.)

**çer-ô-pē-çi-a**, s. [From Gr. κηρός (kēros) = beeswax, and πήγη (pēgē) = a well, a fountain.]

*Bot.*: A genus of Asclepiads (Asclepiadaceæ), containing more than fifty species of perennial herbaceous plants, natives of India and Africa. They have a bulbous root, and short erect or twining stems. The calyx is five-parted. Several species are employed for food; in some cases the whole plant is eaten as a salad, in others the fleshy leaves, stems, and tubers are used as pot vegetables. *Ceropegia edulis* is said to be eaten, whence its specific name.

**\* çer-rōph-ēr-a-ry**, s. [Lat. ceroferarius, from Gr. κηρός (kēros) = wax; φέρω (phērō) = to carry.]

- 1. An acolyte, an assistant of lower grade in a church, whose office it was to carry the candles in any religious procession. (Fuller.)
- 2. A stand for candles.

**† çer-ô-plas-tic**, a. & s. [In Fr. céroplastique; Gr. κηροπλαστικός (kērōplastikos) = of or for modelling in wax; κηρός (kēros) = wax; πλάσσω (plássō) = to mould, to model.]

**A.** As adj.: Modelled in wax.  
**B.** As substantive:  
*Sculp.* (of pl. form): The art or science of modelling figures in wax.

**çer-ôp-tēr-is**, s. [Gr. κηρός (kēros) = wax; πτερίς (ptēris) = a fern.]

*Bot.*: A name formerly applied to the species of Gymnogramma, or Gold and Silver Ferns.

**çer-ô-sine**, **çer-ô-sin**, s. [Lat. cera = wax; Gr. κηρός (kēros) = wax, and Eng. suff. -ine (Chem.) (q.v.).]

*Chem.*: A waxy substance found on sugar-canes. It is composed of carbon, hydrogen, and oxygen.

**çer-ô-tâte**, s. [CEROTIC ACID.]

**\* çer-ô-to**, s. [Low Lat. cerotum; Lat. ceratum.] The same as CERATE (q.v.).

**A.** As adjective:  
**I.** Objectively:

- 1. Sure to happen, inevitable.  
"Virtue that directs our ways,  
Through certain dangers to uncertain praise."  
*Dryden.*
- 2. Trustworthy; on which one can depend; reliable.  
"If he myght on thaim troste  
That they were certayn."  
*Langtoft*, p. 45.

3. Fixed, settled, determined beforehand.  
"You shall gather a certain rate every day."  
*Ecclesi.*, xvi. 4.

4. Indubitable, unquestionable, past doubt.  
"These things are certain among men, which cannot be douled without obstinacy and folly."  
*Philoson.*

5. Unfailing.  
"I have often wished that I knew as certain a remedy for any other distemper."  
*Mead.*

**II.** Subjectively:

- 1. Sure, convinced, assured.  
"This mind is equally certain of, whether these ideas be more or less general."  
*Locke.*
- 2. Determined, resolved.  
"However I with these have fix'd my lot,  
Retain to undergo like doom of death,  
Consort with these."  
*Milton*: P. L., ix. 352.

**III.** Indefinitely:

- 1. In agreement with a subst.: Some one.  
"And Jesus answering said, A certain man went down from Jerusalem to Jericho."—*Luke* x. 30.
- 2. Absolutely: An undetermined number or quantity.  
"How bad soever this fashion may justly be accounted, certain of the same countrymen do pass far beyond it."  
*Croser*: *Sarcep.*

† To make certain: To inform. [Lat. certiorum facere.] [ASCERTAIN.]

**\* B.** As adverb:

- 1. Absolutely: Certainly, surely, undoubtedly.  
"I wol telle it noo other man, certayn."  
*Chaucer*: C. T., 3,493.
- 2. With a prep.: In certain, in certayne, for certain = certainly, assuredly.  
"Yet how should I for certain hold."  
*Temyson*: *The Two Voices*.

**\* C.** As substantive:

- 1. Certainty, sure facts.  
"Wherof the certayne oo man knoweth."  
*Gower*, l. 5.
- 2. A number or amount, either stated or not; a quantity.  
"He took with him a certen of his idle companions."

\* Of a certein: Assuredly, certainly.  
"Of a certein these things are pretty toys."  
*Scott*: *Fair Maid*, ch. 111.

\* Crabb thus distinguishes between certain, sure, and secure: "Certain respects matters of fact or belief; sure and secure the quality or condition of things. A fact is certain, a person's step is sure, a house is secure. Certain is opposed to dubious, sure to wavering, secure to dangerous. A person is certain who has no doubt remaining in his mind; he is sure when his conviction is steady and unchangeable; he is secure when the prospect of danger is removed. When applied to things, certain is opposed to what is varying and irregular; sure to what is unerring; secure is used only in its natural sense. It is a defect in the English language, that there are at present no certain rules for its orthography or pronunciation; the learner, therefore, is at a loss for a sure guide. Amidst opposing statements it is difficult to ascertain the real state of the case. No one can ensure his life for a moment, or secure his property from the contingencies to which all sublunary things are exposed."  
*(Crabb*: *Eng. Synon.*)

\* çer-tain, \* çer-tyne, v.t. [CERTAIN, a.] To certify, to inform.

**çer-tain-ly**, **\* çer-tain-liche**, **\* çer-tane-ly**, **\* çer-teyn-lic**, **\* çer-ten-lich**, adv. [Eng. certain; -ly.]

1. Assuredly, beyond doubt or question, of a certainty.  
"Certentich we be shecht."  
*Seszen Sagez*, 367.

"Certainly he that, by those legal means, cannot be secured, can be much less so by any private attempt."  
*Dr. H. More*: *Decay of Christian Piety*

2. Without fail.  
"And he said, Certainly I will be with thee."  
*Eccod.* III. 12.

\* çer-tain-ness, s. [Eng. certain; -ness.] The quality of being certain; certainty.

\* çer-taint, a. [A pa. par. of certain, v.] Certain, sure. (*Scott*.)

"It is most certaint his crowner Gunn deceivd Abovyn."  
*Spalding*, l. 177.

**çer-tain-ty**, **\* çer-tein-te**, **\* çer-teyn-te**, **\* çer-tayn-tye**, s. [Eng. certain; -ty.]

1. The quality or state of being certain or free from doubt.  
"If it myght that weys be brouht to certeynte."  
*Langtoft*, p. 274.

"In hopeless certainties of mind."  
*Byron*: *Mazappa*, v. 17.

2. The quality or state of being fixed.

3. Assurance, confidence.  
"Fortly may no certainte be sette upon his true-mek."  
*Gower*: C. A., l. 13.

"... at a very venture, soe as it should be hard to build a any certainties of charge to be rayssed upon the same."  
*Spenser*: *State of Ireland*.

4. A thing certain, sure, or indubitable and undeniable.  
"Nay, 'tis most credibile; we here receive it.  
A certainties vouch'd from our cousin Austria."  
*Shakspe*: *All's Well that Ends Well*, l. 2.

† At a certainties = in a state of confidence or assurance.

"... sometimes our way is clean, sometimes foul; sometimes up hill, sometimes down hill; we are seldom at a certainties."  
*Bungay*: P. F., pt. II.

Of a certainties: Assuredly, undoubtedly.

\* çer-tēs, \* çer-tye, adv. [Fr. certes, from Lat. certus = sure.] Certainly, assuredly.

"And certes, if it oere to long to heere,

\* **cesséd** (2), *pa. par. or a.* [SEIZED.]

**cér-ýl-óus**, *a.* [CÆSIOUS.]

\* **cessone**, *s.* [SEIZING.]

"*Cessone* in londe or othyr good takings. *Saisina*." *Prompt. Parv.*

\* **cés-pi-tí-tlouš**, *a.* [Lat. *caespitiosus* = of or pertaining to turf; *caespes* (genit. *caespitis*) = a turf.] Resembling turf; made of turf.

"Breadth of the *caespitiosus* ramparts."—*Gouph.*

**cés-pí-tóse**, *a.* [As if from a Lat. *caespitosus* = full of turf; *caespes* (genit. *caespitis*) = a turf.]

*Bot.*: An epithet applied to plants which grow in tufts or patches.

**cés-pi-toúš**, *a.* [Same etymol. as *caespitose* (q.v.).] Of or pertaining to turf, resembling turf.

**cess** (1), \* **cessé** (1), *s.* [Corrupted from *asses* (q.v.).]

I. *Literally* (of excess):

\* 1. The act of assessing or levying a rate or tax.

2. The tax or rate assessed.

"The like *cess* is also charged upon the country sometimes for victualling the soldiers, when they lie in garrison."—*Spenser.*

\* II. *Fig.*: Apportionment; hence, due share.

"I prythee, Tom, beat Cutte's saddle, put a few flocks in the post; the poor jade is wrung in the withers out of all *cess*."—*Shakesp.*: 1 *Hen. IV.*, III. 1.

\* The word is now little used in England, but is still common in Ireland.

**cess-payer**, *s.* One who pays cess or county rates. (*Ireland*.)

"... the Court, consisting of one magistrate and six *cess-payers*, only awarded 12s."—*Daily Telegraph*, May 11, 1881.

**cess** (2), *s.* [Etym. doubtful. It only occurs in the compound *cesspool*. Skeat suggests *sus-pool* = hog's wash, a puddle, a heap of filth; Gael. *so* = a coarse mess.]

**cess-pipe**, *s.* A pipe for carrying off waste water, &c., from a sink or cesspool.

**cess-pool**, \* **cess-pool**, \* **sus-pool**, *s.*

1. *Lit.*: A deep hole or well for sewage to drain into. The use of cesspools, which are a most prolific source of disease, is now forbidden in towns or other places where a proper system of drainage by water-carriage is provided.

2. *Fig.*: Any receptacle of filth.

"The *cesspool* of avarice, now in a time of paper money, works with a vivacity unexampled, unimagined; exhales from itself sudden fortunes, like Aladdin-palaces."—*Carlyle*: *French Revolution*, pt. III.

\* **cess** (3), \* **cessé** (2), *s.* [CEASE.] A ceasing or cessation.

**cess** (1), *v.t.* [CESS, *s.*] To assess, to impose a rate or tax on.

"They came not armed like soldiers to be *cessed* upon me."—*Briekett*: *Discourse on Civil Life*, p. 157.

\* **cess** (2), \* **cessé**, \* **cessen**, \* **cessen**, *v.t. & i.* [O. Fr. *cesser*; Ital. & Lat. *cesso*.] [CEASE.]

I. *Trans.*: To still, to calm, to cause to be quiet.

II. *Intransitive*:

1. *Ord. Lang.*: To cease.

2. *Law*: To neglect a legal duty. [*CESSOR* (1).] (*Webster*.)

\* **cés-sant**, *a.* [Lat. *cessans*, pr. par. of *cesso* = to cease.] Intermittent, ceasing, not continuous.

**cés-sá-tion**, *s.* [Lat. *cessatio*, from *cesso* = to cease.]

1. The act of ceasing, or stopping.

"The day was yearly observed for a festival, by *cession* from labour."—*Sir J. Heyward*.

2. The state of being at rest.

"A long *cession* of discourse ensued."

Pope: *Bower's Odyssey*, bk. XI., 387-8.

3. The end of action; the state of ceasing to be or act.

"The serum, which is mixed with an alkali, being poured out to that which is mixed with an acid, raiseth an effervescence; at the *cession* of which, the salts, of which the acid was composed, will be regenerated."—*Arbuthnot*: *On Aliments*.

4. A temporary suspension of warfare; a truce. (Generally in the phrase *cession of arms* or *hostilities*.)

"When the succors of the poor protestants in Ireland were diverted, I was interested to give them some respite, by a *cession*."—*King Charles*.

\* Crabb thus distinguishes between *cession*, *stop*, *rest*, and *intermission*: "To *cess* respects the course of things; whatever does not go on has *ceased*; things *cease* of themselves; *stop* respects some external action or influence; nothing *stops* but what is supposed to be *stopped* or hindered by another; *rest* is a species of *cession* that regards labour or exertion; whatever does not move or exert itself is at *rest*; *intermission* is a species of *cession* only for a time or at certain intervals. That which *ceases* or *stops* is supposed to be at an end; *rest* or *intermission* supposes a renewal. A *cession* of hostilities is at all times desirable; to put a *stop* to evil practices is sometimes the most difficult and dangerous of all undertakings; *rest* after fatigue is indispensable for labour without *intermission* exhausts the frame." (*Crabb*: *Eng. Synon.*)

**cés-sá-vít**, *s.* [Lat. = he has ceased, or omitted; third pers. sing. pret. of *cesso* = to cease.]

*Law*: A writ so called.

"*Cessavit* [is] a writ which [gave the lord power to recover lands] when a man who held lands by rent or other services, neglected or ceased to perform his services for two years together, or where a house had lands given to it on condition of performing some certain spiritual services . . . and neglected it."—*Wharton*: *Law Lexicon*.

\* **cessé**, *v.t. & i.* [CESS (2), *v.*, CEASE.]

"For natural affection some doth *cessé*." *Spenser*: *F. Q.*, IV. ix. 2.

**cés-sér** (1), *s.* [CESS (2), *v.*]

*Law*: A neglect to perform the services or payment for two years, under which lands are held. [CESSAVIT.]

\* **cés-sér** (2), *s.* [CESS (1), *v.*] One who assesses; an assessor.

\* **cés-sí-bíl-ý-tý**, *s.* [Eng. *cessible*; -ity.]

The quality of yielding or giving way.

"If the subject stricken be of a proportionate *cessibility*, it seems to dull and deaden the stroke . . ."—*Digby*: *On the Soul*.

\* **cés-sí-ble**, *a.* [Fr. *cessible*, from Lat. *cesso*, app. of *cedo* = to yield, to give way.] Of a yielding quality; giving way. (*Digby*.)

\* **cés-síng**, \* **cess-íng**, \* **cess-ýng**, \* **cess-ýng**, *s.* [CEASING.] Ceasing, cessation.

**cés-sí-ó bō-nór-úm**, *s.* [Lat. *cessio* = a yielding or giving up; *bonorum* = of goods; gen. neut. pl. of *bonus* = good.]

*Law*: A voluntary surrender by a debtor of all his property for the benefit of his creditors.

**cés-sion**, *s.* [Fr. *cession*; from Lat. *cessio* = a yielding, a giving up; from *cessum*, sup. of *cedo* = to yield, to give up.]

I. *Ordinary Language*:

1. The act of yielding or giving way to force or pressure.

"Sound is not produced without some resistance, either in the air or the body percussed; for if there be a mere yielding, or *cession*, it produceth no sound."—*Bacon*: *Natural History*.

2. The act of surrendering or giving up property or territory.

"... a *cession* of Flanders to that crown, in exchange for other provinces."—*Temple*.

3. The act of retiring from or abandoning.

"The *cession* of her claims on the earldom of Angus . . ."—*Froude*: *History of England*, vol. II., ch. 4.

cēs-tī-dō, s. pl. [Mod. Lat. cestum] (q.v.), Lat. fem. pl. adj. suff. -idō.

Zool.: A family of Ctenophora (q.v.) with a single genus, Cestum (q.v.).

cēs-tōid, a. & s. [Gr. kestrós (kestos) = a girdle; eidos (eidos) = appearance, shape.]

A. As adjective: 1. Pertaining to the Cestoidea. 2. Noting the adult condition of a tenia.

B. As substantive: Zool.: An intestinal worm, belonging to the order Cestoidea.

†cēs-tōi-dē-a, s. pl. [Gr. kestrós (kestos) = a girdle; eidos (eidos) = appearance, shape.]

Zool.: An order of intestinal worms, long and slender, flattened like a piece of tape, and having the anterior end of the body armed with spines, hooks, or suckers for adhering to their host. Typically, these animals consist of a number of segments, which are, however, only reproductive parts, budded off from the head, and containing male and female elements. [TAPEWORM.]

\*cēs-tōn, s. [Lat. cestus.] A girdle. "My ceston or my fra, or both?"—Pals: Arraign. of Paris, III. 2.

cēs-trā-cē-ō, s. pl. [Lat. cestrum] (q.v.), fem. pl. suff. -acō.

Bot.: An order of plants, natives of the West Indies. The species are shrubs. They are now generally merged in Solanaceae. [CESTRINEAE.]

cēs-trā-cī-ōn, s. [A dim. from Gr. késtron (kestron) = a dart.]

Ichthy.: A genus of cartilaginous fishes, the typical one of the family Cestraciontidae

(q.v.). Only known recent species Cestracion Philippi (the Port Jackson shark), having two dorsal fins, each furnished with a sharp spine in front; the ventral fin between the two dorsals; caudal fin unequally forked.

cēs-trā-cī-ōnt, a. & s. [CESTRACIONTIDAE.] A. As adj.: Belonging to or connected with the Cestraciontidae.

B. As subst.: A shark of the family Cestraciontidae.

cēs-trā-cī-ōn-tī-dō, s. pl. [From Mod. Lat. cestracion, and fem. pl. adj. suff. -idō.]

Ichthy.: In Prof. Owen's classification a family of the Plagiostomi, the only one ranked under the sub-order, tribe, or group Cestrachori (q.v.).

"The cestraciontids are generally called Port Jackson sharks."—Prof. Owen: Paleontology.

cēs-trāph-ōr-i, s. pl. [From Gr. késtron (kestron) = a tool or weapon, pickaxe, or poiseax; phōrōs (phōros) = to bear.]

1. Ichthy.: A group, tribe, or section of fishes, order Elasmobranchii, sub-order Plagiostomi. They have a strong spine in front of each dorsal fin, and obtuse back teeth. Only recent genus, Cestracion (q.v.).

2. Paleont.: The fin-spines called Ichthyodorulites belong mainly to this group. They are found chiefly in the Palaeozoic rocks.

cēs-trīn-ē-ō, s. pl. [From Mod. Lat. cestrum] (q.v.), and Lat. fem. pl. adj. suff. -ineō.

Bot.: A tribe of plants, of the order Solanaceae, in which the limb of the corolla is plicate, valvate, or imbricate in ætivation; calyx, five-toothed; corolla, funnel-shaped, five-lobed, and regular; stamens, five; anthers, dehiscing lengthways; ovary on a cupulate disk; pericarp, capsular or baccate. (Craig.)

cēs-trūm, s. [Gr. késtron (kestron) = betony.]

Bot.: A genus of plants, Bastard Jasmine, the typical one of the order Cestraceae. Cestrum Hedindia, auriculatum, laurifolium and Pseudoquina are bitter febrifuges. Many species of Cestrum, and notably C. evanides laevigatum, corymbosum, Parqui, and bracteatum are diuretic. They are also emollient, and are applied in a fresh state to wounds and ulcers to cleanse them, while finally the bruised leaves and unripe fruits are used by the people of Brazil in liver-complaints and in Catarrhus vesicæ. C. macrophyllum and nocturnum are used to poison wild beasts.

cēs-tui, cēs-tuy (pron. cēs-t-wē), pron. [The obj. case of Norm. Fr. cest, cest = Mod. Fr. ce = this one.] For definition see etymol.

cestul que trust, s. Law: One in whose trust, or for whose use or benefit another man is enfeoffed or seized of lands or tenements.

cē-tā-cē-a, s. [Lat. cete, cetus; nent. pl. suff. -acō; Gr. κῆτος (kētos) = a whale.]

1. Zool.: An order of mammiferous animals, which have no hind limbs. They have the form of fishes, with the exception of the horizontal tail, an instrument useful in enabling them to rise speedily to the surface of the water for respiration, which they are obliged to do frequently, as they breathe with lungs. Their blood is warm; they are viviparous, and suckle their young. They were formerly divided into the Cetacea herbivora and C. ordinaris, the first comprising the manatees or lamantins, the haliboes or dugongs, and the extinct Rhytims; the latter the whales, dolphins, narwhals, porpoises, and cachelots; or the order may be divided into the Sirenia and Cetacea, the latter with the following families:—(1) Baleenidae (Whalebone Whales), (2) Delphinidae (Dolphins and Porpoises), (3) Catodontidae (Sperm Whales), (4) Rhynchoceti (Xiphioid Whales), and (5) Zeuglodon-tidae (all fossil).

2. Paleont.: The Cetacea appear to begin in the Eocene, from which they extend onwards till now.

"The Cetacea, in fact, have so much the external form of fishes, that ordinary observers would hesitate to consider them as such."—Swainson: Nat. Hist. Quadrupeds, § 186.

cē-tā-cē-an, a. & s. [Lat. cetaceus = pertaining to a whale; cete, cetus = a whale.]

A. As adj.: Of or pertaining to the Cetacea, cetaceous.

B. As substantive: Zool.: An animal belonging to the Cetacea. "The dugong, a phytophagous cetacean."—Sir J. E. Tennent: Ceylon, lx. 7.

\*cē-tā-cē-ōus, a. [Lat. cetaceus = pertaining to a whale; cete, cetus = a whale.] Of or pertaining to the Cetacea; of the whale kind.

"Such fishes as have lungs or respiration are not without the weapon, as whales and cetaceous animals."—Brown: Vulgar Errors.

cē-tā-cē-ūm, s. [Neut. sing. of Lat. cetaceus = of or pertaining to a whale; cete, cetus = a whale.]

Pharm.: An oily, concrete, crystalline, and semi-transparent matter, obtained from the cavity of the cranium of several species of whales, but especially of the spermaceti whale, Physeter macrocephalus.

cē-tē (1), s. [Lat., from Gr. κῆτος (kētos) = a whale.]

Zoology: 1. The whale (q.v.). "This cete thanne hise chaneles luketh."—Bestiary in Old Eng. Miscell. (ed. Morris), 512.

2. In some classifications one of two sub-orders of Cetacea, the other being the Sirenia.

\*cē-te (2), s. [CITY.]

cē-tēne, s. [Lat. cet(e), cet(us) = a whale, and Eng. suff. -ene (Chem.).]

Chem.: C<sub>12</sub>H<sub>22</sub>. An olefine hydrocarbon, boiling at 275°. It is a colourless liquid obtained by distilling ethal repeatedly with glacial phosphoric acid. It is soluble in alcohol and ether, but not in water.

cē-tē-ō-sāu-rūs, s. [CETIOSAURUS.]

cēt-ōr-ōch, s. [Fr. cétoras; Ital. cetracos; a name probably of Arabic origin. (Mahn.).]

Bot.: A genus of polyodiaceous ferns of

CETERACH. 1. Portion of fertile frond, showing acaly bark. 2. Ditto, with scales removed.

the group Aspleniceæ, distinguished by having distinct simple sort, reticulated veins of which

bēll, bōy; pōut, jōwl; cat, cell, chorus, çin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -clan, -tlan = shān. -tion, -sion = shūn; -tion, -gion = zhūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bēl, dēl.

the marginal veinlets are free, and fronds clothed thickly with scales. One species is a commonish native fern, called Miltwaste of Scale-fern. To this plant was formerly attributed a marvellous influence over the spleen, and Vitruvius states that it had the effect of destroying that organ in certain Cretan swine which fed upon it. It is said to be employed usefully as a bait for rock-cod fishing on the coast of Wales. (Treas. of Botany.)

"Cetaceæ growth upon old stone walls and rocks, in dark and shadowy places throughout the west part of England; especially upon the stone walls by Bristol, as you go to St. Vincent's Rock, and likewise about Bath, Wells, and Salisbury, where I have seen great plenty thereof. . . Spleen-wort, or Miltwaste, is called in Greek ἀσπληγιών, in Latin likewise Asplenium, and also Scolopendria; of Oalga Mula herbs, in shops Cetaceæ. . . In English, Spleenwort, Miltwaste, Scaleferne, and Stoneterne."—Gerardus: Herbal, p. 114 (ed. 1635).

\***sete-wale, \*sete-wale, \*sede-wale, \*sed-wale, \*set-uale, s.** [O. Fr. *citoual*, *chtoual*.] [SETWALL.]

Bot.: The herb Valerian.

"Cetaceæ, herba. Zedorium."—Prompt. Parv.

"Ther springen herbes greet and smaale, The leccrys and the cetaceus."—Chaucer: C. T., l. 1512.

\***ge-the-grande, \*ge-to-grande, s.** [Lat. *cete* = whale; *grande* = great, large.] The whale.

"Cetegrando is a fis, The moete that in water is."—Bestiary in Old Eng. Miscell., l. 409.

**qē-tīc, c.** [Lat. *cete*(e) = a whale, and Eng. suff. -ic.] Of or pertaining to a whale.

**octic-acid, s.**

Chem.: A name given to what was supposed to be a peculiar acid resulting from the saponification of cetin, but which has been found to be only a mixture of margaric acid and cetin.

\***qē-tī-qide, s.** [Formed from Lat. *cete*(e) = whale; *quedo* = to kill, on the analogy of parricide, &c.] A whale-killer. (Southey: Letters, vi. 317.)

**qē-tīn, qē-tīne, s.** [Fr. *cétine*, from Lat. *cete*(e), *cetus*) = a whale, and Eng. suff. -ine (Chem.).]

Chem.: The pure, solid, crystalline mass of spermaceti. It occurs in beautiful silvery scales.

**qē-tī-ō-sau-ri-an, s.** [CETIOSAURUS.] Any individual of the genus Cetiosaurus (q.v.)

**qē-tī-ō-sau-rūs, qē-tē-ō-sau-rūs, s.** [Lat. *cete* = a whale; *saurus* = a saurian.]

Palæont.: A name given by Owen to a genus of fossil Saurians found in the oolitic and cretaceous formations. It belongs to the order Deinosauria. Only one species is known. Its height when standing on all fours must have been ten feet, and its length fifty, sixty, or seventy feet. It was herbivorous.

**qē-tōch-il-ī-dæ, s. pl.** [Mod. Lat. *cetochil*(us), and fem. pl. *idæ*, suff. -idæ.]

Zool.: A family of marine Entomostraca, belonging to the order Copepoda.

**qē-tōch-ī-lūs, s.** [Gr. *κῆτος* (*kētos*) = the whale; *χίλος* (*chilos*) = food.]

Zool.: A genus of marine Entomostraca (Crustacea), the typical one of the family Cetochilidae. It is distinguished by the two small atyliform appendages to the head, the inferior antennæ being two-branched, the branches nearly equal, the unbranched jaw feet, the six-jointed thorax and four-jointed abdomen, and the last pair of legs being forms like the rest. There is only one British species, *Cetochilus septentrionalis*. Its colour is bright-red. It forms part of the food of the whale and several fishes. Length one to ten inches. (Griff. & Henfrey.)

**qē-tō-lōg-ī-cal, a.** [Eng. *cetology*(y); -ical.] Pertaining to cetology.

**qē-tōl-ō-gist, s.** [Eng. *cetology*(y); -ist.] One skilled in cetology.

**qē-tōl-ō-gy, s.** [Fr. *étologie*, from Gr. *κῆτος* (*kētos*) = a whale; *λόγος* (*logos*) = a discourse; *λέγω* (*legō*) = to tell, to speak.] The science or natural history of the animals known as Cetacea. (Orabō.)

**qē-tō-nī-a, s.** [Elym. doubtful.]

Entom.: A genus of Beetles, the typical one

of the family Cetoniidae. *Cetonia aurata*, the Rose-beetle, is a beautiful insect, about three-quarters of an inch long, of a bright-green and sometimes coppery colour. It is found commonly in England in May and June on roses.

**qē-tō-nī-ī-dæ, s. pl.** [Mod. Lat. *cetonia*; and Lat. fem. pl. suff. -idæ.]

Entom.: The Floral Beetles, a family of Coleoptera insects of great variety and beauty. They live and move amongst freee, plants, and flowers, which are their natural food. The antennæ are small, ten-jointed; basal joints short, the three terminal joints comparatively long; thorax triangular; elytra straight, and obtusely rounded at the apex. It is one of the most interesting groups of Coleoptera, and all the species have brilliant colours.

**qē-tōp-sīs, s.** [Gr. *κῆτος* (*kētos*) = a whale; *ὄψ* (*ops*), genit. *ὀψίς* (*opsis*) = a face.]

Ichthy.: A genus of fishes with oblong, round, thick bodies, and short tails; eyes vertical and very minute.

**qē-tōt-ō-lite, s.** [From Gr. *κῆτος* (*kētos*) = any sea monster; *ὄτος* (*otos*), genit. *ὠτός* (*otos*) = ear, and Eng. suff. -ite (Palæont.) (q.v.).]

Palæont.: An ear-bone referred to some cetacean mammal. Specimens are found in the Red Crag, which is of Miocene age.

**qē-trār-ī-a, s.** [Mod. Lat., from Lat. *cetra*, *cetra* = a short Spanish leather shield, from the form and leathery quality of the plant.]

Bot.: A genus of Lichens, tribe Cetrariei. Thallus bright-brown, rigid, erect or ascending, divided into leaflike, with abining cortical layer; apothecia dull or bright-brown; spermatia cylindrical. There are three British species, *Cetraria islandica*, the well-known Iceland-moss [CARAGHEK], *C. Delisei*, and *C. aculeata*. (Griff. & Henfrey.)

**qē-trār-ī-o, a.** [Mod. Lat. *cetrar*(ia), and Eng. suff. -io (Chem.).] Of or belonging to Cetraria or Iceland-moss.

**oetrario-acid, s.** An acid which forms one of the components of Cetrarine (q.v.).

**qē-trār-ī-eī, s. pl.** [Mod. Lat. *cetrori*(a), and Lat. pl. suff. -eī.]

Bot.: A tribe of Lichens, of the family Lichenaceæ, having the thallus compressed, fruticlose, or membranously dilated; apothecia on the margins of the leaflike or lobes. Genera, Cetraria and Platyoma.

**qē-rār-īne, s.** [Mod. Lat. *petrar*(ia), and Eng. suff. -ine (Chem.).]

Chem.: The bitter principle of the *Cetraria islandica*, or Iceland-moss, which is a mixture of cetraric acid, a fatty acid, and an indistinctly crystalline substance, neither acid nor basic, which has not been properly examined.

**qē-ūle, s.** [Lat. *cetus* = a whale; Gr. *ὕλη* (*hulē*) = . . . matter as a principle of being.]

Chem.: A substance obtained in the state of an oxide in spermaceti; its hydrate corresponds to alcohol, and is termed *ethyl*, from the first letters in *ether* and *alcohol*. Cetula consists of thirty-two atoms of carbon, and thirty-three of hydrogen.

**qē-tūs, s.** [Lat. *cetus*, from Gr. *κῆτος* (*kētos*) = a whale.]

1. Zool.: The whale (q.v.).  
2. Astron.: The Whale, a large constellation in the southern hemisphere. It occupies the greatest space of any in the heavens, and contains ninety-seven stars, of which two are of the second magnitude, eight of the third, nine of the fourth, &c.

**qē-ūl, s.** [From Gr. *κῆτος* (*kētos*) = a sea monster, and *ὕλη* (*hulē*) = . . . matter as a principle of being.]

Chem.: Organic radical, C<sub>15</sub>H<sub>33</sub>

**qē-ūyl-īc, a.** [From Eng., &c., *cetyl* (q.v.), and suff. -ic.] Derived from or consisting to a greater or less extent of cetyl.

**cetylic alcohol, s.**  
Chem.: C<sub>16</sub>H<sub>33</sub> (OH) = Sexdecyl Alcohol = Ethal. Obtained from spermaceti, a crystalline fatty substance found in cavities in the head of *Physeter macrocephalus*. This substance consists of cetyl palmitate C<sub>18</sub>H<sub>33</sub>.

C<sub>16</sub>H<sub>31</sub>O<sub>2</sub>, which is converted into potassium palmitate and cetyl alcohol by heating it with solid potash. The cetyl alcohol is dissolved out and crystallised from ether. Cetyl alcohol is a white crystalline substance which melts at 50°. Heated with sodium it forms sodium cetylate, C<sub>16</sub>H<sub>33</sub>NO. Heated with potash-lime it is converted into potassium palmitate.

**qēt-ū-wāl, set-wall, s.** [CETEWALE.] *Valeriana pyrenaica*, or some other species of Valerian. (Brit. & Holland.)

**qē-thō-rhūā-chūs, s.** [Gr. *κεῦθω* (*keuthō*) = to hide; *ρῦχος* (*rhyrchos*) = the snout.]

Entom.: A genus of coleopterous insects of the family Curculionidae. Antennæ eleven-jointed; basal joint as long as the remainder taken together; club ovate; rostrum sometimes long, bent, and filiform, at other times short and straight; thorax attenuated; elytra rounded at extremities, and do not entirely cover the abdomen; extremities of tibiae without spines. The species are very numerous; many are exceedingly small in size. *Ceuthorrhynchus didymus* is abundant on the common stinging-nettle. When touched, these little beetles roll themselves into a ball, contract the legs, and allow themselves to fall to the ground, when they can with difficulty be distinguished from the mould. Hence they are best captured by sweeping.

**qēv-a-dāte, s.** [In Fr. *cevadate*, from *cevadilla* (q.v.).]

Chem.: A term for a combination of cevadic acid and a salifiable base.

**qē-vād-īc, c.** [From *cevadilla* (q.v.), and suff. -ic (Chem.).] Of or belonging to the *Veratrum sabadilla*, or caustic barley.

**cevadīc acid, s.** An acid obtained by the action of potash on the fatty matter of the Cevadilla, or Sabadilla plant.

**qē-vād-īl-lā, sē-bād-īl-lā, s. sa-bād-īl-lā, s.** [From the Spanish-Mexican name *cevadilla* = a little oat; dimin. of *cebada* = oat.]

Bot.: A species of *Veratrum*, the seeds of which have become an article of considerable importance from their containing a considerable quantity of Veratrin (VERATRIN). It is a native of Mexico. The flowers have a smell resembling that of Barberry. The plant is now called *Asagracea officinalis*.

**qēv-a-dīne, s.** [From Sp. Mexican *cebadā* = an oat, and Eng. suff. -ine.]

Chem.: An alkaloid with the formula C<sub>22</sub>H<sub>40</sub>NO<sub>9</sub>, found in *cevadilla*.

\***qē-vīl, s.** [Elym. unknown.]

Chem.: A Paracelsian name for a certain hard substance in the earth, similar to a calculus in man, indurated from an earthy tartar by the spirit of wine, which is in the liquor of the earth; it is stated to be an appropriate remedy against the formation of stone or gravel in man.

**Qēy-lōn, s. & a.** [A corruption of Singhalese *Sinhala*, in the word *Sinhala-dwipa* = the island of lions, from Sansc. *śingh* = a lion, the same word which occurs in *Singapore* = the city of lions, and as a title of Sikha and Rajpoots, as Goolab Singh = Goolab the Lion, or the Lion-like Goolab.]

**Ceylon-moss, s.**  
Bot.: *Floccaria candida*, an algal; called also *Jaffna moss*.

**Qēy-lōn-qōe', a. & s.** [From Eng., &c. *Ceylon*; and suff. -qōe'.]

**A.** As adj.: Pertaining to Ceylon.

**B.** As subst.: A native of Ceylon. (CINOLESE.)

**qēy-lōn-īte, qēy-lan-īte, s.** [Fr. *ceylanite*, from *Ceylon*, where it occurs.]

Min.: A variety of Spinel (q.v.), from Ceylon; also called *Iron-Magnesia Spinel*. Colour, dark-green, brown to black, mostly opaque or nearly so. Sp. gr., 3.5-8.6.

**qē-ūx, s.** [Gr. *κῆτις* (*kētis*), *κῆξ* (*kēx*) = a seabird, not clearly identified.]

Ornith.: A genus of the Kingfishers of the family Alcedinidæ, with only three toes, two in front, and one behind. There are eleven species from the Oriental region and the Austro-Malayan sub-region.

lāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, there; pine, pīt, sire, sir, marine; gō, pōt, -or, wāt-, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle. Dīl: trý, Sýrian, sē, cē = ē. ey = ā. qu = kw.

c fa ut, s. A note in the scale of music. "Ganutt I am, the ground of all accord, A re, to plead Hortensio's passion. E mi, Bianca, take him for thy lord, O fa ut, that loves with all affection." Shakespeare: Taming of the Shrew, III. 1.

C. G. S. A contraction for Centimetre, Gramme, and Second, the three fundamental units recommended for universal adoption by the Committee of the British Association for the Selection and Nomenclature of Dynamical and Electrical Units.

"We accordingly recommend the general adoption of the Centimetre, the Gramme, and the Second, as the three fundamental units; and until such time as special names shall be appropriated to the units of electrical and magnetic magnitude hence derived, we recommend that they be distinguished from 'absolute' units otherwise derived by the letters C. G. S. prefixed, these being the initial letters of the names of the three fundamental units."—First Report of Comm. of British Assoc. for the Selection and Nomenclature of Dynamical and Electrical Units. (1873.)

chăb'-a-sîe, chăb'-a-sîte, s. [Gr. χαβαζιος (chabazios) = one of a number of precious stones mentioned in the poem περι λιθων (peri lithon) = about stones, ascribed to Orpheus.] Min. A rhombohedral mineral of a white or flesh-red colour; lustre vitreous, transparent, or translucent. Hardness, 4-5; sp. gr., 2.08-2.19. Compos.: Silica, 45.63-52.20; alumina, 17.44-21.87; lime, 4.24-13.80; soda, 0.25-4.07; potassa, 0.17-3.03; water, 17.98-22.29. It is widely distributed.

chăh'-leau (eau as ô), s. [Fr. chabler = to fasten a cable to, to drag.] Mech. A middle-sized rope, used to draw craft up a river; a tow-rope.

chăb'-lis (s silent), s. [From the place where it is made.] A white wine made at Chablis, a town in France.

cha-bouk', cha-buk', s. [Hind. chabuk = a whip.] The long whip used in the East for inflicting corporal punishment. "Concerning Feramorz, and literature, and the chabuk, as connected therewith."—Moore: Lights of the Harom.

cha-bră'-a, s. [Named after Chabrė, a botanist of Geneva.] Bot. A genus of garden plants, order Composite, sub-order Labiatifloræ.

chăce, v. & s. [CHASE.]

chăck (1), chăck, s. [From the sound made by the bird.] A local name for the Wheatear. "The White Ear...here denominated the chack, is a migratory bird, ..."—Barry: Orkney, p. 208.

chăck (2), s. [Etym. doubtful; Jamieson suggests Eng. check, as a stop to hunger.] A snack, a luncheon. (Scotch.) "... hospitable invitation, "to come back and take part of his family-check."—Scott: Rob Roy, ch. xxiv.

chăck, v. i. & t. [A word probably formed from the sound produced by the action.]

I. Intransitive: 1. Horsemanship: To toss up and shake the head suddenly and frequently, as a horse does to avoid the subjection of the bridle.

2. Ord. Lang.: To clack, to make a clinking noise. (Scotch.) "Some's teeth for cold did chack and chatter, Some from psidia were wringing water."—Clarend: Poems, p. 85.

II. Trans.: To cut or bruise any part of the body by a sudden stroke, as when the sash of a window falls on the fingers. (Scotch.)

"chăck'-ar-ăl-jy, s. [Prob. a corruption of Fr. eschequier, Eng. checker (q.v.). A species of cotton cloth imported from India; is in French called chacart.] Apparently some kind of checkered or variegated cloth. "No record Pnysson, Paragon, Or Chackarally, there was none."—Watson: Coll., 1. 23.

"chăcke'-blynd-man, s. [Probably = bnffet, strike the blind man, from the noise of a blow or smack.] Blindman's bnff.

"He will haue us to ecke after the church, as children, at chacke-blynd-man."—Sp. Forbes: Eubulus, p. 37.

chăck-it, partic. adj. [Fr. eschequé.] Chequered. (Scotch.) "His chackit plaid the speck't apuk ontvies."—Turras: Poems, p. 1.

chăck-low'-rîe, s. [Etym. unknown.] Mashed cabbage mixed amongst barley-broth. (Aberd.)

chăc'-ma, s. [From Hottentot l'chackamma, the native name of the animal.]

Zool. A baboon, Cynocephalus porcarius, found in South Africa. It is dark-coloured,

HEAD OF CHACMA.

tending to green. These animals go in large marauding parties to rob gardens.

chăc'-ô, s. [Native name.] An unctuous kind of earth found near La Paz, Bolivia; it is made into little pats, and eaten with chocolate.

cha-cô'ne, cha-cô'cn', s. [Fr. chacons; Ital. ciaccona; Sp. chacoña.] Music. A kind of Spanish dance in triple time, something like a saraband. It was borrowed by the Spaniards from the Moors.

\* chăd (1), s. [SHAD.]

chăd (2), s. [Ger. schadde = a turf, a clod; Flam. kaade = a bank.] Gravel, such small stones as form the bed of rivers. (Scotch.)

\* chăd (3), s. [Probably from St. Chad, the patron saint of Lichfield.] Only in compounds.

\* chad - farthings, s. pl. Farthings formerly paid among the Easter dues for halloving the font for christenings. (Halliwell.)

\* chad-pennies, a. pl. Pennies formerly paid at Lichfield Cathedral on Whitaunday in aid of the repairs. (Brewer.)

chăd-dy', a. [CHAD (2), s.] Gravelly; as, "chaddy ground," that which chiefly consists of gravel. (Scotch.)

\* chad'-lock, s. [CARLOCK.] Bot. A book-name for Sinapis arvensis. Water-chadlock: Nasturtium amphibium. (Gerarde.)

chă-nô-pleu'-ra, s. [Gr. χαινω (chainô) = to open, and πλευρα (pleura) = the sides.] Bot. A genus of West Indian shrubs, of the order Mælostomaceæ.

chă-nôs'-tô-ma, s. [Gr. χαινω (chainô) = to open, to gape, and στόμα (stoma) = the mouth.] Bot. A considerable genus of South African shrubs, belonging to the order Scrophulariaceæ. Leaves dentate, opposite; flowers axillary or racemose, pedicellate; calyx five-parted; corolla deciduous, funnel-shaped; style simple, stigma sub-elevate.

chă-r-a-dô'-di-a, s. [From Gr. χαιρω (chairô) = to rejoice; second element doubtful.] Bot. A genus of endogenous plants, order Amaryllidaceæ. A cold infusion of the leaves of Charradodia chilensis, the Thekel of Chili, is used by the natives as a purgative and diuretic.

chă-rô-phy'l'-lüm, s. [Gr. χαιρω (chairô) = to rejoice, and φύλλον (phullon) = a leaf, from the agreeable smell of the leaves.] Bot. Cicely, or Chervil, a genus of umbelliferous plants of the tribe Scandiacinæ. [CHERVIL.] Chærophyllum temulum, or temulentum, a plant one to three feet high, with purple-spotted stems, reflexed bracteoles and deltoid twice-pinnate hairy leaves, is common in Britain, from Moray and Ross, southward; ascending to 1,200 feet in Yorkshira; rare in Ireland. Other alleged British species are doubtful.

chă-rô-phy'l'-lüm, s. [Gr. χαιρω (chairô) = to rejoice, and φύλλον (phullon) = a leaf, from the agreeable smell of the leaves.] Bot. Cicely, or Chervil, a genus of umbelliferous plants of the tribe Scandiacinæ. [CHERVIL.] Chærophyllum temulum, or temulentum, a plant one to three feet high, with purple-spotted stems, reflexed bracteoles and deltoid twice-pinnate hairy leaves, is common in Britain, from Moray and Ross, southward; ascending to 1,200 feet in Yorkshira; rare in Ireland. Other alleged British species are doubtful.

chă-rô-phy'l'-lüm, s. [Gr. χαιρω (chairô) = to rejoice, and φύλλον (phullon) = a leaf, from the agreeable smell of the leaves.] Bot. Cicely, or Chervil, a genus of umbelliferous plants of the tribe Scandiacinæ. [CHERVIL.] Chærophyllum temulum, or temulentum, a plant one to three feet high, with purple-spotted stems, reflexed bracteoles and deltoid twice-pinnate hairy leaves, is common in Britain, from Moray and Ross, southward; ascending to 1,200 feet in Yorkshira; rare in Ireland. Other alleged British species are doubtful.

chă-rô-phy'l'-lüm, s. [Gr. χαιρω (chairô) = to rejoice, and φύλλον (phullon) = a leaf, from the agreeable smell of the leaves.] Bot. Cicely, or Chervil, a genus of umbelliferous plants of the tribe Scandiacinæ. [CHERVIL.] Chærophyllum temulum, or temulentum, a plant one to three feet high, with purple-spotted stems, reflexed bracteoles and deltoid twice-pinnate hairy leaves, is common in Britain, from Moray and Ross, southward; ascending to 1,200 feet in Yorkshira; rare in Ireland. Other alleged British species are doubtful.

typical one of the family Chætodidæ. It is found from the Silurian to the Permian.

chă-tôt'-î-dæ, s. pl. [From Mod. Lat. chæretes (q.v.), and fem. pl. adj. suff. -idæ.] Palæont.: A family of Tabulate corals, containing species with a compound corallum of closely approximated imperforate corallites without septa. They occur from the Lower Silurian to the Permian period.

chă-tif'-êr-a, chă-tif'-êr-i, s. pl. [Mod. Lat. chata = a bristle, and fero = to bear.] Zool.: A group of Spoon-worms (Gephyrea) having the mouth at the base of the proboscis, two strong ventral bristles, and the vent terminal.

chă-tif'-êr-ôiis, a. [CHÆTIFERA.] 1. Furnished with, or bearing, bristles. 2. Belonging to, or connected with, the Chætifera (q.v.).

chă-tô'-êr-ôs, s. [Gr. χαιρω (chairô) = hair, a bristle, and κέρας (keras) = a horn.] Zool. & Palæont.: A genus of marine and fossil Diatomaceæ, having the frustules concatenate; valves equal, sub-cylindrical, with two processes, one on each side, which are subsequently converted into very long, thin, and interwoven siliceous filaments. (Griff. & Henfrey.)

chă-tô'-dêr'-ma, s. [Mod. Lat. chata = a bristle, and Gr. δέρμα (derma) = the skin.] Zoology:

1. A primitive or degraded genus of Gastro-poda Isopleura, with a single species, C. nitidulum, from about 100 fathoms in the North Sea. It is a small, worm-shaped animal, and the shell is replaced by numerous minute calcareous spines in the surface of the skin. They were formerly thought to be Spoon-worms.

2. (Used as a pl.) The same as Chæto-dermata. (Jankester.)

chă-tô'-dêr'-ma-ta, s. pl. [CHÆTODERMA.] Zool.: An order of Gastro-poda Isopleura, consisting of the single genus Chætoderma.

chă-tô'-dêr'-ma-toûs, a. [Mod. Lat. chætodermat(a); Eng. suff. -ous.] 1. Bearing spines in the integument. 2. Belonging to or characteristic of the Chætodermata.

chă-tô'-dis'-ôûs, s. [Gr. χαιρω (chairô) = a hair, a bristle, and δίσκος (diskos) = a disk.] Zool.: A genus of Diatomaceæ, having the frustules disk-shaped; valves circular or oval, with radiating dots and a submarginal circle of obtuse processes unconnected by means of special radiating lines of dots with the centre.

chă-tô'-dôn, s. [Gr. χαιρω (chairô) = a bristle; οδούς (odous), genit. δόντος (odontos) = a tooth.] Ichthy.: A genus of fishes, the typical one of the old family Chætodontidæ. The body is oval; the mouth more or less pointed; no spine on the pre-operculum, or prickles before the dorsal fin, which is single. There are about 70 species from the tropical parts of the Atlantic and Indo-Pacific, nearly all characterised by brilliant coloration.

chă-tô'-dôn't, a. & s. [CHÆTODONTIDÆ.] A. As adj.: Belonging to or characteristic of the family Chætodontidæ. B. As subst.: Any fish of the family Chætodontidæ.

chă-tô'-dôn'-tî-dæ, s. pl. [Mod. Lat. chætodont, gen. chætodont(is); Lat. fem. pl. adj. suff. -idæ.] Ichthyology:

1. A family of Acanthopterygian fishes from tropical seas. The body is compressed and elevated, and covered with finely ctenoid or smooth scales. The mouth, which is in front of the snout, is generally small. Dorsal consisting of nearly equal spinous and soft parts, and the dorsal and anal fins are so thickly covered with scales that it is almost impossible to tell where the fins begin, and the body ends. Teeth villiform or setiform in bands, no canines or incisors. In this sense it is equal to Squamipinnes.

2. Later ichthyologists who use the term restrict it to Chætodon and its near allies.

**chæ-tô-gäs-tra**, s. [Gr. χαιτή (*chaitê*) = a bristle, a hair, and γαστήρ (*gastêr*) = a belly.]  
*Bot.*: A genus of plants, natives of tropical America, belonging to the order Melastomaceæ. It derives its name from the tube of the calyx being bristly.

**chæ-tô-glê-na**, s. [Gr. χαιτή (*chaitê*) = a hair, a bristle, and γλήνη (*glênê*) = the pupil of an eye.]  
*Zool.*: A genus of Infusoria, of the family Peridina. Carapace hispid, or studded with rigid spines; no traverse furrow; an eye-spot present; organ of motion a flagelliform filament. (*Griff. & Henfrey.*)

**chæ-tôg-na-tha**, s. pl. [From Gr. χαιτή (*chaitê*) = long, loose, flowing hair, and γνάθος (*gnathos*) = the jaw, the mouth.]  
*Zool.*: A class of small marine worms with but two genera, Sagitta and Spadella, both of which have British representatives.

**chæ-tôg-na-thouâ**, a. [Mod. Lat. *chætognath(a)*; Eng. suff. -ous.] Belonging to or characteristic of the Chætognatha (q.v.).

**chæ-tô-mi-ûm**, s. [Gr. χαιτή (*chaitê*) = a hair, a bristle; etymol. of *miûm* doubtful.]  
*Bot.*: A genus of Perisporiaceæ (Ascomycetous Fungi), having a filamentous mycelium bearing superficial roundish or ovate conceptacles clothed with hairs, finisly opening above and containing clavate asci with paraphyses; sporidia simple, ovate. The asci in this genus are very delicate, and are readily absorbed, so that frequently there is not a trace of them, and the sporidia seem naked. (*Griff. & Henfrey.*)

**chæ-tô-nô-tûs**, s. [Gr. χαιτή (*chaitê*) = a hair, and νότος (*notos*) = the back.]  
*Zool.*: A genus of microscopic animals found in fresh water, amongst aquatic plants. They appear to be allied to the Rotifera, but have neither mastax nor trochal disk. With one or two allied genera, they are now held to constitute a distinct phylum, Gastrotricha.

**chæ-tôph-ôr-a**, s. [Gr. χαιτή (*chaitê*) = a hair; φέρω (*pheros*) = bearing, producing, φέρω (*phêrô*) = to bear, to produce.]  
 1. *Bot.*: A genus of Chætophoridae (Confervoid Algae), characterised like Draparnaldiæ by setigerous branched filaments, but differing from the latter by the filaments being imbedded in a gelatinous matrix. The Chætophoræ are found in fresh water, forming little green protuberances on stones, sticks, &c., usually bright green. The zoospores are formed singly in joints, and bear four cilia. (*Griff. & Henfrey.*) There are about six British species known, all from fresh water.

2. *Zool.* (As a pl.): A sub-class or order of Annelida, comprising those in which progression takes place by means of chitinous setæ, or by setorial disks. Of the former section the Earthworms, Tubeworms, and Sandworms are examples; of the latter, the Leeches. (*Nicholson.*)

**chæ-tô-phôr-î-dæ**, s. pl. [Mod. Lat. *chætophor(a)*, and Lat. fem. pl. suff. -idæ.]  
*Bot.*: A family of Confervoid Algae growing in sea or fresh water, invested with gelatine; either filiform or (a number of filaments being connected together) expanded into gelatinous, branched, definitely or shapeless fronds or masses. Filaments jointed, furnished with bristle-like processes. Fructification consisting of spores and four-ciliated zoospores, formed out of the contents of the articulations. (*Griff. & Henfrey.*)

**chæ-tô-pôd**, a. & s. [CHÆTOPODA.]  
 A. *As adj.*: Belonging to or characteristic of the Chætopoda.  
 B. *As subst.*: Any individual of the Chætopoda (q.v.).

**chæ-tôp-ôd-a**, s. pl. [From Gr. χαιτή (*chaitê*) = long flowing hair, and πούς (*pous*), genit. ποδês (*podês*) = a foot.]  
*Zoology*:  
 1. In Prof. Ray Lankester's classification, one of the three branches of the phylum Appendicula, the other two being Rotifera and Arthropoda.  
 2. An order of Annelidæ, containing those marine worms with dorsal branchiæ and non-setorial. [OLIGOCHÆTA, POLYCHÆTA.]

**chæ-tôp-ô-douâ**, a. [Mod. Lat. *chætopod(a)*; Eng. suff. -ous.] Belonging to or characteristic of the Chætopoda (q.v.).

**chæ-tôpa**, s. [Gr. χαιτή (*chaitê*) = a bristle, a hair, and ὤψ (*ops*) = a face.]  
*Ornith.*: A genus of birds, belonging to the Myotherinæ or Ant-thrushes, so named from the bristly feathers in front of the face.

**chæ-tôp-sis**, s. [Gr. χαιτή (*chaitê*) = a hair; ὤψ (*ops*), genit. ὀψις (*opsis*) = a face.]  
*Bot.*: A genus of Mucedines (Hyphomycetous Fungi) characterised by erect jointed threads, whorled below, above simple and flagelliform, bearing cylindrical spores from the tips of the branchlets. One species only is known, *Chætopsis Wanchit.* (*Griff. & Henfrey.*)

**chæ-tô-pûs**, s. [Gr. χαιτή (*chaitê*) = a bristle, a hair; and πούς (*pous*) = a foot.]  
*Ornith.*: The Francollus, a genus of birds belonging to the Percididæ or Partridges, so named from the tarsus of the male being armed with spurs.

**chæ-tô-spôr-a**, s. [Gr. χαιτή (*chaitê*) = a bristle, a hair, and σπόρά (*spora*) = a sporule.]  
*Bot.*: A genus of Algae, of the order Confervoidæ, so named in reference to the fine capillary divisions of the filaments.

**chæ-tô-s-tôm-a**, s. [Gr. χαιτή (*chaitê*) = a bristle, a hair, and στόμα (*stoma*) = a mouth.]  
*Bot.*: A genus of small, dry, heath-like Brazilian shrubs, belonging to the order Melastomaceæ. Stems leafless at base; flowers solitary, rather small, purple with yellow anthers.

**chæ-tür-a**, s. [Gr. χαιτή (*chaitê*) = a bristle; and οὐρα (*oura*) = a tail.]  
*Ornith.*: The Francollus, a genus of birds of the family Cypselidæ (Swifts), so named from the shafts of the tail-feathers being prolonged into acute points.

**chæ-tür-rî-næ**, s. pl. [Mod. Lat. *chætur(a)*; Lat. fem. pl. adj. suff. -inæ.]

**A. As substantive:**

**I. Ordinary Language:**

1. Literally:

(1) A line formed of a series of metal links connected with or fitted into each other, and used for various purposes, as of restraint, support, connection, transmission of mechanical power, &c.

"*Chayna*. *Cathena*, *bota*."—*Prompt. Parv.*

(2) A series of links of gold or silver, worn as an ornament.

"And Pharaoh took of his ring, and put it upon Joseph's hand, and put a gold chain about his neck."—*Genesis*, xii. 42.

(3) (Pl.) Fetters, bonds, manacles.

"Petre was sleeping bitwix tway knyghtis, boundene with tway chaynes"—*Wycliffe*; *Deeds*, xii. 4.

2. Figuratively:

(1) Anything which confines, fetters, or binds.

"Rivet the chains of habit."—*Lamb*; *Ella*.

(2) A state of subjection or moral captivity.

"A Briton's scorn of arbitrary chains."—*Cowper*; *Table Talk*.

(3) A series of material things connected with and following each other in succession.

"The chain of fortifications which Dioctletian and his colleagues had extended along the banks of the great rivers, . . ."—*Gibbon*: *Decline and Fall*, li. 45.

"From the chain of Taurus to the shores of the Euxine."—*Arnold*; *Hist. Rome*, ch. 35.

(4) A connected series or line of immaterial things, as of events, causes, thoughts, or arguments.

"Here no chain of succession could be pleaded."—*Failler*: *Church History*, bk. lii.

**II. Technically:**

1. **Surveying:** A line formed of a series of iron links, used in measuring land. That now used is known as Gunter's chain, from the name of the inventor. It is 66 feet long, and divided into 100 links, each link being equal to 7/92 inches. Ten square chains are equal to one acre.

2. **Sporting:** The trail of an otter.

3. **Naut. (chains, properly chain-wales, or channels):** Broad and thick planks projecting horizontally from the ship's outside, to which they are fayed and bolted, abreast of and somewhat behind the masts. They are formed to project the chain-plate, and give the lower rigging greater outrig or spread, free from the topsides of the ship, thus affording greater security and support to the masts, as well as to prevent the shrouds from damaging the gunwale, or being hurt by rubbing against it. Of course they are respectively designated fore, main, and mizzen. They are now discontinued in many ships, the eyes being secured to the timber-heads, and frequently within the gunwale to the stringers or lower shelf-pieces above the water-way. In the chains applies to the leadman, who stands on the channels between two shrouds to heave the hand-lead.

" . . . to send it into the main chains, to the man who had thrw on the stern-fast."—*Murray*; *Midship. Easy*.

4. **Weaving:** The warp threads of a web. It is called also *fitting* or *hoist*, and in the case of silk it is denominated *organzine*.

† Crabb thus distinguishes between a *chain*, a *fetter*, a *band*, and a *shackle*:—"All these terms designate the instrument by which animals or men are confined. *Chain* is general and indefinite; all the rest are *chains*; but there are many *chains* which do not come under the other names, a *chain* is indefinite as to its make; it is made generally of iron rings, but of different sizes and shapes; *fettors* are larger, they consist of many stout *chains*; *bands* are in general any thing which confines the body or the limbs; they may be either *chains* or even cords; *shackle* is that species of *chain* which goes on the legs to

confine them; malefactors of the worst order have *fettors* on different parts of their bodies, and *shackles* on their legs. These terms may all be used figuratively. The substantive *chain* is applied to whatever hangs together like a *chain*, as a *chain* of events; but the verb to *chain* signifies to confine as with a *chain*: thus the mind is *chained* to rules, according to the opinions of the free-thinkers, when men adhere strictly to rule and order; and to represent the slavery of conforming to the establishment, they tell us we are *fettered* by systems. *Band* in the figurative sense is applied, particularly in poetry, to every thing which is supposed to serve the purpose of a *band*; thus love is said to have its silken *bands*. *Shackle*, whether as a substantive or a verb, retains the idea of controlling the movements of the person, not in his body only, but also in his mind and in his moral conduct; thus a man who commences life with a borrowed capital is *shackled* in his commercial concerns by the interest he has to pay, and the obligations he has to discharge."—(*Crabb*: *Eng. Synon.*)

† **Chain of locks:**

**Hydraulic Engineering:** A succession of lock-chambers, the lower pair of gates of each of which (except the lowest) forms the upper pair of gates for the chamber below. [CANAL-LOCK.]

**B. As adj.:** (See the compounds).

**chain-belt, s.**

1. A chain forming a band or belt for the conveyance of power.

2. A chain covered with piping or overlaid with strips to form a round belt.

**chain-boat, s.** A boat used in harbours for recovering chain-cables and anchors.

**chain-bolt, s.**

1. **Naut.:** A large bolt to secure the chains of the dead-eyes through the toe-link, for the purpose of securing the masts by the shrouds. Also the bolts which fasten channel-plates to the ship's side.

2. **Carp.:** A bolt having an attached chain by which it may be drawn back, falling by its own gravity or pushed into place by a spring.

**chain-bond, s.** The tying together of parts of a wall by a chain or iron bar built in.

**chain-bridge, s.**

1. A form of ferry-bridge in which the passage is made by chains laid across the river and anchored on each side, and moving over chain-wheels on board, driven by engines. Such a ferry-bridge used to cross the Itchen, in Hampshire. [FERRY-BRIDGE.]

2. An early form of the suspension-bridge in which catenary chains supported the floor. The first was erected over the Tees, in 1741. Rods with eyes and connecting-links were used by Telford on the Menai Suspension Bridge, 1829; steel wires laid up into cables are now used. [SUSPENSION-BRIDGE.]

\* **chain-bullets, s. pl.** [CHAIN-SHOT.]

"My friend and I  
Like two chain-bullets, side by side, will fly  
Thorow the jaws of death."  
*Heywood*: *Challenge for Beautie*, 1636.

**chain-cable, s.**

**Naut.:** A cable made of iron links. They are not new; Caesar found them on the shores of the British Channel. Smyth, in his *Sailor's Word-Book*, says that in 1818 he saw upwards of eighty sail of vessels with them at Desenzano, on the Lago di Garda. They have all but superseded hemp cables in recent times; they are divided into parts fifteen fathoms in length, which are connected by shackles, any one of which may be slipped in emergency; at each 7½ fathoms a swivel used to be inserted, but in many cases they are now dispensed with. Chain-cables were made in England by machinery in 1792, and introduced into the British merchant-service by Captain Brown of the "Penelope," West India merchantman, 400 tons burden, 1811. The cable had twisted links. Chain-cables are generally made in lengths of from 12½ to 25 fathoms; each length is usually provided with a swivel. The lengths are joined together by shackles (q.v.). A cable's-length is 100 fathoms of 6'08 feet each, and is one-tenth of a nautical mile. Chain-cables are stowed in chain-lockers, generally near the mainmast, or just before the engine and boiler compartment. The locker-space required may be

found by the following rule: Multiply the square of the diameter of the cable-iron in inches by 85. The product is the space required in cubic feet, nearly. Four kinds of apparatus are used for regulating or checking the motion of the cable as it runs towards the hawse-holes, and for holding on by the cable after the anchor has taken hold. These are Controllers, Bitts, Stoppers, Compressors (q.v.).

**Chain-cable compressor:** A curved arm of iron which revolves on a bolt through an eye at one end. At the other is a larger eye in which a tackle is hooked; it is used to bind the cable against the pipe through which it is passing and check it from running out too quickly.

**Chain-cable controller:** A contrivance for the prevention of one part of the chain riding on another while heaving in.

**Chain-cable shackles:** Used for coupling the parts of a chain-cable at various lengths, so that they may be disconnected when circumstance demands it.

**chain-coral, s.** An elegant European species of fossil, *Catenipora eecharoides*.

**chain-coupling, s.**

**Railroad Engineering:**

1. A supplementary coupling between cars, as a safety-device in case of accidental uncoupling of the prime connector.

2. A shackle for a chain whereby lengths are united as in a chain-cable, or a shackle or device to unite a chain with an object.

**chain-fastening, s.** A sailor's bend, or cable mooring.

**chain-gang, s.** A gang or number of persons chained together, in order to prevent the escape of any one.

**chain-gear, s.** A form of cog-gearing in which an open linked chain catches up the cogs or sprockets of the wheel, and is the means of motion thereof, or conversely. [CHAIN-WHEEL.]

**chain-guard, s.**

**Hor.:** A mechanism in watches provided with a fusee, to prevent the watch being overwound.

**chain-hook, s.**

**Nautical:**

1. An iron rod with a handling eye at one end and a hook at the other for handling the chain-cable.

2. A cable-stopper which clamps the link of a chain between two other links.

**chain-inclinometer, s.** A form of level in which the inclination of the surveyor's chain is indicated on a scale by the pointer on the end of the level.

**chain-knot, s.**

1. A succession of loops on a cord, each loop in succession locking the one above it, and the last one locked by passing through it the end of the cord.

2. A kind of knot used in splicing. [KNOT.]

3. The loop-stitch of some sewing-machines [STITCH.]

**chain-lifter, s.**

**Naut.:** A cast-iron grooved rim, with projections, situated at the foot of the capstan-barrel, and forming the drum around which the chain-cable is wound in weighing anchor.

**chain-locker, s.** The same as *chain-well* (q.v.).

**Chain-locker**

**type:**

**Naut.:** The

iron-bound opening

or section

of pipe passing

through the deck,

and through

which the chain-

cable passes to

or from the

locker in which

it is stowed.

**chain-mail,**

s. A kind of armour made of interlaced rings or links.

CHAIN-MAIL

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hōr, thēre; pīne, pīt, sīre, sir, marine; gō, pōt, er, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = é; ey = ā. qu = kw.

**chain-moulding, s.**

*Archit.*: A kind of moulding used in the Roman style, made in imitation of a chain.

CHAIN-MOULDING.

**chain-pier, s.** A pier which runs out into the sea and is supported by chains like a suspension-bridge.

**chain-pin, s.**

*Surveying*: The wire pin, having a loop at one end and pointed at the other, employed by surveyors for marking the termination of each chain in measuring distances.

**chain-pipe, s.** An aperture through which a chain-cable passes from the chain-well to the deck above.

**chain-plates, s. pl.** Plates of iron with their lower ends bolted to the ship's sides under the channels, and to these plates the dead-eyes are fastened; other plates cap over and secure them below. Formerly, and still in great ships, the dead-eyes were linked to chain-pieces, and from their being occasionally made in one, they have obtained this appellation.

**chain-pore, s. & a.** (See the compound.) *Chain-pore coral*: The book-name for the zoological genus *Catenipora*.

**chain-pulley, s.** A pulley having pockets or depressions in its periphery, in which lie the links, or alternate links, of a chain which passes over it and gives motion thereto, or conversely.

**chain-pump, s.** One form consists of an endless chain passing around a wheel above and descending into the water below. In its upward course it passes through a vertical tube whose lower end is submerged, and at whose upper end the water is discharged. Along the chain are round disks or buttons, which fit in the bore of the tube, and form pistons which elevate the water as the chain ascends in the tube. The cellular pumps are of this kind, and when packed pistons are used, they are termed *water-raiser pumps*, from the resemblance of the chain and buttons to the rosary.

**chain-rule, s.**

*Arith.*: A theorem for solving numerical problems by composition of ratios or compound proportion.

**chain-saw, s.**

1. *Surg.*: A saw whose teeth are jointed links, used in making sections in deep-seated places by passing the saw around the bone and then back again, so as to give command of both ends to the operator, who draws the ends back and forth.

2. One form of hand-saw or scroll-saw is also made of separate teeth pivoted or hooked together.

**Chain-saw carrier:**

*Surgery*: A hinged and hooked instrument whereby the end of the chain-saw, or a ligature, by which the saw may be drawn, is passed beneath a deep-seated bone, and so far up on the other side as to be grasped by a forceps.

CHAIN-SHOT.

**chain-shot, s.**

Two balls connected either by a bar or chain, formerly used for cutting and destroying the spars and rigging of an enemy's ship. Invented by Admiral De Witt in 1666. (*Knight*.)

"In sea fights oftentimes, a battock, the brawn of the thigh, or the calf of the leg, is torn off by the chain-shot, and splinters."—*Wiseman's Surgery*.

**chain-slings, s. pl.** Chains attached to the sling-hoop and mast-head, by which a lower yard is hung. Used for boat or any other slings dangled.

**chain-stitch, s.**

1. An ornamental stitch resembling a chain.  
2. (In sewing-machines): A loop-stitch, in contradistinction to a lock-stitch. It consists in looping the upper thread into itself, on the under side of the goods; or using a second thread to engage the loop of the upper thread.

**chain-stopper, s.** A stopper for a chain-cable (q.v.).

**chain-timber, s.**

1. A timber of large dimensions placed in the middle of the height of a story, for imparting strength.  
2. A bond timber in a wall.

**chain-top, s.** A chain to sling the lower yards in time of battle, to prevent them from falling down when the ropes by which they are hung are shot away.

**chain-towing, s.** A method of towing ferry or canal boats, in America, by means of a chain which is laid in the bottom of the watercourse, but with one end on the deck of the boat, where it is wound round a windlass as the boat advances. It was first introduced by Marshal Saxe in 1732, in France, for transporting war material. The steam ferry between Portsmouth and Gosport is worked by towing chains.

**chain-wales, s.**

*Shipbuilding*: One of the wales or thick planks bolted to the ship's sides and serving for the attachment of the chains to which the shrouds are connected. [*CHANNEL*]

**chain-well, s.** A receptacle below deck for containing the chain-cable, which is passed thither through the deck-pipe. It is also called a *CHAIN-LOCKER*.

**chain-wheel, s.** A wheel fitted with sprockets adapted to receive the links of the chain successively. The power may be communicated by the wheel to the chain, or conversely.

**chain-work, s.**

1. *Ordinary Language*:  
(1) Work with open spaces like the links of a chain.  
(2) Applied to articles of manufacture in which cordage or thread is linked together in manner of a chain.

"Nets of chequerwork, and wreaths of chainwork, for the chapters which were upon the tops of the pillars."—*1 Kings*, vii. 17.

(2) Applied to articles of manufacture in which cordage or thread is linked together in manner of a chain.

2. *Technically*:  
(1) *Hosiery*: (See extract).

"This texture [stocking-knitting] is totally different from the rectangular decussation which constitutes cloth. . . for in this . . . the whole piece is composed of a single thread united and looped together in a peculiar manner, which is called stocking-stitch, and sometimes chainwork."—*Ure's Dictionary of Arts, Manufactures, and Mines*.

(2) *Naut.*: Chains laid over the sides of vessels, in order to deaden the effects of shot or shell.

**chāin, \* chaeynyn, v.t.** [*CHAIN, s.*]

I. *Literally*:

1. To fasten, bind, or connect with a chain.

"These hands are chain'd, but let me die  
At least with an unshackled eye."  
*Byron: Parisina*, 17.

2. To guard with a chain.

"The admiral seeing the mouth of the haven chain'd, and the castles full of ordnance, and strongly manœuvr'd, durst not attempt to enter."—*Knotles: Hist. of the Turks*.

II. *Figuratively*:

1. To unite closely and strongly, to attach.

"O Warwick, I do bend my knee with thine,  
And to this vow do chain my soul to thine."  
*Shakespeare: 8 Hen. VI., ii. 4*

2. To put or keep in subjection, to enslave.

"This world, 'tis true,  
Was made for Cæsar, but for Titus too;  
And which more blest? who chain'd his country, say,  
Or he whose virtue sought to lose a day?"  
*Pope: Essay on Man*, iv. 185-8.

**chāined, \* chayned, pa. par. or a.** [*CHAIN, v.*]

A. *As pa. par.*: (See the verb).

B. *As adj.*: Furnished or provided with a chain or collar.

"Chayned, Torquatus."—*Hulstet*.

**chāin'-ing, \* qhāyn'-ing, pr. par., a., & a.** [*CHAIN, v.*]

A. & B. *As pr. par. & partic. adj.*: (In senses corresponding to those of the verb).

C. *As substantive*:

1. *Ord. Lang.*: The act of fastening with a chain (*lit. & fig.*).

"The chayning and teltage of the grate bound Carberna."—*Trevia*, ii. 550.

2. *Sewing & Weaving*: A system of loopings on a single thread by which stocking-webs is formed.

"The rib-needles intersecting the plain ones, merely lay hold of the last thread, and, by again bringing it through that which was on the rib-needle before, give it an additional looping, which reverses the line of chaining and raises the rib above the plain intervals which have only received a single knitting."—*Ure's Dictionary of Arts, Manufactures, and Mines, Woollery*.

† **chāin'-lōss, a.** [*Eng. chain; -less*] Free from chains, unfettered.

"And, like a breeze in chainless triumph, went  
Up through the blue resounding firmament."  
*Hemans: The Meeting of the Bards*.

† **chāin'-lēt, s.** [*Eng. chain, and dimin. suff. -let*] A little chain.

"What plumes waved the altar round,  
How spurs, and ringing chainlets, sound."  
*Scott: The Lay of the Last Minstrel*, vi. 4

\* **chāip, v.** [*Fr. échapper*] To escape.

\* **chāipes, chā'-pis, s. pl.** [*CHEAP*] Price, rate, established value of goods.

"The chāipes of the country, the ordinary rate the average price . . ."—*Ol. Sibb.*

**chāir, \* chāier, \* chāiere, \* chāyer, \* chāere, \* chāyre, \* chāyere, s. & a.** [*O. Fr. chaire, chaire; Fr. chaire; Port. cadeira; Wel. cadair, from Lat. cathedra = a chair*] [*CATHEDRAL*]

A. *As substantive*:

I. *Ordinary Language*:

1. *Literally*:

(1) A movable seat with a back, intended to accommodate one person.

"Up a chāere he sat adoun."—*Robert of Gloucester*, p. 321.

"If a chair be defined a seat for a single person, with a back belonging to it, then a stool is a seat for a single person without a back."—*Watts: Logic*.

(2) A kind of carriage. Originally a sedan; now a small carriage for a single person, an invalid; a Bath-chair.

"Een kings might quit their state to share  
Contentment and a one-horse chair."  
*T. Wharton: Phaeton and the one-horse Chair*.

2. *Fig. (Chair or chair-day)*: The evening or close of life.

"Bring thy father to his drooping chair."  
*Shakespeare: 1 Henry VI., iv. 2*

II. *Technically*:

1. A vehicle for one person, carried by two men. [*SEDAN-CHAIR*.]

"Gay pats my shoulder, and you vanish quite,  
Streets, Chairs, and Coxcombs rush upon my sight."  
*Pope: Epist. to Mrs. Blount*.

2. The seat of the president of an assembly; a seat of authority or dignity.

" . . . the chair of the House of Commons."—*Macaulay: Hist. Eng.*, ch. v.

† To take the chair: To assume the position of president of a meeting.

"The committee of the Commons appointed Mr. Pym to take the chair."—*Clarendon*.

† To put into the chair: To elect as president of a meeting.

"John Hampden, the most ardent Whig among them, was put into the chair."—*Macaulay: Hist. Eng.*, ch. 21.

3. The position or office of a professor; a professorship.

4. *Engineer.*: An iron block or socket used upon railways to support and secure the rails.

\* 5. A vehicle drawn by one horse.

B. *As adjective*: (See the compounds).

† Obvious compounds: *Chair-back, chair-bottom, chair-maker*.

*Chair-back machines*: These machines may be hand or jig-saws, which cut out the curved back-piece which is placed on the top of the pillars of the chair-back. Moulding or rounding machines for chair-backs have a holder for the stuff, which is moved against a rotary cutter of peculiar shape, the stuff travelling in a prescribed path, so as to receive the conformation desired.

**chair-bed, s.** A bed or chair which folds up or down at will so as to be used either as a bed or chair.

**chair-bolt, s.** A screw-bolt for fastening down rail-chairs to the sleepers.

\***chair-bow**, \***chare-bowe**, *s.* The back of a chair.

"A chare-bowe: fultrum."—*Cathol. Anglicum.*

**chair-maker**, *s.* A maker of chairs.

*Chair-maker's saw*:

1. A diminutive form of the ordinary frame-saw, in which the blade is strained by buckles and wedges. The work is clamped to the bench while sawing.

2. A scroll-saw especially adapted for getting out chair-stuff, such as backs and legs which have curves which cannot be readily bent, or of stuff which cannot be readily bent to shape.

**chair-organ**, *s.*

*Music*: A choir-organ placed in a separate case in front of the great organ and at the back of the performer.

**chair-rack**, *s.*

*Carpent.*: A moulding round a room, on which the chairs rest so as to keep them from the wall.

**chair-seat**, *s.* The seat of a chair.

*Chair-seat boring-machine*: A machine for the automatic and rapid boring of the small vertical holes in a chair-seat frame, to be occupied by the strips of cane or rattan, or the larger holes for the pillars and spindles of the back.

*Chair-seat machine*: Various machines. *Spec.*—A planing one, for rounding out the bottoms of the chairs, or one for cutting grooves in the chair seat.

**chair-spring**, *s.*

*Upholstery*: A spring underneath the hinged seat of a chair, which gives it a certain resilience, and encourages a tilting or rocking motion.

**chair-web**, *s.* A scroll-saw.

**chair**, \***chayre**, *v.t.* [CHAIR, *s.*]

1. To install.

"Chayred or stalled, cathedratus."—*Huloet.*

2. To carry about in a chair in triumph; a compliment frequently paid in former times to a candidate at an election by his supporters and admirers.

"The Conservative cause triumphed in the person of its Etou champion. The day the member was chaired, several men to Coingsby's rooms were talking over their triumph."—*Dinwiddie. Coingsby, bk. v., ch. ii.*

**chaired**, *pa. par. or a.* [CHAIR, *v.*]

**chair-ing**, *pr. par., a., & s.* [CHAIR, *v.*]

**A. & B.** *As pr. par. & particip. adj.*: (See the verb).

**C.** *As subst.*: The act of carrying in a chair.

"As the day fixed for the chairing approached, Danvers became uneasy."—*Theodore Hook: Sayings and Doings of Danvers.*

**chair-man**, *s.* [Eng. *chair*, and *man*.]

1. One who takes the chair at a meeting; the president of an assembly.

"To assemblies generally one person is chosen *chair-man* or moderator, to keep the several speakers to the rules of order."—*Watts.*

2. The president of a company or society.

3. One whose trade it was to carry a sedan-chair, or wheel a Bath-chair.

† The elected chairman or president of the House of Representatives is called the Speaker. [SPEAKER.] When the house resolves itself into committee of the whole the Speaker vacates the chair, which is taken by the Chairman of Committees.

**chair-man-ship**, *s.* [Eng. *chairman*; -*ship*.]

The position or office of a chairman; the time during which any one is chairman.

**chaise**, *s. & a.* [Fr. *chaise* = a seat, a chair; a Parisian pronunciation of *chaire*.] [CHAIR.]

**A.** *As substantive*:

1. *Lit.*: A light two-wheeled carriage, to accommodate two persons, drawn by one horse, and provided with a calash top.

2. *Fig.*: Any vehicle.

"Instead of the chariot he might have said the chaise of government, for a chaise is driven by the person that sits in it."—*Addison.*

**B.** *As adj.*: (See the compounds).

**chaise-cart**, *s.* A light cart, with springs, used for conveying light goods or parcels expeditiously.

**chaise-house**, *s.* A covered place in which to keep a chaise; a coach-house.

**chaise-lounge**, *s.* A kind of sofa open at one end. (*Ogilvie*.)

\***châi-çel**, \***chei-sel**, \***chey-sil**, *s.* [O. Fr. *châiel*; Fr. *châinell*; from Mod. Lat. *camisile*, from *camissa* = a shirt.] Fine linen used in the Middle Ages.

"Filche and chaisel al hilled."—*Seven Sages, 1819.*

\***châis-ti-fie**, *v.t.* [Lat. *castificus* = making chaste or pure; *castus* = chaste, pure; *facio* (pass. *fo*) = to make.] To chastise.

"Heirior to dant their attemptis of Inglismen. I find na thing as expedient as to be content with the pepil that may chaisitife thame maist easy."—*Bellend.: Cron., x. a.*

**chak** (1), *v.i.* [CHECK.] To check.

**chak** (2), *v.i.* [A word formed in imitation of the sound produced by the action.]

1. To gnash, to snatch at an object with the chops, as a dog does. Properly it expresses the sound made, "when he misses his aim." (*Rudd.*) [CHACK.]

2. The sharp sound made by any iron substance, when entering into its socket, as of the latch of a door when it is shut; to click.

† To chak to: To shut with a sharp sound.

**chak**, *s.* [CHECK.] The act of checking, stop.

\***châk-ër**, *s.* [CHEQUER.] A chess-board.

"Ane suld checker with the men of tabillis thairto."—*Aberd. Reg., A. 1641, v. 17.*

\***châk-ll**, *s.* [SHACKLE-BONE.] The wrist.

"Gold bracelets on thair shackles bings,

Their fingers full of costly rings."—*Watson's Coll., ll. 10.*

\***châk-kir**, *s.* [CHEQUER, CHECKER.] The Exchequer. (*Scotch.*)

\***châl-ance**, *s.* [CHALLENGE.] (*Scotch.*)

\***châl-an-drie**, \***chal-an-dre**, \***chal-aun-dre**, *s.* [Fr. *calandre*; Lat. *calandrus* = a lark.] A singing-bird, a lark.

"*Calandre* and *rodwale*."—*Land of Cockayne, 97.*

**chal-âs-tic**, \***chal-âs-tick**, *a. & s.* [Gr. *χαλαστικός* (*chalastikos*) = relaxing; *χάλω* (*chalo*) = to relax.]

**A.** *As adj.*: Having the property or quality of removing stiffness or rigidity of the body.

**B.** *As subst.*: A medicine having the power or quality described under **A.**

**chal-â-za**, **chal-â-ze**, *s.* [Gr. *χάλαζα* (*chalaza*) = (1) hail; (2) a pimple.]

1. *Bot.*: That part of the seed where the nucleus joins the seminal integuments; it represents the base of the nucleus, and is invariably opposite the end of the cotyledons.

2. *Veterinary*: A disorder in wine, in which the flesh becomes full of tubercles.

3. *Physiol.*: The treddle of an egg, or the knotty kind of string at each end, whereby the yolk and white are connected together.

4. *Med.*: The same as *Chalazium* (q.v.).

**cha-lâz-âl**, *a.* [CHALAZA.] Of or pertaining to the chalaza. (*Lindley: Introd. to Bot.*)

**châl-a-zif-ër-ous**, *a.* [Mod. Lat. *chalaza*, and Lat. *fero* = to bear.]

*Biol.*: Noting or pertaining to the layer of albumen surrounding the yolk of an egg, which is called the chalaziferous membrane, and which, when twisted, gives rise to the chalaza. [CHALAZA, 3.]

**cha-lâz-i-ÿm**, *s.* [Gr. *χάλαζα* (*chalaza*) = hail (from the size and shape).]

*Pathol.*: A small tubercle on the eyelid, commonly called a styte.

**châl-bôt**, **cha-bôt**, *s.* [From Fr. *chabot*, dimin. of *cab* or *chab* = a head. (*Litttré*.)]

*Her.*: A name given in blazonry to the fish called Bullhead, or Miller's Thumb.

**châl-cân-ânthos**, *s.* [Gr. *χαλκός* (*chalkos*) = brass; *άνθος* (*anthos*) = a flower, and Eng. suff. -*ite* (*Min.*.)]

*Min.*: A triclinic mineral; colour blue, of different shades, sometimes a little greenish; subtransparent or translucent; hardness, 2.5; sp. gr. 2.213. Compos.: Sulphuric acid, 82.1; oxide of copper, 31.8; water, 36.1. It occurs in mines in Wicklow and elsewhere.

**châl-gê-dôn-ïc**, *a.* [Eng. *chalcodon*(y); -*ic*.] Of or pertaining to chalcodony. (*Brande*.)

**châl-gê-dôn-ÿ**, *s.* [Lat. *chalcodinitus*. From Chalcodon, Gr. *χαλκόνων* (*chalkodôn*); *Χαλκόνων* (*Chalkedôn*), a town in Asia Minor.]

1. *Min.*: A cryptocrystalline variety of quartz, having the lustre nearly of wax, and either transparent or translucent. Colour, white, greyish, pale-brown to dark-brown or black; tendon-colour common; sometimes delicate blue. Also of other shades, and then having other names. It is a true quartz with some disseminated opal-quartz. Composition: Silica, 98.87; sesquioxide of iron, 0.53; carbonate of lime, 0.62. (*Dana*.)

2. *Scrp.*: It is not quite certain that the chalcodony of Rev. xii. 19, is the mineral now designated by that name. The probabilities, however, are in favour of its being so.

"The first foundation was a Jasper; the second, a sapphire; the third, a chalcodony."—*Rev. xxi. 19.*

† Chalcodony of different colours, arranged in stripes or layers, is called *agate*; if its stripes or layers are horizontal it is called *onyx*; *chrysoprase* is green chalcodony, *carneian* a flesh-red, and *sard* a greyish-red variety. (See these words.)

**châl-gê-dôn-ÿx**, *s.* [Eng. *chalcédon*(y), and *onyx*.]

*Min.*: The name applied to those agates in which opaque white chalcodony alternates with the translucent grey variety.

**châl-cî-dêg**, **châl-cîs** (1), *s.* [The first form is properly the pl. (but used as sing.) of the second, which is Latin from Gr. *χαλκίς* (*chalkis*) = a kind of lizard.]

*Zool.*: The type-genus of the Chalcididae.

**châl-cî-dêg** (1), **châl-cî-dêg**, *s. pl.* [Mod. Lat. *chalcid*(es), or *chalc*(is) (1); Lat. fem. pl. adj. suff. -*idæ*.]

*Zool.*: A family of tropical American snake-like lizards, but with minute feet. Some authorities use this name for the Tejidæ (q.v.).

**châl-cî-dêg** (2), *s. pl.* [Mod. Lat. *chalcis* (2), gen. *chalcid*(es); Lat. fem. pl. adj. suff. -*idæ*.]

*Entom.*: A family of parasitic Hymenoptera, of which Chalcis (2) is the type.

**châl-cî-huîtl**, *s.* [Native Mexican name.]

*Min.*: A mineral, identified with jadeite (q.v.), or with turquoise (q.v.).

**châl-cîs** (1), *s.* [CHALCIDES.]

**châl-cîs** (2), *s.* [Gr. *χαλκός* = copper, from the metallic coloration of the adult species.]

*Entom.*: The type-genus of Chalcididae (2). They are minute parasitic insects, undergoing metamorphosis in the bodies of their hosts.

**châl-cî-têg**, *s.* [From Gr. *χαλκίτης* (*chalkitês*) = containing copper, coppery.]

*Ornith.*: A genus of Cuculine, or parasitic Cuckoo. They are adorned with plumage of a brilliant metallic lustre.

**châl-cî-tis**, **châl-cî-têg**, *s.* [Gr. *χαλκίτης* (*chalkitês*) = the name of a mineral.]

*Min.*: A disintegrating pyrites, iron or copper, impregnated with vitriol. (*Dana*.)

**châl-cô-cîte**, *s.* [Gr. *χαλκός* (*chalkos*) = brass; Eng. suff. -*ite* (*Min.*.)]

*Min.*: An orthorhombic mineral of a lead-grey colour, often tarnished with blue or green. Hardness 2.5–3. Sp. gr. 5.5–5.8. It occurs in Cornwall, Scotland, and many other localities. Compos.: Sulphur, 19.00–21.90; copper, 71.31–79.50; iron, 0.28–0.49. (*Dana*.)

**châl-cô-dîte**, *s.* [From Gr. *χαλκοειδής* (*chalkooidês*) = like brass or copper, and Eng. suff. -*ite* (*Min.*.) (q.v.).]

*Min.*: A variety of Stilpnomelane (q.v.). It consists of minute flexible scales of submetallic lustre.

**châl-cô-graph**, *s.* [From Gr. *χαλκός* (*chalkos*) = copper, and *γράφη* (*graphê*) = a drawing or delineation.] An engraving on copper or brass.

**châl-côg-raph-ër**, *s.* [Gr. *χαλκογράφος* (*chalkographos*) = an engraver; *χαλκός* (*chalkos*) = brass, copper; *γράφω* (*graphô*) = to write,

**fâte**, **fât**, **färe**, amidst, **whât**, **fäll**, father; **wê**, **wêt**, **hère**, camel, **hër**, **thère**; pine, **pît**, sire, **sîr**, marine; **gô**, **pôt**, **or wöre**, wolf, **wörk**, **whê**, **sôn**; müte, **cüb**, **cüre**, unite, **cür**, rôle, **füll**; try. *Syrian.* **se**, **œ** = **ê**. **ey** = **ä**. **qu** = **kw**.

to engrave.] One who engraves on brass, copper, or other metal.

† **chāl-cō-graph-ic**, a. [Gr. χαλκός (chalcos) = brass, copper; γραφικός (graphikos) = pertaining to writing or engraving; γράφω (graphō) = to write, engrave.] Pertaining to or connected with chalcography.

*Min.*: The same as LIROCOSITE (q.v.).

**chāl-cō-phŷ-lite**, s. [Gr. χαλκός (chalcos) = brass, copper; φῦλλον (phullon) = a leaf, from the shape of the crystals, and Eng. suff. -ite (*Min.*)]

*Min.*: A rhombohedral transparent or translucent mineral, from Cornwall and Saxony, of an emerald-green or grass-green colour. Hardness, 2.0. Sp. gr., 2.4–2.66. Compos.: Arsenic acid, 17.51–21.27; oxide of copper, 44.45–58.0; water, 21.0–81.19. (*Dana*.)

**chāl-cō-pŷ-rite**, s. [Gr. χαλκός (chalcos) = brass, copper; and Eng. *pyrite* (q.v.).]

*Min.*: A sulphide of copper and iron containing 2 of copper, 2 of iron, and 4 of sulphur = sulphur, 34.9; copper, 34.6; iron, 30.5. It is of a metallic lustre, of a brass-yellow colour, frequently iridescent. It is opaque. Found largely in the Cornwall mines, where 150,000–160,000 tons of ore are smelted annually. Hardness, 3.5. Sp. gr. 4.1–4.3. (*Dana*.)

**chāl-cō-pŷr-rhō-tite**, s. [From Gr. χαλκός (chalcos) = copper; πυρρότης (pyrrhōtēs) = redness, and Eng. suff. -ite (*Min.*)] (q.v.).]

*Min.*: A variety of Pyrrhotite (q.v.). (*Brit. Mus. Cat.*)

**chāl-cō-sid-ēr-ite**, s. [From Gr. χαλκός (chalcos) = copper; σιδῆρος (sidēros) = iron, and Eng. suff. -ite (*Min.*)] (q.v.).]

*Min.*: A variety of Dufrenite (q.v.). (*Brit. Mus. Cat.*)

\* **chāl-cō-sine**, **chāl-cō-site**, s. [From Gr. χαλκός (chalcos) = copper, and Eng. suff. -ine (*Min.*)]

*Min.*: The same as COPPER GLANCE.

**chāl-cō-stib-ite**, s. [From Gr. χαλκός (chalcos) = copper; στίβι (stibi) = tin, and Eng. suff. -ite (*Min.*)] (q.v.).]

*Min.*: An opaque orthorhombic mineral of a metallic lustre, and a colour between lead-grey and iron-grey. Hardness, 3–4. Sp. gr., 4.748–5.015. Compos.: Sulphur, 25.7; antimony, 48.9; copper, 25.4. It occurs at Wolfsberg, in the Harz mountains, and at Guadiz, in Spain. (*Dana*.)

**chāl-cō-trich-ite**, s. [Gr. χαλκός (chalcos)

= brass, copper; τριχί (trichis), genit. τριχός (trichos) = hair, and Eng. suff. -ite (*Min.*)]

*Min.*: A name applied to the hair-like forms of red oxide of copper, commonly known as plush copper ore.

**Chāl-dā-ic**, a. & s. [Lat. Chaldaicus = pertaining to Chaldea.]

**A.** As adj.: Of or pertaining to Chaldea.

**B.** As substantive:

1. A native or inhabitant of Chaldea.

2. The language of the Chaldeans, Chaldee.

**Chaldaic Christians**, s. pl. [So named because their head church is in what was anciently termed Chaldea.]

*Ch. Hist.*: The chief name given in the East to the interesting sect more commonly known in the West as Nestorians. In parts of India they are called St. Thomas Christians, from the erroneous notion that they were first converted to Christianity by the Apostle Thomas. Their patriarchy resides in a monastery near Mosul, not far from the site of ancient Nineveh. Like Nestorius, they attribute to Jesus two natures, each with its own personality. They reject image worship. In their liturgic services they employ the Syriac language. When first they arose, in the fifth century, they were persecuted by the Eastern Church, but after the rise of the Arabian "prophet" they found favour with the Mohammedans, whose policy it was to support all detached sects against the Catholic Church which they feared. Afterwards they became so noted for missionary work as to elicit the admiration even of the historian Gibbon. Within the present century they have suffered severely from Mohammedan fanaticism. American and other missionaries have also diffused Protestantism among them. One of these Americans, Rev. Asahel Grant, wrote a book which excited some attention, in which he maintained that the "Nestorians" were originally of Jewish descent, deriving their origin from the ten lost tribes.

† **Chāl-dā-ism**, s. [Eog. Chalda(ico); -ism.] An idiom or peculiarity of the Chaldean language.

"He knows chalk from cheese; he knows on which side his bread is buttered."—*Widal; Dictionary*, ed. 1834, p. 570.

Walk your chalks: [WALK].

## II. Technically:

1. *Min. & Chem.*: A massive, opaque carbonate of lime, of a white, greyish, or yellowish colour, with an earthy fracture. Sp. gr. 1.8—2.8. Dana places it along with calcareous marl, under the heading soft, compact limestone, constituting his 21st variety of the mineral species Calcite. It forms extensive rocks in the south and south-east of England.

## 2. Geology and Palaeontology:

(1) *Spec.*: A rock which, when pure, as it often is, is made up of the constituents given under II. 1 *Min.* (q.v.). A great belt of it crosses England diagonally from the eastern to the southern coast, and it is impossible to approach London from the east, west, north, or south without having chalk rocks, at a distance often very limited, beneath one's feet. Their appearance is familiar, owing to their being conspicuously displayed in the chalk cliffs of Dover, and in various chalk pits in the southern counties, on the escarpments on the sides of the Northern and Southern Downs [Downs] and in railway cuttings. The chalk, properly so called, consists of the highest portion of the Upper Cretaceous System, and is divided into Upper White Chalk with Flints and Lower White Chalk without Flints. [FLINT, *Geol.*] The larger animal fossils of the White Chalk consist of Crinoids and other Echinodermata; Cephalopod Molluscs, specially Ammonites, Faculites, Belemnites; Brachiopods, such as *Terebratulæ*, &c.; of other Mollusca, Rudistidae, &c.; of fish, teeth of Cestracoids; of reptiles, Pterodactyls, Turtles, and Oviparous Saurians. Of the smaller organisms, Globigerinae, and other Foraminiferae abound; in fact, chalk is mainly composed of these cemented together by a calcareous paste. The examination by Sir Leopold McClintock, Dr. Carpenter, Sir Wyville Thomson, Prof. Huxley, Dr. Wallich, and others, of the Atlantic ooze obtained in connection with the laying of the telegraphic cable to America, and in the subsequent exploratory expeditions of the Porcupine, Challenger, &c., have shown that the ooze now being deposited at a depth of from 5,000 to more than 15,000 feet in the Atlantic is essentially chalk, with Globigerinae and other Foraminiferae, the former apparently identical with existing species. Most other organisms are extinct, though a few are not. This discovery does not shorten by an hour the period which has elapsed since the chalk first began to be formed, but only proves that a process which was thought to have terminated or intermitted, still goes on. As chalk is a deep-sea formation the vegetable fossils of the Chalk rocks are unimportant.

(2) *Gen.*: The Cretaceous rocks in general, whatever their actual composition. [CRETACEOUS FORMATION or SYSTEM.]

3. *Comm.*: When purified, chalk is called whiting and Spanish white in England. Pure chalk should dissolve readily in dilute muriatic acid, and the solution should afford no precipitate with water of ammonia. Chalk is burnt into lime in great quantities, in which state it is used as a manure, and for making mortar and whitewash.

"Chalk is of two sorts; the hard, dry, strong chalk, which is best for lime; and a soft nutritious chalk, which is best for lands."—*Mortimer*.

*Black chalk*: A carbonaceous variety of shale.

*Brown chalk*: A familiar name for amber.

*French chalk* (*Min.*): [SOAPSTONE].

*Red chalk*: A clay deeply coloured with the peroxide of iron, of which it generally contains 15—18 per cent.

4. *Art.*: A drawing in chalks = one executed with chalk pencils of different colours.

## B. As adjective:

1. Consisting in large measure of chalk, as a chalk down.

2. Derived from chalk or occurring in it, as a chalk flint.

3. Belonging to the time when the chalk was deposited, as the chalk formation.

¶ Obvious compounds: *Chalk-hill*, *chalk-mark*, *chalk-pit*, *chalk-quarry*.

**chalk-bod**, *s.* A layer of chalk.

**chalk-cutter**, *s.* A man who digs up chalk.

**chalk-drawing**, *s.* A drawing sketched and filled in with black or coloured chalks.

**Chalk-line reel**: A spindle or vessel on which a chalk line is wound. (*Knight*.)

## chalk-marl, *s.*

*Geol.*: An argillaceous stratum situated just under the Lower White Chalk without flints. It contains thirty-two species of Ammonites, several peculiar to it. There are also Scaphites, Turritites, &c.

## chalk-stone, *s.*

1. *Ord. Lang.*: A lump of chalk.

"He maketh all the stones of the altar as *chalkstones* that are beaten sunder."—*Isaiah xxvii. 3.*

2. *Med.*: Gouty concretions in the tissues and joints, especially of the feet and hands, consisting chiefly of sodium urate  $C_2N_4H_2NaO_6$ . They are composed of bundles of crystals of urate of soda, and often attain to a considerable size, causing much deformity. Chalk stones are the morbid products of the gouty diathesis which in this way seeks to eliminate itself.

"Also, in many gouty persons, but not in all . . . what are called *chalk-stones* form; concretions that look exactly like chalk collect around and outside the joints . . . and lying in general immediately below the skin."—*Watson: Lectures on the Principles and Practice of Physic*, lect. lxxxii.

**chalk-white**, \***chalkwhit**, \***chalk-whyghth**, *a.* As white as chalk.

"Fyare schetus of eyk *chalkwhyghth* as the myrk."—*Degrewant*, 1460.

**châlk** (*l* silent), *v.t.* [CHALK, *s.*]

## I. Literally:

1. To rub over with chalk.

"With new *châlk*'s hills and rusty arms."—*Hudibras*.

2. To manure or dress land with chalk.

"Land that is *chalked*, if it is not well dunged, will receive but little benefit from a second *chalking*."—*Mortimer*.

## II. Figuratively:

1. To mark or point out; to describe (now only with *out*).

"When now the boy is ripen'd into man,  
His careful sire *chalks* forth some wary plan."

chā-mē-lē-ōn, \* chā-mēs-lē-ōn, \* cham-mē-lē-ō, s. [Lat. *chamaleon*, from Gr. *χamailēon* (*chamailēon*) = a dwarf lion; from *χαμαί* (*chamai*) = on the ground, hence, small, dwarf, and *λέων* (*leōn*) = a lion.]

I. Ordinary Language (chiefly of the form *chamaleon*):

1. Literally:

(1) The animal known to naturalists as

*Chamaleo africanus*. Owing to the *reticostomum* containing two kinds of colouring matter, the animal frequently changes colour to the eye of the observer, a property which has rendered it an object of curiosity in all ages. It was anciently fabled to live on

air. It has but five cervical vertebrae. The hind as well as fore toes are five; trunk mounted high on the legs, forming an exception to the majority of reptiles; lungs very large; tongue cylindrical, extensible, and retractile, terminating in a dilated and tubular tip covered with a glutinous secretion, by means of which the animal catches its food of insects, flies, &c. Reproduction by means of eggs.

"As the chameleon, which is known To have no colours of his own."—*Prior*.

(2) Any other species of the same family.

2. Fig.: A politician or other public man who shows great facility in changing or pretending to change his sentiments, thus suiting his 'colour' to his place.

1. Zool. (chiefly of the form *chamaleo*): A genus of Saurian reptiles, with feet and tail organized for climbing trees. They live on flies and insects. They spend their lives in trees, and are found widely distributed in Africa, East Indies, Madagascar, South of Spain, &c. [CHAMELEO.]

2. Astron. (of the form *chamaleon*): A constellation near the south pole, established by Bayer.

3. Bot.: A term used chiefly in the two following designations of plants:—*Black chamaleon*: *Cardopatum corymbosum*; *White chamaleon*: *Carlina gummiifera*.

chameleon-like, a. Like a chameleon.

"These animals also escape detection by a very extraordinary, chameleon-like power of changing their colour."—*Darwin*: *Voyage round the World* (ed. 1870), ch. l. p. 7.

chameleon mineral, s.

Chem.:  $K_2MnO_4$ . A name given to potassium manganate, from the change of colour it undergoes during its conversion into permanganate. Obtained by fusing  $MnO_2$  black oxide of manganese with potash, and a little nitrate of potash. Its solution in water is green, and gradually changes into blue, purple, and red. It is sold as Condy's fluid; it is a valuable disinfecting agent; a small quantity of the red fluid diluted with water and placed in a soup-plate will keep a sick-room perfectly wholesome.

\* chā-mē-lē-ōn-ize, v. t. [Eng. *chameleon*; -ize.] To change into various colours. (Bailey.)

CHAMOIS.

approaching the sheep and goats. It is about three feet three inches high, with two parallel horns, straight for about six or seven inches, and then sharply bent back, and no beard. It is densely clothed with hair. It is found on high mountain ranges, especially on the Alps, the Pyrenees, the Carpathian mountains, and those of Greece, besides which it is believed to exist also on those of the Taurus and of the Caucasus.

"These are the beasts which ye shall eat; the ox, the sheep, . . . the wild ox, and the *chamois*."—*Deut.* xiv. 4, 5.

2. *Comm.* (*Shammy, Chamois-leather*): The name indicates that this leather is made from the skin of the Chamois (*Rupicapra tragus*), but the skins of sheep, goats, deer, calves, and the split hides of other animals, are used for making this kind of leather; the superior kinds of which are called *chamois*, and the inferior, *wash-leather*. The skins are unhaired in a lime-vat, and scraped on a bism in the ordinary way. The lime is removed in a bath by lactic or acetic acid, and the skins are then *frizzed*. This process consists in rubbing the skins with pumice or the blunt end of a round knife, until the grain is removed, the skin softened, and reduced to an even thickness throughout. The skins are then pressed to expel water, filled by wooden hammers, spread, treated with oil—fish-oil being preferable—rolled up and again filled, to distribute the oil throughout the bundle. They are then taken out, unfolded, dried, re-rolled, and again rolled and filled. These processes are repeated till the effect is fully accomplished, heat being applied during the latter portion, by means of suspending the skins in a store-room. Superfluous oil is removed by a store-steeping in a dilute alkaline lye; the skins are then wrung, dried, supplied by stretching, and polished by rolling. (*Knight*.)

Ital. *cadenza*, from Low Lat. *cadentia* = a chance, from *cado* = to fall.]

**A. As substantive:**

1. An accident, a casual occurrence or event.

"... it was a chance that happened to us."—*I Sam. vi. 1.*

"To say a thing is a chance or casualty, as it relates to second causes, is not profaneness, but a great truth..."—*South.*

2. Fortune; the cause or origin of fortuitous events.

"May hope, when everlasting Fate shall yield, To fickle Chance, and Chaos judge the strife."—*Milton: P. L., II.*

3. The act of fortune, the course of events.

"... the art of catching the tone of any society into which chance might throw him."—*Macaulay: Hist. Eng., ch. xli.*

4. The quality of being without any defined or recognised cause; fortuity.

"Chance is but a mere name, and really nothing in itself; a conception of our minds, and only a commendable way of speaking, whereby we would express, that such effects as are commonly attributed to chances, were verily produced by their true and proper causes, but without their design to produce them."—*Bentley.*

5. The event, success, or result of things.

"Turne we our steeds; that both in equall tilt May meete againe, and each take happy chance."—*Spenser: F. Q., III. viii. 14.*

6. An unlucky event; misfortune, ill-luck.

"That extremity was the trier of spirits, To say common chances common men could bear."—*Shaksp.: Coriolanus, IV. 1.*

7. The possibility or probability of any occurrence.

"Thus he taught the game of hazard, Thus displayed it and explained it, Running through its various chances."—*Longfellow: The Song of Hiawatha, xvi.*

8. An opportunity offered.

¶ *The last chance:* The last remaining hope. *The main chance:* The principal or most important opportunity offered to one.

To take care of or mind the main chance: To watch one's best opportunity to look after oneself, or one's own interests, before those of others.

¶ (1) After pointing out the heathenish character of the three words *chance*, *fortune*, and *fate*, Crabb thus distinguishes between them:—"In this ordinary sense *chance* is the generic, *fortune* and *fate* are specific terms; *chance* applies to all things personal or otherwise; *fortune* and *fate* are mostly said of that which is personal. *Chance* neither forms orders or designs; neither knowledge or intention is attributed to it; its events are uncertain and variable; *fortune* forms plans and designs, but without choice; we attribute to it an intention without discernment; it is said to be blind; *fate* forms plans and chains of causes; intention, knowledge, and power are attributed to it; its views are fixed, its results decisive. A person goes as *chance* directs him when he has no express object to determine his choice one way or other; his *fortune* favours him, if without any expectation he gets the thing he wishes; his *fate* wills it, if he reaches the desired point contrary to what he intended. Men's success in their undertakings depends oftener on *chance* than on their ability [?]; we are ever ready to ascribe to ourselves what we owe to our good *fortune*; it is the *fate* of some men to fail in every thing they undertake."

(2) *Chance* and *probability* are thus discriminated:—"These terms are both employed in forming an estimate of future events; but the *chance* is either for or against; the *probability* is always for a thing; a *chance* is but a degree of probability."

(3) The following are stated to be the differences between *chance* and *hazard*:—"Both these terms are employed to mark the course of future events, which is not discernible by the human eye. With the Deity there is neither *chance* nor *hazard*; His plans are the result of omniscience, but the designs and actions of men are all dependant on *chance* or *hazard*. *Chance* may be favourable or unfavourable, more commonly the former; *hazard* is always unfavourable; it is properly a species of *chance*. There is a *chance* either of gaining or losing: there is a *hazard* of losing."

(4) The following are the differences between *accident* and *chance*. "... *Accident* and *chance* may be used indifferently to the colloquial expression to happen by chance or by accident; but the word *accident* is used only in respect to particular events, as it was pure *accident*; but *chance* is employed to

denote a hidden senseless cause of things as opposed to a positive intelligent cause." (Crabb: *Eng. Synon.*)

(5) The *Penny Cyclopædia* states briefly and pointedly that the word *chance* has been used in two senses, as opposed to providence and as opposed to certainty.

**B. As adj.:** Happening accidentally; casual, accidental, fortuitous.

"Now should they part, malicious tongues would say, Meet like chance companions on the way."—*Dryden.*

**C. As adv.:** Perchance, accidentally, fortuitously, unexpectedly.

"If chance by lowly contemplation led, Some kindred spirit shall enquire thy fate."—*Gray: Elegy.*

**chance-medley**, **chaut-medley**, *s. & a.*

**A. As substantive:**

1. *Ord. Lang.:* Chance, luck, a haphazard result.

"Wherefore they are no twain, but one flesh; this is true in the general right of marriage, but not in the *chance-medley* of every particular match."—*Milton: Tetrachordon.*

2. *Law:* The casual slaughter of a man, not altogether without the fault of the slayer, when ignorance or negligence is joined with the chance; as if a man lop trees by a high-way-side, by which many usually travel, and cast down a bough, not giving warning to take heed thereof, by which bough one passing by is slain: in this case he offends, because he gave no warning, that the party might have taken heed to himself.

"But the self-defence, which we are now speaking of, is that whereby a man may protect himself from an assault, or the like, in the course of a sudden brawl or quarrel, by killing him who assaults him. And this is what the law expresses by the word *chance-medley*, or (as some rather choose to write it) *chaut-medley*, the former of which in its etymology signifies a casual affray, the latter an affray in the heat of blood or passion; both of them of pretty much the same import."—*Blackstone: Commentaries, B. IV., c. 14.*

**B. As adj.:** Depending on chance or fortune.

"And, artless as thou art, whom thou wilt choose; Though much depends on what thy choice shall be, Is all *chance-medley*, and unknown to me."—*Cowper: Tirocinium.*

**chance**, **chance**, **chause**, *v. i. & t.* [CHANCE, *s.*]

**A. Intransitive:**

1. *Of things:* To happen, to fall out, to befall, to fortune, to occur accidentally.

"... natural selection can do nothing until favourable variation chance to occur."—*Darwin: Origin of Species (ed. 1859) ch. vi., p. 117.*

¶ It is frequently used impersonally.

"It chanced that the glad tidings arrived at Whitehall on the day to which the Parliament stood prorogued."—*Macaulay: Hist. Eng., ch. xvi.*

2. *Of persons:*

(1) To happen, to do anything accidentally, casually, or without premeditation (followed by a verb).

"As Diane hunted on a day, She chaus't to come where Cupid lay."—*Spenser: Epigrams, II.*

"... chancing to mention the famous verses which the Emperor Adrian spoke on his death-bed..."—*Pope: Letter to Steele, (1713).*

(2) To meet or fall in with; to find or hit upon (followed by a preposition).

"He chanced upon divers of the Turks victuallers, whom he easily took."—*Knolles: History of the Turks.*

**B. Transitive:**

\* 1. To befall, to happen to.

"It hath not chaused me to see it."—*Lambarda.*

2. To risk, to venture upon (colloquial).

¶ To chance on: To fall in with, to happen on.

"By what strange accident, I chanced on this letter."—*Shaksp.: Merchant of Venice, v. 1.*

*How chance:* How chances it, how comes it.

"How chance you went not?"—*Shaksp.: Merry Wives, v. 4.*

**I. In ancient times:**

\* 1. *Originally (in the Roman Empire):* A petty officer stationed at the fence of bars or lattice-work in a law-court, to introduce such functionaries as were entitled to pass inside. The Emperor Carinus, the immediate predecessor of Diocletian, gave great offence by making such a cancellarius prefect of Rome.

\* 2. *Next (in the Eastern Empire):* A secretary who sat inside the lattice-work to write, but who, in the lower empire, was invested also with judicial functions, and ultimately with a superintendence over the other officers of the empire. From this high dignity to that of a modern English Lord Chancellor the transition is easy.

3. *Then (in the Church of Rome during mediæval times):* An officer standing to the bishop much in the same relation as the cancellarius of the lower empire did to the emperor.

**II. In more modern times:**

1. *On the Continent:* An officer of the highest rank, with a certain jurisdiction over other civil functionaries. The powers of the chancellor, however, varied in the different nations.

(a) The Lord Chancellor: Originally he was the king's chief secretary, to whom petitions were referred, whence he was called referendarius. This title subsequently gave place to chancellor, which first occurs, according to Selden, in English history about A.D. 920. Being generally an ecclesiastic, he became keeper of the king's conscience. Having to express the sovereign's views in cases appealed to him from the Courts of Law, he gradually acquired a great legal standing himself, and finally developed into the potent personage now denominated the Lord Chancellor, or more fully the Lord High Chancellor. He is now the highest judicial functionary in the kingdom, and ranks above every temporal lord, excepting those of the blood royal; he is also above every spiritual lord, except the Archbishop of Canterbury; he is keeper of the great seal; he presides in the House of Lords, of which he is prolocutor; he is a cabinet minister and privy councillor; presides in what was the Court of Chancery (once spelled chancery), but is now the Chancery Division of the Supreme Court; appoints all justices of the peace throughout the kingdom; is the general guardian of all infants, idiots, and lunatics; visitor of the hospitals and colleges of royal foundation; and patron of all livings under twenty marks in value. He goes out with the ministry of which he is a member.

(b) Chancellor of the Exchequer: Properly, the under-treasurer of the Exchequer, the head treasurerhip being held, not by an individual, but by the Lords Commissioners of the Treasury. The Chancellor has, however, a very powerful voice in connection with the Exchequer. He must sit in the House of Commons, and may be its leader, and also Prime Minister.

(c) Chancellor of the Duchy of Lancaster: An officer who presides, either himself or by deputy, in the Duchy Chamber of Lancaster, deciding on all matters of equity connected with lands held of the crown in that Duchy.

(2) In the Universities: The titular head of a university. The office is only honorary. Under him is a Vice-Chancellor, who is the actual working head.

(3) In the Church: Specially two kinds of officers, viz.:

(a) Chancellor of a Cathedral: One of the four chief dignitaries in the cathedrals of old foundation.

(b) Chancellor of a Diocese or of its Bishop: A law officer who acts as vicar-general for the bishop, and holds courts for him to decide on cases tried by ecclesiastical law.

(4) In Heraldry: A functionary, viz., the Chancellor of the Order of the Garter, or other military orders. An officer who acts as secretary to the order, sealing the commissions and mandates of the Assembly of the Knights.

3. In Scotland: Till the Union, in 1707, there was a Chancellor of Scotland, who was the head of law as well as equity, thus having gained a step beyond what the English Lord High Chancellor had attained, he being specially head in equity, though with superiority to the judges in law. There are also a Chancellor and Vice-Chancellor in each of the Scottish Universities. The foreman of a jury was also sometimes called its chancellor. (Scott: Heart of Midlothian.)

4. In Ireland: There is a Lord High Chancellor of Ireland. There are Chancellors and Vice-Chancellors in the Irish Universities and colleges.

\* 5. A secretary. "One Gilbert Peck, his chancellor."—Shaksp.: Henry VIII., l. l.

chan'-cél-lór-shíp, s. [Eng. chancellor; -ship.] The office or position of chancellor.

chan'-cér-y, \*chan'-cér-ye, \*chan'-cér-ye, \*chan'-cél-ér-ye, \*chan'-cél-ér-ye, \*chan'-cél-ér-ye, s. & a. [O. Fr. chancellerie, chancellerie = "a chancery court, the chancery, seal office, or court of every parliament" (Cotgrave); from Low Lat. cancellaria = a place where records are kept, a record-office of a chancellor, from cancellarius = a chancellor.]

A. As substantive:

1. The Court of Chancery was the highest court of judicature next to the House of Lords. The Lord Chancellor presided in this court, having under him the Lords Justices and Vice-Chancellors, who set for him in separate courts, and the Master of the Rolls, who had the keeping of all the rolls and records of the Court of Chancery, and also presided in a court of his own. The Court of Chancery was a court of equity. Under the Judicature Act of 1873 the powers and jurisdiction of the Court of Chancery were transferred to the High Court of Justice, and it now exists as the chancery division of that court. In the United States there are Courts of Chancery in several of the original thirteen states, but in most of the states the principles of equity are administered in the higher courts of law.

4. To take or substitute one garment for another.

5. To turn sour or acid, to become tainted.

¶ (1) Crabth thus distinguishes between to change, to alter, and to vary.—We change a thing by putting another in its place ; we alter a thing by making it different from what it was before ; we vary it by altering it in different manners and at different times. We change our clothes whenever we put on others ; the tailor alters the clothes which are found not to fit, and he varies the fashion of making them whenever he makes new . . . A thing is changed without altering its kind ; it is altered without destroying its identity, and it is varied without destroying the similarity.

(2) He thus discriminates between to change, to exchange, to barter, and to substitute.—"The idea of putting one thing in the place of another is common to all these terms, which varies in the manner and the object. Change is the generic, the rest are specific terms : whatever is exchanged, bartered, or substituted, is changed ; but not vice versa. Change is applied in general to things of the same kind, or of different kinds ; exchange to articles of property or possession ; barter to all articles of merchandise ; substitute to all matters of service and office. Things rather than persons are the proper objects for changing and exchanging, although whatever one has a control over may be changed, or exchanged ; a king may change his ministers ; governments exchange prisoners of war. Things only are the proper objects for barter ; but, to the shame of humanity, there are to be found people who will barter their countrymen, and even their relatives, for a paltry trinket. Substituting may either have persons or things for an object ; one man may be substituted for another, or one word substituted for another. The act of changing or substituting requires but one person for an agent ; that of exchanging and bartering requires two : a person changes his things or substitutes one for another ; but one person exchanges or barter with another. Change is used likewise intransitively, the others always transitively ; things change of themselves, but persons always exchange, barter, or substitute things . . . In the figurative application these terms bear the same analogy to each other. A person changes his opinions ; but a proneness to such changes evinces a want of firmness in the character. The good king at his death exchanges a temporal for an eternal crown. The mercenary trader barter his conscience for paltry pelf. Men of dogmatical tempers substitute assertion for proof, and abuse for argument." (Crabb : Eng. Synon.)

chānge, s & a. [CHANGE, v.]

A. As substantive :

I. Ordinary Language :

1. Literally :

(1) The act of altering or changing ; a substitution of one thing for another.

"Nothing can cure this part of ill-breeding, but change and variety of company, and that of persons above us."—Locke.

(2) The act of passing from one state or phase to another ; alteration, mutation, vicissitude.

"Hear how Timotheus' various lays surprise,  
And bid alternate passions fall and rise ;  
While at each change, the son of Lybian Jove  
Now burns with glory, and then melts with love."  
Pope : Essay on Criticism, 578.

(3) The state or quality of being altered.

"Since I saw you last,  
There is a change upon you."  
Shaksp. : Antony & Cleopatra, II. 6.

(4) That which is substituted for another.

"He took with him . . . ten changes of raiment"—  
3 Kings, v. 6.

(5) An alteration in the order or succession of a series. [II. 3, 4.]

(6) The act or process of giving and receiving things in exchange.

(7) That which is given in exchange for anything of a higher or lower denomination. (A shortened form of exchange, q.v.).

"Wood buys up our old halpence, and from thence the present want of change arises ; . . ."—Swift.

(8) The balance of money paid beyond the price of goods purchased, and therefore returned to the purchaser.

(9) A succession of events.

"O wondrous changes of a fatal scene,  
Still varying to the last!"—Dryden.

\* 2. Figuratively :

(1) Death ; the moment of exchanging life for death.

(2) Novelty, variety.

"Perhaps you would like a kidney instead of a devil ? It will be a little change."—Dierckx : Hvarietin Temple, bk. vi., ch. xx.

II. Technically :

1. Comm. : A place where merchants and others meet to transact business. (Properly a curtailed form of exchange, q.v.).

"The bar, the bench, the change, the schools and pulpits are full of quacks, jugglers, and plagiarists."—L'Estrange.

"He found that he could not go on Change without being followed round the piazza by goldsmiths, . . ."—Macaulay : Hist. Eng., ch. xx.

2. Hunting : Applied to a stag, whose scent has been crossed by chance by hounds in pursuit of another, and who is pursued in his turn.

3. Music :

(1) The word used as the short for change of key or modulation. Changes are of three kinds : the Diatonic, the Chromatic, and the Enharmonic changes. (See these words.) (Groves.)

(2) An alteration or permutation in the order in which a set of bells is rung ; alternate or varied peals rung on bells.

"Four bells admit twenty-four changes in ringing, and five bells one hundred and twenty."—Holder : Elements of Speech.

4. Math. : The permutations, alterations, or variations which any number of things may undergo, or are capable of in respect of position, order, &c.

5. Astron. : The phases through which the moon passes.

"Take seeds or roots, and set some of them immediately after the change, and others of the same kind immediately after the full."—Bacon : Nat. Hist.

6. An Inn or ale-house. [CHANGE-HOUSE.]

¶ Change of voice :

Music : [LARYNX.] (Stainer & Barrett.)

¶ To ring the changes :

1. Lit. : To ring a set of bells in varied peals. [II. 3.]

† 2. Figuratively :

(1) To play upon words by slight changes in order or meaning.

"Easy it may be to contrive new postures, and ring other changes upon the same bells."—Norris.

(2) To render a money transaction over a counter or bar as complex as possible with the view of fraudulently obtaining back more change than one is entitled to, as for instance a half-sovereign which one has paid and silver for it. (Slang.)

¶ Crabth thus distinguishes between change, variation, and vicissitude.—"Change consists

simply in ceasing to be the same ; variation consists in being different at different times ; vicissitude in being alternately different and the same. All created things are liable to change ; old things pass away, all things become new ; the humours of men, like the elements, are exposed to perpetual variations ; human affairs, like the seasons, are subject to frequent vicissitudes." (Crabb : Eng. Synon.)

B. As adj. : (See the compounds.)

\* change-church, s. One who holds various benefices in succession.

"Boso . . . was a great change-church in Roma."—Fuller : Worthies, Hert., l. 429.

change-house, s. An Inn, an ale-house.

"When the Lowlanders went to drink a cheerpugging cup, they go to the public house called the change-house."—Smollett : Humphry Clinker (Sept. 3).

change-keeper, s. One who keeps an ale-house, or a petty inn. (Scotch.)

"That nobody went into the house but the three brothers,—and Nelson the change-keeper and the deponent himself."—Trials of Sons of Rob Roy, p. 130.

change-pump, s. A pump introduced by the successors of Boulton and Watt in connection with the boilers of sea-going vessels, in order to keep a continual change in the body of water, removing the super-salted water and substituting sea water. The change-pump has been superseded by the blow-off cock, which, being turned at intervals, allows a portion of the super-salted water to escape overboard. External condensation and fresh-water boiler-supply are now the mode. (Knight.)

change-ringing, s. The art or practice of ringing a peal of bells, so as to make the greatest possible number of permutations.

change-wheel, s.

Mach. : Change-wheels, having varying numbers of cogs at the same pitch, are used to connect the main arbor of the lathe with the feed-screw, so as to vary the relative rates of rotation and consequently the pitch of the screw to be cut. The first application of change-wheels to a lathe is supposed to have been in a fusee-cutting lathe, described in a work, 1741. The change-wheels are intermediate, and journaled in a bracket, which permits them to be brought into engagement with the rotative and feed wheels respectively. [SCREW-CUTTING LATHE, ENGINE-LATHIE.]

¶ Change-seats, the King's come : A game well known in Lothian and in the south of Scotland. (Jamieson.)

chānge-a-bil-ĭ-ty, \* chāunge-a-ble-te, s. [Eng. changeable ; scty.]

The quality of being changeable or subject to change ; changeableness.

"Repeating whanne it berith changeablete, may not be in God."—Wycliffe : 1 Kings xv. 11.

chānge-a-ble, \* chāunge-a-ble, a

[Eng. change ; -able.]

1. Capable of being changed.

"The changeable suite of apparel, and the mantles, and the wimples, and the craping-plin . . ."—162. III. 52.

2. Liable to change, fickle, inconstant.

"This worlds life that changeable ee."  
Hamspole, 1, 478.

\* 3. Having the quality of exhibiting different appearances.

"Now the taylor make thy doublet of changeable taffeta ; for thy mind is a very opal."—Shaksp. : Twelfth Night, II. 4.

¶ Crabth thus distinguishes between changeable, mutable, variable, inconstant, fickle, and versatile.—"Changeable is said of persons or things ; mutable is said of things only : human beings are changeable, human affairs are mutable. Changeable respects the sentiments and opinions of the mind ; variable, the state of the feelings ; inconstant, the affections ; fickle, the inclinations and attachments ; versatile, the application of the talents. A changeable person rejects what he has once embraced in order to take up something new ; a variable person likes and dislikes alternately the same thing ; an inconstant person likes nothing long ; a fickle person likes many things successively or at the same time ; a versatile person has a talent for whatever he likes. Changeable, variable, inconstant, and fickle, as applied to persons, are taken in the bad sense ; but versatility is a natural gift, which may be employed advantageously." (Crabb : Eng. Synon.)

**chank-shells**, s. pl. A name given in the East Indies to certain varieties of the shell *Turbinella pyrum*, fished up by divers in the Gulf of Manaar, on the N.W. coast of Ceylon. There are two kinds, payel and patty, one red and the other white; the latter is of little value. These shells are imported into India, where they are sawn into rings of various sizes, and worn on the arms, legs, fingers, and toes by the Hindoos. A third species, opening to the right, is rare, and very highly valued. The demand for these shells, caused by the religious rites of the Hindoos, was so great that 60,000 rix-dollars per annum were received by the Government for the right of fishing for them. Now the fishery is open and free to all.  
 "The natives, in addition to fishing for *chank shells* in the sea, dig them up in large quantities from the soil on the adjacent shores."

čhar-a, s. [Gr. *χαρά* (*chara*) = delight.]  
 1. *Bot.*: The typical genus of the order Characeae. The species are found in ponds and slow-running streams, and even in brackish water. The slender stem bears a number of whorls of leaves, the internodes growing smaller towards the top, which is crowned by a terminal bud. These internodes consist of enormous cells, sometimes enclosed by a layer of smaller cells (the cortex), and within the internodes the streaming of the protoplasm—erroneously called the circulation of the sap—may be easily seen with a low power of the microscope (1" objective). Several of the species are incrustated with lime. The axis is coated with tubes, and a large quantity of calcareous matter is deposited upon them. *Chara vulgaris*, Common or Stinking Chara or Stonewort, is very common in England, and a perennial, as also is *C. hispida*, the Prickly Stonewort.

char-a-bānc (c silent), s. [Fr.] A long, light pleasure van, with transverse seats.]

 2. *Nat. Science*: A short definition expressing the essential marks by which an animal, a plant, or a mineral is distinguished from the others which most nearly resemble it.  
 3. *Music*: A general name for the signs employed in music, such as brace, blind, bar, sharp, flat, natural, clef, stave, shake, &c.  
 4. *Roman Theol.*: The change wrought in the recipient of the Sacrament of Baptism or Holy Orders.  
 † (1) Crabb thus distinguishes between *character* and *letter*: "*Character* is to *letter* as the genus to the species; every *letter* is a *character*; but every *character* is not a *letter*. *Character* is any printed mark that serves to designate something; a *letter* is a species of *character* which is the constituted part of a word. Short-hand and hieroglyphics consist of *characters*, but not of *letters*. *Character* is employed figuratively, but *letter* is not. A grateful person has the favours which are conferred upon him written in indelible *characters* upon his heart."  
 (2) He thus discriminates between *character* and *reputation*:—" *Character* lies in the man; it is the mark of what he is; it shows itself upon all occasions; *reputation* depends upon others; it is what they think of him. A *character* is given particularly; a *reputation* is formed generally. Individuals give a *character* of another from personal knowledge; public opinion constitute the *reputation*. *Character* has always some foundation; it is a positive description of something; *reputation* has more of conjecture in it; He source is hearsay. It is possible for a man to have a fair *reputation* who has not in reality a good *character*; although men of really good *character* are not likely to have a bad *reputation*." (*Crabb*: *Eng. Synon.*)

• **chär-coäl**, • **chär-cole**, • **chär-coil**, **chär-kole**, s. & a. [Eng. *char*, v., and *coal* = that which is turned to coal or carbon.]

**A. As substantive:**

**I. Ord. Lang.:** The same as **II. 1.**

**II. Technically:**

1. An impure variety of carbon, prepared from vegetable substances or bones.

(1) *Wood charcoal* consists of wood burned with but little access of air. Billets of wood are built into a heap, which is covered with earth or sand. The heap is fired at openings left near the bottom of the pile, and the gases escape at small openings above. For making fine charcoal, such as that of willow, used in the manufacture of gunpowder, the wood is burned in iron cylinders, or rather retorts, in which a process of destructive distillation removes the volatile hydrocarbons, pyrolygneous acid, &c. By this more perfect means the process is accurately regulated. Charcoal is used in the arts as a fuel; a polishing powder; a table on which pieces of metal are secured in position to be soldered by the blow-pipe; a filtering material; a defecator and decolorizer of solutions and water; an absorbent of gases and aqueous vapours; a non-conducting packing in ice-houses, safes, and refrigerators; an ingredient in gunpowder and fire-works; in the galvanic battery and the electric light.

(2) *Animal charcoal*: Used largely in sugar-refining, and as a disinfectant and filtering medium, is prepared by calcining bones in closed vessels. These are either retorts, similar to those in which coal is distilled for the production of illuminating gas, or they are earthenware pots piled up in kilns and fired. Charges of fifty pounds of bones to a pot will require, say, sixteen hours of firing. The bones are then ground between fluted rollers, the dust removed, and the granulated material used for charging the filters of the sugar-refiner. The material is used for removing colour, feculencies, and fermenting ingredients from the syrup. [*BONE-BLACK FURNACE.*] (*Knight.*)

"Charcole (or *charcole*, P.). *Carbo*."—*Prompt. Parv.*

"Seasonal lasts longer than charcoal; and charcoal of roots, being coaled into great pieces, lasts longer than ordinary charcoal."—*Bacon: Natural History.*

2. A name for the finest tin-plates, so called from being manufactured with charcoal fire.

**B. As adjective:** (See the compounds.)

• **charcoal-black**, s. pl. Various black pigments essentially composed of charcoal, the latter formed by burning ivory, bones, vine twigs, &c.

• **charcoal-burner**, s. A man employed in attending to the manufacture of charcoal.

"That evening [August 2, 1100] the [William Rufus] was found dead by some charcoal-burners."—*C. H. Pearson: The Early and Middle Ages of England, ch. xxv.*

• **charcoal-cooler**, s. A wire cylinder in which animal charcoal is agitated and cooled, after reinvigiving, while a current of air carries off the noxious gases. (*Knight.*)

• **charcoal-filter**, s. A filter charged with ordinary or animal charcoal for domestic use, or with animal charcoal for use in the sugar-house or refinery. (*Knight.*)

• **charcoal-furnace**, s. A furnace for producing charcoal by the dry distillation of wood, and for the collection of the tar and pyrolygneous acid resulting therefrom. (*Knight.*)

• **charcoal-point**, s. A pencil of carbon prepared for use in the electric-light apparatus. (*Knight.*)

• **chard** (1), s. [Fr. *cardé*; Ital. *carda*; Lat. *carduus* = a thistle.]

"Charm by accepting, by committing away."

Pope: Epistle, II. 263.

¶ Crabb thus distinguishes between to charm, to enchant, to fascinate, to enrapture, and to captivate: "To charm expresses a less powerful effect than to enchant; a charm is simply a magical verse used by magicians and sorcerers; incantation or enchantment is the use not only of verses but of any mysterious ceremonies, to produce a given effect. To charm and enchant in this sense denote an operation by means of words or motions; to fascinate denotes an operation by means of the eyes or tongue. . . . Charms and enchantments are performed by persons; fascinations are performed by animals; the former have always some supposed good in view; the latter have always a mischievous tendency. . . . To charm, enchant, and fascinate, are taken in the improper sense to denote moral as well as natural operations; enrapture and captivate have a moral application only. . . . When applied to the same objects charm, enchant, and enrapture rise in sense. (Crabb: Eng. Synon.)

**chart-ing, s.** [CHART, v.] The act or process of laying down on a chart or map.

"The effectiveness of well-devised processes of *charting* has been hitherto overlooked."—*Proctor: Rough Ways made Smooth*, p. 91.

**chart-ism, s.** [Eng. *chart* = charter; suff. -ism.] The principles or political views of the Chartists as set forth in the *People's Charter*.

"*Chartism* means the bitter discontent grown fierce and mad."—*Carlyle: Chartism*, ch. 1.

**chart-ist, s.** [Eng. *chart* = charter; suff. -ist.] A name given to a political party in this country, whose views were embodied in a document called the *People's Charter*. The chief points were—universal suffrage, vote

by ballot, annual parliaments, payment of members, equal electoral divisions, and the abolition of property qualification for members. These principles were set out in a bill prepared in 1838. The party became divided in the following year, the extreme members advocating the employment of force for the attainment of their object. These were known as *Physical Force Chartists*. They perpetrated great outrages at Birmingham on 15th July, 1839, and at Newport in Monmouth, on 4th November of the same year. Inspired by the proclamation of a republic in France early in 1848, they agreed to assemble on 10th April of that year to the number of 200,000 men, and march in procession to Parliament, to present a petition alleged to be signed by six millions of persons. Under the direction of the first Duke of Wellington, the Bank of England, the Post Office, and other public buildings were in consequence temporarily fortified, whilst troops supported by artillery held the bridges. About 200,000 civilians were sworn in as special constables, among them being Louis Napoleon, afterwards the Emperor Napoleon III. The petition was permitted to be delivered, and was found to have only two millions of signatures, many of them forged. The procession was forbidden, its suppression being facilitated by the suggestive fact that only about 20,000 had actually put in an appearance at the place of rendezvous. The rise of the Chartists was in large measure produced by the distress consequent on the existence of protection, and when free trade was established, with the effect of raising wages and cheapening food, the movement died away. Now one never hears of a *Chartist*, but it is worth noting that some points of the Charter, and notably household suffrage and vote by ballot, have been accepted by the legislature, and are the law of the land.

**chart-lēss, a.** [Eng. *chart*; -less.]

1. *Lit.*: Without a chart or map by which to direct one's course; not set down on charts.

2. *Fig.*: Without a guide; wandering helplessly.

chāse (1), \* chāce, \* chās, s. & a. [Fr. chasser; O. Fr. chace; Sp. & Port. caza; Ital. caccia.]

A. As substantive:

I. Ordinary Language:

1. Literally:

(1) The act or custom of hunting wild animals.

"To make his hunting and his chace."—Gower, I. 63.

"The unworled chace each hour employe, Yet shares be not the hunter's joye." Byron: The Giaour.

(2) The act of pursuing after an enemy; pursuit.

"The chas is left for thilke day." Gower, I. 248.

(3) That which is hunted or pursued; the object of pursuit.

"Nish. Nay, Warwick, single out some other chace; For I myself will hunt this wolf to death." Shakspeare: 3 Henry VI., II. 4.

(4) Fitness for hunting.

"Frequent the forests, thy chasets all obey, And only make the beasts of chace thy prey." Dryden: Palamon & Arcite, III. 246.

2. Figuratively:

† (1) The act of pursuing eagerly after anything; an earnest effort after or pursuit of.

"Yet this mad chace of fame, by few pursued, Has drawn destruction on the multitude." Dryden: Juvenal.

(2) That which is eagerly sought after.

II. Technically:

1. An open hunting-ground or preserve for game, which is private property. It differs from a park in not being enclosed and in being of greater extent, and from a forest in being of less extent and endowed with fewer liberties. Every forest is a chase, but every chase is not a forest.

"The mere for his net, and the land for his game. The chase for the wild, and the park for the tame." Scott: Robby, III. 30.

\* 2. A term at tennis, signifying the spot where a ball falls, beyond which a player has to drive his ball to gain a point or chase.

"T. I have two chases—I, Sir, the last is no chase, but a loss.—I, Sir, how is it a loss?—I, Because you did strike it at the second bound."—Woodroffe: French and English Grammar, p. 234 (1624).

B. As adj.: (See the compounds).

chase-gun, s.

Ord.: A gun mounted at the bow to fire at a vessel being chased. It is fired from a chase-port.

chase-port, s.

Naut.: A port-hole at the bow of a vessel, from which the chase-guns are fired.

chāse (2), s. [A variant of case (q.v.).]

1. Printing: A rectangular iron frame which receives the matter from a galley, and in which it is arranged in columns or pages, and locked up in order for printing. Rules (if necessary) and furniture for spacing the pages are placed between the pages, and all locked firmly in the chase by wedges called quoins. The furniture consists of slips of wood or metal, half an inch in thickness, and of any required length. Those at the head, foot, and side are called head-sticks, foot-sticks, side-sticks. Those between the pages are called gutters. Gutenberg used screws to lock up his form in the chase. Quoins came later.

2. Ordnance: The portion of a gun forward of the trunnions to the swell of the muzzle. In modern guns, the swell is suppressed, and the chase extends to the muzzle.

3. Masonry: A groove cut in the face of a wall.

4. Shipbuilding: A kind of joint by which an overlay-joint gradually becomes a flush-joint, as at the hooding-end of clinker-built boats. A gradually deepening rabbet is taken out of each edge at the lands, so that the projection of each strike beyond the next below it gradually diminishes, and they fit flush with each other into the rabbets of the stem and stern post.

5. Engin., &c.: A groove, trench, or passage of a given width and depth to fit an object which traverses or fits therein: as,—

(1) The chase or curved water-way, or breast in which a breast-wheel or scoop-wheel rotates. The sides of the chase fit as nearly as possible to the wheel, to prevent waste of water.

(2) The trench made by spades or machines for the reception of drain-tile. (Knight.)

chase-mortice, s.

Carp.: A method of fixing the ends of a transverse piece of wood into two holes or mortices in two joists, beams or other timber unyieldingly fixed in position. One end of the transverse piece being morticed into the one fixed timber, the other end is partly rotated around this as a centre till it be fitted into a long groove cut for it in the other beam. This is the method by which ceilings are morticed into bridging joists.

chāsed (1), \* chāped, pa. par. or a. [CHASE (1), v.]

chāsed (2), pa. par. or a. [CHASE (2), v.]

chās-ēr (1), s. [CHASE (1), v.; -er.]

1. Ordinary Language:

(1) One who chases, hunts, or pursues.

"A stranger to respect or fear, In posce a chaser of the deer." Scott: The Lady of the Lake, VI. 4.

(2) A horse trained specially for hunting or steeple-chasing. (STEEPLE-CHASER.)

"They will certainly have to do more at this meeting than the chasers."—Daily News, Dec. 7th, 1880.

2. Naut.: A gun at the bow or stern of a ship, used for firing when in chase.

chās-ēr (2), s. [CHASE (2), v.]

I. Ord. Lang.: One who practises the art of chasing.

II. Technically:

1. Mach.: A tool for cutting threads in the hand-lathe; sometimes called a comb, from its having a row of projecting teeth. It is made of steel, and the teeth filed by hand or by a cutting hub. It is first forged in blank. The teeth are then filed or made by a hub (q.v.). The latter is a steel mandril rotated

on the centres of a lathe and having a section of screw-thread cut upon it. The thread is notched in places, so as to make cutting edges. Chasing by the graver may be merely engraving in lines, but is usually in the form of relief; parts of the metal being cut away, leaving protuberant portions of ornate form, and which are further beautified by graver-lines, frosting, milling, &c. The sand-bag supports the work while being chased by the graver. (Knight.)

2. Metal: One of the edge-wheels which revolves in a trough, to grind substances to powder. (CHILIAN MILL; MORTAR-MILL; OTT-MILL.) Also used in grinding ore for puddling-furnaces, &c. (Knight.)

chās-ēr (3), s. [Perhaps from chase (1), v.] A ram that has only one testicle. (Scotch.)

"I think into Geordie Allan's, at the West Port, where I had often been afore, when selling my sild-owes and chasers."—Brosnie of Rodbeck, II. 32.

C. As subst.: The act of hunting or pursuing; chase.

chās-īng (2), pr. par., a., & s. [CHASE (2), v.]

A. & B. As pr. par.: (See the verb).

B. As adj.: Of or pertaining to the art of a chaser. (See the compounds below.)

C. As substantive: 1. The act or art of a chaser.

"The art of chasing was much practiced among the Greeks."—Knight.

2. The pattern chased on any metal.

"You would not suppose that he referred to the dial-plate in front and the chasing of the case behind."—Tyndall: Frag. of Science (3rd ed.), p. 100.

chasing-chisel, s. A punch used in chasing. The mallet by which it is driven is the chasing-hammer, and the operation is performed on a stake. [CHASER.] (Knight.)

chasing-hammer, s. The mallet of the chaser in the operation of chasing by embossing by punches. (Knight.)

chasing-lathe, s. A screw-cutting lathe. So called from the name of the tool wherewith screws were cut by hand in the old form of lathe, before the slide-rest and feed-screw were invented. (Knight.)

chasing-tools, s. pl. Those used by the chaser in the operation of embossing by punches. The work is laid on a chasing stake or cushion, and the punch struck by hammer or mallet. The chasing-tools are of various kinds, with flat, rounded faces and curved edges, so as to follow a pattern. Other tools have faces ornamented with designs in cameo or intaglio, which are conferred upon the metal by the action of the punch and hammer. (Knight.)

chāsm, s. [Lat. chasma, from Gr. χάσμα (chasma) = a gulf, from χαινω (chainō) = to gape.] [CHASMA.]

1. Lit.: A deep opening in the earth; an abyss, a yawning gulf.

"Round his gray head the wild curlew In many a fearless circle flew. O'er chasms he passed." Scott: The Lord of the Isles, v. 6.

2. Fig.: A gap, a void, an empty space.

(n) In material things:

"Great numbers of recruits were sent to fill the chasms which pestilence had made in the English ranks."—Macaulay: Hist. Eng., ch. xv.

(b) In immaterial things:

"Such, whose supine felicity but makes In story chasms, in epochs mistakes." Dryden: Aureas Redus, 108.

† For the distinction between chasm, breach, break, and gap, see BREACH.

chās-ma, s. [The same as chasm (q.v.).] Trench says it was long in the language before it became Anglicised as chasm. A chasm.

"Observe how handsomely and naturally that hideous and unprofitable chasma bewixt the predictions in the eleventh chapter of Daniel and the twelfth in this way filled up."—Morr: Mystery of Iniquity, bk. 2, ch. 10, § 4.

chās-mē, s. [Gr. χάσμα (chasma) = a gaping.] Entom.: A genus of beetles of the family Scarabæidæ.

\* Chāsmēd (med as md), a. [Eng. chasm; -ed.] Full of chasms or gaps.

**chasse-pôt** (t silent), s. [French; from the name of the inventor.] The breech-loading centre-fire needle-gun of the French service. It was designed as an improvement on the Prussian needle-gun, to which it was opposed in the Franco-Prussian war of 1871. A paper cartridge is employed in the gun as originally constructed in 1867, but in 1869 M. Chassepot patented an improved arrangement, embracing a cartridge-retractor for use with a central-fire metallic cartridge; the construction of the gun is, however, essentially the same. (*Knights*.)

**chass-ūr, s.** [Fr. = a hunter, from *chasser* = to hunt.]

\* I. A hunter or huntsman.  
"The daring *Chasseur* lost two of his best horses soon after, and never perfectly recovered . . ."—*Scott: The Chase*.

2. One of a select body of infantry in the French service, designed for particularly light and rapid movements.

3. An attendant upon persons of rank and wealth, wearing a kind of military uniform, and acting as a footman.

**chās-sis** (is as i), s. [Fr. = a frame, a sash, a lattice.]

**Ordnance**: The base frame on which a barbet or casemate gun is run in and out of battery. The chassis is capable of a certain amount of lateral sweep, called traverse, so as to adjust the gun horizontally in pointing. This is often done by oscillating in an arc, a pintle in front of the chassis being the centre of oscillation. (*GUN-CARRIAGE*.) (*Knights*.)

**chāste, \* chāst, a.** [O. Fr. *chaste, caste*; Sp., Port., & Ital. *casto*, from Lat. *castus*, fem. *casta* = chaste.]

I. **Of persons (mode of life, &c.):**

1. Pure from all unlawful sexual intercourse; virtuous.

"Among words which signify the same principal ideas, some are clean and decent, others unclean; some chaste, others obscene."  
*Watts: Logic*.

2. Free from any mixture of barbarous phrases; pure, uncorrupt; unaffected.

" . . . that great model of chaste, lofty, and pathetic eloquence, the Book of Common Prayer."  
*Maccubain: Hist. Eng. ch. x*

¶ The word was formerly used in reference to men as well as women, but is now chiefly restricted to the latter.

¶ **Chaste brethren and sisters:**  
*Ch. Hist.*: An appellation given to them-

selves by the members of a sect which flourished in the 12th century, and was more generally known by the name of *Apostolici* (q.v.).

**chaste-eyed, a.** Free from unchaste or lascivious looks.

"The oak-crown'd sisters, and their chaste-ey'd queen."  
*Collins: Ode on the Poisons*.

**chaste-tree, s.**  
**Bot.**: The same as *Agnus Castus* (q.v.).

\* **chāste, \* chāst, \* chāstie, \* chāsty, v.t.** [O. Fr. *castier, chastier*; Sp. & Port. *castigar*; Ital. *castigare*; Lat. *castigo*, from *castus* = chaste, pure, and *ago* = to make.] [CHASTEN.]

1. To make or keep chaste.  
"Odyr wymmen by her to chaste."  
*Octavian, 218*.

2. To chastise, to punish, to correct.  
"Harlotry with his hendelayk he hoped to chaste."  
*Allie: Poems* (ed. Morris); *Cleanse, 860*.

1. In a chaste manner; virtuously, purely.  
"He secl him lokk chasteiche."  
*Ayembitz, p. 225*.

"You should not pass here; no, though it were as virtuous to lie as to live chasteily."—*Shakesp: Coriolanus, v. 2*.

2. Without violation of decent ceremony.  
"Howe'er my knees goe, see my body  
(Upon my cause I ask it) hurried chasteily."  
*Beaumont and Fletcher: Knight of Malta*.

**chās-tēn** (t silent), \* **chās-tien, v.t.** [O. Fr. *castier, chastier*; Sp. & Port. *castigar*; Ital. *castigare*; Lat. *castigo* = to make chaste or pure, from *castus* = pure, and *ago* = to make.] [CHASTE, CHASTISE.]

1. To correct with corporal punishment.  
"Chasten thy son while there is hope, and let not thy soul spare for his crying."  
*Proverbs, xix. 18*.

2. To correct, subdue, or mortify the mind or heart.  
"But observation tends to chasten the emotions and to check those structural efforts of the intellect which have emotion for their base."  
*Zyndall: Frag. of Science* (3rd ed.), II, 91.

3. To make pure or free from faults; to purify, to expurgate.

¶ Crabb thus distinguishes between to *chasten* and to *chastise*:—"Chasten has most regard to the end, *chastise* to the means; the former is an act of the Deity, the latter a human action. God *chastens* his faithful people to cleanse them from their transgressions, parents *chastise* their children to prevent the repetition of faults." (*Crabb: Eng. Synon.*)

**chās-tened** (t silent), *pa. par. or a.* [CHASTEN, v.]

1. *Lit.*: Punished, chastised, corrected.

2. *Fig.*: Softened down, subdued; formed or made according to the very strictest rules.  
"It was a face that in prosperity would have been rich and sparkling as a jewel, and in adversity preserved its charms from the rare and chastened beauty in which it was modelled."  
*G. J. Whyte Melville: The Gladiator, ch. vii*.

**chāst-en-ōr** (t silent), s. [Eng. *chasten*; -er.] One who chastens, corrects, or punishes.

"And be alone on earth, as I am now,  
Before the *Chastener* humbly let me bow."

chēap, \*chep, \*chepe, \*cheep, s., a., & adv. [A.S. cheap = price, ceapian = to cheapen, to buy; Dut. koop = a bargain; Icel. kaup = a bargain, kaupsa = to buy; Sw. köp = a bargain; köpa = to buy; Dan. köb, kiøbe, Goth. kaupon = to traffic; O. H. Ger. koufen; M. H. Ger. koufen; Ger. kaufen = to buy, kauf = a purchase. The word was originally a substantive, and was never used as an adjective in the earlier periods. (Skeat.)]

A. As substantive:

\*1. A price, value.

"Hire cheap was the wrae."

Leaymen, l. 17.

"Chep. Precium."—Prompt. Pars.

\*2. A market. In this sense the word survives in many local names, as Eastcheap, Cheap-side.

† It is generally found in the compound phrases—Good cheap (an imitation of the French bon marché) = great plenty, very cheap; better cheap, great cheap, dirt-cheap (and earlier), dog-cheap, all signifying exceedingly cheap, at a very low price.

"Each female eye the glittering links employ.  
They turn, review, and cheapen, every toy."  
Pope: Homer's Odyssey, bk. xv., l. 497-8.

† Crabb thus distinguishes between to buy, to purchase, to bargain, and to cheapen: "Buy and purchase have a strong resemblance to each other, both in sense and application, but the latter is a term of more refinement than the former. . . . Buying implies simply the exchange of one's money for a commodity; bargaining and cheapening have likewise respect to the price; to bargain is to make a specific agreement as to the price; to cheapen is not only to lower the price asked, but to deal in such things as are cheap." (Crabb: Eng. Synon.)

\*chēap-gned, \*chēap-ned, pa. par. & a. [CHEAPEN, v.]

chēck, \*chēcke, v.t. & i. [CHECK, s.]

A. Transitive:

1. Ordinary Language:

I. To put a sudden restraint on; to cause to stop.

"A secret horror checked the feast,  
And chilled the soul of every guest."  
Scott: Lay of Last Minstrel, vi. 24

2. To restrain, so as to allow to move or progress less rapidly.

"Such a tax, it was hoped, would check the growth of a city which had long been regarded with jealousy and aversion by the rural aristocracy."—Macaulay: Hist. Engl., ch. iv.

3. To repress, to curb, to restrain.

"... the means of checking the abuses which disgraced every department of the government."—Macaulay: Hist. Eng., ch. xl.

4. To improve, to chide.

"A poet in his evening walk,  
Overheard and check'd this idle talk."  
Cooper: Sentimental Plant.

5. To go through and place marks against names or items in a list, account, &c.

6. To ascertain or ensure the correctness or authenticity of anything by comparing it with others.

bēil, bēy; pōut, jōwl; cat, cēll, ohorus, chīn, bēnch; go, gēk; thīn, thīs; mīn, aſ; expect, Xēnophon, exīst. -īng. -cian, -tian = shan. -tion, -sion = shūn; -tīon, -tīon = zhūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bēl, dēl.

... but we have scanty means of checking and controlling it, with other accounts. — Lewis: *Early Roman Hist.* (1835), ch. xiii., pt. 1, § 3, vol. II. p. 363.

II. Technically:

1. Chess: To make a move by which any one of the adversary's pieces is put in check.

Dispose, confute, check, leave, or take. Pawn, rook, knight, queen, or king.

2. Bookkeeping, &c.: To compare with an original or counterpart in order to secure accuracy and correctness.

3. Nautical:

(1) To check a brace: To slacken or ease off a brace which is found to be too stiffly extended, or when the wind is drawing aft.

(2) To check a cable: To stopper it.

(3) To check a bowline: To slacken it when the wind becomes large or free.

B. Intransitive:

I. Ordinary Language:

\*1. To make a stop or pause (followed by

an object). "The mind, once laded by an attempt above its power, either is disabled for the future, or else checks at any vigorous undertaking ever after." — Locke.

\*2. To clash, to interfere.

"If love check with business, it troublith men's fortunes." — Bacon.

\*3. To cause a feeling of restraint or repression; to act as a restraint.

"I'll avoid his presence; It checks too strong upon me." — Dryden.

II. Falconry: To stop, to hover over the game; to change the game while in pursuit, especially for an inferior kind.

"... like the haggard, check at every feather That comes before his eye." — Shakespeare: *Twelfth Night*, III. 1.

¶ (1) Crabb thus distinguishes between to check, to curb, and to control:—"To check is to throw obstacles in the way to impede the course; to curb is to bear down by the direct exercise of force, to prevent from action; to control is to direct and turn the course: the actions of men are checked; their feelings are curbed; their actions or feelings are controlled. External means are employed in checking or controlling; external or internal means are employed in curbing: men check and control others; they curb themselves or others; young people ought always to be checked whenever they discover a too forward temper in the presence of their superiors or elders; it is necessary to curb those who are of an impetuous temper, and to keep youth under control, unless they have within themselves the restrictive power of judgment to curb their passions and control their inordinate appetites."

(2) He thus discriminates between to check, to chide, to reprimand, to reprove, and to rebuke:—"The idea of expressing one's disapprobation of a person's conduct is common to all these terms. A person is checked that he may not continue to do what is offensive; he is chidden for what he has done that he may not repeat it; impertinent and forward people require to be checked, that they may not become intolerable; thoughtless people are chidden when they give hurtful proofs of their carelessness. People are checked by actions and looks as well as by words; they are chidden by words only: a timid person is easily checked... the young are perpetually falling into irregularities which require to be chidden. To chide marks a stronger degree of displeasure than reprimand, and reprimand than reprove or rebuke... Chiding and reprimanding are employed for offences against the individual, and in cases where the greatest disparity exists in the station of the parties: a child is chid by his parent; a servant is reprimanded by his master. Reproving and rebuking have less to do with the relation or station of the parties than with the nature of the offence; wisdom, age, and experience or a spiritual mission give authority to reprove or rebuke those whose conduct has violated any law human or divine..."

(3) The difference between to check and to stop is thus stated:—"To check is to cause to move slowly; to stop is to cause not to move at all: the growth of a plant is checked when it does not grow so fast as usual; its growth is stopped when it ceases altogether to grow: the water of a river is stopped by a dam; the rapidity of its course is checked by the intervention of rocks and sands. When applied to persons, to check is always contrary to the will of the sufferer; but to stop is often a matter

of indifference, if not directly serviceable: one is checked in his career of success by some untoward event; one is stopped on a journey by the meeting of a friend." (Crabb: *Eng. Synon.*)

chéck, \* chék, chèque, \* checque, s. & a.

[O. Fr. *eschec* = a check at chess, from Pers. *sháh* = king.] [CHECKMATE, CHESS.]

 "And e'en on the ranks of Tuscany  
 Could scarce forbear to cheer."  
*Horatius*, xl.

† Crabb thus distinguishes between to cheer, to encourage, and to comfort:—"... To cheer and comfort have both regard to the spirits, but the latter differs in degree and manner; to cheer expresses more than to comfort; the former signifying to produce a lively sentiment, the latter to lessen or remove a painful one: we are cheered in the moments of despondency, whether from real or imaginary causes; we are comforted in the hour of distress. Cheering is mostly effected by the discourse of others; comforting is effected by the actions, as well as the words, of others. Nothing tends more to cheer the drooping soul than endearing expressions of tenderness from those we love; the most effectual means of comforting the poor and afflicted, is by relieving their wants." (*Crabb: Eng. Synon.*)

**II. Objec.:** Inspiring cheerfulness; cheering, gladdening.  
 "The cheerful psalter bring along,  
 And harp with pleasant string."  
*Milton: Trana; Ps.*, lxxxii.

† (1) Crabb thus distinguishes between cheerful, merry, sprightly, and gay:—"Cheerful marks an unruffled flow of spirits; with mirth there is more of tumult and noise; with sprightliness there is more buoyancy; gaiety comprehends mirth and indulgence. A cheerful person smiles; the merry person laughs; the sprightly person dances; the gay person takes his pleasure. . . . Cheerfulness is an habitual state of the mind; mirth is an occasional elevation of the spirits; sprightliness lies in the temperature and flow of the blood; gaiety depends altogether on external circumstances. . . . Sprightliness and mirth are seldom employed but in the proper sense as respects persons; but cheerful and gay are extended to different objects; as a cheerful prospect, a cheerful room, gay attire, a gay scene, gay colours, &c.

chēese, \*chēse, s. & a. [A.S. cēse, cyse; O. Sax. kēse, kēsti; Dut. kaas; Ger. käse; M. H. Ger. kasse; O. H. Ger. chasi; Sp. queso; Ital. cacio, caseo, from Lat. caseus; Gael. caise; Ir. cais; Wel. cais; Corn. kes; Armor. cais; Basque gasta, gastaya, gasna.]

A. As substantive: 1. The curd or caseine of milk, with variable quantities of butter and common salt, pressed into moulds and ripened by keeping. The various kinds of cheese differ chiefly in the mode of manufacture, the amount of fat which they contain, and in the flavour, which is due partly to the food, and partly to the breed of the animal. In this country, cheese is made from the milk of the cow, but on the continent of Europe it is made from goat's milk and ewe's milk, whilst in Arabia it is prepared from the milk of the camel and the mare. There are three kinds of cheese, viz., whole-milk, skim-milk, and cream-cheese. To the first class belong the Stilton, Cheddar, Doolop, Gloucester, and American, all of which are made from unskimmed milk and contain from 20 to 40 per cent. of fat or cream, and 30 to 50 per cent. of caseine. Skim-milk cheese is poor in fat, containing from 1 to 4 per cent. Cream-cheese contains from 60 to 70 per cent.

Authorities differ as to the dietetic value of cheese, some affirming that it is very indigestible, whilst others assert that it assists digestion. Its digestibility, however, varies with its age, its texture, and its composition, and it is possible that it may produce different effects on different persons. Cream-cheese is more digestible than any other kind of cheese, owing to its containing less caseine.

Cheese is rarely adulterated. To suit the public taste it is frequently coloured with annatto, or some other vegetable colour, and so long as the colouring matter is not injurious, it cannot be considered an adulteration.

2. (Sing. cheese, or more frequently pl. cheeses) The fruit of two species of Mallow—(1) Malva sylvestris, and (2) M. rotundifolia.

*Bot.*: A genus of cruciferous flowers, of which *Cheiranthus cheiri*, the Wallflower, is well known. In its wild state the flowers are always single and of a bright yellow colour, but the cultivated plants produce a wide variety of tints. The Wallflower is by some supposed to be the *Viola* of the Latin poets. [WALLFLOWER.]

\* **cheir-ó-gál-ó-us**, *s.* [Gr. *χείρ* (*cheir*) = the hand, and *γάλεος* (*galeos*) = a young weasel or kitten.]

*Zool.*: A genus of Quadrumans belonging to the Lemniridae (q.v.).

**cheir-ól-óp-is**, *s.* [Gr. *χείρ* (*cheir*) = the hand, and *λέπτις* (*leptis*) = a scale.]

*Palæont.*: A genus of fossil fishes found in the Old Red Sandstone of Morayshire and the Orkney Islands. (*Miller: Old Red Sandstone*, ch. iv.) It is doubtfully referred to the Lepeosteidae. It is akin to *Palæoniscus*.

**cheir-ól-ó-gý**, *s.* [Gr. *χείρ* (*cheir*) = the hand, and *λόγος* (*logos*) = a discourse, a treatise.] A treatise on the language of the hands; also a mode of conversing with manual signs practised by the deaf and dumb.

**cheir-óm-ý-dæ**, *s. pl.* [From Mod. Lat. *cheiromys* (q.v.), and fem. pl. adj. suff. *-idæ*.]

*Zool.*: A family of mammals, order Quadrumans, tribe or section *Strepsirhina*.

\* **cheir-ó-mýs**, *s.* [Gr. *χείρ* (*cheir*) = a hand, and *μύς* (*mys*) = a rat.]

*Zool.*: The genus containing the Aye-aye, a singular animal inhabiting Madagascar. It is the Aye-aye Squirrel of Pennant. Swinson classed it amongst the Rodentia or Gliræ; it is now placed near the Lemnurs. It is *Cheiromys madagascariensis*, formerly called

*Sciurus madagascariensis*. Its large and flat ears resemble those of a bat, while its habits approach those of the squirrel. It is of a musk-brown colour mixed with black and ash-grey; tail black.

**chei-ró-néó-tés**, *s.* [Gr. *χείρ* (*cheir*) = the hand; *νήχω* (*néchō*) = to swim.]

1. *Ichthy.*: The Frog-fish, the name given by Cuvier to a genus of Acanthopterygion fishes, comprising some of those fishes popularly known under the name of Anglers. They are most grotesquely and hideously shaped, having the pectoral fins supported like short feet on peduncles, by means of which they can creep over mud or sand when lily dry by the receding tide. [ANGLER.]

2. *Zool.*: A name given by Illiger to a genus of marsupial animals, the opossums, in which the hinder legs are webbed. [DIOLPHINÆ.]

**chei-rón-ó-mý**, *s.* [Gr. *χείρ* (*cheir*) = the hand; *νόμος* (*nomos*) = a law, a regulation.] The management of the hands with appropriate movements and gestures in speaking.

"*Cheironomy* or the decorous and expressive movement of the hands being especially practised."—*Grote*: *Hist. Greece*, ch. 23.

**chei-ró-pleür-i-a**, *s.* [Gr. *χείρ* (*cheir*) = hand; *πλευρά* (*pleura*) = a rib.]

*Bot.*: A synonym of *Anapansis*, applied to *A. vespertilio*, and *A. bicuspis*, two ferns which are remarkable in bearing fronds of a form resembling bats'-wings.

**cheir-óp-ó-dist**, *s.* [CHIROPODIST.]

\* **cheir-ó-pód-s**, \* **cheir-óp-ó-d-a**, *s. pl.* [From Gr. *χείρ* (*cheir*) = the hand, and *πούς* (*pus*), genit. *πόδος* (*podos*) = a foot.]

*Zool.*: Ogilby's name for the mammals possessed of hands, all of which he brings together, dividing them again into *Bimana* (two-handed), including man; *Quadrumana* (four-handed), including monkeys; *Pedimana* (foot-handed), including the lemurs, *œfidee*, the cheiromys, and the didelphidae. His views have not been adopted by other zoologists.

† **cheir-óp-tér**, *s.* [CHIROPTERA.] A mammal belonging to the order *Cheiroptera* (q.v.).

**cheir-óp-tér-a**, *s. pl.* [Gr. *χείρ* (*cheir*) = the hand; *πτερόν* (*pteron*) = a wing.]

1. *Zool.*: The name of a natural order or tribe of mammiferous animals, having the fingers elongated for the expansion of membranes which act as wings. It contains the bats. They are widely spread over the globa-

CHIROPTER.

Generally speaking they remain in concealment during the day in hollow trees, caverns, ruins, &c., and flit forth at dusk to seek their prey, which consists principally of flies. The genera and species are numerous. The *Cheiroptera* are divided primarily into *Frugivorous Bats* and *Insectivorous Bats*, the first tribe containing only one family, *Pteropidae* (the Fox-bats, or *Rousettus*), and the second three, viz., *Vesperilionidae* or *Typical Bats*, the *Rhinolophidae* or *Horse-shoe Bats*, and *Phyllostomidae*, *Vampire Bats* or *Vampires*.

2. *Palæont.*: Bats have been found as early as the Eocene.

**cheir-óp-tér-óus**, *a.* [Eng. *chiropter* (q.v.); *-ous*.] Of or belonging to the *chiroptera*; having elongated fingers or toes for the expansion of membranes which act as wings.

**cheir-ós-pór-a**, *s.* [Gr. *χείρ* (*cheir*) = the hand; *σπορά* (*spora*) = a seed.]

*Bot.*: A genus of *Melanconiel* (*Coniomycetous Fungi*), growing upon the twigs of the

fate, fát, fáre, amidst, whát, fáll, father; wê, wêt, hère, camel, hêr, thêre; pine, pit, síre, sír, marine; gô, pôt, or, wôre, wôlf, wôrk, whò, sôn; mûte, cûb, cûre, unite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = é. ey = a. qu = kw.

beech. The heads are formed of chains of spores, like a Penicillium. (Griff. & Henfrey.)

**cheir-ō-stō-mōn**, s. [Gr. χείρ (cheir) = hand; στῆμον (stēmon) = a stamen. So called from the hand-like form of the anthers.]

**Bot.**: A genus of Sterculiads, of which *Cheirostemon platanoides*, the Hand-flower tree, or Macapochitiquahntli of the Mexicans, is the sole species. It is a tree growing thirty or more feet in height, and having plane-like leaves of a deep-green colour on the upper surface, but coloured underneath with a rust-coloured scurf composed of star-like hairs; each leaf being about six inches long by five broad, deeply indented at the base, and divided at the margin into from three to seven blunt-rounded lobes. The flowers are two inches long, by as much broad, with a leathery rusty-red, cup-shaped calyx; stamens bright-red, united for about one-third of their length, and then separated into five curved claw-like rays, bearing some slight resemblance to the human hand. Forests of the tree exist near the city of Guatemala. (Treas. of Bot.)

**cheir-ō-sty-lis**, s. [Gr. χείρ (cheir) = the hand; στυλος (stulos) = a style.]

**Bot.**: A genus of terrestrial orchids, consisting of little plants, with the habit of *Anacochilus*, to which it is nearly allied. It has the three sepals united into a short tube, from the front of which hangs down a lip divided into narrow lobes.

**\*cheir-ō-thēr-ī-ūw**, s. [Gr. χείρ (cheir) = the hand; θηρίον (thērion) = a wild beast.]

**Palæont.**: A provisional name formerly given to an animal whose footprints, re-

TRACKS OF CHEIROTHERIUM.

sembling those of a human hand, are found in the New Red Sandstone. The name has lapsed, for the footprints are now known to have been made by one of the huge Batracians, for which the late Professor Owen founded the genus *Labyrinthodon* (q.v.).

**cheir-ūr-ī-dā**, s. pl. [From Mod. Lat. *cheirus* (q.v.), and fem. pl. adj. snff. -idæ.]

**Palæont.**: A family of Trilobites. The head shield is well developed, and there are eleven, ten, or twelve body rings.

**cheir-ūr-ūs**, s. [From Gr. χείρ (cheir) = a hand, and οὐρά (oura) = a tail.]

**Palæont.**: A genus of Trilobites, the typical one of the family Cheiruridae. It is found in the Silurian.

**\*cheis**, v. [CHOOSE.]

**\*chei-tle**, v. t. [From the sound.] To chirp, to chatter, or to warble.

**\*chei-tor**, **\*chei-tur**, s. [O. Fr. *eschetour*; Low Lat. *eschator*.] An escheator.  
"Shireves, chetters and chauceleur."  
Wright: *Poët. Songs*, p. 388.

**\*chĕk**, **\*cheke** (1), s. & v. [CHECK, s. & v.]

**\*chĕk**, **\*cheke** (2), s. [CHEEK.]

**che-ka-o**, **che-ko-a**, s. [Chinese.] A kind of paste prepared by calcination and trituration from a hard stony substance. It is used by the Chinese in drawing figures in wholly white chinaware, which they afterwards varnish.

**\*chĕke-māte**, s. & v. [CHECKMATE, s. & v.]

**\*chĕk-ēr** (1), **\*chĕk-yr**, s. [CHECKER, CHEQUER.]

"A cheyr; scaccartium."—Cath. Anglicum.

**chĕk-ēr** (2), s. [Contracted from O. Fr. *eschiquier* = the checker.] The checker. (Scotch.)

**chek-mak**, s. [Turkish.]

**Fabrics**: A Turkish fabric of silk and gold thread, mixed with cotton.

**chē-lā**, **chē-lē**, s. [Gr. χήλη (chēlē) = a claw.]

1. **Sing.** (Of the form *chele*) (*Owen*): One of the bifid claws of the Crustacea, Scorpions, &c. [CHELY.]

2. **Pl.** *Chelæ*: The modified fourth pair of thoracic limbs in lobsters and their allies; the modified mandibles in scorpions. (Huxley.)

3. **Ichthy.**: A genus of fishes belonging to the Salmonide, sub-family Cyprinæ. The mouth is very small, and opens vertically; anal fin long.

**chē-lāte**, a. [Gr. χήλη (chēlē) = a claw.] Having the form or appearance of a claw; possessed of claws.

"The foremost two pairs [legs] are terminated by double claws, arranged so as to form a pincer, whence they are said to be *chelate*."—Huxley: *Crayfish*, p. 20.

**\*che-laun-dre**, s. [CHALANDRIE.]

"Than is blisful many aithe,  
The chelandrie, and the popyngay."  
Romance of the Rose.

**\*chele** (1), s. [CHILLA.]

"Her is chele and bete."  
Old Eng. Miscell. (ed. Morris), p. 73.

**chele** (2), s. [CHELA.]

**chē-lō-rŷth-rine**, s. [From Mod. Lat. *chelidonium*; Gr. ἐρυθρός (eruthros) = red, and Eng. suff. -ine (Chem.) (q.v.).] A substance obtained in the form of a gray powder from the plant *Chelidonium majus* and *Glaucium luteum*, which powerfully excites sneezing. Under the action of acids it takes a fine orange colour, and forms neutral salts, which act as narcotics when taken in small doses.

**chē-lō-tite**, s. [From Gr. χηλεντός (chēlentōs) = netted, platted, and Eng. suff. -ite (Min.).]

**Min.**: A variety of Smaltine (q.v.) (Brit. Mus. Cat.)

**chē-lō-ēr-ā**, **chē-lō-ēr-ēs**, s. [Gr. χήλη (chēlē) = a claw; κέρα (keras) = a horn.]

A name given by Latreille to two appendages on the heads of spiders and scorpions, which he considers as representing the mesial antennæ of the Decapod Crustaceans, converted in these Arachnids into organs for the seizure of food.

**chē-lō-nūs** (chē guttural), s. [From Gr. χηλή (chēlē) = a horse's hoof, a bird's talons, a wolf's claws, &c., and ἰχθυος (ichthos) = a foot-step.]

**Palæont.**: A temporary and provisional genus, formed for the reception of certain footprints like those made by chelonians. *Chelichnus Duncanii* (Sir William Jardine) is the name given to certain footprints in the Permian rocks of Annandale. It is doubtful if they were really made by chelonians, and when it is discovered what animal really produced them, the term *Chelichnus* will be superseded, as Cheirotherium was by *Labyrinthodon*. (See these words.)

**\*chē-lō-ēr-ōct**, s. [O. Fr. *chelydre*.] A kind of serpent; a basilisk. [CHELIDRE.] (Dr. Murray suggests that it may be a "bad spelling of 'chelydric,' noting that "aspect" = aspice = asp.)

"Thair was the Viper, and th' Aspect,  
With the serpent *Chelydract*.  
Quibus stink in tell' ante."  
Burel: *Pūg.*, Watson's Coll., II. 21.

**chē-lō-dōn** (1), s. [CELANDINE.]

**chē-lō-dōn** (2), s. [Gr. χελιδών (chēlidōn) = a swallow. . . . a hollow above the bend of the elbow (so called from being like the fork in a swallow's tail).] The hollow at the flexure of the arm.

**chē-lō-dōn-īc**, a. [Eng. *chelidon*; -ic.] Pertaining to or derived from *chelidon*, 1.

**chelidonic acid**, s.

**Chem.**: C<sub>7</sub>H<sub>6</sub>O<sub>5</sub>. A tribasic acid, which occurs combined with lime in *Chelidonium majus*. It crystallises in colourless needles, soluble in water.

**chē-lō-dōn-īne**, s. [From Mod. Lat. *chelidonium* (q.v.), and Eng., &c. suff. -ine (q.v.).]

**Chem.**: A bitter principle extracted from *Chelidonium majus* and *Glaucium luteum*. It consists of 40 atoms of carbon, 20 of hydrogen, 6 of oxygen, and 3 of nitrogen. When pure it forms colourless scales of a bitter taste.

**chē-lō-dō-nī-ūm**, s. [CELANDINE.]

**Bot.**: Celandine, a genus of plants of the order Papaveraceæ. The Greater Celandine is a glaucous hairy annual plant, with pinnately-lobed leaves, small yellow flowers in a loose umbel, and a fruit consisting of a long pod, containing a number of seeds with a small crest on them. It is full of a yellow juice, which is of an acrid poisonous nature, and has been used in certain diseases of the eye, and as a caustic to destroy warts, &c. *Chelidonium majus* is found wild in Britain and the North of Europe, in Siberia, and in Western Asia as far as Persia. Its juice is a violent acrid poison.

† **chē-lō-dōn-īze**, v. t. [Gr. χελιδονίζω (chēlidonizō) = (1) to twitter like a swallow, (2) see def., from χελιδών (chēlidōn).]

**Gr. antiq.**: To sing the swallow-song, i.e., the song welcoming the return of the swallows, which was done by the Rhodian boys in the month of Boëdromion, the act being made a pretext for begging. (Stainer & Barrett.)

**chē-lō-dōn-ī-zīng**, pr. par., a., & s. [CHELIDONIZE.]

**A. & B.** As pr. par. & adj.: (See the verb.)

**C.** As subst.: Singing the "swallow-song."

**\*chē-lō-dre**, s. [O. Fr. *chelydre*; Lat. *chelydrus*; Gr. χελιδών (chēlidōn) = an amphibious serpent, from χέλυς (chelus) = a tortoise, and ὕδωρ (hūdōr) = water.] A serpent.

"*Chelydre* her yate her adders skin."  
Gower: *C. A.*, II. 206.

**chē-lō-rī-dæ**, s. pl. [From Lat. *chelydrus* (us), and fem. pl. suff. -idæ.]

**Zool.**: The Crocodile Tortoises, a family of Chelonians, in which the tail is long, and the head not retractile. Order, Chelonides.

**chē-lō-fēr**, s. [Gr. χήλη (chēlē) = a claw; Lat. *fero* = to bear.]

**Zool.**: A genus of Arachnids, Spiders, which have the appearance of small scorpions without the tail.

**chē-lō-fēr-ī-dæ**, s. pl. [From Mod. Lat. *chelyfer* (q.v.), and Lat. fem. pl. adj. suff. -idæ.]

**Zool.**: A family of the class Arachnida, order Adelarthromsata. For their form see CHELIFER. They are sometimes found among old books, and when disturbed run forwards, backwards, sideways, or in any direction which they please. They sometimes attack the common fly.

**chē-lif-ēr-ōs**, a. [CHELIFER.] Furnished with chelæ or cheliform appendages.

"One of the short *chelyferous* legs."—Dana: *Crustacea*, pt. I., 626.

† **Chelyferous Slaters**:

**Zool.**: The name given to the Cursorial Isopod Crustaceans of the genus *Tanais*.

**chē-lī-form**, a. [Gr. χήλη (chēlē) = a claw; Lat. *forma* = a form, an appearance.] Having the form or appearance of a claw; claw-shaped.

**che-lingue**, s. [An East Indian word.] The same as MASULAMANCHE.

**chē-lō-nō-tūs**, s. [Gr. χέλυς (chelus) = a tortoise, and νότος (notos) = the back.]

**Zool.**: A genus of Molluscs, belonging to the Haliotide, or Ear-shells; the animal is cheliform; shell ear-shaped, thin, fragile, imperforate, and without a pillar, and entirely concealed in the back of the animal.

**chē-lō-mōn**, s. [Gr. χελιδών (chēlidōn) (Hesychius), from χελών (chēlōn) = a fish with a long snout.]

**Ichthy.**: A genus of fishes in which the mouth is prolonged into a slender snout or tube; family, Chelodontidae. *Chelmon rostratus*, a species found in the seas of China, is kept by the people of that country in basins, that they may witness it projecting drops of water at flies hung above them on strings; their aim in such cases is remarkably exact.

**chē-lō-mōn-fōrd-ite**, s. [From Chelmsford in Massachusetts, U.S., where it occurs; and suff. -ite (Min.) (q.v.).]

**Min.**: A variety of Wernerite (q.v.). The crystals are of a grey-greenish or reddish shade. (Dana.)

**chē-lō-dīn-ā**, s. [Gr. χέλυς (chelus) = a tortoise; and εἶδος (eidos) = form, appearance.]

bōl, bōy; pōt, jōwl; cat, çell, chorus, çin, bench; go, gem; thin, þis; sin, aþ; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn. -þion, -þion = zhūn. -tious, -sious, -cious = ahūs. -tie, -dre, &c. = tel, dēr.

**Zool.**: A genus of the Emydæ, or River Tortoises, in which the neck is remarkably long. Order, Cheloniidæ.

**chē-lō'-nō**, s. [Gr. χελώνη (*chelōnē*) = a tortoise.]

**1. Zool.**: A genus of turtles, often written Chelonia. Thus, the common green turtle is called by some naturalists *Chelone midas*, and by others *Chelonia midas*.

**2. Bot.**: A small genus of liliads, closely allied to the Penstemon. The corolla has a broad-keeled upper lip and scarcely open mouth, giving it some resemblance to the head of a tortoise or turtle, to which it owes its scientific appellation, and the American popular name of Turtlehead. The best-known species is *Chelone obtusa*, a perennial with creeping roots and flowers in terminal spikes, with corollas mostly of a rosy-purple colour.

**chēl'-ō'-nō-sē**, s. pl. [From Gr. χελώνη (*chelōnē*) = a tortoise (CASSONS), and Lat. pl. suff. -sē.]

**Bot.**: A tribe of Scrophulariaceae plants, type *Chelone* (q.v.).

**chē-lō'-nī-a**, s. [Gr. χελώνη (*chelōnē*) = a tortoise.]

**Zoology**:

**1.** A genus of reptiles, the typical one of the family Cheloniidæ. It contains the Turtles proper. *Chelonia midas* is the Green Turtle, *C. imbricata* the Hawk's-bill Turtle, and *C. caretta* the Loggerhead Turtle. [CHELONE.]

**2.** In Prof. Owen's classification, the 12th order of the class Reptilia, or Reptiles. It includes the Tortoise, Turtle, &c.

**chē-lō'-nī-an**, a. & s. [CHELONIA.]

**A. As adj.**: Of or pertaining to the Chelonia.

**B. As subst.**: One of the order of Chelonia.

"... is the thorax of birds and chelonians, ..."  
Owen: *Anatomy of Vertebrates*, ch. III, p. 44.

**chē-lō'-nī-i-dæ**, s. pl. [Mod. Lat. *cheloni(a)*, and fem. pl. suff. -idæ.]

**1. Zool.**: The Sea-turtles, a family of the order Chelonia (q.v.). They are all marine.

**2. Paleont.**: The Cheloniidæ appear at least as early as the Portland Stone in the Upper Jurassic beds. They are abundant in the Eocene.

**chē-lō'-nī-te**, s. [Gr. χελώνη (*chelōnē*) = a tortoise, and Eng. suff. -ite (q.v.).] A name given to certain species of fossil Echini of the genus *Cidaris*.

**chēl'-ō-nō-bā-trā'-chī-a**, s. pl. [From Gr. χελώνη (*chelōnē*) = a tortoise, and βράχος (*brachos*) = a frog.]

**Zool.**: A name sometimes given to the amphibian order of Anoura, which contains the frogs and toads.

**chē-lō'-ly**, s. [Lat. *chela*; Gr. χήλη (*chēlē*) = a claw.] The claw of a lobster. [CHELA.]

"It happeneth often, I confess, that a lobster hath the chely or great claw, of one side longer than the other."  
—Brewer.

**chē-lō'-lō'-ā**, s. [From Gr. χελύς (*chelus*) = a tortoise.]

**Zool.**: A genus of turtles, family Emydidae. *Chelydra serpentina* is the Alligator Tortoise of North America.

**chē-lō'-lō'-i-dæ**, s. pl. [From Lat. *chelys* (q.v.), and fem. pl. adj. suff. -idæ.]

**Zool.**: A family of Chelonians. They resemble the Trionyctidæ, but have a carapace sufficiently large to allow the head and neck to be retracted within it. Of the five toes, three or four are furnished with claws, whereas in the Trionyctidæ only three are thus armed.

**chēl'-y-dra**, s. [From Lat. *chelydrius*; Gr. χελύδρος (*chelydros*) = a feticid snake, living in water, from χελύς (*chelus*) = a tortoise; and ὕδωρ (*húdōr*) = water.]

**Zool.**: A genus of Chelonians; family Trionyctidæ. *Chelydra serpentina* is the Snapping Turtle. It is found in the United States. It destroys many young alligators, and occasionally bites pieces of flesh from the bodies of any bathers at whom it has an opportunity of snapping.

**chēl'-y-s**, s. [Lat. *chelys*; Gr. χελύς (*chelus*) = a tortoise.]

**1. Music**:

(1) The lyre of Mercury, supposed to have been formed by strings stretched across a tortoise-shell.

(2) In the 16th and 17th centuries a bass-viol and division-viol were each called chelys. (Stainer & Darrett.)

**2. Zool.**: A genus of turtles, the typical one of the family Chelydidae (q.v.). They live in the ponds and rivers of warm countries, feeding on fish.

\* **che-mer**, s. [CHIMERE.]

**chēm'-ic**, \* **chēm'-ick**, a. & s. [In Fr. *chimique*; Sp., Port., and Ital. *chimico*; from Gr. χημικός (*chēmikos*).] [CHEMISTRY, I, 1 (2).]

**A. As adj.**: Chemical.

**B. As subst.**: A chemist, an alchemist.

"... these *chymicks*, seeking to turn lead into gold, turn away all their own silver."—Brewer: *Lingua*, iv. l.

**chēm'-ic-al**, **chēm'-ic-al**, a. & s. [Eog. *chemic*; -al.]

**A. As adj.**: Of or belonging to chemistry, or chemical action; resulting from the forces investigated by chemistry, as chemical changes; designed for such investigation, as the Chemical Society.

**B. As subst. (pl. chemicals)**:

**1.** Substances having a definite chemical composition, as crystallized cupric sulphate,  $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ .

**2.** Chemical reagents.

† **Chemical affinity**: [AFFINITY.]

**Chemical analysis**: [ANALYSIS.]

**Chemical apparatus**: Apparatus designed for chemical purposes, such as a blowpipe, retorts, test tubes, reagents, &c.

**Chemical attraction**: The same as **Chemical affinity** (q.v.).

**Chemical combination**: The combination of chemical substances into a compound different from any of the constituents, and having a definite percentage composition, and mostly having their vapour densities the halves of their molecular weights. When such union takes place heat is generally evolved. The constituents of a chemical compound cannot be separated by mechanical means. [COMBINATION.]

**Chemical deposits**:

**Geol.**: Deposits, like carbonate of lime, thrown down from water by chemical action. They are distinguished from mechanical deposits precipitated by mechanical means. [LYELL.]

**Chemical equivalents**: The relative proportions in which chemical substances will replace one another, according to their atomicity (q.v.); thus one atom of oxygen, a dyad element, is the chemical equivalent of two atoms of hydrogen, a monad element.

**Chemical formula**: The formula or symbolic expressions which indicate the chemical constituents of a body, as NaCl indicates that chloride of sodium contains one atom of chlorine and one atom of sodium.

**Chemical furnace**: A small furnace for laboratory uses.

**Chemical notation**: [NOTATION.]

**Chemical printing**: (See the compound.)

**Chemical printing-telegraph**: An apparatus for printing symbols upon prepared paper by means of electro-chemical action; as, for instance, by an iron stylus on paper prepared with a solution of yellow cyanide of potassium.

**Chemical reagents**: Pure chemicals used for testing.

**Chemical Society of London**: A Society founded on Feb. 23, 1841. The letters F.C.S. indicate a Fellow of the Chemical Society.

**Chemical works**: Manufactories where chemical processes are carried out on a large scale. They are regulated chiefly by the Alkalies Act of 1863, which requires them to condense at least 95 per cent. of the muriatic acid gas which they produce.

**chēm'-i-cal-ly**, adv. [Eng. *chemical*; -ly.] By a chemical process; opposed to mechanically, &c.

"... the sun's rays had become so tempered by distance and by waste as to be chemically fit for the decomposition necessary to vegetable life."—Tyndall: *Frags. of Science* (3rd ed.), vii., 163.

**chēm'-iok-ing**, s. [O. Eog. *chemick*; -ing.]

**Bleaching**: The process of steeping goods in a dilute solution of chloride of lime in stone vats, the liquor being continuously pumped up and straining through the goods until the action is complete. This precedes the souping which sets free the chlorine. [BUCKING-KIER.]

**chēm'-i-ōō**, pref. [CHEMIC.] Relating to chemistry. (The meaning completed by the second element.)

**chemico-algebraic**, a. Relating to chemistry and algebra.

**chemico-electric**, a. Pertaining to or derived from electric force excited chemically, not mechanically.

**chemico-galvanic**, a. The same as chemico-electric (q.v.).

**chemico-technical**, a. Pertaining to chemistry as applied to theories and industries.

**chēm'-i-ōō-graph**, s. [Lat. *chemicus* = chemical, and suff. -graph (q.v.).]

**Chem.**: A diagrammatic representation of the constitution of a chemical substance. It consists of the symbols of the respective atoms connected by lines or bonds.

**chēm'-i-glyph'-ic**, a. [From Gr. χημεία (*chēmeia*) = chemistry, and γλύφω (*gluphō*) = to engrave.] Engraved by means of a galvanic battery.

**chē-mīse** (1), s. [Fr.; Ital. *camicia*; Sp. & Port. *camisa*, from Low Lat. *camista* = a shirt; from Arab. *gamis* = a shirt. (Skeat.)]

**1. Ord. Lang.**: A shift or under garment worn by females.

**2. Fortif.**: A wall for lining a bastion or ditch.

† **Chémise de Notre-Dame**:

*Bot.*: *Convolvulus*, or *Calystegia sepium*.

\* **chē-mīse** (2), \* **chē-mys**, \* **chymes**, s. [O. Fr. *chymes* = the principal house on an estate.] A chief dwelling, as the manor-house of a landed proprietor or the palace of a prince.

"The *chémise* or principal message could not be devilled nor given in name of dowrie or tierce to the woman, ..."  
—Baïou: *Pract.*, p. 103.

In Sw. *kemi*; Ger. *chemie*; Fr. *chimie*, *chymie*; Sp. *chimia*, *chymia*; Port. *chimica*, *chymica*; Ital. *chimica*; Sp. & Port. *alquimia*, from Arab. *al-kimia* = alchemy. (q.v.).] The science which investigates the several elements of which bodies are composed, and the laws which regulate the combination of these elements and the reactions of chemical compounds on each other.

**1. History**:

(1) Claims to have been the originators of chemistry have been put in on behalf of the Egyptians and the Chinese, but details are wanting. The blow-pipe was known to the former people (Vol. I., p. 598, col. 2).

(2) **The Greek period**: The first stage in the development of chemistry seems to have been conducted by the Greeks, who gave prominent attention to investigating the properties of plant juices for medicinal purposes. This would now be called pharmacy, though some of the more recent researches might lay the foundation of organic chemistry.

(3) **The Arabian and Medieval periods** (those of Alchemy): When the Arabs adopted the Greek word *χημεία* (*chēmeia*) or its analogue, and prefixed to their article *al* = the, their

inquiries took a new form, and were mainly those to which the term Alchemy is still applied. Suidas himself had defined *χημεία* (*chémeia*) as "the making of silver and gold." The Moors introduced alchemy into Spain about A.D. 1150. For its further history see ALCHEMY.

(4) *The modern period* (that of Chemistry properly so called): As astronomy developed from astrology, so chemistry came forth from alchemy. The transition was gradual, but a considerable part of it was effected in the 15th century, though straggling alchemists flourished till the 18th.

Among the discoveries which have made chemistry what it now is, the following may be mentioned: Boyle, who published his "Sceptical Chemist" in 1669, introduced the use of chemical reagents or tests. In 1674 Mayow, of Oxford, perceived that respiration produced the same effect on atmospheric air as combustion did. In 1756 Dr. Black proved that an aeriform body (carbon dioxide) existed in carbonate of lime, thus distinguishing it from quicklime. About 1765 Mr. Cavendish brought to notice hydrogen gas. On August 1, 1774, Dr. Priestley discovered oxygen, and in the latter year Cavendish made known the constituent elements of water. In 1774 Scheele discovered chlorine, and in 1783 Berthollet pointed out the use which might be made of it in bleaching; the same year also he described the elements of ammonia. In 1797 Vanquelin discovered chromium. In 1803 Dalton introduced his atomic theory. In November, 1807, Sir Humphrey Davy intimated the existence of potassium and sodium. Klaproth during his life, which ended in 1817, analysed nearly 300 minerals. The synthesis of urea by the molecular transformation of ammonium cyanate, by Wohler in 1828, also the discovery of the synthesis of cyanogen and alcohol, &c., showed that organic compounds could be formed without the aid of plants or animals. The discoveries of Wurtz, Bertholot, Kolbe, Baeyer, &c.; the researches of Williamson on ethers, Hoffmann on compound ammonias, Frankland on organic radicals, Kekule on the benzene series, Bunsen's spectroscopic researches, leading to the discovery of the elements cesium and rubidium, followed by the discovery of thallium by Crookes, &c., and the synthesis of alizarin and indigo, may be mentioned to give some idea of the rapid progress of chemistry in recent years. (Consult *Watts's Dic. Chem.* and the *Journals of the English, German, and French Chemical Societies.*)

2. *Modern divisions of chemistry*: It is divided into *organic* and *inorganic* chemistry, the former comprising the chemistry of carbons and the compounds derived from them, and the latter dealing with the compounds of the other elements. The supposed distinction between organic and inorganic compounds was broken down by Wöhler in 1828 by his preparation. Another classification is into pure or theoretical, analytical, and applied or practical chemistry. The latter may be subdivided according to the arts or occupations which it is designed to benefit, as *agricultural* chemistry, &c.

**chém-i-týpe, s.** [Eng. *chemic*], and *type* (q.v.)

**Engraving**: A somewhat general term which includes a number of relief processes by which a drawing or impression from an engraved plate is obtained in relief, so as to be printed on an ordinary printing-press.

\***chem-ne, s.** [CHEMNEV.]

**chém-nít-zí-q, s.** [Named after Chemnitz, a distinguished conchologist of Nuremberg, who published a work on shells in seven vols. between A.D. 1780 and 1795.]

**Zool.**: A genus of gasteropodous molluscs, family Pyramidellidae. The shell, which is slender, is many-whorled with a simple aperture closed by a horny anapirapal operculum. The animal has a very short head, with a long proboscis. Recent species thirty-two, four of them British; fossil 240, from the Silurian period on ward. (Woodward, ed. *Tale.*)

**chém-mól-y-sis, s.** [Eng. *chemic*], and *Gr. λύσις* (*lusis*) = dissolving, solution.]

**Chem.**: The resolution of a compound into its constituent elements by chemical means.

**chém-ô-lyt-ic, a.** [Eng. *chemolytic*]; *t* conn., and suff. *-ic*.] Pertaining to or performed by chemolysis.

**chô-mô-sis, s.** (Gr. *χημωσις* (*chémôsis*) = inflammation of the eyes; *χάσμα* (*chémâ*) = a yawning, a gaping; *χάσμα* (*châina*) = to gape.]

**Med.**: An affection in which the conjunctiva, the membrane which lines the posterior surface of the eyelids, is continued over the forepart of the globe of the eye. Frequently lymph or blood is effused with the cellular substance connecting it with the eyeball, and so causes it to be elevated or projected towards the eyelids, giving it the appearance of a gap or aperture along the middle of the eye. The swollen conjunctiva sometimes overlaps the cornea altogether, and there is usually more or less purulent discharge, with severe pain, headache, and feverishness.

**chém-ôs-mô-sis, s.** [Eng. *chemic*], and *osmosis*.] Chemical action transmitted by osmosis.

**chém-ôs-môt-ic, a.** [Eng. *chemic*], and *osmotic*.] Pertaining to or effected by chem-osmosis (q.v.)

**chén-ê-vix-ite, s.** [Named after its discoverer, and Eng. suff. *-ite* (*Min.*)]

**Min.**: A massive, compact, dark-green mineral from Cornwall, found in quartz veins in small compact masses. Hardness, 4.5; sp. gr., 3.93. Compos.: Arsenic acid, 32.20—33.5; phosphoric acid, 0—2.30; sesquioxide of iron, 25.10—27.5; oxide of copper, 22.5—31.70; lime, 0—0.34; water, 8.66—12. (*Dana.*)

**cheng, s.** [Chinese.] The Chinese organ, which consists of a series of tubes having free reeds.

CHENG.

It is held in the hand and blown by the mouth. The introduction of this instrument into Europe led to the invention of the accordion and harmonium. (*Stainer & Barrett.*)

**chê-nûle, s. & a.** [Fr. *chenille* = (1) a caterpillar, (2) fine velvet twist.]

**A. As subst.**: A round fabric or trimming, made by uniting with two or more sets of warps, either by weaving or twisting, a fine filling or weft, which is allowed to project beyond the warps. This filling is cut at its outer edges, and the fabric is then twisted, assuming a cylindrical shape with weft projecting radially from the central line of warps.

**B. As adj.**: (In compounds, as *Chenille-carpet*, *Chenille-machine*.)

\***chen-non, s.** [CANON.]

**chê-nô-côp-rô-lite, s.** [Gr. *χηνή* (*chênâ*) = a goose, and Eng. *coprolite* (q.v.)]

**Bot.**: An alliance of hypogynous exogens. Lindley includes under it the orders *Nyctaginaceæ*, *Phytolaccaceæ*, *Amarantaceæ*, and *Chenopodiaceæ* (q.v.)

**chên-ô-pôd-î-â-gê-ae, s. pl.** [Mod. Lat. *Chenopodi(um)*; Lat. fem. pl. suff. *-aceæ*.]

**Bot.**: The Goose-foot family, a natural order of Monochlamydeous dicotyledons, characterising Lindley's *Chenopod* alliance. The species are inconspicuous herbs or under-shrubs, found in waste places in all parts of the world, but abounding in extra-tropical regions. Some are used as potherbs, as spinach (*Spinacia oleracea*), orach (*Atriplex*

*hortensis*, beet (*Beta vulgaris*), &c. The mangold-wurzel is a variety of beet used for the food of cattle. In 1866 there were 74 genera and 638 species known.

**chên-ô-pôd-î-üm, s.** [Gr. *χηνή* (*chênâ*) = a goose; *ποδ* (*pous*), genit. *ποδος* (*podos*) = a foot.]

**Bot.**: Goosefoot, a genus of annual and perennial herbs, the typical one of the order *Chenopodiaceæ*, *Chenopods*, and chiefly remarkable for the weedy character of the species composing it. Perianth five-parted; stamens five; styles two, crowning the ovary, which contains a single round flattened seed. The common Goosefoot is found everywhere. It has triangular leaves, covered with a whitish meanness, and numerous small flowers in terminal clusters. *C. atriplicis* is a tall-branched annual, growing four to five feet high. *C. Quinoa*, a native of the Pacific slopes of the Andes, is largely cultivated in Chili and Peru for the sake of its seeds, which are

II. Tech.: The game of chess is of very great antiquity. It was probably invented in China or India, certainly in the East. In India it has been from time immemorial known as *chatrang*, i.e., the four *angas*, or members of an army; viz.: elephants, horses, chariots, and foot soldiers. This was by the Persians corrupted into *chatrang*, and by the Arabs into *shatrang*. By them it was introduced into Spain in the eighth century, and from thence it found its way into France, and was known in England before the Norman conquest. From the Arabic *shatrang* came the still further corrupted forms *scacchi*, *échecs*, and *chess*. In the modern European arrangement the idea of elephants, horses, chariots, and foot soldiers has been abandoned, and, in their places, have been substituted a king, queen, knights, bishops, castles or rooks, and pawns, forming six distinct classes of pieces. [See these words.] The name rook is the Hindu *rath* = an armed chariot; Pers. *rath* = the pawns are the foot-soldiers, Hindu *peon* = an attendant. The game is played on a board divided into sixty-four squares, coloured alternately black and white. Each player has sixteen pieces, viz., a king, a queen, two bishops, two knights, two castles or rooks, and eight pawns. The manner of moving each piece is regulated by rule, and the object of each player is to checkmate the other. [CHECK-MATE.]

2. A red colouring matter, extracted from the Bignonia chica. It is used by some tribes of North American Indians to stain the skin. It is extracted by boiling the leaves in water, decanting the decoction, and allowing it to settle and cool, when a red matter falls down, which is formed into cakes and dried. It is not much used in this country. (Ure.) It is called also Carajuru.

3. A fermented liquor or beer, made of maize, &c., by the natives of South America.

4. The name of a dance popular among the Spaniards and the South American settlers descended from them. It is said to have been introduced by the Moors, and to have been the origin of the fandango, which some writers declare to be the chica under a more decent form. It is of a similar character with the dance of the Angriemena performed at the festivals of Venus, and still popular among the modern Greeks. The English jig is said to be one form of the chica. (Stainer & Barrett.)

chī-cāne', s. [Fr. chicane, a word of doubtful origin. Skeat gives Brachet's suggestion that it represents a form zicanum = Mod. Gr. τζικάνιον (tzikanion), a word of Byzantine origin, from Pers. chaugān = a club or bat used in polo. It would thus originally mean disputes in games. But there is no evidence as to the connection of the Mod. Gr. and Fr. forms.] The making use of mean, petty subterfuges in order to draw away attention from the real merits of a case, or to prolong a contest. Artifices, stratagems in general.

**chicken-pox**, s.

**Path.:** The common name for Varicella, a contagious and infectious disease which in some respects resembles modified small-pox, and is characterised by a specific eruption, which breaks out over the whole body, and runs a definite course in about eight or ten days. The disease appears to be the result of a specific poison which, after a period of latency or incubation, develops into one of more or less feverishness. This lasts for two or three days, when an eruption of pimples appears, at first on the body, then on the face and head, the fever subsiding as the rash appears. These pimples soon fill up with lymph, and become vesicles which in their turn, two or three days later, shrivel up and fall off in the form of crusts or scabs, seldom, however, becoming purulent or pitting as in the eruption of small-pox. Chicken-pox appears to have obtained its name partly from the pulse or pea-like (Fr. *chiche*) character of the rash in the first instance, and partly from the mild nature of the complaint as compared with small-pox. Swine-pox, bastard-pox, livea, horn-pox, pearl or stone-pox, are the names popularly given to this disease, according to the character of the eruption, which varies somewhat in different cases. Adults seldom suffer from chicken-pox.

"Diuretics evacuate the salt serum; as all acid diuretics, and the testaceous and bitter *chicoraceous* plants."—*Str J. Flower*.

**chic-ô-rý**, \* **chic-cô-rý**, s. [O. Fr. *chicorie*, *chicorée* = succorie (Cotgrave); Fr. *chicorie*, from Lat. *chichorium*; Gr. *κίχῳριον* (*chichōrian*); *κίχῳρα* (*chichōra*) = succory.] [SUCCOARY.]

**Bot. & Comm.:** The root of the *Cichorium intybus*, Wild Succory or Chicory. The plant is cultivated in various parts of England and Europe and is also raised in California. The roots were formerly used medicinally, possessing properties resembling those of the Dandelion. The root roasted has been employed as a substitute for coffee for more than a century. It is now used extensively as a mixture with genuine coffee, but is regarded as an adulterant, and by the Adulteration Act the seller is bound to acquaint the purchaser

CHICORY.

with the fact that the compound is sold not as genuine coffee, but as a mixture of chicory and coffee. Its presence is easily detected by the microscope, and by the brown colour which is immediately produced when a few grains are thrown into cold water. Chicory root is heated in iron cylinders, which are kept revolving as in the roasting of coffee. In this country about two pounds of lard are added to every hundred-weight of the kiln-dried root during the roasting process. In France butter is used. By this a lustre and colour resembling that of coffee is imparted to it. When roasted the chicory is ground to powder and mixed with the coffee. Chicory contains some saccharine matter, but otherwise does not serve to supply the animal economy with any useful ingredient. Its extensive use sometimes produces diarrhoea. The prepared chicory gives a deep brown color to water, when an infusion is made, and it is this property which makes it valuable for the adulteration of coffee, giving an artificial appearance of strength. As in the case of many other adulterants, chicory itself is sometimes adulterated, the adulterants being roasted pulse, damaged wheat, parsnips, carrots, logwood and mahogany dust, burnt sugar, dog-biscuit, and even baked livers of horses and bullocks. Venetian red and ruddle are used to colour it. (*Ure, dc.*)

**chî-côt** (t silent), s. [Fr.] The seed of a plant, *Moringa pterygosperma*.

*Shakesp.: Merchant of Venice*, l. 1.

\*3. Exceeding, extraordinary, very intimate or close.

"A froward man soweth strife, and a whisperer separateth chief friends."—Proverbs, xvi. 28.

¶ Formerly the word was used in the comparative and superlative degrees.

"He sometimes denied admission to the chiefest officers of the army."—Clarendon.

¶ Crabb thus distinguishes between chief, principal, and main: "Chief respects order and rank; principal has regard to importance and respectability; main to degree or quantity. We speak of a chief clerk, a commander in chief; the chief person in a city; but the principal people in a city; the principal circumstances in a narrative, and the main object." (Crabb: Eng. Synon.)

B. As substantive:

I. Ordinary Language:

\*1. The top, the highest part, the head.

"Upon the *chefe* of har chelle  
A padek prykettoe as a polle."  
Antique of Ardour, ix.

2. The head or leader of any number of persons, as of an army, a political or social union, &c.

3. A prime mover or actor; the principal agent.

"I was the *chief* that raised him to the crown,  
And I'll be *chief* to bring him down again."  
Shakspeare: Henry VI., iii. 3.

II. Technically:

1. Old law:

(1) Used as a translation of the Latin *caput*. Persons who held their land by personal service direct from the king were called *tenanta in chief*, in Latin, *in capite*, in French, *en chef*. " . . . licence of alienation to be made of lands holden in *chief*."—Bacon.

(2) Applied loosely to the holding of any estate direct from any person.

"I shall be proud to hold my dependences on you in *chief*, as I do part of my small fortune in Wiltshire."—Dryden.

2. Heraldry:

(1) As the head is the chief part of the man, so the head or principal part of the escutcheon is called the chief, or chief point. It contains the upper third of the field, and is determined by one line, either drawn straight, or *crenelled*, or indented. Sometimes one chief is borne upon another, which is called surmounting, and is usually expressed by a line drawn across the uppermost part of the chief. When a chief is charged with anything it is said to be on chief, but when a thing is borne on the top of the escutcheon it is said to be borne in chief.

CHIEF.

"The chief is so called of the French word *chef*, the head or upper part; this possesses the upper third part of the escutcheon."—Peacock: On Drawing.

(2) The chief of an ordinary is a fess removed to the upper part of a coat.

¶ In chief:

1. Law: [II. 1].

2. Her.: [II. 2].

3. First, before all. Used in such compounds as *commander-in-chief*, *general-in-chief*.

¶ Crabb thus distinguishes between chief, leader, chieftain, and head: "Chief respects precedence in civil matters; leader regards the direction of enterprises; *chieftain* is (or rather was once) employed for the superior in military rank; and *head* for the superior in general concerns. Among savages the chief of every tribe is a despotic prince within his own district. Factions and parties in a state, . . . must have their leaders. . . . Robbers have their *chieftains*, who plan and direct everything, having an unlimited power over the band. The heads of families were, in the primitive ages, the chiefs, who in conjunction regulated the affairs of state. Chiefs ought to have superiority of birth combined with talents for ruling; leaders and *chieftains* require a bold and enterprising spirit; heads should have talents for directing." (Crabb: Eng. Synon.)

† C. As adv.: Chiefly, especially.

"Then, issuing cheerful, to thy sport repair,  
Chief, should the western breeze curling spring."  
Thomson: Spring.

chil-blain, \* child-blain, \* child-blāne, s. [Eng. *chill*, and *blain* (q.v.).] A blain or sore on the hands or feet produced by cold, especially if the parts were previously much heated. There are three types of the disease. In the first or mildest, there are

redness and swellings, with much heat and itching. In the second the affected part becomes greatly swelled, and of a red or blue, or even of a purple, hue. In the third, or severest type, vesicles rise on the swollen skin, which become sores, discharging irritating matter. The disease affects young people more frequently than adults, and girls oftener than boys. A cure of mild chilblains may sometimes be effected if they be rubbed with snow or ice-water, and finally immersed in it till the pain and itching cease. This should be repeated several times a day, the affected parts being dried and enclosed in leather casings.

"I remembered the cure of chilblains when I was a boy (which may be called the children's gout), by burning at the fire."—*Sir W. Temple*.

**chil-blain**, *v.t.* [CHILBLAIN, *s.*] To affect with chilblains; to raise chilblains upon.

**A. As substantive:**

**I. Ordinary Language:**

**1. Literally:**

(1) A descendant in the first degree, whether male or female; a son or daughter.

(2) Extended to more remote descendants.

"Thus saith the Lord, Behold, a child shall be born unto the house of David, . . ."—*1 Kings* xii. 2.

(3) Applied, in the plural, especially in Scripture, to all the members of a race.

" . . . the children of Benjam, and the children of Gad, and the half tribe of Manasseh, built there an altar by Jordan."—*Josh.* xxii. 10.

(4) A young girl. (Obsolete, except in the provinces, and especially in Warwickshire.)

"Marry on 'a, a barme; a very pretty barme! A boy or a child, I wonder?"—*Shakesp.* *Winter's Tale*, iii. 3.

(5) A young person generally, irrespective of any relationship or connexion.

" . . . and his flesh came again like unto the flesh of a little child, and he was clean."—*1 Kings* v. 14.

† (6) [*CHILDE*.]

"And every child ware of leaves grene  
A fresh chaplet."—*Chaucer.* *Flower and Leaf*.

\* (7) A servant, a page. (*Scotch*.)

(8) A fellow, a person, irrespective of age. (*Scotch*.)

"They're fools that slawry like, and may be free;  
The childis may 'n knit up themselves for me."—*Ramsay.* *Poems*, li. 17.

**2. Figuratively:**

(1) *Relig.*: Child of God.

(a) One owned by God as His child.

"Ye are all the children of God by faith in Christ Jesus."—*Gal.* iii. 26.

(b) A baptized Christian.

"In Baptism, wherein I was made a member of Christ, the child of God."—*Church Catechism*.

(c) One who exhibits the character of a child; applied to—

(i) One who is weak in knowledge. (*Isaiah* iii. 12, *1 Cor.* xiv. 20.)

(ii) One who is young in grace. (*1 John* ii. 13.)

(iii) One who is humble, docile, and obedient as a child. (*Matt.* xviii. 3, 4.)

(2) One who in manners or disposition exhibits the characteristics of a very young person; one who is innocent or ignorant as a child.

(3) Used as a term of endearment, or affection.

" . . . Children, how hard is it for them that trust in riches to enter into the kingdom of God!"—*Mark* x. 24.

† (4) The result, product, or effect of anything.

" . . . this noble passion,  
Child of integrity, hath from my soul  
Wip'd the black scruples."—*Shakesp.* *Macbeth*, iv. 2.

† The plural was originally *cild* or *cildru*, and afterwards *childir*, *chilidre*, &c. The later addition of the plural suff. (*-en*) consequently makes the modern *children* really a double plural.

"Fyne childir he had."—*Lanslet*, p. 10.

† The word occurs frequently in Scripture, in phrases with little more meaning than *persons* or *people* attached or belonging to some specified class; as, *children of the flesh* = those whose affections are set on the world;

*children of the promise* = those to whose ancestors the promise had been made; *children of wrath* = those liable to the wrath of God; *children of disobedience* = disobedient persons, &c.

† To be with child:

**1. Lit.**: To be pregnant.

"Therhyle that hi is mid childre."—*Ayenbite*, p. 224.

\* **2. Fig.**: To be very anxious for anything.

"I sent my boy, who, like myself, is with child to see all strange thing."—*Pepys.* *Diary*, May 14, 1660.

*From a child*: From infancy.

"He that delightfully bringeth up his servant from a child shall have him become his son at the length."—*Prov.* xxiii. 21.

**II. Law**: Under seven a child is supposed to be incapable of committing felony. Between seven and fourteen it is held to be *doli incapax*, i.e. incapable of crime, whilst above fourteen it is *doli capax*, i.e. capable of crime. If, however, anything atrocious be done with obvious malice by a child, it may be held that *malitia supplet etatem*, malice supplies [the want of] age. The age at which a child can be sworn as a witness depends on the education it has received and its apparent comprehension of the nature and obligation of an oath.

**B. As adj.**: (See the compounds).

**child-bearing**, **\*ohild-beringe**, *a. & s.*

**A. As adj.**: Bearing or bringing forth children.

**B. As substantive:**

**child-crowing**, *s.*

*Med.*: The name popularly given to an affection of the larynx, of which the most remarkable feature is a peculiar crowing or hissing sound caused by the breath being drawn with more or less violence into the windpipe in the effort to remove some impediment, which is usually of a spasmodic character, existing in that organ. The disease is peculiar to childhood, and is caused by reflected irritation from worms, teething, and other disorders upon the muscles of the larynx, through the recurrent laryngeal and pneumogastric nerves. The symptoms, which are those of impending suffocation, are most alarming and must be relieved instantly, but the attack is seldom fatal. Child-crowing, technically called *laryngismus stridulus* (q.v.), is also known as false-croup, from its resemblance in some respects to that disease. True croup is, however, quite a distinct affection, and a much more formidable one.

"There is a sort of bastard croup . . . Spasmodic croup is the most common of its names. . . My late colleague, Dr. Ley, in a volume upon this curious disorder . . . adopts from Dr. Mason Good the appellation of *Laryngismus stridulus*. Dr. Gooch called it *child-crowing*, a homespun term which I much prefer. . . ."—*Watson.* *Principles and Practice of Physic*, lect. xiv.

I. Literally:

1. Having the characteristics or nature of a child; simple, innocent.

"... should find something engaging in the childish innocence of the Prince of Wales..."—*Macaulay: Hist. Eng.*, ch. xxiii.

2. Of pertaining to, or befitting a child.

"He will not blinch, that has a father's heart, To take in childish plays a childish part."  
Cooper: *Percivinus*, 144.

\* II. Figuratively:

1. Young, simple, or ignorant as a child; inexperienced.

2. (With an idea of contempt): Puerile, trifling.

"They have spoiled the walls with childish sentences, that consist often in a jangle of words."—*Addison: On Italy*.

Crabb thus distinguishes between *childish* and *infantine*: "What children do is frequently simple or foolish; what infants do is commonly pretty and engaging; therefore *childish* is taken in the bad and *infantine* in the good sense. *Childish* manners are very offensive to those who have ceased, according to their years, to be children; the *infantine* actions of some children evince a simplicity of character." (*Crabb: Eng. Synon.*)

† *child-*ish-ly**, adv. [Eng. *childish*; *-ly*.] In a childish or puerile manner; like a child.

\* *child-*ish-mind-éd**, a. [Eng. *childish*; *-mind-éd*.] Childish in disposition; simple, innocent.

Bot.: A genus of composite plants with yellow flowers. They are natives of Mexico.

chill, \* *chil*, \* *chele*, s. & a. [A.S. *cyle*, *cèle* = great cold, chilliness, from *chlan* = to cool, *cól* = cool; Dut. *kil* = a chill, *killen* = to chill, *koel* = cool; Sw. *kyla* = to chill, *kulen*, *kyllig* = chill, cool; Lat. *gelu* = frost.]

[COOL, CHELE.]

A. As substantive:

I. Ordinary Language:

1. Literally:

(1) The state of being moderately cold; chillness.

(2) A sudden sensation of coolness, generally accompanied with shivering; a sudden check to the circulation of heat.

*Chills and fever*: Fever and ague. (U.S.)

2. Fig.: A sudden check to warmth of manner or feeling; a discouragement.

II. Technically:

1. Painting: A dullness or dimness in a painting; also called *blowing*.

2. Iron Manuf.: A piece of iron introduced into a mould so as to rapidly cool the surface of molten iron which comes in contact therewith. Cast-iron, like steel, is hardened by rapid cooling, and softened by the prolongation of the cooling process. The extreme in the former direction gives chilled iron the hardness of hardened steel; the extreme in the direction of softness is obtained by prolonging the heat, abstracting the carbon from the cast-iron, reducing it to a nearly pure crystalline iron. [MALLEABLE IRON.]

The chilled cast-iron ploughshare has a hard under-surface, and the top wears away, leaving a comparatively thin edge of hardened metal. This resembles the natural provision in the teeth of rabbits, squirrels, and other rodents, whereby the enamel remains in advance of the softer portion of the tooth, keeping a sharp edge. (*Knighth*.)

B. As adjective:

I. Literally:

fáte, fát, fáre, amidst, whát, fáll, fáther; wé, wét, hère, camél, hër, thère; pine, pít, síre, sír, marine; gó, pót, or. wóre, wólf, wórk, whó, són; míte, cúb, cüre, únite, cür; rále, fáll; trý, Síryan. æ, œ = é. ey = á. qu = kw.

1. *Subj.*: Having a sensation of coolness; somewhat cold.

2. *Obj.*: Moderately cold; causing a sensation of coolness, generally accompanied with shivering; chilly.

II. *Figuratively*:

1. *Subj.*: Cold and reserved in manners, temper, or feeling; distant, formal.

"But he is *chill* to praise or blame."  
Tennyson: *The Two Voices*.

2. *Obj.*: Causing a discouragement to or checking warmth of feeling or manners; depressing, discouraging; distant, formal.

"Downward and ever downward, and deeper in age's chill valley."  
Longfellow: *Children of Lord's Supper*.

¶ Crabb thus distinguishes between *chill* and *cold*: "*Chill* expresses less than *cold*, that is to say, it expresses a degree of cold. The weather is often *chilly* in summer; but it is *cold* in winter. We speak of taking the *chill* off water when the *cold* is in part removed; and of a *chill* running through the frame when the *cold* begins to penetrate the frame that is in a state of warmth." (Crabb: *Eng. Synon.*)

**chill-cold**, *a.* Very cold.

"A *chill-cold* blond . . . fleets through my veins."  
Davies: *Muse's Sacr.*, p. 49. (Davies.)

**chill-hardening**, *s.* A mode of tempering steel-cutting instruments, by exposing the red-hot metal to a blast of cold air.

**chill**, \* **chyl-lyn**, *v.t. & t.* [CHILL, *s.*]

*A. Transitive*:

I. *Ordinary Language*:

1. *Literally*:

(1) To make cold or chilly; to strike with a chill.

" . . . when a body is said to be *chilled* . . ."—*Tyndall: Frag. of Science* (3rd ed.), VIII, 2, p. 174.

(2) To blast with cold.

" . . . by snows homodrate *chill'd*."  
Blackmore.

2. *Fig.*: To "check warmth of feeling or manners; to discourage, to depress; to damp the spirits.

"As an icy touch had *chill'd* its heart."  
Bemans: *A Tale of the Secret Tribunal*.

II. *Iron Manuf.*: To cause the surface of molten iron to cool suddenly by the introduction of a piece of cold iron, so as to increase the hardness. [CHILL, *s.*, B. 2.]

† *B. Intransitive*:

1. *Lit.*: To become cold, to shiver.

2. *Fig.*: To become cold, distant, or formal in manners or feeling; to be discouraged, disheartened, or downcast.

"Al changed her cheer and *chilled* at the heart."  
Allie: *Poems; Patience*, 367.

**chilled**, *pa. par. & a.* [CHILL, *v.*]

*A. As pa. par.*: (See the verb.)

*B. As adjective*:

\* 1. *Ord. Lang.*: Chill, cold.

"He said, and Friam's aged joints with *chilled* fear did shake."  
Chapman, (Rich.)

2. *Technically*:

(1) *Iron Manuf.*: Made of iron which has been hardened by chilling. Chilled castings are used for axle-boxes, iron wheel-buhs, rolls for iron-rolling mills, ploughshares, and mould-boards, stamp-heads, heavy hammers, and anvils for some kinds of work, and in many other instances. (*Knight*.)

(2) *Painting*: Dimmed, clouded; affected with blooming.

**chilled-shot**, *s.*

*Mil.*: Shot of very rapidly cooled or chilled cast-iron, which thus acquires a hardness of nearly equal efficiency with steel for penetrating iron plates, and yet produced at a very much less cost. Chilled-shot break up on passing through the plates, and the fragments are very destructive on crowded decks.

**chill'-li**, *s.* [Sp. *chill*, *chile*.]

1. The popular name of the American Red-pepper.

2. The pod or fruit of the Capsicum (q.v.). *Spec.*, the dried ripe pod of *Capsicum fastigiatum*.

"*Chilies* . . . form the basis of Cayenne pepper and curry powder."—*Waterson: Cyclopaedia of Commerce*.

*Chill* or *Chili Vinegar*: Vinegar flavoured with Capsicum pods.

**chilli** (or **chili**) **sauce**, *s.* A spicy condimental sauce, variously composed.

**chill'-li-nëss**, *s.* [Eng. *chilly*; -ness.]

I. *Literally*:

1. The quality or state of being chilly.

"The *chilliness* of their waters."—*Locke: Education*, pt. II.

2. Coolness; a moderate degree of cold.

II. *Fig.*: A sensation of discouragement or depression.

**chill'-lîng**, \* **chyl-lyâge**, *pr. par., a., & s.* [CHILL, *v.*]

*A. & B. As pr. par. & particip. adj.*: (See the verb.)

*C. As substantive*:

1. *Ordinary Language*:

(1) The act of cooling or making chill (*lit. & fig.*).

(2) The act or state of shivering.

"*Chillyng* of teth or other lyke. *Frigidor*."—*Prompt. Par.*

2. *Iron Manuf.*: The process of chill-hardening. [CHILL, *s.*, II. 2.]

**Chill'-lîng-ham**, *e.* [A proper name, see A.]

*A. As substantive*:

*Geog.*: A parish in Northumberland, on the river Till, about four and a half miles south of Wooler.

*B. As adj.*: In any way pertaining to or connected with the parish described under A.

**Chillingham bulls**, **Chillingham cattle**, *s. pl.* Certain bulls, or rather cattle of both sexes, preserved in a semi-wild state in Chillingham Park. They are pure white, except the muzzle, which is black, and the horns, which are tipped with black. The white colour on the body, however, is artificially produced, the owner causing all spotted calves to be killed. They are now generally believed to be the descendants of the mountain bull or Urus which were wild in Gaul at the time of Caesar's invasion, and the stock whence our larger cattle have been derived. Some writers have thought them descended from ordinary cattle which have become wild, and others have made them a distinct species, *Bos Scoticus*. Professor W. Boyd Dawkins considers them the last surviving representatives of the gigantic Urus of the Pleistocene period, reduced in size and modified in every respect by their small range and their contact with man. (*Q. J. Geol. Soc.*, vol. xxii. (1866), pt. i., p. 398.)

† **chill'-lîng-ly**, *adv.* [Eng. *chilling*; -ly.] In a chilling manner.

" . . . a qualification which must then have fallen *chillingly* on the ears of belligerent Tories."—*Daily News*, April 19, 1874.

\* **chill'-nëss**, \* **chil'-nëss**, \* **chil'-nësse**, *s.* [Eng. *chill*; -ness.]

1. *Lit.*: A sensation of coldness, a chill.

"Lend their weaker Ore  
To conquer the night's *chillness*."  
Habington: *Castara*, p. 11.

2. *Fig.*: A feeling of discouragement or depression.

**chill'-y**, *a. & adv.* [Eng. *chill*; -y.]

*A. As adjective*:

I. *Literally*:

1. Feeling a sensation of coldness or chilliness.

"Sir Charles, I'm as *chilly* as a bottle of port in a hard frost."—*Colman the younger: The Poor Gentleman*, iv. 1.

2. Causing a sensation of coldness or chilliness.

"My shudd'ring limbs."  
Philips.

II. *Fig.*: Cold in manners, distant, cool.

† *B. As adv.*: In a chill or cool manner (*lit. & fig.*).

**chil'-lô-car'-pûs**, *s.* [Gr. *χείλος* (*cheilos*) = a lip, and *καρπός* (*karpos*) = a fruit.]

*Bot.*: An imperfectly known genus of climbing plants, natives of Java, having a salver-shaped corolla, capitate stigmas, and capsular fruit. The genus is referred to the Apocynaceae. (*Treas. of Bot.*)

**chil'-ô-chil'-ô**, *s.* [Gr. *χίλος* (*chilos*) = fodder, and *χλόη* (*chloë*) or *χλόα* (*chloa*) = young grass.]

*Bot.*: A genus of plants of the order Gramineæ, allied to Phleum and Phalaris.

**chil'-lô'-di'-a**, *s.* [Gr. *χείλος* (*cheilos*) = a lip, and *ὀδούς* (*odontos*) = a tooth.]

*Bot.*: A genus of Labiata, consisting of a single species from New Holland. It is a branched glabrous or slightly pubescent shrub. In habit and structure the genus is very near Prostanthera, differing only in having no appendages to the anther cell. (*Treas. of Bot.*)

**chil'-lô-dôn**, *s.* [Gr. *χείλος* (*cheilos*) = a lip, and *ὀδούς* (*odontos*), genit. *ὀδοντος* (*odontos*) = a tooth.]

*Zool.*: A genus of Infusoria, of the family Trachelina, having the body covered with cilia; mouth with teeth arranged to the form of a tube; fore part of the head produced into a broad membranous or ear-like lip. The cilia form longitudinal rows. (*Griff. & Henfrey*.)

**chil'-lô-glôt'-tis**, *s.* [Gr. *χείλος* (*cheilos*) = a lip, and *γλώσσα* (*glôssa*) or *γλώττα* (*glôtta*) = a tongue.]

*Bot.*: A small genus of terrestrial Australasian orchids, bearing radical leaves in pairs, and solitary paleate reddish flowers.

**chil'-lôg-nâth'-y-form**, *a.* [Eng. *chilognath*, and *form*.]

*Entom.*: A term applied to the larvae of those coleopterous insects which are herbivorous, elongated, and sub-cylindrical, and resemble the genus *Julia*.

**chil'-lôg-nâth** (*Eng.*), **chil'-ôg-na-tha**, **chil'-lôg-na-thëg** (*Mod. Lat.*), *s. pl.* [Gr. *χείλος* (*cheilos*) = a lip, and *γνάθος* (*gnathos*) = a jaw.]

1. *Entom.*: An order of the Myriapoda, or Centipedes, distinguished by having the two mandibles, and the tongue so united as to form a large lower lip; antennæ short with six or seven joints, body convexly cylindrical, legs short and slender. The segments of the body, from the fourth, fifth, or sixth from the head, have each of them two pair of legs. It contains the Millepedes and Galleyworms. At least seventy species are known. The order is also called Diplopoda. They are found beneath the bark of trees and in humid places, and feed both upon animal and vegetable productions.

2. *Palæont.*: The order begins, as far as is known, in the Carboniferous period.

**chil'-ô-gram**, *s.* [KILOGRAM.]

† **chil'-lô-ma**, *s.* [Gr. *χείλωμα* (*cheilôma*) = a lip, rim, or edge. (*Septuagint*.)]

*Zool.*: The upper lip of a mammal when it is tumid, and continued uninterruptedly from the nostril. A good example of this may be seen in the camel.

**chil'-lôm'-ô-nâs**, *s.* [Gr. *χείλος* (*cheilos*) = a lip, and *μόνος* (*monos*) = single, solitary.]

*Zool.*: A genus of Infusoria, of the family Monadina, free swimming or temporarily fixed; mouth oblique or lateral, and surmounted by a lip; there are two flagella, one of which is convolute and adherent.

**Chil'-lô-ni-an**, **Chil'-lôn'-yë**, *a.* [From Lat. *Chilo*], and Eng. aff. *-ian*, *-ic*.] Relating to Chilo, one of the seven ages of Greece. (*Smart in Worcester*.)

**chil'-lôp'-ô-dâ** (*Lat.*), **chil'-lô-pôds** (*Eng.*), *s. pl.* [Gr. *χίλιος* (*chilias*) = a thousand, and *πούς* (*πους*), genit. *ποδός* (*podos*) = a foot.]

1. *Entom.*: An order of Myriapoda or Centipedes, the genera of which have elongated antennæ, with fourteen to forty or more joints, a depressed body covered with coriaceous plates, and legs of variable length. Each segment of the body has a single pair of legs. The order contains the Centipedes proper as distinguished from Millepeda, &c. It is sometimes called also Symphyla. Nearly 100 species are known. They all run fast, are carnivorous, and nocturnal. They are principally found beneath stones, the bark of trees, and in loose, humid earth.

2. *Palæont.*: No species of the order has yet been found fossil.

**chil'-ô-pôd'-y-form**, *a.* [Eng. *chilopod*, -y connective, and *form*.]

*Entom.*: A term applied to the larvae of Coleopterous insects which are subhexapod, with a long, linear, depressed body, and bear a resemblance to the genus Scolopendrella. (*Kirby & Spence: Entomology*, III. xxix. p. 166.)

**chil**, **bôy**; **pôut**, **jôwi**; **cat**, **pell**, **chorns**, **chin**, **bench**; **go**, **gem**; **thin**, **þis**; **sin**, **aþ**; **expect**, **Xenophon**, **exist**. **ph = ç**

† **chil-ô-pôd-î-mor-phous**, *a.* [Eng. *chilopod*; *-i-* connective; Gr. *μορφή* (*morphê*) = form; Eng. suff. *-ous*.] The same as **CHILOPODIIFORM** (q.v.).

"Those [larvæ] being the most perfect chilopodimorphous of the whole."—*Kirby & Spence: Entomology*, III. XLX., p. 164.

**chil-ôp-sis**, *s.* [Gr. *χείλος* (*cheilos*) = a lip, *ὄψ* (*ops*), genit. *ὄψης* (*opsis*) = face, appearance.]

*Bot.*: A genus of Bignonaceæ, consisting of a single species of erect branching shrubs from Mexico. It has long linear entire alternate leaves, and beautiful flowers in terminal, dense, spicate racemes. (*Treas. of Bot.*)

**Chil-térn**, *s. & a.* [A proper name, see A.]

*A. As substantive:*

*Geog.*: The name of certain beech-clad hills in Buckinghamshire, formerly infested by robbers. To keep these in check, a functionary was appointed, who was called Steward of the *Chiltern Hundreds* (q.v.).

*B. As adj.*: Pertaining to, or in any way connected with, the hills described under A.

**Chiltern hundreds**, *s.* A hilly district in Buckinghamshire, belonging to the Crown. The office of Steward of this district, although the duties have long ceased to be more than nominal, is still retained for a special purpose. No Member of Parliament is allowed to resign his seat, and if he wishes to vacate it he can only do so by accepting some office of profit under the Crown. The Stewardship of the Chiltern Hundreds is therefore applied for by any member desiring to retire, and its acceptance necessarily vacates his seat.

**chil-tôn-ite**, *s.* [Etymol. doubtful. Apparently named after a Mr. Chilton.]

*Min.*: The same as *Prehnite* (q.v.).

**chi-mæ-ra**, *s.* [Lat. *chimæra*; Gr. *χαιμαίρα* (*chimaíra*) = (1) a she-goat, (2) a fire-spouting monster with a lion's head, a serpent's tail, and a goat's body, killed by Bellerophon.] [**CHIMERA**.]

1. *Myth.*: [**CHIMERA**.]

2. *Ichthy.*: A genus of fishes, the type of the family *Chimæridæ*, having the tail ending in a slender thread, the head pointed, and spiracle single. *Chimæra monstrosa* is sometimes called the *Sea-monster*, and sometimes the King of the Herrings. It is a native of the Northern Seas, from which it straggles to Britain and follows shoals of herrings as they move from the deep sea towards the shore. [**CHIMÆRIDÆ**.]

**chi-mær-î-dæ**, *a pl.* [Lat. *chimæra*]; fem. pl. suff. *-idæ*.]

1. *Ichthy.*: A family of cartilaginous fishes, distinguished by the head being furnished with appendages, and the tail terminating in a point. It contains two species, *Chimæra* and *Calorhynchus*.

2. *Palæont.*: The *Chimæridæ* begin with the Devonian rocks.

**chi-mær-ôid**, *a. & s.* [Lat. *chimæra*; and Gr. *εἶδος* (*eidos*) = form, appearance.]

*A. As adj.*: Pertaining to, or resembling the *Chimæridæ*.

*B. As subst.*: A fish belonging to the family *Chimæridæ*, or akin to *Chimæra*.

"In the Mesozoic and Kainozoic deposits, the remains of *Chimæridæ* are not extremely rare, but they consist only of the jaws and teeth, along with fish-scales or lethyodorulites."—*Nicholson's Palæont.*, II. 154.

**chi-mæph-î-l-â**, *s.* [Gr. *χέιμα* (*cheima*) = winter, and *φιλέω* (*philéō*) = to love; and from the leaves retaining their green colour during winter.]

*Bot.*: A small genus of *Pyrolaceæ*, natives of Europe, Siberia, and North America. The plants, called Winter-greens in America, have woody subterranean shoots, and a short stem with a tuft of thick, shining, evergreen leaves, oblong, wedge-shaped, or lanceolate. The pedicels are one-flowered, bearing handsome bell-shaped, white flowers, tinged with purplish-red, and very sweet-scented. (*Treas. of Bot.*) *Chimaphila umbellata* is a most active diuretic. *C. maculata* is used in North America in stranguary and nephritis. (*Lindley*.)

**chi-mæph-î-l-în**, *s.* [Mod. Lat. *chimaphila*]; *-în*.]

*Chem.*: The name given to the tasteless, inodoriferous crystals found in the leaves of *Chimaphila umbellata*.

**chi-mær-rhis**, *s.* [Gr. *χεῖμαρος* (*cheimarros*) = a torrent; and from the plant growing on the banks of torrents.]

*Bot.*: Riverwood, a genus of white-wooded American trees, belonging to the order Rubiacæ. The wood is used for beams and rafters.

\* **chimb**, \* **chýmbe**, *s.* [A.S. *cim*, found in *cimstan* = a base; Sw. *kim*, *kimb*, *kinme*; Dut. *kim*, *kinme*.]

1. *Coppering*: The edge of a cask or tub, formed by the ends of the staves.

"The stream of ty now droppeth on the *chymbe*."—*Chaucer: C. T.*, 3, 592.

2. *Naut.*: That part of the waterway which is left above the deck, and hollowed out to form a channel.

\* **chím-blóy**, *s.* [**CHIMEY**.]

**chím-dô-ráz-ite**, *s.* [From *Chimborszo*, where it is found, and Eng. suff. *-ite* (*Min.*).] *Min.*: The same as *ARAONITE* (q.v.).

**chime** (1), \* **chímbe**, \* **chymbe**, \* **chymme**, *s.* [A corruption of *chimbale* or *chymbale*, a dialectic form of O. Fr. *cimbale* or *cymbale* = a cymbal; Lat. *cybalum*; Gr. *κύβαλον* (*kumbalon*).]

*A. Ordinary Language:*

*I. Literally:*

\* 1. A cymbal; probably used also for a bell. (See extract.)

"As a *chymbe* or a brassen belle."—*Curios Mundí*, 12, 198.

2. The harmonic or consonant sound of several instruments or bells. [B. I.]

† *II. Figuratively:*

1. Harmonised sounds of any instrument of music.

"The Minstrel waked his harp—three times Across the well-known martial *chime*."—*Scott: The Lady of the Lake*, II. 7.

2. Any sound in harmony or accord.

"A happy *chime* of many dancing feet."—*Bernays: Familis*.

3. A correspondence in sound or proportion.

"Life and time Ring all their joys in one dull *chime*."—*Scott: The Bride of Triermain*, III. 2.

*B. Technically:*

1. *Musio:*

(1) A number of bells attuned to each other in diatonic succession. A peal consists of three or more bells in harmonic succession, which may be rung successively or simultaneously, but will not admit of a tune being played upon them. Thus a set embracing the eight notes of the common scale will constitute a *chime*, while a set upon the first, third, fifth, and eighth of the scale would be a peal. The smallest number of bells that can be said to constitute a *chime* is five, but the number may be increased indefinitely. The usual number is at least nine, which number embraces the eight notes of the natural scale, with the addition of a flat seventh. Apparatus for ringing chimes is said to have been first made at Alost, in East Flanders (Belgium), in 1487. Potthoff, the chime-player of Amsterdam, in the latter part of the 18th century, played pianoforte music with facility. Each key required a force equal to two pounds' weight. (*Knight*.)

(2) An arrangement of bells and strikers in an organ or musical box, operated in harmony with the reeds, pipes, or tongues, as the case may be.

**chime-barrel**, *s.*

*Horol.*: A prolongation of the rim of a striking-wheel, which is furnished with pins, like the barrel of a musical-box, the pin lifting the tails of the hammers, which are set on one axis and strike their respective bells when set in motion.

**chime-bell**, \* **chymbe belle**, *s.* A bell or set of bells harmonised.

"His *chymbe belle* he doth rynga."—*Alliander*, 1, 852.

**chime** (2), *s.* [**CHIME**.]

\* **chime** (3), *s.* [**CHIME**.]

**chime**, \* **chî-men**, \* **chy-myn**, \* **chímbe**, *v. & t.* [**CHIME** (1), *s.*]

*A. Intransitive:*

*I. Literally:*

1. To sound in harmony or accord; to give out a sound in harmony, as bells, they meanwhile remaining unmoved. It is opposed to

ringing, in which the bell is raised, i.e. swung round. (*Stainer & Barrett*)

2. To cause bells to ring in harmony or accord.

"*Chymyn* or chenzen wythe belly."—*Vintilla: Prompt. Parv.*

*II. Figuratively:*

\* 1. To correspond or accord in rotation or proportion.

"Father and son, husband and wife, and such other correlative terms, do belong one to another; and, through custom, do really *chime*, and answer one another, in people's memories."—*Locke*.

2. To agree, suit, or accord with.

"Any sect, whose reasonings, interpretation, and language, I have been used to, will, of course, make all *chime* that way . . ."—*Locke*.

3. To join or fall in with in accord; to join or interfere in a conversation; often followed by *in with*.

"He not only sat quietly and heard his father rattle at, but often *chimed* in with the discourse."—*Arbuthnot: History of John Bull*.

\* 4. To make jingling rhymes.

\* 5. To clatter, to chatter.

"The sely tonge may wel rynga and *chímbe* Of wretchednes that passed is ful yore."—*Chaucer: C. T.*, 3, 594.

† 6. To give utterance to any harmonious sounds.

"Before the song of those who *chime* for ever After the chimeing of the eternal sphere."—*Longfellow: Dante's Purgatorio*, XXX-XXXI.

*B. Transitive:*

*I. Literally:*

1. To play a tune on bells, either by machinery or by hand, by means of hammers, or swinging the clappers, the bell remaining unmoved. It is opposed to ringing in which the bells are raised, that is, swung round. (*Stainer & Barrett*.)

2. To cause to sound in harmony.

\* *II. Fig.*: To utter harmoniously.

"Let little Wordsworth *chime* his childish verse, And brother Coleridge toll the bells at nurse."—*Byron: English Bards and Scotch Reviewers*.

**chimed**, *pa. par. or a.* [**CHIME**, *v.*]

**chím-êr**, *s.* [Eng. *chime*]; *-er*.] One who or that which *chimes*.

**chi-môr-a**, **chi-mær-a**, *s.* [Lat. *chimæra*; Gr. *χαιμαίρα* (*chimaíra*).] [**CHIMERA**.]

1. *Myth.*: A fabulous fire-breathing monster, with a lion's head, serpent's tail, and goat's middle, killed by Bellerophon. According to Hesiod, it was the daughter of Typhaon and Echidris, with the heads of a lion, goat, and serpent.

2. *Ord. Lang. (Fig.)*: Any vain and idle fancy; a foolish and unreal creature of the imagination.

"Thou, whose whole existence hitherto was a *chimers* and scenic show, at length becomest a reality."—*Carlyle: French Revolution*, pt. 1, bk. 1, ch. 1v.

2. A fire-place, a stove, a hearth.  
"A schîmny of charcole to chaufen the knyghte."  
*Arthur of Arthur*, xxxv.

3. The flue, vent, or passage through which the smoke escapes from the fire into the open air.

4. A tube of glass placed over the flame of a lamp to increase the draught, improve the combustion, and protect the flame.

5. The portion of the flue standing above the roof. [CHIMNEY-SHAFT.]

II. *Hist.*: Down to the thirteenth century, the people seem to have been generally destitute of chimneys. The open hole for the emission of smoke is referred to in Herodotus, viii. 137.—"Now it happened that the sun was shining down the chimney into the room where they were; . . . the boy, who had a knife in his hand, made a mark with it round

the sunshine on the floor of the room." In the Middle Ages people made fires in their house in a hole or pit in the centre of the floor, under an opening formed in the roof; and when the family lay down for the night—for it can hardly be said that they went to bed—the hole was closed by a cover of wood. The laws of the feudal ages (*couvre-feu* of the French; *curfew-bell* of the English) ordered that such fires should be extinguished at a certain time in the evening. William I. introduced this law into England in 1063, and fixed the *ignitiegium* at seven in the evening. The law was abolished by Henry I. in 1100. Chimneys, in the modern sense, were not common before the reign of Elizabeth. Thus Harrison, in his *Description of England* (ed. Furnivall), i. 338, says: "Now have we manle chimnies; and yet our tenderlings complain of rheumes, catarrhe, and poses [colds in the head]; then had we nune but reredosses [open hearths]; and our heads did never ake." A tax, called *Chimney-money* (q. v.), was imposed on each hearth or stove in a house in the reign of Charles II., and was abolished in the reign of William and Mary.

The following are the names of the various parts of the chimney: The opening into the room is the fireplace. The floor of the fireplace is the hearth. The paved portion in front of the hearth is the slab. At the back of the fireplace is the fire-back. The flaring sides of the fireplace are the covings. The vertical sides of the opening, a part of the wall of the apartment, are the jambs. The chimney-piece is the ornamental dressing around the jambs and mantel. The entablature resting on the latter is the mantel. The mantel-shelf, or mantel-piece, rests thereupon. The whole hollow space from the fireplace to the top of the wall is the funnel, or chimney-hood. The contracting portion of the funnel is the gathering. The narrowest part is the throat. The throat is closed (at times) by a damper. Above this is the flue. The wall above the mantel against the flue is the breast. The chimney above the roof is the shaft. This, in England, is usually surmounted by a chimney-pot, and that frequently by a hood, vase, or cowl. A cluster of chimneys is a stack. A chimney-board closes the fireplace in summer. A ciper-tunnel is a false chimney placed on a house as an ornament or to balance thins. [Knight.]

B. *As adjective*: (See the compounds).

• **chîmney-arch**, s. An arch turned over the fireplace.

• **chîmney-board**, s. A piece of board used to close up the fireplace in summer.

• **chîmney-brace**, **chîmley-brace**, s. The mantel-shelf. [Scotch.]

• **chîmney-cap**, s.

1. An abacus or cornice forming a crowning termination for a chimney.

2. A device to render more certain the expulsion of smoke, by presenting the exit aperture to leeward, or by a rotatory device. [COWL.]

• **chîmney-checks**, **chîmley-checks**, s. pl. The jambs of a chimney-piece.

• **chîmney-collar**, s. A device to prevent the leakage of rain around a chimney-stack where it protrudes through a roof. The slates or shingles lie upon the slanting plates, and upright plates lie closely against the bricks.

• **chîmney-flue**, s. [CHIMNEY, S.]

• **chîmney-hook**, s. A hook suspended in a chimney from which to hang pots over the fire.

• **chîmney-jack**, s. A rotating chimney-head; a kind of revolving cowl.

• **chîmney-jambs**, s. pl. The jambs of the fireplace. [JAMB.]

• **chîmney-man**, s. An officer appointed to collect chimney-money.

• **chîmney-money**, s.

*Old Law*: A tax paid for each chimney in a house. It was imposed by Act 14, Chas. II., c. 2, which enacted that every hearth and stove of every dwelling-house, "except such as pay not to church and poor, should pay two shillings per annum at Michaelmas and Lady-day." The tax was abolished in the reign of William and Mary. It was also called *HEARTH-MONEY*.

• **chîmney-nook**, **chîmley-neuck**, a. [Eng. *chimney*; Scotch & Prov. Eng. *chîmley*, and *neuck* = nook.] The corner of the fireplace, the fireside.

• **chîmney-piece**, s. The ornamental frame round a fireplace, consisting of jambs and mantel.

• **chîmney-shaft**, s. The portion of the chimney carried up above the roof.

• **chîmney-swallow**, s.

*Ornith.*: A species of swallow, *Hirundo rustica*, so called from its selecting chimneys, outhouses, ruins, &c., as the favourite sites for its nests. The forehead and throat are of a reddish-brown.

"The martin arrives in this country a little later than the *chîmney-swallow*."—*R. Litchby: Popular History of British Eggs.*

• **chîmney-sweep**, s.

1. *Ord. Lang.*: A man whose occupation it is to clean the flues of chimneys of the accumulated soot.

2. *Bot.* (*pl. Chimney-sweeps*): The same as CHIMNEY-SWEEPER, II. 2.

• **chîmney-sweeper**, s.

I. *Ordinary Language*:

1. *Literally*:

(1) A chimney-sweep.

"To look like her, are *chîmney-sweepers* black."  
*Shakesp.: Love's Labour's Lost*, IV. 4.

(2) A machine for sweeping chimneys. It was invented in England by Smart, 1805, to supersede the climbing boys, who were so cruelly treated. A brush of rattan is fixed on the end of a rod which consists of jointed sections of cane.

\* 2. *Fig.*: Used proverbially for any one of a mean occupation.

"Golden lads and girls all must,  
As *chîmney-sweepers*, come to dust."  
*Shakesp.: Cymbeline*, IV. 2.

II. *Technically*:

1. *Law*: The 28 Geo. III. c. 48, and 4 and 5 Wil. IV., which passed on 25th July, 1834, regulated the occupation of chimney-sweepers and their apprentices, as well as providing for the safer construction of chimneys and flues. It prohibited the apprenticing of children under ten years old to chimney-sweepers.

2. *Botany*:

(1) The heads of *Plantago lanceolata*. (*Britt. & Holland.*)

(2) *Luzula campestris*. (*Britt. & Holland.*)

*Chîmney-sweeper's Cancer*:

*Med.*: A disease, also called *Soot-wart*, or *Chancercroci*.

• **chîmney-top**, s.

1. *Ord. Lang.*: The top of a chimney; a chimney-cap or cowl, a chimney-pot.

"Many a time and oft  
Have you climb'd up to walls and battlements,  
To towers and windows, yea, to *chîmney-tops*."  
*Shakesp.: Julius Cæsar*, I. 1.

2. *Music*: In organ building, a metallic mouthpiece whose otherwise closed upper end has an open tube of small dimension, which allows a part of the air to escape and has the effect of sharpening the note. [MOUTH-PIPE.]

• **chîmney-valve**, s. A device of Dr. Franklin for withdrawing the foul air from an apartment by means of the upward draft in the chimney. In its simplest form it consists merely of a metallic frame fitted in an aperture in the chimney and having a suspended flap opening inwardly to the chimney which allows a current to pass in that direction, but shuts off a down-draft into the room.

• **chî-mô-nân'-thûs**, s. [Gr. *χέμων* (*chémôn*) = winter, and *άνθος* (*anthos*) = a flower; in reference to its early flowering.]

*Bot.*: A genus of plants belonging to the Calycanthaceæ family, and consisting of a single species, the Japan Allspice, *Chimonanthus*

bôn, bôy; pôt, jôwl; oat, çell, chorus, çhîn, bench; go, gêm; thin, thîs; sin, aç; expect, Xenophon, exist. -îng. -cian, -tian = shàn. -tion, -sion = shûn; -tîon, -sîon = zhûn. -cious, -tious, -sious = shûs. -ble, -dle, &c. = bôl, del.

*fragnans*, well known in gardens for its early flowering and the sweet scent of its blossoms. It was introduced from China in 1766. It is a much-branched shrub, and is generally treated as a wall-plant in gardens. The flowers are sessile, about an inch in diameter, made up of a large number of pale yellow, waxy petals arranged in several rows. They appear in mild winters about Christmas, and last for a long time. (*Treas. of Bot.*)

**chim-pán-zee, \*chim-pán-só, s.** [Fr. *chimpanzé*, from the native Guinea name.]

**Zool.:** The popular name of either of the two species of anthropoid apes of the genus *Anthropopithecus*, from tropical Africa. (The generic name *Troglydotes* formerly used for these animals must be dropped, as it properly belongs to a genus of birds.) The chimpanzees are large, semi-arboreal anthropoids, with very long arms, and can assume a nearly erect posture, though when on the ground their favourite mode of progression is a kind of shambling canter. The Common Chimpanzee (*A. troglodytes*) is the best known species; of the other, the Bald Chimpanzee, *A. calvus* (assumed to be the *Troglydotes calvus* of Du Chaillu), only two examples have yet (1893) been brought to Europe. One of these, the famous "Sally," lived in the Gardens of the Zoological Society, Regent's Park, for a period of eight years. (*Proc. Zool. Soc.*, 1885, p. 673; 1889, p. 816.)

B. *As substantive*:

- 1. A native of Chins.
- 2. The language of Chins.

**Chinese architecture**. The architecture of China had its rise from Indian art introduced with the worship of Buddha. But diversities of treatment soon appeared, and instead of the Indian dagoba arose a tower-like construction of many storeys, growing gradually smaller towards the top, and with each stage distinctly marked, and covered with many-coloured curved roofs, to which bells were attached. These edifices were, for the most part, octagonal, and were constructed for religious purposes. Chinese structures have nothing durable about them, wood forming an essential element in their construction. They are more remarkable for their elegance and slender proportions than for size. The roofs are especially characteristic, the most striking peculiarities being that they are always curved, and have figures on them in high relief, as well as at the corners, from which hang bells, and that they are decorated with fantastic embellishments, such as dragons, &c. The Chinese do not possess the art of arching large spaces, and consequently numerous columns are introduced for the support of the ceilings and roofs; these are of wood, sometimes carved, but always painted. (*Rosengarten*, &c.)

**Chinese-balance**, *s.* A form of the steelyard having four points of suspension,

and as many quadrated sides to the weight-arm of the lever. [STEELYARD.]

**Chinese-blue**, *s.* A mixture of ultramarine, or of cobalt blue, with flake white. (*Weale*.)

**Chinese capstan**, *s.* A differential hoisting or hauling device, having a vertical axis, and therein only differing from the differential windlass (q.v.).

**Chinese-cherry**, *s.*

*Bot.*: *Cerasus chinensis*.

**Chinese-crab**, *s.*

**Chinese-fire**, *s.* A pyrotechnic composition, consisting of gunpowder, 16; nitre, 8; charcoal, 3; sulphur, 8; cast-iron borings (small), 10.

**Chinese-glue**, *s.* A superior glue and varnish, obtained from a species of algae, which abounds on the shores of China. When once dried it resists the action of water, and is used by the Chinese to fill up the lozenge-shaped interstices in the network of bamboos of which their windows are frequently constructed, as well as to strengthen and varnish the paper of their lanterns. (*Ogilvie*.)

**Chinese-grass**, *s.*

*Bot.*: [CHINA-GRASS.]

**Chinese indigo**, *s.* A plant, *Isatis indigo-titica*.

**Chinese lantern**, *s.* [LANTERN.]

**Chinese pavilion**, *s.* [So called from the usual shape.]

*Music*: A pole with several transverse brass plates of some crescent or fantastic form, generally terminating at top with a conical pavilion or hat. On all these parts are hung small bells, which the performer causes to jingle by shaking the instrument held vertically up and down. It is used only in military bands, and more for show than use. (*Victor de Pontigny, in Grove's Dict. Mus.*)

CHINESE PAVILION.

**Chinese pitcher-plant**, *s.* A pitcher plant, *Nepenthes phyllanthiflora*.

**Chinese stones**, *s. pl.* Certain stones consisting chiefly of silicate of alumina altered by heat so as to adapt the material to be used in making grotesque statuary.

**Chinese swallows' nests**, *s. pl.* These curious productions, which sell at such a high price in China, though they have no special points of recommendation beyond many other gelatinous ingredients in soups, were formerly supposed to be made of some species of the rose-spired Alga, as *Sphaerococcus lichenoides*; but this is now ascertained to be a mistake, and it is known that they are formed of a secretion from the mouth of the bird itself. (*Treas. of Bot.*)

**Chinese-tree**, *s.*

*Bot.*: *Paeonia Montan.*

**Chinese-varnish**, *s.* *Rhus verniciifera*.

**Chinese-wax**, *s.* A secretion from a tree grown in China. [CERVI CEROTATE.]

**Chinese-white**, *s.* White oxide of zinc.

**Chinese windlass**, *s.* A differential windlass, in which the cord winds off one part of the barrel and on to the other, the amount of absolute lift being governed by the difference in the diameters of the respective portions. It is a good contrivance in the respect that great power may be attained without making the axle so small as to be too weak for its work. [DIFFERENTIAL WINDLASS.]

**Chinese-yellow**, *s.* A very bright sulphuret of arsenic, formerly brought from China. (*Weale*.)

\* **chīn-gīl-ŷ**, \* **chīn-gīŷ**, *a.* [SHINGLY.]

chin-oi-dine, s. [Eng. & o. chin(ine) = quinine (q.v.); Gr. εἶδος (eidos) = an appearance, and Eng. suff. -ine (Chem.).]

Chem.: C<sub>20</sub>H<sub>24</sub>N<sub>2</sub>O<sub>2</sub> = Quinoidina = Amorphous quinine. A resinous mass contained in refuse of the quinine liquids. It is insoluble in water; soluble in alcohol and ether, also in dilute acids. It has powerful febrifuge properties.

chin-oi-line, s. [CHINGLINE.]

chin-ō-line, s. [From Eng. quin(ine); Lat. oleum = oil; and Eng. suff. -ine (Chem.).]

Chem.: C<sub>9</sub>H<sub>7</sub>N. A tertiary monamine formed by the distillation of quinine, cinchonine, strychnine, &c., with a concentrated solution of potash. It is a colourless oily basic liquid, boiling at 235°. It is slightly soluble in water, and dissolves in alcohol and ether.

chintz, v.t. [Probably from chintz (1), v.]

Naut.: To stop a seam temporarily by crowding in oakum with a knife or chisel. A slight calking.

chin'-sūng, pr. par. or a. [CHINESE.]

chinsing-iron, s.

Naut.: A calker's edge-tool or chisel for chinsing seams.

chintz, \*chintz, s. [Hinda. chhint = spotted cotton cloth; chhintā = a spot; chhintānd = to sprinkle. The simpler forms are chhit = chintz, a spot; chhitki = a small spot, a speck; chhitnā = to scatter, to sprinkle; Mod. Dnt. sits Gr. zitā. (Skeat.)] A cotton cloth gaily printed with designs of flowers, &c., in five or six different colours. It was a favourite in the time of Queen Anne, long before cotton print became cheap. The name, being highly respectable, has since been applied to goods lacking the graceful and artistic character of the genuine article. The chintzes of the Coromandel coast were celebrated in the time of Marco Polo, thirteenth century. They are mentioned also by Odoardo Barbosa, a Portuguese, who visited India soon after the passage of the Cape of Good Hope by Vasco da Gama:—"Great quantities of cotton cloths admirably painted, also some white and some striped, held in the highest estimation."

"Let a charming chintz, and Brussels lace, Wrap my cold limbs, and shade my lifeless face." Pope's Moral Essays, l. 248.

chi-ō cōc-ca, s. [Gr. χιών (chiōn) = snow; κόκκος (kokkos) = a berry.]

Bot.: The Snow-berry, a genus of the Cinchonaceae family, consisting of small shrubs, with a funnel-shaped, yellowish corolla, concealing the five stamens, which are provided with hairs. Ovary two-celled, with two inverted ovules. Fruit a berry with two seeds. (Treas. of Bot.) The root of *Chiococca angustifolia*, a woody herb, and that of *C. densifolia*, a trailing bush, are held by the people of Brazil to be a remedy for snake-bite.

chi-ō dēc-tōn, s. [Gr. χιών (chiōn) = snow, and δεκτός (dektos) = received, acceptable.]

Bot.: A genus of Lichens (tribe Graphidiet) of which one species, *Chiodacton myrtilloides*, has been found in Ireland; and its var. *sarniense* in the Channel Islands. (Griff. & Henfrey.)

chi-ō-lite, s. [Gr. χιών (chiōn) = snow; λίθος (lithos) = a stone.]

Min.: A tetragonal, snow-white mineral, with a somewhat resinous lustre, found in the Ilmen mountains near Miask. Compos.: Fluorine, 53.0; aluminum, 18.6; sodium, 23.4. Hardness, 4.0. Sp. gr., 2.72—2.898. (Dana.)

chi-ō-nān-thūs, s. [Gr. χιών (chiōn) = snow; άνθος (anthos) = a flower, in allusion to the colour of the flower.]

Bot.: The Snowdrop-tree of North America, or the Snow-flower, as the name implies, belongs to a genus of Gelseae, and is distinguished by its deciduous leaves, and the long, narrow, ribbon-like segments of the corolla. The fruit is a drupe like that of the olive. *Chionanthus virginica* is a deciduous shrub, or small tree, with large smooth leaves like those of a Magnolia, and bearing flowers in terminal panicles. It blossoms in this country in June, and is highly ornamental. (Treas. of Bot.)

chi-ō-nō, s. [Gr. χιόνεος (chioneos) = white as

snow; χιών (chiōn) = snow, in allusion to the colour of the cymes of white flowers.]

\* **chir'-ô-pläst**, *s.* [Gr. *χειροπλάστος* (*cheiroplastos*) = moulded or formed by hand; *χείρ* (*cheir*) = the hand; *πλάσσω* (*plassō*) = to mould, to form.] An instrument, or hand-director, as its name indicates, for training and exercising the hands, for giving them facility and command in playing music. It was invented by Professor John Bernard Logier, a native of Germany, and resident of London, who died about 1852. Patented about 1812. It consists of the position-frame, to keep the hands from wandering; the finger-guides, two movable brass frames each having five divisions; and the wrist-guide, to preserve the proper position of the wrist. The position-frame consisted of two parallel rails extending from one extremity of the keys to the other, and fastened to the pianoforte. This frame served as a line upon which the finger-guides

travelled; these guides were two movable brass frames, with five divisions for the fingers, and to each guide was attached a brass wire with a regulator, called the wrist-guide, by which the position of the wrist was preserved from inclination outwards. (*Stainer & Barrett*.)

**chir'-ôp'-éd-ist**, *s.* [Gr. *χείρ* (*cheir*) = the hand; *πούς* (*pous*), genit. *πόδος* (*podos*) = the foot; Eng. suff. -*ist*.] One who treats or is skilled in diseases of the hands and feet, especially one who removes corns from them.

*Chem.*: C<sub>9</sub>H<sub>15</sub>NO<sub>5</sub>. The horny substance which gives firmness to the tegumentary system and other parts of the crustacea, arachnida, and insects; probably also the carapace of the rotatoria consists of it. It is left when the above structures are exhausted successively with alcohol, ether, water, acetic acid, and alkalies, retaining the original form of the texture. It is dissolved by concentrated mineral acids without the production of colour. It is not dissolved by solution of potash, even when boiling; neither does it give the characteristic reactions with Millon's or Schultze's tests. It contains nitrogen. (*Griff. & Henfrey*.)

chít'-tín-óus, a. [Eng. *chitin*(e); -ous.] Of the nature of chitine.

chít'-tón, s. [Gr. *χίτων* (*chítōn*) = (1) an under garment, (2) a coat of mail.]

I. *Ord. Lang.*: A robe.

2. *Zool.*: A genus of Mollusca, the shells of which are boat-shaped, and consist of a series of symmetrical plates, folding over each other, and implanted in the mantle or zone of the animal. It is the typical genus of the family Chitonidae or Chitons. The species occur in all climates. More than 200 recent species are known, and thirty-seven fossil, the latter from the Silurian period onward.

CHITON.

\* "The Chiton attaches itself to the rock by a muscular sucker or foot, which, extending ventrally along its entire length, resembles that of the slug or snail and enables it to crawl."—*Miller*: *Old Red Sandstone*, ch. xii.

chít-tón-él-lús, s. [From *chiton* (q.v.), and Lat. dim. suff. *-ellus*.]

*Zool.*: A genus of Cyclobranchia, in which the body is larveform; the plates are small and detached, the mantle is naked, and the seeds have punctures resembling spiracles. Ten recent species are known, and one fossil, the latter from the Carboniferous rocks of Scotland.

chít-to-ní-a, s. [Gr. *χίτων* (*chítōn*) = a coat of mail (the seeds being covered with arilli), and Lat. neut. pl. suff. *-ia*.]

*Bot.*: A genus of West Indian shrubs of the family Melastomaceæ, some species of which in this country serve as ornamental stove-plants. They form shrubs or small trees, and have opposite, ovate, acute, five-nerved leaves, and terminal panicles, with three-floored branches. They are native of Mexico.

ohí-tón'-í-dæ, s. pl. [From *chiton* (q.v.), and Lat. fem. pl. suff. *-idæ*.]

*Zool.*: A family of Gasteropods, affording the only known instance of a protecting shell formed of many portions or, as they have been sometimes but incorrectly termed, valves, often in contact and overlapping each other, but never truly articulated. The species are numerous and widely spread. The fossil species are rare.

Chít'-ta-góng, s. [A district in the south-east of Bengal.] The name of a fowl originally brought from the district mentioned in the etymology.

Chittagong-wood, s. The timber of several Indian trees, especially of *Cedrela Toona* and *Chickrasia tabularis*.

chít'-tér, v.i. [CHATTER, v.]

1. To chirp in a tremulous or shivering manner (in this sense perhaps onomatopoeic).

\* "The fettered sparrow said I am; In sweet and pleasant spring, I greatly doe delight, for then I chitter, chirp, and sing." *Kendall*: *Flowers of Epigrams* (Nares.)

2. To shiver, to tremble. (*Scotch*.)

\* "Where wilt thou ow'r thy chattering wing?" *Burns*: *A Winter Night*.

3. To chatter. Used of the teeth striking against each other, as by cold.

chít'-tér-íng, \* chít'-tér-íng, s. [Of obscure origin.]

1. (Generally in pl.): The smaller intestines of swine, &c., cooked for food by frying.

\* "A gut or chattering hanged in the smoke."—*Baret*.

\* 2. A ruff or frill to a shirt (so called because when ironed out it resembles the small entrails).

\* 3. A little child [as if it were a dimm. from *chit* (1)].

\* chíttes, s. [CHR (1).] See extract.

\*2. The dignity of knighthood.

"There be now, for martial encouragement, some degrees and orders of chivalry . . ."—*Bacon: Essays*.

3. The system, practices, or usages of knighthood generally.

"The faith which knights to knighthood bore, And what'er else to chivalry belongs."

4. A body or number of knights collectively. [CAVALRY.]

"He was made kyng of France by assent of alle the chivalrie."—*Travis*, 1, 283.

\*5. Warfare, arms.

"As one unfit therefore, that all might see He had not trayned benein chivalrie."

\*6. An army, generally including foot-soldiers as well as cavalry, the former apparently being considered not worth mentioning.

"Philo, the prince of his chivalrye."—*Wycliffe: Genesis* xli. 28.

\*7. An exploit, a deed of arms, an adventure.

"They fear doing acts more dangerous, though less famous, because they were but private chivalrie."—*Sidney*.

8. Men actuated by a chivalrous spirit; brave gentlemen.

"Her Beauty and her Chivalry, and bright The lamps shone o'er fair women and brave men."

*Byron: Childe Harold's Pilgrimage*, III. 31.

II. Technically:

1. *Hist.*: The rise of chivalry has been placed by some as late as the crusades, but at that time it was in an advanced stage of development. From the 9th to the 12th century, a "miles," that is, one bearing a designation which in classical times meant simply a soldier, and in the mediæval period a knight, was one who held land or fee from a superior, and was in consequence bound to render him military service. When a young man who was heir to these responsibilities came of age enough to formally pledge himself to discharge them honourably, a ceremony of investiture took place. The Church, as was natural and right, sought to add solemnity to the interesting event, and made the investiture of a youthful knight an imposing religious ceremony, holding up, moreover, before him a high moral and religious ideal to which he was exhorted to aspire. Mercy to vanquished foes and purity in the youthful knight's relations to women were earnestly pressed upon him; and there was undoubtedly more of both than if the Christian Church had not interfered. Yet withal the ages of chivalry were marked to a frightful extent by cruelty and impurity. Whilst the Church censured and poets celebrated the religious and moral elevation of the true knight, that individual himself manifested little of either; his principles and his practices were wonderfully different. Chivalry declined and fell with the feudal system, of which it was a normal growth. The institution of the military orders, the Knights Templars, the Knights of St. John, and the Teutonic Knights, was an interesting development of chivalry. To a certain extent also it has a place in the present, its ceremonies being retained in the creation of modern knights, though some of them are all but meaningless. But whatever in the days of its vigour it effected in making society braver, more compassionate, and more pure, created for it a title of gratitude which should never pass away.

\*2. *Law*: A tenure of land by knight's service; also called tenancy in *chefe*, or in *capite*. [CHIEF, B., II. 1.]

"*Servitium militare*, of the French *chevalier* a tenure of land by knight's service. There is no land but is holden mediately or immediately of the crown, by some service or other; and therefore are all our freeholds, that are to us and our heirs, called *feudum*, fees, as proceeding from the benefit of the king. As the king gave to the nobles large possessions for this or that rent and service; so they parcelled out their lands, so received for rent and service, as they thought good; and those services are by little and little divided into *chivalry* and socage. The one is martial and military; the other clownish and rustic. *Chivalry*, therefore, is a tenure of service, whereby the tenant is bound to perform some noble or military office unto his lord; and is of two sorts; either royal, that is, such as may hold only the king; or such as may also hold of a common person, as well as of the king. That which may hold only of the king, is properly called *peerage*; and is again divided into *grand* or *petit*, i. e. great or small. *Chivalry* that may hold of a common person, as well as of the king, is called *curiagium*."—*Cowell*.

† *Tenure in Chivalry*: Tenure on condition of rendering knight's service. [II. 2.]

† *Court of Chivalry*: A court formerly held before the Lord High Constable and Earl Marshal of England, having cognizance of contracts and other matters relating to deeds of arms. (*Blackstone*, bk. III., ch. v.)

\* *chiv-an, chiv-en, s.* [? The same as Chevin = chub.] Occurring only in the phrase to *play the chivan* = to run away precipitately.

*Min.*: A variety of Enstatite (q.v.) found in meteorites, and containing little or no iron. (*Dana*.)

*chlœ-nā'-çê-sø, s.pl.* [Gr. *χλαίνα* (*chlaina*) = a cloak, from the flowers being furnished with an involucre; and Lat. fem. pl. adj. suff. *-æce*.]

*Bot.*: A small family consisting of only four genera, of one or two species each, all from the island of Madagascar, and as yet but very imperfectly known. They are trees or shrubs with the habit, alternate leaves, stipules, and terminal inflorescence of some Sterculiaceæ, of which they have also the free petals, monadelphous stamens, and others. Included by Lindley in his Geraniid alliance. (*Treas. of Bot.*, &c.)

*chlœ-nî-ûs, s.* [Gr. *χλαίνα* (*chlaina*) = a cloak.]

*Entom.*: A genus of Coleopterous insects, of elegant forms, and generally of green hues. The legs and antennæ of many of the species are of a pale-yellow colour, as also the outer margin of the elytra. Four species are British.

*chlâm-yd'-ân'-thûs, s.* [Gr. *χλαμύς* (*chlamus*) = a cloak, and *άνθος* (*anthos*) = a flower.]

*Bot.*: A name now applied to a section of the genus *Thymelea*, in which the tubular calyx remains attached after withering, and encloses the nut. The plants embraced in this section are low woody-stemmed bushes, chiefly natives of the Mediterranean regions.

*chlâm-yd'-ê-ôus, s.* [Gr. *χλαμύς* (*chlamus*), genit. *χλαμύδος* (*chlamudós*) = a cloak; *-eus*.]

*Bot.*: Pertaining to the floral envelope of a plant.

*chlâm-y-dôd'-êr-a, chlâm-yd'-êr-a, s.* [Gr. *χλαμύς* (*chlamus*), genit. *χλαμύδος* (*chlamudós*) = a cloak, and *êρα* (*êrê*) = the neck.]

*Ornith.*: A genus of birds, family Sturnidæ (q.v.) *Chlamydoterus maculata* is the spotted Bower-bird of Australia. [BOWEA-BIRD.]

*chlâm-yd'-ê-dôn, s.* [Gr. *χλαμύς* (*chlamus*) = a cloak, and *êδων* (*êdôn*), genit. *êδωντος* (*êdônτος*) = a tooth.]

*Zool.*: A genus of Infusoria, of the family Euplotia. Furnished with cilia and a cylinder of teeth, but neither styles nor hooks.

*chlâm-yd'-ê-sâu'-rûs, s.* [Gr. *χλαμύς* (*chlamus*), genit. *χλαμύδος* (*chlamudós*) = a cloak, and *σαύρος* (*sauros*) = a lizard.]

*Zool.*: A genus of Saurians, founded on a specimen, *Chlamydosaurus Kingii*, found in Careening Bay, Port Nelson, Australia, in 1820. In colour it is yellowish-brown, variegated with black. Head depressed with the sides erect, leaving a blunt ridge on the upper part wherein the eyes are placed. Toes long, compressed, scaly, and very unequal; claws hooked and horn-coloured; neck covered with small scales, and furnished with a large plaited frill, rising from each ear. Each frill has four plates which converge on the under part of the chin, and fold it up on the side, and a fifth where the two are united in lower part of the neck. Length, 22 inches.

*chlâm-y-dê-thê-ri-ûm, s.* [Gr. *χλαμύς* (*chlamus*), genit. *χλαμύδος* (*chlamudós*) = a cloak, and *θηρίον* (*thêrion*) = a wild animal.]

*Paleont.*: A mammal of the order Edentata, found in late Pliocene or Post-tertiary deposits of South America.

*chlâm-yph'-ê-rûs* (*Mod. Lat.*), *chlâm-y-phore* (*Eng.*), s. [Gr. *χλαμύς* (*chlamus*) = a cloak; and *φορός* (*phoros*) = bearing, *φέρω* (*phêro*) = to bear.]

*Zool.*: A genus of Mammals of the order Edentata, consisting of a single species, *Chlamyphorus truncatus*. It resembles the Mole in some respects, and in others the Beaver or Sloth. Its length is 5½ inches. The body is covered with a shell of a consistency somewhat more dense and inflexible than sole-leather, of an equal thickness, and consisting of a series of plates of a square, rhomboidal, or cubical form, each row containing fifteen to twenty-two plates. The superior semicircular margin of the truncated surface, together with the lateral margins of the shell, are beautifully fringed with silky hair.

*chlâm-y's, s.* [Gr. *χλαμύς* (*chlamus*) = a cloak.]

\*1. *Mil.*: A military cloak or mantle, worn especially by horsemen.

2. *Entom.*: A genus of Coleopterous insects, belonging to the sub-tribe *Cyclica*, and the family Chrysomelidæ.

*chlô-nê'-çê-sø, s. pl.* [CHLÉNACEÆ.]

*chlî-dân'-thûs, s.* [Gr. *χλιδή* (*chlîdê*) = softness, delicacy, and *άνθος* (*anthos*) = a flower.]

*Bot.*: A genus of South American amaryllids, having truncated bulbs, linear-lorate leaves, sheathing at the base developed after the flowers, and a scape (one and a half foot high) supporting an umbel of a few large fragrant flowers. (*Treas. of Bot.*)

*chlô-ân'-thês, s.* [Gr. = budding, sprouting.]

*Bot.*: A genus of Verbenaceæ from extra-tropical New Holland, consisting of undershrubs thickly covered with opposite or ternate, sessile, linear, and revolute leaves, and having solitary axillary flowers with short peduncles.

*chlô-ân'-thite, s.* [Gr. *χλοάνθης* (*chloanthês*) = budding, sprouting, from its reticulations, and Eng. suff. *-ite* (*Min.*) (q.v.).]

**chlō-ās-mā, s.** [From Gr. χλωάζω (*chloazō*) = to be pale-green; χλόος (*chloos*) = pale green.]  
*Med.*: A discoloration of the human skin which occurs in greenish or yellowish-brown patches, and for the most part on those portions of the body which are covered by clothing. The affection is due to a fungus or confervoid, *Microspora furfur*.

**chlō-ē-ī-a, s.** [Gr. χλόη (*chloē*) = the young shoots of grass, &c.]

*Zool.*: A genus of Annelids, belonging to the order Dorsobranchiata, in which the head is furnished with five tentacles, and the branches resemble a tripartite leaf.

**chlōr-**, pref. [CHLORO-]

**chlōr-ā, a.** [Gr. χλωρός (*chlōros*) = green.]

*Bot.*: An annual herbaceous plant, well marked among Gentianaceae by its eight-cleft flowers and eight stamens. *Chlora perfoliata*, called Yellow-wort, the only British example, is a singularly erect, slender plant, about a foot high, with but few root-leaves. The whole plant is perfectly smooth, and of a decided glaucous hue. The flowers, which are rather large, and of a delicate clear yellow, expand only during the sunshins, like the genus Erythraea, to which *Chlora* is allied. The whole plant is intensely bitter, and may be employed with advantage as a tonic; it also dyes yellow. It is common in chalky pastures, especially near the sea.

**chlōr-āc-ēt-āte, s.** [Eng. *chloracet(ic)*; -ate.]  
*Chem.*: A salt of chloroacetic acid.

**chlōr-a-cēt-īc, a.** [From Eng., &c. *chlor(ine)*, and acetic (q.v.).] Derived from chloric acid and acetic acid.

**chloroacetic acid, s.**

*Chemistry*:

*Monochloroacetic acid*,  $\text{CH}_2\text{Cl.COOH}$ , is obtained by the action of chlorine on boiling glacial acetic acid. It boils at 186°, and solidifies at 64°. Soluble in water, and is gradually decomposed when the aqueous solution is boiled. Heated with KHO it is converted into potassium glycolate,  $\text{K}_2\text{C}_2\text{H}_3\text{O}_2$ .

*Dichloroacetic acid*,  $\text{CHCl}_2\text{COOH}$ , is formed by the action of chlorine on monochloroacetic acid. It boils at 105°.

*Trichloroacetic acid*,  $\text{CCl}_3\text{COOH}$ , is obtained by the action of excess of chlorine on glacial acetic acid in direct sunlight, or by oxidation of chloral hydrate with chromic acid or with nitric acid; also synthetically by the action of Cl and  $\text{H}_2\text{O}$  on  $\text{C}_2\text{Cl}_4$  carbon dichloride. It is a colourless acid deliquescent substance. Nascent hydrogen reduces it to acetic acid. Boiled with excess of ammonia it yields ammonium carbonate and chloroform. By  $\text{PCl}_5$  it is converted into trichloroacetyl chloride,  $\text{CCl}_3\text{COCl}$ .

**chlōr-ā-cēt-ōne, s.** [Eng. *chlor(ine)*; and acetone.]

*Chem.*: Acetone in which hydrogen has been replaced by chlorine. *Monochloroacetone*,  $\text{CH}_3\text{CO.CH}_2\text{Cl}$  is prepared by the action of hypochlorous acid on acetone. It is a colourless liquid, boiling at 119°.

**chlōr-ō-a, s.** [Gr. χλωρός (*chlōros*) = green.]

*Bot.*: An extensive genus of terrestrial orchids, exclusively found in the southern districts of South America. Their roots are coarse, fasciated, glutinous fibres. The leaves are all radical. The scape is clothed with thin herbaceous sheaths. The flowers grow in spikes or racemes in the manner of the Green Orchids, are greenish, whitish, or yellow, occasionally marked by deep brown specks. Some thirty or forty species are known, none of which are in cultivation. (*Treas. of Bot.*) It is thought in Chili that *Chloroxia disoides* promotes the flow of milk.

**chlōr-āl, s.** [From Eng., &c. *chlor(ine)*; -al.]

*Chem.*:  $\text{C}_2\text{HCl}_3\text{O}$  or  $\text{CCl}_2\text{CO.H}$  = trichloraldehyde. Chloral is a colourless, odorous, oily liquid, boiling at 94°. It is soluble in water, alcohol, and ether. Sp. gr., 1.502. It is obtained by passing chlorine gas through absolute alcohol. By the action of caustic potash it is decomposed into chloroform and formate of potassium. It changes on keeping into a solid

white modification, reconverted into a liquid by heat. With water it forms a crystalline compound called hydrate of chloral,  $\text{CCl}_3\text{HC(OH)}_2$ . It is used to adulterate beer.

**chloral hydrate, s.**

*Pharm.* (*Chloral Hydrate*): A white crystalline substance, forming a neutral aqueous solution if free from HCl. Its solution in chloroform, when shaken up with sulphuric acid, remains colourless if no oily impurities are present; 100 grains of hydrate of chloral dissolved in an ounce of distilled water and mixed with thirty grains of slaked lime should yield, when carefully distilled, not less than seventy grains of chloroform. Chloral is used in medicine in the form of a syrup. It produces sleep, but only acts as an anodyne during sleep, the pain returning as soon as the patient wakes. The habitual use of this drug is followed by profound melancholy and enfeeblement of will, and muscular lassitude and suicidal insanity. It was discovered by Dr. O. Liebreich.

**chlōr-āl-īsm, s.** [Eng. *chloral*; -ism.]

1. The act or practice of using chloral as a hypnotic.

2. The abnormal condition of the system resulting from the habitual use of chloral. The ill effects are often mental and moral as well as physical.

**chlōr-āl-īst, s.** [Eng. *chloral(ist)*; -ist.] A person addicted to the use of chloral.

**chlōr-āl-īze, v. t.** [Eng. *chloral*; -ize.] To treat with chloral, to affect with chloralism.

**chlōr-ā-nīl, s.** [Eng. *chlor(ine)*, and anil-(ine).]

*Chem.*:  $\text{C}_6\text{Cl}_4\text{O}_2$ . Tetrachloroquinone. It is formed by the action of hydrochloric acid and chlorate of potassium, on aniline, phenol, isatin, &c. It crystallizes in golden-yellow laminae, which are insoluble in water, soluble in hot alcohol and ether; it sublimes at 156°, and is converted by  $\text{PCl}_5$  into perchlorobenzene,  $\text{C}_6\text{Cl}_6$ . The potassium salt of chloranilic acid,  $\text{C}_6\text{Cl}_2\text{O}_2(\text{OK})_2$ , is formed by dissolving chloranil in strong potash; it crystallizes in dark-red needles, sparingly soluble in water.

**chlōr-ā-nīl-īo, a.** [Eng. *chloranil*; and -ic.] Pertaining to or derived from chloranil (q.v.).

**chloranilic acid, s.**

*Chem.*: Chloranilic acid, dichlor-dioxyquinone,  $\text{C}_6\text{Cl}_2(\text{OH})_2\text{O}_2$ , is formed by decomposing the potassium salt by acids. It forms reddish crystalline scales.

**chlōr-ān-ī-line, s.** [Eng. *chlor(ine)*, and aniline (q.v.).] [ANILINE.]

*Chem.*: By the action of chlorine on aniline, monochloraniline,  $\text{C}_6\text{H}_5\text{Cl}(\text{NH}_2)$ , dichloraniline,  $\text{C}_6\text{H}_3\text{Cl}_2\text{NH}_2$ , and trichloraniline,  $\text{C}_6\text{H}_2\text{Cl}_3\text{NH}_2$ , are obtained.

**chlōr-ān-thā-cē-ōe, s. pl.** [From Mod. Lat. *chloranthus* (q.v.), and Lat. fem. pl. adj. suff. -aceae.]

*Bot.*: A small family of Dicotyledons, with flowers of a very simple structure, allied to those of Piperaceae and Saururaceae. They are trees, shrubs, or rarely herbs, with opposite leaves connected by sheathing stipules. The minute flowers are in simple or branched terminal spikes, often articulate as in Gaetium.

**chlōr-ān-thūs, s.** [Gr. χλωρός (*chlōros*) = green, and άνθος (*anthos*) = a flower.]

*Bot.*: A genus of plants, the type of the order Chloranthaceae, the only floral envelope of which is a very small calyx, consisting of one scale adhering to the side of the ovary. The apparently single stamen, which is the most remarkable part of its structure, consists of three, the central one of which has a perfect two-lobed anther, and the other two, one on each side of it, have only half an anther, so that they are only one-celled, or the two lateral half-anthers may be deficient, leaving a single perfect stamen. They are attached to the side of the ovary immediately above the calyx. They are natives of Japan and China, where they are called Chin-han.

**chlōr-ān-thūy, s.** [CHLORANTHUS.]

*Bot.*: The tendency in brightly coloured petals when decaying to become green.

**chlōr-āp-ā-tite, s.** [Eng. *chlor(ine)*, and apatite (q.v.).]

*Min.*: A variety of Apatite (q.v.), in which the proportion of chlorine is excessive.

**chlōr-ār-gūr-īte, s.** [Gr. χλωρός (*chloros*) = green; άργυρος (*argyros*) = silver; and Eng. suff. -ite (*Min.*).]

*Min.*: A mineral consisting of silver and chlorine. (*Brit. Mus. Cat.*)

**chlōr-ās-tēr, s.** [Gr. χλωρός (*chlōros*) = green, and άστρη (*astēr*) = a star.]

*Zool.*: A genus of Infusoria, of the family Mousdina, having a single mouth (?) terminal, a single frontal eye-spot, no tail, and the middle of the body with radistie warty processes. (*Griff. & Henfrey.*)

**chlōr-ās-trō-līte, s.** [Gr. χλωρός (*chlōros*) = green, άστρον (*astēr*) or άστρον (*astron*) = a star, and Eng. suff. -līte (*Min.*), from λίθος (*lithos*) = a stone.]

*Min.*: A light bluish-green mineral, found on the banks of Lake Superior, in small rounded pebbles. It receives a fine polish. Hardness, 5.5–6; sp. gr., 3.780.

**chlōr-āte, s.** [In Fr. *chlorate*, from Eng., &c. *chlor(ine)*, and suff. -ate (*Chem.*) (q.v.).] [CHLORIC ACID.]

*Chlorate of potassium*:

1. *Chem.*:  $\text{KClO}_3$ . Obtained by passing a current of chlorine gas through a mixture of carbonate of potassium and slaked lime,  $\text{K}_2\text{CO}_3 + 6\text{Ca}(\text{OH})_2 + 6\text{Cl}_2 = 2\text{KClO}_3 + 5\text{CaCl}_2 + \text{CaCO}_3 + 6\text{H}_2\text{O}$ . The carbonate of calcium is removed by filtration, and on evaporating the solution the potassium chlorate separates out in colourless transparent anhydrous six-sided plates; water dissolves only 3/3 parts of the salt at 0°C. It is insoluble in alcohol. When heated, potassium chlorate is decomposed thus  $2\text{KClO}_3 = 2\text{KClO}_4 + \text{KCl} + \text{O}_2$ ; on increasing the heat the potassium perchlorate is decomposed— $\text{KClO}_4 = \text{KCl} + 2\text{O}_2$ . [CHLORIC ACID.]

2. *Pharm.* (*Potassae Chlorate*): It is given in the form of *Trochiscii Potassae Chloratis* (Chlorate of Potassium Lozenges). Chlorate of potassium acts as a refrigerant and diuretic; it exerts a powerful action upon the mucous membranes when used as a gargle in cases of severe tonsillitis, &c.

**chlōr-ē-a, s.** [CHLORÆA.]

**chlōr-ēth-āne, s.** [Eng. &c. *chlor(ine)*; ethane.]

*Chem.*:  $\text{C}_2\text{H}_5\text{Cl}$ . [CHLORIC ETHER.]

**chlōr-ēth-ēne, s.** [Eng. &c. *chlor(ine)*; ethene.]

*Chem.*:  $\text{C}_2\text{H}_3\text{Cl}$ . A gas liquifying at 18°. It has an alliaceous odour.

**chlōr-ēt-īo, a.** [Eng. *chlorit(e)*; -ic.] Resembling or containing chlorite.

† **chlōr-hū-drīo, a.** [From Eng. *chlor(ite)*, and *hydrō*, in compos., from Gr. υδωρ (*hudōr*) = water.] [CHLORIDE.]

**chlorhydric acid, s.** [CHLORIDE.]

**chlōr-hū-drīns, s. pl.** [Eng., &c. *chlorhydr(ic)*, and (*glycer*)in-(ē).]

*Chem.*: Ethers produced by the action of chlorine on glycerine - monochlorhydrin  $\text{C}_3\text{H}_7(\text{OH})_2\text{Cl}$ , dichlorhydrin  $\text{C}_3\text{H}_5(\text{OH})_2\text{Cl}_2$ . By the action of  $\text{PCl}_5$  on glycerine, trichlorhydrin  $\text{C}_3\text{H}_3\text{Cl}_3$  has been obtained. Ethers of glycerine end in *in*. [DICHLORHYDRIN.]

**chlōr-hū-drē-quin-ōnes, s. pl.** [Eng., &c. *chlor(ine)*; and *hydroquinones*.]

*Chem.*: Substitution compounds of hydroquinone,  $\text{C}_6\text{H}_4\text{<OH>}$  the (OH) occupying the position in the benzene ring, 1–4. They are obtained by the reduction of the corresponding chloroquinones with sulphurous acid.  $\text{C}_6\text{H}_3\text{Cl}_2(\text{OH})_2$  melts at 158°;  $\text{C}_6\text{H}_2\text{Cl}_3(\text{OH})_2$  at 184°; and  $\text{C}_6\text{HCl}_4(\text{OH})_2$  at 200°.

**chlōr-īc, a.** [Eng. *chlor(ine)*; -ic.] Pertaining to or containing chlorine.

**chloric acid, s.**

*Chem.*:  $\text{HClO}_2$ . A monobasic acid obtained by decomposing barium chlorate,  $\text{Ba}(\text{ClO}_2)_2$ , by dilute sulphuric acid, and decanting this clear liquid. It oxidises organic matter rapidly. When boiled it gives off  $\text{O}_2$  and  $\text{Cl}_2$ , and perchloric acid is formed. It forms

bōl, bōy; pōūt, jōwī; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -īng. -dan, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -clous, -fious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

salts called chlorates; they are soluble, and give no precipitate with  $\text{AgNO}_3$ . Potassium chlorate explodes when triturated with sulphur or phosphorus in a mortar. It is used in the manufacture of fireworks, percussion caps, and lucifer matches. Chlorates when heated on charcoal deflagrate. When heated strongly they give off oxygen and are converted into chlorides which give a white precipitate with argentic nitrate. Heated with strong  $\text{H}_2\text{SO}_4$  they give off  $\text{Cl}_2\text{O}_2$  with explosive violence. Hydrochloric acid liberates euchlorine, an explosive mixture of chlorine and chlorine tetroxide; it is a powerful oxidising agent, used to destroy organic matter.

#### chloric ether, s.

1. *Chem.*:  $\text{C}_2\text{H}_5\text{Cl}$ , or  $\text{CH}_3\text{CH}_2\text{Cl}$ . Ethyl chloride, Chloroethane, also called Hydrochloric ether, a monatomic haloid ether formed by substitution of an atom of chlorine for an atom of hydrogen in the hydrocarbon ethane by the direct action of chlorine. It also can be prepared by the union of hydrochloric acid with ethene,  $\text{C}_2\text{H}_4$ , and by distilling at a gentle heat alcohol saturated with dry hydrochloric acid gas. It is a thin, colourless, volatile liquid, boiling at  $12.5^\circ$ . By the action of hot aqueous caustic potash, it is resolved into ethyl alcohol and potassium chloride; with alcoholic potash it forms ethylic ether,  $\text{C}_2\text{H}_5\text{O.C}_2\text{H}_5$ . Heated with soda-lime, it yields ethene,  $\text{C}_2\text{H}_4$ .

2. *Pharm.*: The so-called chloric ether, used in medicine, is only a solution of one fluid ounce of chloroform in nineteen fluid ounces of rectified spirit of wine. It is given as a narcotic and antispasmodic, and is a valuable sedative in neuralgia.

**chlor-ri-dáte**, v. t. [Eng. *chlorid(e)*, and verbal suff. *-ate*.] To treat or prepare with a chloride.

**chlor-ide**, s. [Eng. *chlorid(e)*, and suff. *-ide* (q.v.).]

*Chem.*: A compound of chlorine with an element, or radical. Hydrogen chloride,  $\text{HCl}$  = Hydrochloric acid = Chlorhydric acid = Muriatic acid. Hydrochloric acid is a colourless gas. It is very soluble in water; 450 volumes dissolve at  $15^\circ$ . It fumes strongly in damp air. It is formed by the action of diffused daylight on a mixture of H and Cl, also by the action of strong sulphuric acid on sodium chloride; it can be collected over mercury; it is condensed into a colourless liquid by a pressure of 40 atmospheres at  $10^\circ\text{C}$ . Sp. gr., 1.27. Its solution in water (commonly called hydrochloric acid) is easily obtained by distilling common salt  $\text{NaCl}$  with sulphuric acid. Muriatic acid is an impure solution of  $\text{HCl}$ , containing iron, arsenic, organic matter, and sulphuric acid. It is obtained in large quantities in the preparation of sodium carbonate. The hydrogen in hydrochloric acid can be replaced by metals, forming metallic chlorides (see the different metals). Soluble chlorides are detected by their giving a white precipitate with silver nitrate which is insoluble in nitric acid but soluble in ammonia. Chlorides heated with strong  $\text{H}_2\text{SO}_4$  and  $\text{MnO}_2$  give off chlorine.

#### Chloride of antimony solution:

*Pharm.*: *Antimonii Chloridii Liquor*. A heavy yellowish-red liquid. Sp. gr., 1.47. It consists of perchloride of antimony,  $\text{SbCl}_3$ , dissolved in hydrochloric acid; on the addition of water it gives a precipitate of oxychloride,  $\text{SbOCl}$ ; this, treated with sodium carbonate, is converted into the oxide  $\text{Sb}_2\text{O}_3$ . [ANTIMONV.] Chloride of antimony is a powerful caustic and escharotic, and is applied to cancerous growths and poisonous wounds. The oxide of antimony, mixed with twice its weight of calcium phosphate, is a substitute for "James's powder." It is given when the diaphoretic and slightly alterative effects of antimony are required in a mild form.

#### Chloride of nitrogen:

*Chem.*:  $\text{NCl}_3$ . An oily explosive liquid, sp. gr. 1.65, obtained by the action of excess of chlorine on ammonium chloride solution; also by suspending a piece of ammonium chloride in a solution of hypochlorous acid,  $\text{NH}_4\text{Cl} + \text{SHClO} = \text{HCl} + \text{NCl}_3 + \text{SH}_2\text{O}$ . This dangerous substance is decomposed violently by gentle heat, or by contact with fat, &c. By some chemists it is thought to contain hydrogen. It is ammonia  $\text{NH}_3$  in which the H is replaced by Cl.

#### Chloride of sodium:

1. *Chem.*:  $\text{NaCl}$ , sodium chloride or common salt. [SODIUM.]

2. *Pharm.*: *Sodii Chloridum*. It occurs in transparent cubes or in small white grains. It is soluble in three parts of cold water, and its solubility increases very slightly with rise of temperature; it is partly precipitated by  $\text{HCl}$ . It is nearly insoluble in alcohol, and fuses at  $776^\circ$ , and at higher temperatures volatilises. It is a necessary article of food, and occurs in the blood and other animal fluids; a deficiency causes disease. Chloride of sodium in large doses acts as an emetic, purgative, and anthelmintic; in milder doses it is a slight stimulant and sterterve. Externally it is applied as a stimulant and rubefacient. Sponging with salt water is good for rheumatism and joint affections.

#### Chloride of zinc solution:

*Pharm.*: *Liquor Zincí Chloridí*. A solution of chloride of zinc,  $\text{ZnCl}_2$ , which applied externally acts as an irritant and astringent; when mixed into a paste with gypsum it is applied as a powerful escharotic to malignant ulcers. A solution of chloride of zinc, sp. gr. 2, is used as a deodorizer and disinfectant under the name of "Sir W. Burnett's solution."

**chlör-íd-ic**, a. [Eng. *chlorid(e)*; *-ic*.] Pertaining to or containing chloride.

**chlör-íd-ize**, v. t. [Eng. *chlorid(e)*; *-ize*.] The same as *CHLORIDATE* (q.v.).

**chlör-im-ét-rý**, **chlör-óm-ét-rý**, s. [Eng. *chlorine*; Gr. *μετρον* (*metron*) = a measure.] The method of determining the amount of chlorine in a sample of bleaching powder. (For methods see *Watts' Dict. Chem.*)

"He [Gay-Lussac] now prescribes as the preferable plan of *chlorometry*, to pour very slowly from a graduated glass tube a standard solution of the chloride, to be tested upon a determinate quantity of arsenious acid dissolved in muriatic acid, till the whole arsenious is converted into the arsenic acids."—*Ure: Dictionary of Arts, Manufactures, and Mines*.

**chlör-in-áte**, v. t. [Eng. *chlorin(e)*; *-ate*.] To treat with chlorine.

**chlör-in-á-téd**, a. [CHLORINATE, v.]

#### chlorinated lime, s.

*Pharm.*: *Calx Chlorata*. A mixture of calcium hypochlorite,  $\text{Ca}(\text{ClO})_2$ , with calcium chloride,  $\text{CaCl}_2$ . A whitish powder is obtained by passing chlorine gas over loosely spread out hydrate of calcium. Its solution (*Liquor Calcis Chloratæ*) is formed by adding one pound of the solid to 160 fluid ounces of distilled water. It is used as a disinfectant and in the preparation of chloroform.

**chlör-in-á-tion**, s. [Eng. *chlorin(e)*; *-ation*.]

A process for the extraction of gold by exposure of the auriferous material to chlorine gas. First introduced by Plattner. The following conditions are necessary:—(1) The gold must be in a metallic state. (2) There must be no other substance in the charge which would combine with free chlorine. (3) The chlorine must have no impurities which would dissolve other metals or bases. (4) No reaction must be induced which would cause precipitation of the gold before the termination of the process. The process with quartz and free gold does not involve roasting, but the latter process is necessary with ores containing sulphurets and arsenurets. In the chlorination process, the ore is sifted into a wooden vat lined with pitch, and having a false bottom, beneath which the gas is admitted. The top is luted on and the gas admitted; when the gas begins to escape at a hole of observation in the lid, it is the signal that the air is ejected and the hole is then closed. The gas is continually passed into the mass for any eighteen hours, according to the coarseness of the gold; and the solution drawn off into the precipitation vat, the supernatant liquor decanted. The sediment is a brown powder which is filtered upon paper dried in an iron or porcelain vessel, smelted to a metallic regulus in clay crucibles, a little borax, salt, and nitrate of potash being used as fluxes. (*Knight*.)

**chlör-in-din**, s. [CHLORISAT. DE.]

**chlör-ine**, s. [Ger. *chlor*; Fr. *chlorie*, from Gr. *χλωρός* (*chlōros*) = pale-green, light-green, greenish-yellow, and Eng. suff. *-ine* (*Chem.*.)]

1. *Chem.*: A monatomic element. Symbol **Cl**. Atomic weight, 35.5. Discovered by Scheele in 1774. It was thought by Berthollet to contain oxygen, and was called by him *oxy-muriatic acid*. It was found to be an element by Davy in 1810. Chlorine is a yellow-green incombustible gas. It has a powerful irritating smell, and attacks violently the mucous membrane and the lungs. It is very soluble in water, acts strongly on metals, and is best collected by displacement. Sp. gr., 2.47. At the pressure of five atmospheres it is condensed into a heavy yellow liquid. It is obtained by heating common salt, sodium chloride, with sulphuric acid and black oxide of manganese. It combines with hydrogen to form hydrochloric acid, with an explosion in direct sunlight or when a light is applied to a mixture of the two gases, but slowly in diffused daylight. A solution of it in water is gradually converted in the sunlight into  $\text{HCl}$  with liberation of oxygen. A lighted candle burns in  $\text{Cl}$  with a smoky flame. Phosphorus, antimony, arsenic, and turpentine take fire in chlorine. Chlorine destroys animal and vegetable matter; and forms addition and substitution compounds with organic compounds; an aqueous solution of it has powerful bleaching properties. It is also a powerful disinfectant. It occurs in nature in the form of metallic chlorides. Three oxides of chlorine are known,  $\text{Cl}_2\text{O}$ ;  $\text{Cl}_2\text{O}_2$ ;  $\text{Cl}_2\text{O}_4$ .

2. *Pharm.*: Chlorine is used in pharmacy as *Liquor Chlori*, a solution of chlorine in water; and as *Vapor Chlori*, inhalation of chlorine. Free chlorine gas acts as a powerful stimulant or irritant, according to its state of dilution; it is used in cases of chronic bronchitis and phthisis. A diluted solution is used as a gargle for ulcerated tonsils; and as a lotion to foul ulcers, and in some skin diseases.

#### chlorine monoxide, s.

*Chem.*:  $\text{Cl}_2\text{O}$ . A colourless gas obtained by the action of chlorine on cooled precipitated mercuric oxide; it can be condensed to a red liquid, which explodes on elevation of temperature. It has powerful bleaching properties. It dissolves in water and forms hypochlorous acid; this acid forms salts called hypochlorites. These salts can also be obtained by passing chlorine gas into cold solutions of alkalies, or alkaline carbonates, or over hydrates of calcium, &c. Bleaching-powder is thus prepared.

#### chlorine tetroxide, s.

*Chem.*:  $\text{Cl}_2\text{O}_4$ , a dark yellow explosive gas, which can be condensed to a red liquid. It is obtained by the action of strong sulphuric acid on chlorate of potassium. It is absorbed by caustic potash solution, forming a chlorate and a chlorite.

#### chlorine trioxide, chlorous oxide, chlorous anhydride, s.

*Chem.*:  $\text{Cl}_2\text{O}_3$ , a greenish-yellow gas, obtained by heating a mixture of potassium chlorate, nitric acid, and arsenic trioxide. It can be condensed into a very explosive liquid; the gas explodes at  $50^\circ$ , and is decomposed by sunlight. It is soluble in water, forming a crystalline hydrate which is gradually converted into chlorous acid.

**chlör-in-ize**, v. t. [Eng. *chlorin(e)*; *-ize*.] To treat or prepare with chlorine.

**chlör-in-ized**, *pa. par. or a.* [CHLORINIZE.]

**chlör-i-ó-dine**, s. [Eng. *chlor(ine)*; *iodine*.]

*Chem.*: A compound of chlorine and iodine, as iodine chloride,  $\text{ICl}$ . [IODINE.]

**chlör-ís**, s. [Gr. *χλωρίς* (*chlōris*) = a bird with a greenish belly, from *χλωρός* (*chlōros*) = green.]

*Bot.*: A genus of grasses, the typical one of the tribe Chlorideæ, distinguished chiefly by the spikes of inflorescence being in finger-like fascicles, rarely two, or only one. Flowers polygamous; glumes two, containing from two to six florets; lower flowers one to three, hermaphrodite; stamens three, and styles two. Sixty-two species are described in Steudel's "Synopsis," and these are mostly natives of warm, dry countries. *Chloris radiata* is a pretty annual grass, frequently cultivated in greenhouses for the sake of its ornamental and curious appearance. (*Treat. of Bot.*)

**fáte**, **fát**, **fáre**, **amidst**, **whát**, **fáll**, **father**; **wé**, **wét**, **hóre**, **camel**, **hór**, **thóre**; **pine**, **pít**, **síre**, **sír**, **marine**; **gó**, **pót**, **or**, **wóre**, **wólf**, **wórk**, **whó**, **són**; **múte**, **cúb**, **cúre**, **unite**, **cúir**, **rúle**, **fúll**; **trý**, **Sýrian**. **æ**, **œ** = **é**. **ey** = **a**. **qu** = **kw**.

**chlorisatic acid, s.**

*Chem.*: C<sub>6</sub>H<sub>5</sub>ClNO<sub>2</sub>. The potassium salt of this acid is obtained by mixing solutions of caustic potash and chlorisatin. It crystallises in yellow needles, which are decomposed by hydrochloric acid with precipitation of chlorisatin.

**chlör-ís-a-tín, s.** [Eng. *chlor(ine)*, and *isatin*.] [HEATIN.]

*Chem.*: C<sub>6</sub>H<sub>5</sub>ClNO<sub>2</sub>. Obtained by passing chlorine into tepid water in which isatin, or powdered indigo, is suspended. It is purified by crystallization from alcohol. It crystallises in orange prisms, having a disagreeable odour.

**chlör-ís-a-týde, s.** [Eng. &c. *chlor(ine)*; *isatylol* (q.v.).]

*Chem.*: A white or yellowish powder, deposited on cooling when chlorisatin has been dissolved, with heat, in hydrosulphuret of ammonia. It is sparingly soluble in water, and by heat is resolved into chlorisatin water, a new compound appearing as a violet-coloured powder, and termed Chlorindin.

**chlör-ý-só-ma, s.** [Gr. *χλωρός* (*chlōros*) = green, and *σῆμα* (*sēma*) = a body.]

*Ornith.*: A sub-genus of the Myrotherinæ, or Ant-thrushes, separated by Swainson from the Pitta of Temminck. (*Crotyl*.)

**chlör-íte, a.** [Gr. *χλωρίτις* (*chlōritis*) = a grass-green stone, from *χλωρός* (*chlōros*) = green, and Eng., &c. suff. *-ite* (*Min.*) (q.v.).]

**1. Mineralogy:**

- (1) The same as RAPIDOLITE (q.v.).
- (2) The same as PENNINITE (q.v.).
- (3) The same as CLINOCHLORE (q.v.).

**Ferruginous Chlorite:**

*Min.*: The same as DELESSITE (q.v.).

**2. Chem. (Pl.):** Salts of chlorous acid. They can be obtained by passing chlorine trioxide into alkaline solutions; also by the action of Cl<sub>2</sub>O<sub>4</sub> on bases. They are mostly soluble in water. Chlorites of lead and silver are insoluble, and are obtained by double decomposition.

**chlorite schist, s.**

*Geol.*: A green slaty rock, in which chlorite is abundant in foliated plates, usually blended with minute grains of quartz or sometimes with fclapar or mica. It is often associated with or even graduates into gneiss and clay-slate. (*Lyell*.)

**chlorite slate, s.**

*Geol.*: The same as chlorite schist, or if there is any difference, then in the slates the laminations are finer.

**chlorite spar, s.** [In Ger. *chloritspath.*]

*Min.*: An old name for Chloritoid (q.v.).

**chlör-ýt-íc, a.** [Eng. *chlorit(e)*; *-ic*.] Pertaining to or containing chlorite.

**chloritic sand, s.**

*Geol.*: Sand coloured by an admixture of the simple mineral glauconite.

**chloritic series, s.**

*Geol.*: A name sometimes given to the Green-sand beds, but the mineral is glauconite.

**chlör-ýt-öld, s.** [Eng. *chlorite*, and Gr. *εἶδος* (*eidos*) = appearance.]

*Min.*: A monoclinic or triclinic chlorite-like mineral, of a dark-grey, greenish-grey to black colour. It is brittle, and has a double refraction. Hardness, 5-6; sp. gr., 3.5-3.6.

**chlör-ð, in compos.** [Gr. *χλωρός* (*chlōros*) = green.]

**1. Nat. Science:** In composition frequently used as a prefix to scientific words, and indicating a bright grass-green colour.

**2. Chem.:** Compounds in which chlorine has replaced some other element, as hydrogen, without altering the constitution of the compound, as chloro-benzene, C<sub>6</sub>H<sub>5</sub>Cl. The *o* is often omitted, and chlor is used.

**chloro-argentotype, s.**

*Photog.*: A photographic agent prepared by moistening a sheet of paper with a solution of common salt, and then dipping it in a bath of nitrate of silver. Taking out a thin film of the latter substance it becomes extremely sensitive to light.

**chloro-benzene, s.**

*Chem.*: Monochloro-benzene or phenyl chloride, C<sub>6</sub>H<sub>5</sub>Cl. It is prepared by the action of chlorine on benzene, or of PCl<sub>5</sub> on phenol. It boils at 132°. (Consult *Watts: Dict. Chem.*)

**chloro-calcite, s.**

*Min.*: Calcite with chlorine in its composition. (*Brit. Mus. Cat.*)

**chloro-naphthalene, s.**

*Chem.*: Monochloronaphthalene, C<sub>10</sub>H<sub>7</sub>Cl, dichloro-naphthalene C<sub>10</sub>H<sub>6</sub>Cl<sub>2</sub>, &c. The chloronaphthalenes are obtained by boiling the chlorides of naphthalene with alcoholic potash, which removes HCl. These, when subjected to the action of chlorine, form addition products, and by again boiling these with alcoholic potash it removes more HCl, and a more highly chlorinated substitution compound is obtained.

**chloro-phenol, s.**

*Chem.*: Phenol C<sub>6</sub>H<sub>5</sub>(OH), in which hydrogen has been replaced by chlorine, as Monochlorophenol C<sub>6</sub>H<sub>4</sub>Cl(OH). Dichlorophenol C<sub>6</sub>H<sub>3</sub>Cl<sub>2</sub>(OH), and Trichlorophenol C<sub>6</sub>H<sub>2</sub>Cl<sub>3</sub>(OH) are obtained by action of chlorine on phenol. Pentachlorophenol or perchlorophenol, C<sub>6</sub>Cl<sub>5</sub>(OH), crystallizes in long colourless needles soluble in alcohol and in ether. It melts at 187°. Concentrated nitric acid converts it into tetrachloroquinones C<sub>6</sub>Cl<sub>4</sub>◊. When distilled with PCl<sub>5</sub> it yields C<sub>6</sub>Cl<sub>6</sub> hexa-chlor benzene.

**chloro-picrin, s.**

*Chem.*: A compound formed by distilling picric acid with chloride of lime and water. Chloro-picrin, Nitro-trichloro-methane, Nitrochloroform C(NO<sub>2</sub>)Cl<sub>3</sub>. Also obtained by distilling chloral with strong nitric acid; also by distilling a mixture of methyl alcohol and sulphuric acid over a mixture of sodium chloride and potassium nitrate. It is an oily liquid, boiling at 112°. It is reduced to methylamine CH<sub>3</sub>·H<sub>2</sub>N by the action of iron filings and acetic acid. Chloro-picrin heated with alcoholic ammonia is converted into guanidine hydrochloride CH<sub>3</sub>N<sub>3</sub>·HCl. When heated with sodium ethylate it is converted into ethylic orthocarbonate C(O·C<sub>2</sub>H<sub>5</sub>)<sub>4</sub>.

**chloro-quinones, s. pl.**

*Chem.*: Substances formed by the action of chlorins on quinone, C<sub>6</sub>H<sub>4</sub>◊◊; monochloroquinones, C<sub>6</sub>H<sub>3</sub>ClO<sub>2</sub>. Dichloroquinone, C<sub>6</sub>H<sub>2</sub>Cl<sub>2</sub>O<sub>2</sub>, is formed by action of hypochlorous anhydride, Cl<sub>2</sub>O, on benzene; and by heating trichlorophenol, C<sub>6</sub>H<sub>2</sub>Cl<sub>3</sub>(OH), with nitric acid, it forms large yellow prisms, melting at 120°. Trichloroquinone, C<sub>6</sub>HCl<sub>3</sub>O<sub>2</sub>, is obtained by the action of chromyl chloride, CrO<sub>2</sub>Cl<sub>2</sub>, on benzene, C<sub>6</sub>H<sub>6</sub>. It crystallizes in large lamine, melting at 160°. Tetrachloroquinones, C<sub>6</sub>Cl<sub>4</sub>O<sub>2</sub>. [*CHLORANIL*.]

**chloro-toluene, s.**

*Chem.*: Chlorotoluenes, or Toly Chloride, C<sub>6</sub>H<sub>4</sub>Cl·CH<sub>3</sub>, occurs in three modifications. Parachlorotoluene, 1-4, is formed by the action of chlorine on toluene at ordinary temperatures; it is a liquid, boiling at 160°. By oxidation with chromic acid mixture it yields parachlorobenzoic acid. When chlorine acts on boiling toluene, benzyl chloride, C<sub>6</sub>H<sub>5</sub>·CH<sub>2</sub>Cl, is formed. (See *Watts: Dict. Chem.*)

**chlör-ð-bén-zō-ýt-íc, a.** [Eng. *chlor(ine)*, and *benzoic*.]

**chlorobenzolo acid, s.**

*Chem.*: C<sub>6</sub>H<sub>4</sub>Cl·CO·OH. Benzoic acid in which hydrogen is replaced by chlorins.

**chlör-ð-chróm-ýt-íc, a.** [From Eng. *chloro*, and *chromic*.] Having chromium and chlorine in its composition.

**chlorochromic acid, s.**

*Chem.*: CrO<sub>2</sub>Cl<sub>2</sub>. Dioxychloride of chromium, chromyl chloride, obtained by the action of sulphuric acid on a dry mixture of potassium dichromate and chloride of sodium. A heavy red liquid, giving off red vapours. Sp. gr., 1.71; boiling at 118°, decomposed by water into chromic and hydrochloric acids. Slowly passed through a glass tube heated to low redness it deposits rhombohedral dark-green hard crystals of sesquioxide of chromium.

**chlör-ð-chróús, a.** [Gr. *χλωρός* (*chlōros*) = pale green, and *χρῶα* (*chroa*) = colour.] Having a green colour.

**chlör-ð-cóc-óúm, s.** [Or. *χλωρός* (*chlōros*) pale-green, and *κόκκος* (*kōkkos*) = a kernel.]

*Bot.*: A genus of Algae, order Palmellaceæ. *Chlorococcum vulgare* consists of extremely minute cells, multiplying into twos and fours, with no gelatinous substratum and no zoospores. It covers nearly every piece of unpainted timber and old trunk in England, 800 millions of individuals on a square inch. (*Griff. & Hensley*.)

**chlör-ð-form (Eng.), chlör-ð-för-müm (Mod. Lat.), s.** [Eng., &c. *chlor(ine)*, and *form(ia)*, from Lat. *formica* = an ant.]

**1. Chem.:** CHCl<sub>3</sub>, trichloromethane, methyl chloride, tetrachloride of formyl. Chloroform is formed by the action of the sun's rays on a mixture of chlorine and marsh gas; also by the action of caustic potash on chloral or chloracetic acid, or by the action of nascent hydrogen on tetrachloride of carbon. It is prepared on a large scale by distilling water and alcohol with bleaching-powder. Chloroform is a colourless, mobile, heavy, ethereal liquid. Sp. gr., 1.5. It boils at 62°; its vapour density is four times that of air; it is nearly insoluble in water, but dissolves readily in alcohol. It has a sweet taste. It dissolves caoutchouc, resins, fats, alkaloids, &c. It should not be exposed to the light, as it may decompose, hydrochloric acid and chlorine being set free.

**2. Pharm.:** Chloroform is used in medicine, dissolved in alcohol, under the name of chloric ether, as a stimulant. Chloroform taken internally acts as a narcotic, sedative, and antispasmodic, and is given in cases of asthma, colic, and cholera, also for neuralgia. *Linimentum Chloroformi*, equal parts of chloroform and camphor liniment, is used externally to allay pain and irritation in neuralgia and itching.

**3. Surgery & Midwifery:** The vapour of chloroform, when inhaled for some time, produces a temporary insensibility to pain. Inhaled in small doses it produces pleasurable inebriation, followed by drowsiness; in larger doses it causes loss of voluntary motion, suspension of mental faculties, with slight contraction of the muscles and rigidity of the limbs; then if the inhalation is continued a complete relaxation of the voluntary muscles takes place, but if carried too far it causes dangerous symptoms of apnea or of syncope, and the patient must be restored by artificial respiration. Chloroform should not be administered to persons suffering from cerebral disease or organic cardiac affection. Dr. Simpson, of Edinburgh, in 1847, began to employ the vapour as a means of producing anaesthesia or insensibility, partial or complete, in certain surgical operations and painful diseases, as well as in ordinary obstetric practice.

**4. Law:** By 24 and 25 Vict. c. 100, to administer chloroform or anything similar, with the view of one's self committing, or aiding another in committing, an indictable offence, is felony.

**chlör-ð-form, v.t.** [*CHLOROFORM*, s.] To bring under the influence of chloroform; to produce anaesthesia or unconsciousness in, by means of chloroform.

**chlör-ð-form-ýt-íc, a.** [Eng. *chloroform*; *-ic*.] Pertaining to, derived from, or produced by chloroform.

**chlör-ð-form-í-zā-tion, s.** [Eng. *chloroform*; *-ization*.] The aggregate of anaesthetic phenomena resulting from the inhalation of chloroform.

**chlör-ð-mél'-an, s.** [Gr. *χλωρός* (*chlōros*) = green, and *μέλας* (*melas*), neut. *μέλαν* (*melan*) = black.]

*Min.*: The same as CRONSTEDTITE (q.v.).

**chlör-ðm'-ét-ér, s.** [Eng. *chlor(ide)*; Gr. *μέτρον* (*metron*) = a measure.] An instrument for testing the decolorizing or bleaching powers of samples of chlorids of lime. Ure's process consists in adding liquor of ammonia of a known strength, tinged with litmus, to a solution of a given weight of this chloride under examination until the whols of the chlorine is neutralized, which is known by the colour being destroyed. From the quantity of ammonia consumed the strength of the sample is estimated.

**chlör-ð-mé-tháne, s.** [Eng. *chloro*; *meth(y)*; *-ane*.]

*Chem.*:  $\text{CH}_3\text{Cl}$ . A colourless, odorless gas, obtained when equal volumes of marsh gas  $\text{CH}_4$  and  $\text{Cl}$  are exposed to reflected sunlight, or by heating a mixture of  $\text{NaCl}$ , wood spirit, and sulphuric acid. Exposed to sunlight with excess of chlorine, it is converted into  $\text{CH}_2\text{Cl}_2$ , then  $\text{CHCl}_3$ , and finally into  $\text{CCl}_4$ .

**chlōr-ō-mēt-ric**, a. [Eng. *chloromet(er)*; -ic.] Pertaining to or effected by chlorometry.

**chlōr-ōm-ēt-ry**, s. [CHLORIMETRY.]

**chlōr-ō-mya**, s. [Gr. *χλωρός* (*chlōros*) = green; and *μῦς* (*mys*) = a mouse.] [AGOUTY.]

**chlōr-ō-pal**, s. [Gr. *χλωρός* (*chlōros*) = green, and Eng. *opal* (q.v.).]

*Min.*: A compact massive mineral, with an opal-like appearance; colour greenish-yellow to pistachio-green. Hardness, 2.6–4.5; sp. gr., 1.727–1.870. It occurs in Saxony, Hungary, &c. Compos.: Silica, 46; sesquioxide of iron, 33; alumina, 1; magnesia, 2; water, 18. (*Dana*.)

**chlōr-ō-phae-ite**, s. [Gr. *χλωρός* (*chlōros*) = green; *φαῖος* (*phaios*) = brown, and Eng. suff. -ite (*Min.*.)]

*Min.*: A chlorite-like mineral from the Western Isles of Scotland, at Scur Mors in the Island of Rum, and from Fifeshire and the Faroe Islands. Hardness, 1.5–2; sp. gr., 2.02; colour, dark or olive-green, changing to dark-brown on exposure.

**chlōr-ō-phāne**, s. [Gr. *χλωρός* (*chlōros*) = green, and *φαῖνο* (*phainō*) = to appear.]

*Min.*: A variety of Fluorite (q.v.), affording a green phosphorescent light, sometimes called *pyro-emerald*. It occurs in Connecticut with topaz in gneiss.

**chlōr-ō-phān-ēr-ite**, s. [Gr. *χλωρός* (*chlōros*) = green; *φαῖνο* (*phainō*) = to appear, and Eng. suff. -ite (*Min.*.) (q.v.).]

*Min.*: A greenish variety of Glauconite (q.v.).

**chlōr-ō-phē-nēs-īo**, a. [Eng. *chloro*; *phen(ol)*, and suff. -ic (*Chem.*.)]

*Chem.*: Composed of phenol and chlorine.

#### chlorophenesic acid, s.

*Chem.*: Dichlorophenol,  $\text{C}_6\text{H}_4\text{Cl}_2\text{O}$ , is a volatile oil, insoluble in water, soluble in alcohol and ether, obtained by the dry distillation of dichlorosuccinic acid.

**chlōr-ō-phēn-ī-sic**, a. [Eng. *chloro*; *phen(ol)*, and suff. -ic.]

*Chem.*: Composed of phenol and chlorine.

#### chlorophenisic acid, s.

*Chem.*: Trichlorophenol,  $\text{C}_6\text{H}_3\text{Cl}_3\text{O}$ , obtained by the action of chlorine on phenol. It crystallises in colourless silky needles, which have a strong odour, and are slightly soluble in water, soluble in alcohol and ether.

**chlōr-ō-phēn-ū-sic**, a. [Eng. *chloro*; *phen(ol)*, and suff. -ic (*Chem.*.)]

*Chem.*: Composed of phenol and chlorine.

#### chlorophenousic acid, s.

*Chem.*: The same as pentachlorophenol,  $\text{C}_6\text{HCl}_5\text{O}$ , obtained by the action of an excess of chlorine on an alcoholic solution of trichlorophenol.

¶ The letters a, e, i, o, u, rns used to distinguish the compounds formed by replacing respectively 1, 2, 3, 4, or 5 atoms of H in phenol  $\text{C}_6\text{H}_5\text{O}$  by the same number of monatomic elements or monatomic radicals. See also the nitrophenols.

**chlōr-ō-phūll**, **chlōr-ō-phūlle**, s. & a. [Gr. *χλωρός* (*chlōros*) = green, and *φύλλον* (*phūllon*) = a leaf; Fr. *chlorophylle*.]

#### A. As substantive:

1. *Bot. Physiol.*: The name given to the green-colouring matter of plants. Its nature is still doubtful. It is ordinarily stated that it exists under the form of globules or granules, and occasionally as an amorphous granular substance. It presents itself in the form of distinct corpuscles in the cells of the flowering plants generally.

"The colour of plants, especially the green colour, is produced by the presence of chlorophyll, which may be considered a vital secretion."—*Lindley: Introduction to Botany*, bk. 1, sect. 7, § 88.

2. *Animal Physiol.*: Chlorophyll exists in *Hydra viridis*, the Green Fresh-water Polype,

one of the Cœlenterata, and in *Stentor*, an infusorian animalcule. (*Nicholson*.)

B. *As adj.*: Coloured by chlorophyll; composed of chlorophyll.

**chlorophyll bodies**, s. pl. Particles of protoplasm of definite form coloured green by chlorophyll. (*Thomé*.)

**chlōr-ō-phūll-lā-ōō-ōie**, a. [Eng. *chlorophyll*; -aceous.] Of the nature or character of chlorophyll; containing chlorophyll.

"The affinities exhibited by many chlorophyllaceous and colourless Thallophytes."—*Nature*, Feb. 26th, 1880, p. 291.

† **chlōr-ō-phūll-ī-an**, a. [Eng. *chlorophyll*; -ian.] Pertaining to, or containing chlorophyll.

**chlōr-ō-phūll-īte**, s. [Gr. *χλωρός* (*chlōros*) = green, *φύλλον* (*phūllon*) = a leaf, and Eng. suff. -ite (*Min.*.) (q.v.).]

#### Mineralogy:

1. The same as IOLITE (q.v.).

2. A variety of Fahluite (q.v.), from Unity, Maine, U.S.A.

**chlōr-ō-piō-rin**, s. [Eng., &c. *chloro*; and *pirin*.]

*Chem.*:  $\text{CNO}_2\text{Cl}_2$  is obtained by distilling picric acid with potassium chlorate and hydrochloric acid. It is an oily odorless liquid. Sp. gr., 1.665. It boils at  $116^\circ$ .

**chlōr-ō-pro-tē-ic**, a. [Eng. *chlorine*, and *protic* (q.v.).] Compounded of chlorine and protine.

#### chloroproteic acid, s.

*Chem.*: A name given to the white flocks which are deposited when chlorine is passed through a solution containing protine =  $\text{C}^{\text{H}}\text{N}^{\text{O}}$ .

**chlōr-ōp-sis**, s. [Gr. *χλωρός* (*chlōros*) = green, and *ὄψις* (*opsis*) = face, appearance.]

*Ornith.*: A genus of birds belonging to the Merulidae or Thrushes. The bill is long and hooked.

**chlōr-ō-pyō-ī-a**, s. [Gr. *χλωρός* (*chlōros*) = green, and *πύρη* (*pyrē*) = the rump, the tail.]

*Ornith.*: A genus of birds belonging to the Meropidae or Bee-eaters. They are natives of Madagascar.

**chlōr-ō-rhōd-īc**, a. [Gr. *χλωρός* (*chlōros*) = green, and *ῥόδον* (*rhodon*) = a rose.]

#### chlororhodic acid, s.

*Chem.*: An acid obtained from pus. It crystallises in fine needles, is soluble in water and alcohol, but not in ether. Chlorine water in dilute solutions has a rose-red colour.

**chlōr-ō-sis**, s. [Gr. *χλωρός* (*chlōros*) = green.]

1. *Bot.*: One of the most formidable diseases to which plants are liable, and often admitting of no remedy. It consists in a pallid condition of the plant, in which the tissues are weak and unable to contend against severe changes, and the cells are more or less destitute of chlorophyll. It is distinct from blanching, because it may exist in plants exposed to direct light on a south border, but is often produced or aggravated by cold ungenial weather and bad drainage. The most promising remedy is watering them with a very weak solution of sulphate of iron. Many forms of the disease exist, of which those of clover, onions, cucumbers, and melons are best known.

2. *Med.*: An affection in which the skin of the body, and especially that of the face, assumes a peculiar greenish cast, and hence is popularly known as green-sickness (q.v.). The condition is closely allied to anæmia, and is due to deficiency of the colouring matter of the blood. Chlorosis occurs chiefly amongst young and delicate women who lead sedentary lives under unwholesome conditions.

**chlōr-ō-spōrm**, s. [CHLOROPERMEE.]

*Bot.*: Any algal of the division Chlorospermeæ (q.v.).

**chlōr-ō-spēr-mē-ō**, s. pl. [Gr. *χλωρός* (*chlōros*) = green, and *σπέρμα* (*sperma*) = a seed.]

*Bot.*: One of the three great divisions of Algae characterised by the green colour of the spores. The spores of most members of this great division, when they are first liberated, are endowed with active motion, which is pro-

duced by long thorny-like appendages and by short cilia. [CILIA.] Such spores are called, from their resemblance to Infusoria, Zoospores (q.v.). The green powdery or gelatinous productions so common upon damp walls or rocks; the curious microscopic foveolated productions which are found in our pools or infest other Algae; the green floating masses which form a scum upon our pools, or the shrubby tufts of the same colour in running streams or on sea-rock, &c., are so many members of the division. (*Treas. of Bot.*)

**chlōr-ō-sphær-ō**, s. [Gr. *χλωρός* (*chlōros*) = green, and *σφαῖρα* (*sphaîra*) = a ball, a sphere.]

*Bot.*: A genus of Unicellular Algae, probably related to *Edogonien* (Rabenhorst places it among the Palmellaceæ), of which one species, *Chlorosphaera Olszewi*, is known, consisting of a single globular cell about one-200th in diameter densely filled with green contents, sometimes exhibiting a radiate appearance. The *C. Olszewi* was found in a boggy ditch at Prestwick Car, Northumberland. (*Griff. & Henfrey*.)

**chlōr-ō-spin-ēl**, s. [Gr. *χλωρός* (*chlōros*) = green, and Eng. *spinel* (q.v.).]

*Min.*: A variety of Spinel (q.v.), of a grass-green colour, due to the presence of copper. Also called Magnesia-Iron Spinel. Sp. gr., 3.591–3.594.

**chlōr-ōs-tōm-g**, s. [Gr. *χλωρός* (*chlōros*) = green, and *στόμα* (*stoma*) = a mouth.]

*Zool.*: A genus of Mollusca belonging to the family Trochidae. Shell deeply umbellated almost to the top of the spire; inner lip forming a semi-margin to the umbellatics; outer angulated at the base; aperture remarkably oblique.

**chlōr-ōt-ic**, \* **chlōr-ōt-ick**, a. [Fr. *chlorotique*, from *chlorosis* (q.v.).] Affected with or relating to chlorosis.

"The extases of sedentary and chlorotick nuns."—*Battie*.

**chlōr-ō-tūl-ī-ūm**, s. [Gr. *χλωρός* (*chlōros*) = green, and *τύλη* (*tylē*) = a swelling, a knob.]

*Bot.*: A genus of Convolvold Algae belonging to the family Chaetophoraceæ. Filaments jointed, repeatedly dichotomous, parallel; joints of two kinds, some elongate and colourless, and others swollen, abbreviated, and with green endochromes. (*Griff. & Henfrey*.)

**chlōr-ōūs**, a. [Eng. *chlor(ine)*; -ous.]

*Chem.*: Pertaining to Chlorine.

#### chlorous acid, s.

*Chem.*:  $\text{HClO}_2$ . An acid obtained by condensing chlorous oxide in water or by action of dilute sulphuric acid on a metallic chlorite. Its solution is a greenish-yellow liquid, having strong bleaching property; its salts are called chlorites.

#### chlorous oxide, s. [CHLORINE.]

#### chlorous pole, s.

† *Elect.*: A term applied on a certain electrical hypothesis to the negative pole of a galvanic battery, because of its exhibiting the same attraction as chlorine. On the same hypothesis the positive one is called the zincous or zincic pole.

**chlōr-ōx-ī-lōn**, s. [Gr. *χλωρός* (*chlōros*) = green, and *ξύλον* (*xylon*) = wood.]

*Bot.*: A genus of Cedrelaceæ, generically distinguished by its fruit having only three cells, and splitting into three parts instead of five. The Satia-wood tree of India, *Chloroxylon Swietenia*, forms a fine tree fifty or sixty feet in height. It is a native of Ceylon and the Coromandel coast. It furnishes a handsome light-coloured hard wood with a satin-like lustre, and sometimes beautifully mottled or curled, bearing some resemblance to boxwood, but rather deeper in colour. It is used for articles of turnery, for the backs of brushes, and as veneering for cabinet-work. (*Treas. of Bot.*, &c.)

\* **chlōr-ū-rēt**, s. [Eng. *chlor(ine)*, and suff. -ret (*Chem.*.)]

*Chem.*: A compound of chlorine; a name formerly given to what is now termed chloride.

**chōak**, v. t. & i. [CHOK.]

**chōaked**, a. [CHOK.]

*Printing*: A term applied to the press,

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pīne, plit, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, oūb, cūre, ūnte, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = é. ey = ä. qu = kw.

when, for want of proper washing, the ink gets into the hollow of the face of the type.

**cho'-an-ite**, s. [Gr. χοάνη (choanē)=a funnel.] *Palaeont.*: A genus of fossil Zoophytes, placed between Alcyonium and Ventriculites. They have a central cavity at the upper part, and outer surface not reticulated. Skeleton generally funnel-shaped.

**choast**, s. [HOAST.] A severe cough. (Scotch.) (Scott.)

**chōck** (1), s. [O. Fr. choc.] [SHOCK.] An attack, an encounter, a charge. "One of the kings of France died miserably by the chock of a hog."—Sp. Patrick: *Divine Arithmetick*, p. 27.

**chōck** (2), s. & adv. [A mere variant of chōke (q.v.)] **A. As substantive:**

- 1. *Shipbuilding*:
  - (1) A block, preferably wedge-shaped, driven behind the props of a cradle to prevent it from slipping on the ways before the ship is ready to launch.
  - (2) A piece of timber framed into the heads and heels of ships' timbers at their junctions to act as a lap to the joint, and make up the deficiency at the inner angle, as in the stem-piece and the main-piece of the head; in the dead wood, &c.
- 2. *Navigation*: A wedge need to secure anything with, or for anything to rest upon. The long-board resta upon two large chocks when it is stowed. (Wales.)
- 3. *Coverage*: A wedge-shaped block placed beneath and against the bilge of a cask to keep the latter from rolling.
- 4. *Carriage-building*: A piece of wood by which the wheel of a carriage is prevented from moving forward or backward.
- 5. Loose pieces of wood or stone placed in or upon any machine to add to its weight and steadiness; as stones placed in a mangle, weights laid on a harrow, roller, &c.

**B. As adv.**: Quite, full. "I drew a shaft, Chock to the steel."

*Taylor: Philip Fan Art.*, II. III. 1.

¶ **Chock and block, chock-a-block**:  
1. *Naut. & Min.*: A term signifying closely wedged.  
2. *Fig.*: Choke-full.

**chock-full**, a. [CHOCK-FULL.]

**chōck** (1), v. i. & t. [CHUCK, SNOCK.] **A. Intrans.**: To encounter.  
**B. Trans.**: To give a shock to. (Turberville.)

**chōck** (2), v. t. & i. [CHOCK, s.]

- A. Transitive**:  
1. To fasten or stop with a wedge.  
\* 2. To heap up (?).  
"And in the tavern in his cups doth roar, Chocking his crown."  
*Drayton: Agincourt*, p. 79. (Latham.)
- B. Intrans.**: To fill up; to fit into exactly.  
"The woodwork thereof . . . exactly chocketh into the joints again."—*Fowler: Worthies*, I. 149.

**chōck** (3), v. t. [CHOKÉ.] (Scotch.) (Burns.)

**chōck'-in**, pr. par. a. & s. [CHOKING.] (Burns.)

**chōc'-ô-late**, s. & a. [Sp. & Port, from Mexican *acualti* = cacao.]

- A. As substantive**:  
1. The nut of the cacao-tree. [CACAO.]  
2. A paste or cake made from the roasted kernels of the *Theobroma cacao*.  
¶ The roasted and crushed seeds of the cacao-nut tree are ground between two horizontal millstones, which are kept at a temperature of about 200° F., by means of a steam-jacket. The nibs pass down from the hopper into the shoe, which is shaken by a damsel on the spindle of the runner so as to discharge the nibs into the eye which leads them to the space between the stones. The heat and friction liberates the oil, which is one third of the weight, and the cacao issues as a paste from the spout and is conducted to a second and similar mill where the stones are similarly heated but are closer set, so as to still farther reduce the paste. It is discharged from the second grinding in a liquid condition and is collected in a pan, where it hardens into a

cake. To enable it to form an emulsion with water, it receives additional substances. Sugar, honey, molasses, gum, starch, flour, rice, and arrow-root are adapted for this purpose. Spices and flavouring extracts are added for some markets.

3. The drink made by dissolving chocolate in boiling water.

**B. As adj.**: Composed of, relating to, or of the colour of chocolate.

\* **chocolate-house**, s. A house where chocolate was prepared and sold.

**chocolate-mill**, s. A mill in which the roasted and crushed seeds of the cocoa plant are ground between two horizontal millstones kept at a temperature of about 200° Fahr. This liberates the oil, which is about one-third of the weight, leaving the cocoa to issue as a paste from the spout in the machine.

**chocolate-nut**, s. The nut of the cacao-tree. [CHOCOLATE, s.]

**chocolate-root**, s. The root of a plant, *Geum canadense*.

**chocolate-tree**, s. *Theobroma cacao*, from the seeds of which chocolate is made.

\* **chod-chod**, s. [Heb. חֹדְחֹד (chodchod).] A sparkling gem, probably a ruby. (N.E.D.)  
"Gemme and purpur, and clooth with dyverse colours and bilja and silk and chodchod, that is precious merchandise."—*Wycliffe: Ezek.*, xxvii. 16.

\* **chōde**, pret. of v. [CRIDE.]

**chōd'-nēf'-fite**, s. [Named after the discoverer, Herr Chodnoff, and suff. -ite (Min.).] *Min.*: A mineral much resembling Chiolite, found in the Ilmen Mountains at Miask. Compos.: Fluorine, 56.4; aluminum, 16.3; sodium, 27.3. Sp. gr., 2.82—2.77.

**choer-ā-dō'-dī-ā**, s. [CHERADODIA.]

**choer-ō-pōt'-ā-mūs, chær-ō-pōt'-ā-mūs, chër-ō-pōt'-ā-mūs**, s. [Gr. χοίρος (choiros) = a pig, and πόντος (ponatos) = a river.] *Palaeont.*: An extinct genus of the order Pschydermata, or thick-skinned Mammalia, considered as forming a link between the Anoplotherium and the Pecary.

**choer-ōp'-sis**, s. [Gr. χοίρος (choiros) = a pig, and οπίς (opsis) = appearance.] [LIBERIAN HIPPOPOTAMUS.]

\* **choffe**, s. [CHUFF.] A rough, clownish fellow. (Prompt. Parv.)

\* **chōf'-fēr**, s. [CHAFER.] A chaffing-dish.

\* **chōf'-fing**, pr. par. [CHAFING.]

\* **chōffing-dish**, s. [CHAFING-DISH.]  
"Makes balls, which ye shall put on coals, in a chōffing-dish, and the party is to receive the fumes, &c."—*St. Germain: Royal Physician*, p. 223.

**chōie**, \* **chōis**, \* **chōise**, \* **chōys**, s. & a. [O. Fr. chols, from Fr. choisir = to choose; Fr. choix.]

- A. As substantive**:  
1. The act of choosing or determining between two or more things proposed.  
"His choice was soon made . . ."—*Macaulay: Hist. Eng.*, ch. xvi.  
2. The power of choosing between two or more things; power of election or preference.  
"Love is not in our choice, but in our fate."  
*Dryden: Palamon & Arcite*, l. 323.  
"Choices befits not thy condition, Acquiescence suits thee best."  
*Cowper: Walking with God*, No. 2.
- \* 3. Care or discrimination in choosing; judgment, skill.  
". . . I imagine they were collected with judgment and choice."—*Bacon: Apoph.*
- 4. A number of things proposed or offered for selection or discrimination.  
"A braver choice of dauntless spirits Did never float upon the swelling tide."  
*Shakespeare: King John*, II. 1.
- 5. The thing chosen or elected; selection, preference.  
"Oh! hearken, stranger, to my voice! This desert mansion is my choice!"  
*Campbell: O'Connor's Child*, v.
- 6. That which would be chosen or preferred; the best part of anything; the best.  
". . . in the choice of our sepulchres bury thy dead . . ."  
—*Gen.* xxiii. 6.
- ¶ **A matter of choice**: One in which there is freedom of choice or election as to the course to be pursued or preferred.

"This was indeed scarcely matter of choice . . ."—*Macaulay: Hist. Eng.*, ch. xi.  
To make choice of: To choose; to select one from two or more things offered.  
"Wisdom of what herself approves makes choice, Nor is led captive by the common voice."  
*Denham: Of Prudence*, 11

**B. As adjective**:

**I. Of things**:

- 1. **Worthy of being chosen or preferred; of superior merit; excellent, select.**  
"Intill a chamber full choice chosen there way."  
*Destruct. of Troy*, 489.  
"He was a man of a choice spirit, only he was always kept very low . . ."  
—*Bunyan: The Pilgrim's Progress* bk. II.
- \* 2. **Carefully chosen or selected; fit, appropriate.**

**II. Of persons**: Careful or discriminating in choosing or preserving; difficult to please; chary, frugal.

"He that is choice of his time, will also be choice of his company, and choice of his actions."—*Taylor: Holy Living*.

¶ For the difference between choice and option, see OPTION.

\* **choice-drawn**, a. Selected with especial care.

"For who is he, whose chin is but enrich'd With one appearing hair, that will not follow These cull'd and choice-drawn cavaliers of France?"  
*Shakespeare: Hen. V.*, III. (Chorus.)

\* **chōice'-fūl**, \* **chōice'-fūll**, a. [Eng. choice; -fūl(l).]

- 1. **Making frequent choices; fickle, changeable.**  
"His choiceful sense with every change doth flit."  
*Spenser: Webster*.
- 2. **Offering a choice, varied.**  
"Heer's choicefull plenty."—*Sylvester: The Colonies*, p. 681.

\* **chōice'-lēss**, a. [Eng. choice; less.] Not having the right or power of choosing; not free.

"Neither the weight of the matter of which the cylinder is made, nor the round voidless form of it, are any more impantable to that dead choiceless creature than the first motion of it . . ."  
—*Hammond*.

† **chōice'-ly**, \* **chōice'-lich**, \* **chōis'-ly**

- \* **chōis'-ly**, adv. [Eng. choice; -ly.]  
**1. By choice; of free choice or will.**  
"To seeke a child that chōisly chooses In maydes blood to blame."  
*Legends of Holy Rood* (ed. Morris), p. 218.
- \* 2. **Finely, excellently, in a choice manner.**  
"It is certain it is chōisely good."—*Walton: Angler*
- \* 3. **Carefully; with care used in the choice.**  
"To Ireland will you lead a band of men, Collected chōisely, from each county some."  
*Shakespeare: 2 Henry VI.*, III. 1.

**chōice'-ness**, s. [Eng. choice; -ness.]

- 1. The quality of being worthy of being chosen; excellence, superiority.  
"Carry into the shade such articulas, seedlings, or plants, as are for their choicenesse reserved in pots."  
*Evelyn: Calendarium hortense*.
- 2. **Carefulness, nicety, preciseness.**

**choir** (pron. kwir), **quire**, \* **queer**, \* **queere**, \* **queir**, s. & a. [Fr. *choeur*; Sp. & Ital. *coro*; Lat. *chorus* = a band of singers; Gr. χορός (choros) = a dance in a ring, a band of singers.] [CHORUS, QUIRE.]

**A. As substantive**:

**I. Ord. Lang.**: A number of singers [II. 1.]  
"Had vanlah'd from his prospects and desires; Not by translation to the heavenly choir."  
*Wordsworth: Excursion*, bk. vi.

**II. Technically**:

- 1. **Eccles.**: The organised body of singers in church service.  
¶ The minor canons, choral vicars, and choristers, or other singers taken collectively, are spoken of as the choir. The choral body is usually divided into two sets of voices, the one sitting on the north and the other on the south side of the chancel, and are known by the respective titles of Cantoria and Decani from their nearness to the Cantor (or Precentor) and to the Decanus (or Dean). In most cathedrals and collegiate chapels, the Decani side is held to be the side of honour, the best voices are placed there, and all the "verses" or solo parts, if not otherwise directed, are sung by that side, which is also considered the "first choir" (*coro primo*) in eight-part music. (Stainer & Barrett.)
- 2. **Ecol. Archit.**: The part of the building in a cathedral or collegiate chapel set apart for the performance of the ordinary daily

enclosed by a screen, upon which the organ is placed. (Stainer & Barrett.)

“... with the crown on his head, returned public thanks to God in the choir...” —Mocautay: *Hist. Eng.*, ch. xvi.

**B. As adjective:** (See the compounds).

**choir-boy**, *s.* A boy who sings in a choir.

**choir-man**, *s.* An adult male member of a choir. (Stainer & Barrett.)

**choir-office**, *s.*

1. A choir service.

2. The divine office, or any one of its parts. [OFFICE, ¶ (2).]

**choir-organ**, *s.*

**Music:** One of the three aggregated organs which are combined in an organ of large power. The other two are the *great-organ* and the *swell*. The great organ has its large pipes in front and its bank of keys occupies the middle position; it contains the most important and powerful stops. The *choir-organ* has its key-board below that of the *great-organ*, and contains stops of a light character and solo stops. The *swell* has its bank of keys the highest of the three, and has louvre boards which may be opened and shut by means of a pedal, so as to produce *crescendo* and *diminuendo* effects. (Knight.)

**choir-pitch**, *s.* The old German church pitch, about one tone higher than concert pitch.

**choir-ruler**, *s.*

**Roman Ritual:** One of the choir who leads the psalms at vespers on festivals. The choir-rulers, who may be laymen, wear copes, and are two or four in number, according to the rank of the feast.

**choir-screen**, *s.*

**Arch.:** An ornamental open screen of wood or stone, dividing the choir or chancel from the nave, but not obstructing sight or sound.

**choir-service**, *s.* The part of the church service sung by the choir.

“That part of our choir-service called the motet or anthem.” —Watson: *Hist. of Eng. Poetry*, II, 183.

**choir-stall**, *s.* A seat or stall in the choir. [STALL.]

**choired** (pron. kwird), *a.* [Eng. *choir*; -ed.] Assembled in a choir.

“From the choired gods advancing.”  
Chaucer: *The Departing Year*.

**\* choir-is-ter**, *s.* [CHORISTER.]

**choised**, *pa. par. & a.* [Eng. *choise*; -ed.] Chosen, picked.

“Choiſed needs to be picked and trimly well ſide.” —Tusser, p. 183.

**\* chōis-lī**, **\* chōis-līy**, *adv.* [CHOICELY.]

**chok**, *s.* [Icel. *kok* = the gullet.] The throat, the gullet.

**chok-band**, *s.* The small strap of leather by which a bridle is fastened around the jaw of a horse. (Scotch.)

**chōke**, **\* cheke**, **\* choak**, *v.t. & t.* [A.S. *accocan* = to suffocate (Somner); Icel. *kokk* = to gulp; *kok* = the gullet.]

**A. Transitive:**

**I. Lit.:** To suffocate, to strangle, to destroy by stopping the passage of the breath.

“The herd ran violently down a steep place into the lake and were choked.” —Luke VIII, 33.

**II. Figuratively:**

1. To obstruct or stop up any passage, to block, to clog.

“... the sandhills near the sea threatened to choke the channel.” —Times, Nov. 11, 1876.

¶ Frequently with the adverb *up*.  
“Then Commoners brought into the public walk The busy merchant; the big warehouse built; Rais'd the strong crane; chok'd up the loaded street.” —Thomson: *Autumn*.

2. To stiffen; to hinder or check the growth or spread of anything; to overpower, to suppress, to destroy.

“And some fell among thorns; and the thorns sprang up with it, and choked it.” —Luke VIII, 7.

“Confess thee freely thy sin: For to deny each article with oath, Cannot remove nor choke the strong conception That I do groan withal.” —Shakespeare: *Othello*, v. 2.

† 3. To irritate or offend, so as almost to prevent the use of words.

“I was choked at this word.” —Swift.

4. To vanquish in argument or by a statement.

“What, have I choked you with an argosy?” —Shakespeare: *Taming of the Shrew*, II, 1.

**B. Intransitive:**

**I. Literally:** To be suffocated, strangled, or stifled.

“Who eats with too much speed may hap to choak.” —Heywood: *Dialogues*, p. 323.

**II. Figuratively:**

\* 1. To be hindered or checked.

“The words choked in his throat.” —Sir W. Scott.

† 2. To be irritated or offended exceedingly.

¶ For the difference between *choke* and *to suffocate*, see SUFFOCATE.

\* **choke-bail**, *a.* In which bail is not allowed.

“How? how? in a choke-bail action?” —Wycherley: *Plain Dealer*, v. 2.

**choke-berry**, *s.* A species of pear-tree, *Pyrus arbutifolia*.

**choke-bore**, *a.*

**Gun-making:** A kind of breech-loading gun, in which the bore is constricted near the muzzle; the effect being to keep the shot more compactly together, to prevent its spreading on leaving the muzzle of the gun, and thus to cause it to travel a greater distance.

**choke-cherry**, *s.*

1. **Bot.:** A species of cherry, *Cerasus hyemalis*, or *borealis*, so called from the astringent nature of the fruit.

2. **Min.:** Choke-damp (q.v.).

**choke-damp**, *s.* A result given by miners to the fire-damp resulting from an explosion of gas in mines. [CARBONIC ACID.] The following diagram is illustrative of the combustion of fire-damp, or carburetted hydrogen, of which the product is choke-damp, called also after-damp and black-damp:—

Before Combustion.	Elementary Mixture.	Products of Combustion.
Wght.	Atoms.	Wght.
8 carburetted hydrogen	1 carbon 1 hydrogen	22 carbonic acid 9 steam.
144 atmospheric air	1 oxygen 1 oxygen 8 nitrogen	112 112 uncombined oit.
152		182 182 choke-damp.

(Williams: *Combustion of Coal*.)

\* **choke-fitch**, *s.* Another name for *choke-weed* (q.v.).

**choke-full**, **\* choak-full**, **\* chokke-full**, *adv.* Full to repletion or overflowing; completely full.

“We filled the skins choak-full.” —Bruce: *Travels*, iv. 549.

**choke-pear**, **\* choak-pear**, *s.*

1. **Bot.:** A kind of pear with a rough, astringent taste, and therefore swallowed with difficulty.

\* 2. **Figuratively:**

(1) A kind of gag.

(2) A sarcasm by which one is put to silence.

“After your goodly and valn-glorious banquet, I'll give you a choak-pear.” —Webster: *White Devil*.

**choke-plum**, *s.* A species of plum, of a nature and quality similar to the *choke-pear*.

**choke-strap**, *s.*

**Saddlery:** A strap passing from the lower

portion of the collar to the belly-band, to keep the collar in place when descending a hill or backing.

\* **choke-weed**, *s.*

**Bot.:** A name proposed by Turner for *Orobancha*, “because it destroyeth and *choketh* the herbes that it tyeth and claspeth withy his roote.” (Britt. & Holland.)

\* **choke-wort**, **\* choak-wort**, *s.*

**Bot.:** A plant, perhaps a species of *Spurga*. “The name of *choak-wort* is to it assigned, Because it stops the venom of the mind.” Taylor: *The Waterpoet*. (Nares.)

**chōke**, *s.* [A shortened form of *artichoke* (q.v.).] The filamentous or capillary part of the artichoke.

**chōked**, *pa. par. or a.* [CHOKED, v.]

**chō-kō-dar**, *s.* [Hind. *chauki-dār* = a watchman, from *chauki* = watch, custom-house, &c., and *dār* = possessing, master. (Mahn.)]

1. A watchman.

2. A custom-house officer.

\* **chōke-līng**, *a.* [CHUCKLING.]

“Double me this burden, *chokeling* in his throat, For the Tegeter should here of his merry note.” Chaucer: *Tale of Beryn*.

**chōk'ēr**, *s.* [Eng. *chok(e)*; -er.]

**I. Lit.:** One who, or that which chokes.

**II. Figuratively:**

1. A statement or argument which cannot be answered. (Slang.)

2. A necktie. (Slang.)

“There's Mr. Brown, who ... wears rings and white chokers.” —Thackeray: *Novels*, I, 66.

\* **chōk'ēr-īnge**, *s.* [Etymol. doubtful.] Chattering, chattering.

“Mid *chokeringe* mid *stevne* hose.” Owl & Nightingale, 504.

**chōk'īng**, **\* choak'īng**, *pr. par., a., & s.* [CHOKED, v.]

**A. & B. As pr. par. & particip. adj.:**

1. **Lit.:** Causing suffocation or stifling.

2. **Figuratively:**

(1) Stifling.

“From *choaking* weeds to rid the soil.” Gay: *Fables*, I, 34.

(2) Indistinct and interrupted, as the utterance of one undergoing suffocation.

**C. As substantive:**

1. The act of suffocating or stifling.

2. The state of being suffocated or stifled.

† **chōk'īy**, **\* chōk'e-y**, **\* choak'īy**, *a.* [Eng. *chok(e)*; -y.]

1. Having the power or tendency to choke; suffocating, stifling.

“Having nothing coarse or choaky therein.” —Pulter: *Works*; *Warwick* (II, 402).

2. Inclined to choke.

“The allusion to his mother made Tom feel rather choaky.” —Hughes: *Tom Brown's School-days*, I, iv.

**chōk'īy**, **chōk'e-y**, *s.* [Hind. *chauki* = a watch, a guard.]

1. A prison, a lock-up.

2. A custom-house, or toll-house, a station for psanquin-bearers. (Ang.-Indian.)

\* **chol**, **\* chow**, *s.* [CHAUL, JOWL.] The joint of jowl.

“Thy chop, thy *chol*, gara toony men live chaste, Thy gane it gara us mind that we meame die.” —Everyman, II, 16, st. 15.

**chōl-sē-mī-a**, *s.* [From Gr. *χολή* (*cholē*) = bile, and *αίμα* (*haima*) = blood.]

**Med.:** A condition in which the bile is present in the circulation. [JAUNDICE.]

**chōl-sē-pūs**, **chōl-ōs-pūs**, *s.* [Gr. *χολόπους* (*cholopous*) = lame-footed; *χολός* (*cholōs*) = lame, and *πούς* (*pous*) = foot.]

**Zool.:** A genus of edentata, comprehending the two-toed sloths. The name was given by Illiger.

**chōl-a-gōgue**, *s.* [Fr. *cholagogue*; Gr. *χολάγωγος* (*cholagōgos*), from *χολή* (*cholē*) = the bile, and *άγωγος* (*agōgos*) = leading, drawing; *άγω* (*agō*) = to lead, to draw.]

**Pharm.:** Cholagogues are purgative or cathartic medicines, as calomel, aloes, &c., which act upon the liver and cause flow of bile into the intestines. They are supposed to act by stimulating the gall-bladder. [CATHARTICS.]

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thère; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūh, cūre, unīte, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē; ey = ā. qu = kw.

**chōl'-āte, s.** [Gr. χολή (*cholē*) = the bile, and Eng. suff. -ate (*Chem.*.)]

*Chem.*: A salt of choleic acid.

**chōl'-ē-āte s.** [Eng. *chol(ic)*; -ate.]

*Chem.*: A salt of choleic acid.

**chōl'-ē-dōch, chōl'-lēd'-ō-choūs, a.** [CHOLEDOCHUS.] Conveying bile.

**chō-lēd'-ō-chūs, s.** [Gr. χολή (*cholē*) = bile, and δολή (*doché*) = . . . a receptacle.]

*Anat.*: The tube formed by the union of the hepatic and cystic ducts. (*Owen.*)

**chōl'-ēd-ōg'-raph-ŷ, s.** [Gr. χολή (*cholē*) = the bile; γραφή (*graphē*) = a description.]

*Med.*: A description of and treatise on bile.

¶ An erroneous formation for chology, from some confusion with Gr. χοληδόχος (*cholēdochos*). [CHOLEDOCHUS.]

**chōl'-ē-dōl'-ō-ŷ, s.** [Gr. χολή (*cholē*) = the bile, and λόγος (*logos*) = a discourse.] [CHOLEDOGRAPHY.]

*Med.*: A treatise or discourse on bile and the biliary organs.

**chōl'-ē-īo, a.** [Gr. χολή (*cholē*) = bile, and Eng. adj. suff. -ic.] Pertaining to, or of the nature of, bile.

**choleio acid, s.**

*Chem.*: An acid obtained from bile,  $C_{27}H_{46}N_2O_2$ .

**chōl'-ē-pŷr-rhīn, s.** [From Gr. χολή (*cholē*) = bile, and πύρρος (*pyrrhos*) = flame-coloured, from πῦρ (*pur*) = fire.]

**chōl'-ēr (1), s.** [Lat. *cholera*, from Gr. χολή (*cholē*) = the bile.]

*I. Lit.*: The bile.

*II. Figuratively*:

1. That humour which, when in excess, was supposed to cause irascibility of temper.

"It engenders cholera, planteth anger."

*Shakspeare: Taming of the Shrew, iv. 1.*

2. Anger, rage.

"My cholera is ended."—*Shakspeare: Love's Lab. Lost, iii. 1.*

**chōl'-ēr (2), chōl'-lēx, chūl'-lēx, chūrl, s.** [CHAUL, CHAVEL.]

1. A double chin.

2. (*Pl.*) *Chollers*: The gills of a fish; the wattles of a cock. (*Scotch.*)

"The second choll was a thick, setler, swown pallach, wi' a great chuller ower his cheeks, like an Ilscampit baggie."—*Journal from London, p. 2.*

**chōl'-ēr-a, s. & a.** [In Dnt. *cholera*; Fr. *cholera*; Lat. *cholera* = (1) the gall bile, (2) the jaundice; from Gr. χολέρα (*cholera*) = the cholera, from χολή (*cholē*) = bile.]

*A. As substantive*:

*Med.*: One of two or three diseases more or less akin to each other. They are—

1. *British Cholera*: A severe form of diarrhoea, somewhat resembling but quite distinct from Asiatic Cholera. [2.] It occurs usually during the summer months, and is due for the most part to deleterious food or drink taken into the body exciting the purging, vomiting, and cramps which characterise the complaint. Children often succumb to this disease; adults rarely.

2. *Asiatic or Malignant Cholera*: A malignant disease due to a specific poison which, when received into the human body through the air, water, or in some other way, gives rise to the most alarming symptoms and very frequently proves fatal to life. An attack of cholera is generally marked by three stages, though these often succeed each other so rapidly as not to be easily defined. There is first a premonitory diarrhoea stage, in which the stools soon become very copious, watery, and rice-coloured, there is also occasional vomiting, with severe cramps in the abdomen and legs, and great muscular weakness. This condition is succeeded, and often within a remarkably short period, by the second stage, which is one of collapse, and is called the algid or cold stage. This is characterised by intense prostration, suppression of urine, great thirst, feebleness of circulation and respiration, with coldness and blueness of the skin, iciness of the breath, and loss of voice. Should death not take place at this the most fatal period, the sufferer will then pass into the third or reaction stage of the disease. This, though very frequently marked by a high state of fever, with a ten-

dency to congestion of internal organs, as the brain, lungs, kidneys, &c., is a much more hopeful stage than that which has preceded it, and the chances of recovery are very much increased. Asiatic Cholera is so called from having had its home, so to speak, in the East, and more especially in India for centuries, though there is little doubt that under other names it had been previously epidemic in the United States and Great Britain. The nature of the disease was not fully recognised until the outbreak of 1831 occurred. Similar epidemics in 1843-49, in 1853-54, and in 1865-66 have increased our knowledge of the mode of propagation of choleraic poison, and strict attention to the laws of sanitation will do much if not all to prevent it finding that habitat which appears necessary for its development into epidemic activity.

¶ *Spasmodic Cholera* is another name for Asiatic Cholera. [No. 2.]

"The malady known by the name of *spasmodic cholera* . . . had been known in India from the remotest periods, and had at times committed fearful ravages. Its effects, however, were in general restricted to particular seasons and localities, and were not so extensively diffused as to attract notice or excite alarm. In the middle of 1817, however, the disease assumed a new form, and became a widely spread and fatal epidemic. It made its first appearance in the Eastern districts of Bengal, in May and June of that year, and after extending itself gradually along the north bank of the Ganges, through Tirhut to Ohsampur, it crossed the river, and passing through Rewa, fell with peculiar virulence upon the centre division of the grand army, in the first week of November. . . . During the week of its greatest malignity it was ascertained that seven hundred and sixty-four fighting men and eight thousand followers perished."—*Asiatic Res. India, Continuation by H. H. Wilson, viii. 283.*

*B. As adj.*: Pertaining to cholera; designed for use in cholera, &c., as *Cholera poison*, *cholera mixture*.

**cholera asphyxia, s.** Also called Asiatic cholera, or *Cholera morbus*, the more malignant form of cholera.

**cholera-pill, s.** A pill containing one grain each of camphor, cayenne, and opium.

**chōl'-ēr-ā-īc, a.** [Eng. *cholera*; -ic.] Pertaining to, producing, or produced by cholera, as "choleraic poison," "choleraic discharges."

**chōl'-ēr-īo, \*chōl'-ēr-īck, a.** [Fr. *cholérique*, from Lat. *cholericus*; Gr. χοληρικός (*cholērikos*), from χολή (*cholē*) = the bile.]

*I. Of persons*:

(1) Full of cholera; passionate, irascible.

(2) Angry, enraged.

2. *Of the disposition, temper, &c.*: Inclined to passion; hot.

¶ The choleric or bilious temperament is characterised by black hair often curling, black or hazel eyes, and dark yet often ruddy complexion, a hairy skin, and a strong full pulse. It is the strong temperament of the melanous or swarthy variety of mankind.

\* 3. *Of things, words, &c.*:

(1) Offensive; calculated to cause passion or rage.

(2) Full of passion; angry; caused by passion.

"There came in choleric haste towards me about seven or eight knights."—*Sir P. Sidney.*

**\*chōl'-ēr-īo-īŷ, adv.** [Eng. *choleric*; -ly.] In a choleric or passionate manner. (*Richardson.*)

**\*chōl'-ēr-īc-nēss, \*chōl'-ēr-īck-nēss, s.** [Eng. *choleric*; -ness.] The quality of being choleric; irascibility, passionateness.

"Subject to like passions for covetousness, contentions, and cholericness."—*Bishop Hauden: Anti-Baal Berith, p. 128 (1651).*

**chō-lēr'-ī-form, s.** [Eng. *cholera*; *i* connect., and *form.*] Resembling, or of the nature of, cholera.

**chōl'-ēr-īne, s.** [Eng. *cholera*(a), and suff. -ine.]

*Medical*:

1. The precursory symptom of cholera.

2. The first stage of epidemic cholera.

**chōl'-ēr-ī-zā-tion, s.** [As if from a verb to *cholērizē*.] Inoculation with the specific poison of cholera, as a protective measure.

**chōl'-ēr-ōid, a.** [Gr. χολέρα (*cholēra*), χοληρά (*cholēra*) = cholera, and εἶδος (*eidos*) = appearance.] Resembling cholera, as choleroïd discharges.

**chōl'-ēs-tēr-āte, s.** [Eng. *cholester*(ic); -ate.]

*Chem.*: A salt of cholesteric acid.

**chōl'-ēs-tēr-īo, a.** [Fr. *cholesterique*.] Pertaining to or obtained from cholesterine.

**cholesteric acid, s.**

*Chem.*: An acid formed by treating cholesterine with nitric acid. It is in yellowish-white crystals, slightly soluble in water, but abundantly so in boiling alcohol.

**chōl'-ēs-tēr-īne, chōl'-ēs-tēr-īn, s. & a.** [Fr. *cholesterine*, from Gr. χολή (*cholē*) = the bile, and στεάρον (*stear*) = fat.]

*A. As substantive*:

*Chem.*:  $C_{26}H_{44}O = C_{26}H_{43}(OH)$ . A monatomic aromatic alcohol, which occurs in small quantities in the bile, brain, and nerves. It forms the chief part of biliary calculi, obtained by boiling these in alcohol. It crystallizes in colourless plates, which melt at 137° and sublime at 200°. It exists naturally in most animal liquids in a state of solution; also in many animal solids, as in the blood, the bile, the meconium, the brain and spinal cord. As an abnormal product it occurs in the crystalline form in the bile, biliary calculi, various dropsical effusions, the contents of cysts, pus, old tubercles, malignant tumours, the excrements, and expectoration of phthisis. In the vegetable kingdom it occurs in peas, beans, almonds, many seeds, &c. Cholesterine is insoluble in water and solution of potash, even when boiling; but soluble in ether and boiling alcohol, crystallizing on cooling. It is most easily procured from gall-stones (of which it is the chief constituent), by finely powdering them, then boiling the powder in alcohol, and filtering when hot, when the cholesterine will deposit on cooling in nearly scales. The crystals thus obtained are usually thicker than the natural plates. It is very sparingly soluble in cold alcohol and not at all in water.

*B. As adj.*: (See the compound).

**cholesterine infiltration.**

*Med.*: A form of degeneration which occurs for the most part in the liver, spleen, and heart, and which is characterised by the development or infiltration into these organs of a certain peculiar fatty or isrdaceous matter acid by some to be of the nature of cholesterine, by others to be of a starchy or albuminous character. The terms lardaceous, albumenoid, and amyloid are used to express the same conditions.

**chōl'-ēs-trō, in compos. as a prefix.** [From Eng., &c. *cholest(e)r(ine)*, with *o* connective.]

*Chem.*: Having Cholesterine as the less abundant chemical substance in its composition.

**chōl'-ēs-trō-phāno, s.** [From Eng., &c. *cholesto* (q.v.); and Gr. φαῖνω (*phainō*) = to make to appear.]

*Chem.*:  $C_5H_9N_2O_2$ . A dimethyl-parabauiic acid, obtained by the oxidation of caffeine, and by digesting silver parabanate with methyl-iodide.

**chōl'-ē-va, s.** [From Gr. χολέων (*chōleōn*) = to become lame.]

*Entom.*: A genus of coleoptera, family Silphidae. Twenty-four British species are enumerated in Sharp's catalogue (1871).

**chōl'-ī-amb, chol-ī-ām'-bic, s.** [Fr. *choliambique*, from Lat. *choliambus*; Gr. χολιαμβος (*chōliambos*), from χῶλος (*chōlos*) = lame, and ἰαμβος (*iambos*) = an iambus.]

*Poet.*: A verse having an iambus in the fifth foot, and a spondee in the sixth or last.

" . . . his *choliambics* were accordingly . . . transposed into the brief compositions which have descended to us as *Æsopian fables*."—*Leavis: Crad. Early Roman Lit. (ed. 1855), ch. vi. 8, vol. 1, p. 233.*

**chōl'-īc, a.** [Gr. χολή (*cholē*) = the bile, and Eng. suff. -ic.] Pertaining to, or obtained from bile.

**cholic acid, s.**

*Chem.*:  $C_{24}H_{40}O_5$ . Obtained by boiling the resinous mass precipitated by ether from an alcoholic solution of bile, with a dilute solution of potash for several hours, and decomposing the potassium salt by HCl. Cholic acid crystallises in tetrahedra. It gives a purple-violet colour with sugar and sulphuric acid.

**chōl'-īn-āte, s.** [*Cholin*(ic); and suff. -ate (*Chem.*) (q.v.).]

*Chem.*: A term for a combination of cholinic acid with a salifiable base.

ōl, hōy; pōnt, jōwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -cious, -tions, -sious = shūs. -ble, -dle, &c. ~ bəl, dəl.

**chol-in'-ic, a.** [Gr. *χολή* (*cholē*) = the bile.] Pertaining to bile or obtained from it.

**cholino acid, s.**

*Chem.*: A distinct substance obtained by digesting胆汁 with dilute hydrochloric acid. It is insoluble in water.

**chol'-ō-chrōme, s.** [Gr. *χολή* or *χόλος* (*cholōs*) = bile, and *χρόμα* (*chrōma*) = colour.] The colouring matter of bile. [BILIRUBIN.]

**chol'-ce-pūs, s.** [CHOLEPUS.]

**chol'-ō-id', a.** [Gr. *χολοειδής* (*cholooidēs*) = like bile, from *χολή* (*cholē*) = the bile, and *ειδός* (*eidōs*) = appearance, form; and Eng. suff. -ic.] Pertaining to bile.

**cholooid acid, s.**

*Chem.*:  $C_{20}H_{33}O_4$ . A white amorphous acid, obtained by boiling glycocholic or tartricholic acid with concentrated sulphuric acid.

**chol'-ō-phās'-in, s.** [Gr. *χόλος* (*cholōs*) = bile, and *φαίος* (*phaios*) = brown.] The same as BILIRUBIN (q.v.).

**chō-lām, s.** [Hindustani.]

*Bot. & Hort.*: Indian Millet, *Sorghum vulgare* (formerly *Holcus Sorghum*), a grain commonly cultivated in India and some other parts of the East.

**chōm-ē-lī-a, s.** [Named in honour of Dr. J. B. Chomel, physician to Louis XV.]

*Bot.*: A genus of American shrubs, belonging to the order Cinchonaceae.

† **chō-mēr, s.** [HOMER.]

**cho-mo-ro, s.** [Javanese.]

*Bot.*: *Podocarpus cupressina*, a taxaceous plant, one of the best timber trees of Java. [Lindley.]

**chō-na, s.** [Gr. *χώνη* (*chōnē*) = a funnel, from the shape of the flowers.]

*Bot.*: A genus of plants belonging to the order Ericaceae, and consisting of a single small shrub with blood-red flowers. It is a native of the Cape of Good Hope.

**chōn-dēs-tēs, s.** [Said to be from Gr. *χώνδρος* (*chōndros*) = grain, and *έσθιον* (*esthion*) = to eat.]

*Ornith.*: The Larkfinch, a genus of finches placed next to *Emberiza* by Swainson. [Craig.]

**chōn-dra-cān-thūs, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *άκανθα* (*akantha*) = a spine.]

*Zool.*: A genus of Crustacea of the order Siphonostoma, and family Lernaeopoda. *Chondracanthus Zei* is found upon the gills of Zeus (the Common Dory). The body is covered with short reflexed spines.

**chōn-drar-sēn-ite, chōn-drō-ar-sēn-ite, s.** [Gr. *chondroarsenit*; so named from its similarity to *Chondrodite* (q.v.), while differing from it in being an arsenate.]

*Min.*: A yellowish mineral, occurring in the Paisberg mines, Wernmland. It is an arsenate of manganese. It is translucent and brittle.

**chōn-dri-a, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, from the cartilaginous structure.]

*Bot.*: A genus of marine Alga, belonging to the tribe Florideae.

**chōn-dril-la, s.** [From Lat. *chondrilla*, *chondrillon*; Gr. *χονδρίλλη* (*chondrillē*) = a plant which exudes a gum; *χώνδρος* (*chōndros*) = grain, cartilage, a small roundish mass.]

*Bot.*: A genus of composite plants, nearly allied to the lettuce (*Lactuca*). It has the achenes rough, and furnished at the base with five small scales. The plants are herbs, natives of South Europe, the East, and Siberia. The flowers are yellow and solitary. About twenty species are known. A grain like *lactucarium* is obtained in Lemnos from *Chondrilla juncea*. [Lindley, &c.]

**chōn-drine, chōn-drin, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and Eng. suff. -in, -ine.]

*Chem.*: A variety of gelatine obtained from the cartilage of the ribs and joints. It is less soluble in boiling water, and is precipitated from its solution by acetic acid, alum, and by acetate of lead. Its chemical formula is

doubtful; it contains nearly 15 per cent. of nitrogen.

**chōn-dri-tēs, s.** [Mod. Lat. *chondrus* (q.v.), and Gr., &c. suff. -ies (q.v.).]

*Palaeont.*: A temporary genus of plants, alliance Algae. It consists of plants somewhat resembling the sea-weeds of the recent genna *Chondrus*. *Chondrites verisimilis* found in the Upper Silurian of Scotland. An alleged fuoid, *Chondrites acutangulus* of Mr. Coy, is found in Lower Silurian rocks at Bangor in Wales.

**chōn-drit'-ic, a.** [Mod. Lat. *chondrit(es)*; Eng. suff. -ic.] Having a granulated structure, like that of *Chondrites*.

**chōn-drō-crā-ni-a-l, n.** [CHONDROCRANIUM.] Pertaining to the chondrocranium (q.v.).

**chōn-drō-crā-ni-ūm, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and Lat. *cranium* = the skull.]

*Biology*:

- 1. A skull permanently cartilaginous.
- 2. The portion of an embryonic skull first formed in cartilage, which afterwards ossifies.
- 3. The cartilaginous portion underlying parts of the skull in many bony fishes.

**chōn-drō-dēn-drūm, s.** [Gr. *χώνδρος* (*chōndros*) = grain, cartilage, and *δένδρον* (*dendron*) = a tree.]

*Bot.*: A genus of climbing shrubs, belonging to the Menispermaceae. *Chondrodendrum convolvulaceum* is called by the Peruvians the Wild Grape, an account of the form of the fruits, and their acid and not unpleasant flavour. The bark is esteemed as a febrifuge. [Treas. of Bot.]

**chōn-drō-dite, s.** [Gr. *χώνδρος* (*chōndros*) = a grain, from the granular structure; and Eng. suff. -ite (Min.) (q.v.).]

*Min.*: An orthorhombic whitish or pale-yellowish mineral, sometimes red, apple-green, or black. It was first discovered in New Jersey by Dr. Bruce.

**chōn-drō-glōs-sūs, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *γλώσσα* (*glōssa*) = the tongue.]

*Anat.*: An epithet applied to a fasciculus of muscular fibre, extending from the lesser corner of the hyoid bone to the tongue, and forming a part of the hyo-glossus. [Craig.]

**chōn-drō-grā-da, s. pl.** [From Gr. *χώνδρος* (*chōndros*) = . . . gristle, cartilage, and Lat. *gradus* = a step, from *gradior* = to go.]

*Zool.*: An order of Siphonophora, so called because the disc is supported upon somewhat cartilaginous plate. Genera *Velella*, &c.

**chōn-drōg'-ra-phŷ, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *γραφή* (*graphē*) = a delineation.] A treatise on cartilages.

**chōn-drōid, n.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *ειδός* (*eidōs*) = form.] Resembling or of the nature of cartilage.

**chōn-drōl'-ō-gŷ, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *λόγος* (*logos*) = a discourse.]

*Med.*: A discourse or treatise on the nature of cartilages. [Brande.]

**chōn-drōm'-ē-tēr, s.** [Gr. *χώνδρος* (*chōndros*) = grain, and *μέτρον* (*metron*) = a measure.] A steelyard or balance for weighing grain. [Francis.]

**chōn-drōp-tēr-ŷg'-ī-an, a. & s.** [Gr. *χώνδρος* (*chōndros*) = a cartilage, and *πτερυξ* (*pteryx*), genit. *πτερυγος* (*pterygos*) = a fin, in allusion to the gristly nature of the fins.]

*A. As adj.*: Characterized by cartilaginous fins and skeleton.

*B. As substantive*:  
*Ichthy.*: One of the Chondropterygii.

**chōn-drōp-tēr-ŷg'-ī-i, s. pl.** [Fr. *chondropterygien*; Gr. *χώνδρος* (*chōndros*) = cartilage, and *πτερίγιον* (*pterygion*) = a little wing, a fin, dim. of *πτερυξ* (*pteryx*) = a wing.]

The name given by Cuvier to one of the great sections into which the class Pisces or fishes are divided. It includes all those species, the bones and fin-spines of which are cartilaginous, or formed of gristle, such as the Sturgeon, Shark, Ray, Lamprey, &c. The same as CARTILAGINEL.

**chōn-drō-sē-pl-a, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and Lat. *sepia* (q.v.) = an allied genus.]

*Zool.*: A genus of Cephalopoda, in which the whole margin of the sac is bordered with fins, as in *Sepia*, but the shell is horny, as in *Loligo*. [Craig.]

**chōn-drō-spēr-mūm, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *σπέρμα* (*sperma*) = a seed.]

*Bot.*: A genus of climbing evergreen shrubs, natives of India. The yellow flowers and climbing stems, together with the erect ovules, have caused this genus to be referred to the Jasmineae (Jasmines), but the whole structure of the flower seems to unite it more closely to the Oleaceae. [Treas. of Bot.]

**chōn-drōs-tē-a, s. pl.** [From Gr. *χώνδρος* (*chōndros*) = . . . gristle, cartilage, and *ὀστία* (*ostia*), pl. of *ὀστέον* (*osteon*) = a bone.]

*Ichthy. & Palaeont.*: The name given by Professor Müller to a sub-order of ganoid fishes, in which the vertebral column consists only of a simple and soft *chorda dorsalis*, in place of being divided into separate vertebrae. The dermal covering of these fishes consists of large bony plates. The tail is heterocercal. The sub-order is sometimes called *Loricata*. It contains the families Cephalaspidae, Acipenseridae, and Spatulariidae (q.v.). The second and third contain recent species, the first only fossil.

**chōn-drōs-tē-ī-dæ, s. pl.** [From Mod. Lat. *chondrosteus* (q.v.), and Lat. fem. pl. adj. suff. -īdæ.]

1. *Ichthy.*: In some classifications a family of fishes, sub-order Placoganoidei. It is synonymous with the Sturionidae, the latter being made comprehensive enough to include both the Sturgeons proper (Acipenseridae), and the Paddle-fishes (Spatularidae), but excluding the Cephalaspidae. [CHONDROSTEA.]

2. *Palaeont.*: It is not known prior to the Eocene of the London Clay, where a sturgeon, *Acipenser tiliapicus*, occurs.

**chōn-drōs-tē-ō-sān-rŷe, s.** [From Mod. Lat. *chondrostea* (q.v.), and Gr. *σαῖρος* (*sauros*) = a lizard.]

*Palaeont.*: A genus of dinosaurian reptiles, found in cretaceous rocks in Britain and America. Some species must have been sixty or seventy feet long.

**chōn-drōs-tē-ūs, s.** [CHONDROSTEA.]

*Ichthy.*: A genus of fishes, the typical one of the family Chondrosteidae and the sub-order Chondrostea (q.v.). It is found in the Lias.

† **chōn-drō-tōme, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *τόμη* (*tomē*) = a cutting, *τέμνω* (*temnō*) = to cut.]

*Surg.*: A knife especially adapted to dissecting cartilage.

**chōn-drōt'-ō-mŷ, s.** [Gr. *χώνδρος* (*chōndros*) = cartilage, and *τόμη* (*tomē*) = a cutting, *τέμνω* (*temnō*) = to cut.]

*Anat.*: The dissecting of cartilage.

**chōn-drūs, s.** [Gr. *χώνδρος* (*chōndros*) = grain, cartilage, mudclay.]

*Bot.*: A genus of Cryptonemiacae (Florideae) (green Alga), composed of cartilaginous seaweeds with flat dichotomously-divided fronds, the cellular structure of which exhibits three layers—a central of longitudinal filaments, an intermediate of small roundish cells, and an outer of vertical coloured and beaded rows of cells, the whole imbedded in a tough intercellular matrix. *Chondrus crispus* becomes horny when dry, and is the Irish Moss or Carrageen of the shops.

**chōn-ē-mor'-pha, s.** [Gr. *χώνη* (*chōnē*) = a funnel, and *μορφή* (*morphē*) = form, appearance, in reference to the form of the corolla.]

*Bot.*: A genus of erect or twining Indian shrubs, belonging to the order Apocynaceae, closely allied to *Echites*, from which it differs in the funnel-shaped corolla. The flowers are showy, yellow or white. The root and leaves of *Chonemorpha malabarica*, a plant of Malabar, are used medicinally by the natives [Treas. of Bot., &c.]

**chōn-ē-tēs, s.** [Gr. *χώνη* (*chōnē*), contracted from *χώνη* (*chōanē*) = a melting-pot, . . . s. funnel.]

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hōre, camēl, hēr, thēre; pine, pit, sīre, sīr, marine; gō, pēt, or, wōre, wōlf, wōrk, whō, sōn: mūte, cūb, cūre, unīte, cūr, rūle, fūll; trŷ, Sŷrian. æ, œ = ē. ey = ā. qu = kw.

**Palæont.**: A genus of brachiopod mollusca, family Productida. The shell is concavo-convex, with the hinge-line straight. The ventral valve is convex, and the dorsal one concave. All are fossil. In 1875 Tate estimated the known species at forty-seven, all from the Silurian and the Carboniferous rocks.

**chōn'-i-crite**, s. [Gr. χωνεία (chōneia) = a fusion, and κριτός (kritos) = a test; its fusibility distinguishing it from some allied species.]

**Min.**: A massive, crystalline, granular, or compact mineral from Elba and Finland. It is of a whitish colour, sometimes with yellowish or greyish spots. It is a lime pyrochlorite. Hardness, 2.5-3; sp. gr., 2.91. (Dana.)

**chōop**, \* **chōops**, s. [A.S. *heope*, *hlope* = a hip, the fruit of the dog-rose.] [HIP, CHOUUPS.] The fruit of *Rosa canina*. (Parts of Eng. & Scotland.)

**chop-rose**, s. *Rosa canina*.

**chop-tree**, s. The same as CHOP-ROSE (q.v.).

**chōo'-pa**, s. [A Malacca word.] The Malacca name of a fruit, that of *Pterardia dulcis*, a sapindaceous tree.

(pt. t. \* *chese*, \* *ches*, \* *cheas*, \* *churs*, \* *chus*, \* *chōse*, \* *pa. par. coren*, \* *icoren*, \* *chōsen*.) [A.S. *ceosan*, *ciosan*; O. Sax. *kiocan*, *keosan*; O. Fris. *kiasa*; O. H. Ger. *chiosan*, *chūsān*; Goth. *kiusan*; O. Icel. *kjōsa*; Sw. *keza*; Dut. *kiesen*; Ger. *kiesen*.]

**A. Transitive:**

**I. Ordinary Language:**

- 1. To take by preference one out of several things offered; to select. "Of harness two the lesser is for to choose." Chaucer: *Troilus*, ll. 470.
- 2. To accept when offered; not to reject.
- 3. To take, to adopt, to apply oneself to. "William his way to Scotland ches." Langtoft, p. 146.
- 4. To elect, to wish; to prefer a certain course. "Let us choose to us judgment; and let us know among ourselves what is good." Job xxxiv. 4.
- 5. To obtain. "Such strength he him the ches That prince of all the world he was." *Cantel of Louis*, p. 127.

**II. Technically:**

- 1. *Scrip.*: To adopt or select for a special purpose or position. [CHOSEN.] "He chose David also his servant." Psalm lxxviii. 70.
  - 2. *Theol.*: To elect for eternal happiness.
- B. Intransitive:**
- 1. To make one's choice; to select, elect, or prefer. "Thou mayst haf thi will if thou to lone chese." Langtoft, p. 116.
  - 2. To have the power or freedom of choice (generally with a negative, and meaning that the person spoken of has no alternative). "Knaves abroad, Who having by their own importunate suit Convinced or supplied them, they cannot choose But they must blis." Shakespeare: *Othello*, iv. 1.

¶ To choose: By or of choice. "Be a lord to choose." *Farguhar: Twin Rivals*, ll. 2.

¶ (1) Crabb thus distinguishes between to choose and to prefer: "To choose is to prefer as the genus to the species; we always choose in preferring, but we do not always prefer in choosing. To choose is to take one thing instead of another; to prefer is to take one thing before or rather than another. We sometimes choose from the bare necessity of choosing; but we never prefer without making a positive and voluntary choice. When we choose from a specific motive, the acts of choosing and preferring differ in the nature of the motive. The former is absolute, the latter relative. We choose a thing for what it is, or what we esteem it to be of itself; we prefer a thing for what it has, or what we suppose it has, superior to another. . . . We calculate and pause in choosing; we decide in preferring; the judgment determines in making the choice; the will determines in giving the preference. A wise prince is careful in the choice of his ministers; but a weak prince has mostly favourites whom he prefers."

(2) He thus discriminates between to choose, to pick, and to select: "Choose is as in the former

case the generic; the others are specific terms: pick and select are expressly different modes of choosing. We always choose when we pick and select; but we do not always pick and select when we choose. To choose may be applied to two or more things; to pick and select can be used only for several things. . . . To choose does not always spring from any particular design or preference; to pick and select signify to choose with care."

(3) The difference between to choose and to elect is thus stated: "Both these terms are employed in regard to persons appointed to an office; the former in a general, the latter in a particular sense. Choosing is either the act of one man or of many; election is always that of a number; it is performed by the concurrence of many voices. A prince chooses his ministers; the constituents elect their members of parliament. A person is chosen to serve the office of sheriff; he is elected by the corporation to be mayor. Choosing is an act of authority; it binds the person chosen; election is a voluntary act; the elected has the power of refusal. People are obliged to serve in some office, when they are chosen, although they would gladly be exempt. The circumstance of being elected is an honour after which they eagerly aspire. . . ." (Crabb: *Eng. Synon.*)

"And choral seraphs sing the second day."  
*Amhurst.*

**choral music**, s. Vocal music in parts, as opposed to instrumental. (*Stainer & Barrett.*)

**choral service**, s. A service of song; a service is said to be partly choral, when only canticles, hymns, &c., are sung; wholly choral, when, in addition to these, the verses, responses, &c., are sung. (*Stainer & Barrett.*)

**choral vicar**, s. A lay vicar (q.v.).

† **chör-al-ist**, s. [Eng. *choral*; -ist.] A member of or a singer in a choir. (*Genl. Mag.*)

**chör-al-ly**, *adv.* [Eng. *choral*; -ly.]

1. In a style to be sung by a choir; in harmony.

" . . . a modern composer would judge ill if he chose to set the same words chorally."—*Mason: Essay on Church Music, p. 116.*

2. In manner of a chorus.

"Marvellous sing their wild 'To Arms' in chorus; which now all men, all women and children have learnt and sing chorally, in theatres, boulevards, streets; and the heart burns in every bosom."—*Carlyle: French Revolt, pt. III, bk. I, ch. I.*

**chord**, s. [Fr. *corde*; Lat. *chorda*; Or. χορδή (*chorde*) = an intestine of which strings were made. *Chord* and *cord* are essentially the same word. When the primitive meaning of a string of a musical instrument is preserved, the original *h* is retained; when a rope or string is meant *h* is dropped.] [CORD.]

I. *Ordinary Language*:

1. *Literally*:

(1) A string of a musical instrument.

"Who mov'd  
Their stops and chords, was seen; his vibrant touch  
Instinct thro' all proportions, low and high,  
Fled and pursued transverse the resonant fugue."  
*Milton: P. L., xl. 560*

(2) A combination of musical sounds, consonant or dissonant. [II., 2.]

2. *Figuratively*: A combination.

"Is but passionate appealing,  
A prophetic whisper stealing  
Over the chords of our existence."  
*Longfellow: Epimetheus.*

II. *Technically*:

1. *Math.*: A straight line joining the extremities of an arc of a circle.

" . . . because troops passing between any two parts move on the chord of an arc . . ."  
*MacDougall: Modern Warfare as influenced by modern Artillery, ch. vi.*

2. *Music*: The simultaneous occurrence of several musical sounds, and producing harmony, such as the common chord, the chord of the sixth, of the dominant, of the diminished seventh, of the ninth (q.v.). (*Parry, in Grove's Dict. of Music.*)

**chord** (*pa. par. chorded*), *v.t.* [CHORD, s.] To furnish with strings or chords; to string.

"What passion cannot music raise and quell?  
When Jubal struck the chording shell,  
His listening brethren stood around."  
*Dryden.*

**chör-dä** (*pl. chördë*), s. [Lat. *chorda*.] [CHORD.]

1. *Anat.*: Any cord or chord-like structure. [CHORDA DORSALIS.]

2. *Bot.*: A genus of Lamiaceae (Fucoid Algae), with fronds of a peculiar, simple, cylindrical form. Two species, *Chorda filum* and *C. tomentaria*, are found between tide-marks on British coasts. The former grows from one to twenty or even forty feet long, with the greatest diameter at half its length, of 1-4 to 1-2". The cord-like frond is tubular, but has at intervals thin diaphragms, formed by interwoven transparent filaments.

3. *Music*: [CHORD-MUSIC.]

**chorda characteristic**, s. with a. *Music*: A chord of the seventh, in which a leading note appears. (*Stainer & Barrett.*)

**chorda dorsalis**, s. with a. *Anat.*: The embryonic representative of the spinal column of the Vertebrata; the perma-

ment spinal column of the lower Vertebrates. It sometimes forms a spindle-shaped, transparent, gelatinous-looking cord, with the broadest part near the tail; at others it is cylindrical or conical, rounded anteriorly and tapering posteriorly. It usually consists of an outer comparatively thick and firm structureless membrane, forming a sheath, and of pale nucleated cells, which fill the sheath. In some instances, however, its structure is fibrous, and that of the sheath fibro-membranous. The cells are mostly angular or polyhedral, and closely crowded. The Chorda Dorsalis is called also the Notochord, which is from two Greek roots, whereas Chorda Dorsalis is Latin.

"... the permanent chorda dorsalis or rudimentary spinal column of the early embryo."—*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. iv., p. 22.

**chorda tympani**, *s.*

*Anat.*: A small branch connected with the seventh or facial nerve.

**chor-dæ**, *s. pl.* [Pl. of Lat. *chorda* (q.v.)]

**chordæ essentialæ**, *s. pl.* with *a.*

*Music.*: The tonic and its third and fifth; the key-chord. (*Stainer & Barrett.*)

**chordæ tendinæ**, *s. pl.* with *a.*

*Anat.*: Strong fine tendons closing the valves of the heart.

**chordæ vocales**, *s. pl.* with *a.*

*Anat.*: The vocal chords (q.v.).

**chordæ Willisii**, *s. pl.*

*Anat.*: Several bands crossing the superior longitudinal sinus of the brain obliquely at its inferior angle. (*Quain.*)

**chor-dal**, *a.* [Eng. *chord*; -*al*.] Of the nature of, or pertaining to, a chord, esp. to the notochord.

**chor-dār-l-a**, *s.* [From Gr. *χορδάριον* (*chordarion*), dimin. of *χορδή* (*chordē*) = a string.]

*Bot.*: A genus of Chordariaceæ (Fucoid Algæ), remarkable for the solidity of the cellular texture of the filiform fronds. The so-called spores attached to the horizontal filaments are oospores, and discharge zoospores when mature. Trichosporangia have not yet been observed. *Chordaria flagelliformis*, Müll., is common on rocks and stones between tide-marks.

**chor-dār-l-ā-cē-sē**, *s. pl.* [Mod. Lat. *Chordaria* (q.v.), and Lat. fem. pl. adj. suff. -*acē-sē*.]

*Bot.*: A family of Fucoid Algæ. Olive-coloured sea-weeds, with a gelatinous or cartilaginous, branching frond, composed of vertical and horizontal filaments interlaced together, the oospores and trichosporangia attached to the filaments forming the superficial layers of frond.

**chor-dā-ta**, *s. pl.* [Mod. Lat. from *chorda* (q.v.)]

*Zool.*: A primary division, embracing all animals that have, or have had, a notochord. Thus it includes (1) the true Vertebrates; (2) the Cephalochordata (the lancelet); and (3) the Urochordata, or Tunicates.

**chor-dāte**, *a. & s.* [CHORDATA.]

*A. As adj.*: Belonging to or characteristic of the Chordata (q.v.).

*B. As subst.*: Any individual of the Chordata.

**chor-dān-lō-dī-ōn**, *s.* [Gr. *χορδή* (*chordē*) = the chord of a lyre, and *αὐλός* (*aulōs*) = singing to the flute.] A self-acting musical instrument, invented by Kauffmann, of Dresden, in 1812.

**chor-ded**, *pa. par. & a.* [CHORD, v.]

**chor-dēe**, *s.* [From Lat. *chorda*.] A painful contraction of the frænum.

**chor-ding**, *pr. par. & s.* [CHORD, v.]

*A. As pr. par.*: (See the verb.)

*B. As subst.*: The act of setting in accord; the state of being accordant.

**chor-dōm-ē-tēr**, *s.* [Gr. *χορδή* (*chordē*) = a chord, and *μέτρον* (*metron*) = a measure.]

*Music.*: A gauge for measuring the thickness of strings.

**chōre** (1), *s.* [CHOR, CHARE (1), &] A little job, a turn of work.

**\*chōre** (2), *s.* [CHOR, CHORUS.] A choir or chorus. (*B. Jonson.*)

**chōr-ē-g-a**, *s.* [Lat. *chorea*; Gr. *χορεία* (*choreia*) = a dance.] [CHORUS.]

*Med.*: More fully *Chorea Sancti Viti*, St. Vitus' Dance, a disorder of the nervous system usually occurring before puberty, and characterised by a peculiar convulsive action of the voluntary muscles, especially those of the face and extremities. [St. VITUS' DANCE.]

**\*chor-ēe**, *s.* [CHOREUS.]

**\*chō-rē-grāph-ic**, **\*chō-rē-grāph-i-cal**, *a.* [Eng. *choreograph(y)*; -*ic*, -*ical*.] Pertaining or relating to choreography.

**\*chō-rēg-rāph-ŷ**, *s.* [Gr. *χορεία* (*choreia*) = a dance, and *γράφω* (*graphō*) = to write or discourse about.] [CHOROGRAPHY (2), &] The art of representing dancing by signs, as singing is by notes. (*Craig.*)

**chō-rē-gūs**, *s.* [CHORAGUS.]

**†chō-rē-gŷ**, *s.* [Gr. *χορηγία* (*chorēgia*) = the office of a choregus.] The office or duties of a choragus or choregus (q.v.).

"As a rich young man, also, choregy and hierarchy became incumbent upon him."—*Grote: Hist. Greece*, v., ch. iv.

**chō-rē-ic**, *a.* [Lat. *chorea* (q.v.); -*ic*.] Of the nature of or pertaining to chorea, or St. Vitus' dance; convulsive.

"It began to suffer from choreic spasms of the left angle of the mouth and left arm."—*Ferrier: Functions of the Brain*, p. 201.

**\*chōr-ē-pis-cō-pal**, *a.* [Formed from *chorepiscopus* (q.v.), on the analogy of *episcopal*, from *episcopus*.] Of or pertaining to a suffragan or local bishop.

"... the Valentinian heresy, episcopal and chorepiscopal power, and some emergent difficulties concerning them."—*Felt: Life of Hammond*, § 1.

**\*chōr-ē-pis-cō-pūs**, *s.* [Lat., from Gr. *χωρησιακός* (*chōrepsikōs*) = a local bishop, from *χώρα* (*chōra*) = a place, a district, and *ἐπίσκοπος* (*episkōpos*) = a bishop.] [BISHOP.]

*Eccles.*: A local or suffragan bishop, whose episcopal jurisdiction is limited to certain districts.

**chō-rē-tis**, *s.* [Gr. *χωρήτης* (*chōrētēs*) = rustic.]

*Bot.*: A genus of Mexican and Texan Amariyllidaceæ. The perianth has a long, slender, nearly straight tube, a reflexed limb of long narrow segments, and a large rotate corolla lacerated at the margin, the long filaments being spreading-connivent. *Choretis glauca* is a beautiful species, with black-coated bulbs, erect glaucous leaves, and three or four sessile flowers. *C. galvestonensis* is a smaller-flowered species from Texas. (*Treas. of Bot.*)

**chō-rē-trūm**, *s.* [Gr. *χωρήτης* (*chōrētēs*) = rustic.]

*Bot.*: A genus of plants belonging to the order Sandalworts. The flowers have both pistils and stamens. The species are natives of New Holland, and are shrubs resembling our native broom.

**†chō-rē-ūs**, **chō-rēe**, *s.* [Lat. *choreus*, *chorius*; Gr. *χορηγος* (*choreios*) = pertaining to a chorus or choir; *χορός* (*choros*) = a dance, a choir; O. Fr. *chorée*.]

*Ancient Prosody*:

1. A foot of two syllables, the first long and the second short; mors generally called a *trochee* (q.v.).

2. A foot of three short syllables, a *tribrach* (q.v.).

**†chōr-ŷ-amb**, **chōr-ŷ-ām-būs**, *s.* [Lat. *chorambus*; Gr. *χοριαμβος* (*choriambos*), from *χορηγος* (*choreios*) = a trochee, and *αμβος* (*ambos*) = an iambus (q.v.).]

*Anc. Pros.*: A foot consisting of four syllables, of which the first and fourth are long, and the second and third short, thus combining the trochee and the iambus.

"... if you had asked him what 'religio' was, he would have replied at once that it was a *choriambus*."—*Bannay: Singleton Pontenay*, bk. 1, ch. 1.

**chōr-ŷ-ām-hic**, *a. & s.* [Lat. *choriambicus*; Gr. *χοριαμβικός* (*choriambikos*) = pertaining to a choriambus (q.v.).]

*A. As adj.*: Pertaining to or of the nature of a choriambus.

*B. As subst.*: A choriambus.

**†chōr-ic**, *a.* [Gr. *χορηγος* (*chorēgos*) = pertaining to a choir or chorus (q.v.).] Of or pertaining to a chorus; fitted for or sung by a chorus.

"A *choric* ode."—*Coleridge in Webster.*

**chō-rī-nō-mūs**, *s.* [Gr. *χόριον* (*chorion*) = skin, leather, and *νήμα* (*nēma*) = thread.]

*Ichthy.*: A genus of fishes belonging to the sub-family Centrotonina, and family Zeidae.

**chōr-ŷ-ōn**, *s.* [Gr. *χορίον* (*chorion*) = skin, leather; Lat. *corium*.]

1. *Anat.*: The outer membrane which envelops the fetus in the womb.

"They are seen to form a close pall over the surface of the chorion."—*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. 14, p. 140.

2. *Bot.*: The external membrane of the seeds of plants.

**chōr-ŷ-ōn-ic**, *a.* [Eng. *chorion*; -*ic*.] Pertaining to the chorion (q.v.).

**chōr-ŷ-pēt-a-lūm**, *s.* [Gr. *χωρίς* (*chōris*) = apart, and *πέταλον* (*petalon*) = a leaf petal.]

*Bot.*: A genus of scandent shrubs or trees of the Ardielid order, distinguished amongst its allies by the petals being four and free, not united, as well as by its racemed flowers. The flowers are small, white or yellowish, horns in little axillary racemes; the berries, when ripe, are scarlet in colour. *Choripetalum undulatum*, a native of the temperate regions of the Himalayas, grows to a height of 60 feet.

**chō-ris-ŷ-a**, *s.* [Named in honour of J. L. Choris, the artist who accompanied Kotzebue round the world.]

*Bot.*: A genus of small prickly-stemmed trees of the Sterculiad family, peculiar to South America. The flowers are large, rose-coloured, 1—3 in number, and composed of a bell-shaped 3—5 lobed calyx; 5 narrow petals, covered with silky hairs; a double staminal tube, the outer bearing the barren, the inner the fertile stamens. The tough bark of *Chorisia crispiflora* is used in Brazil for making cordage; and the white cottony hairs of the seeds of *C. speciosa* are used by the Brazilians for stuffing pillows and cushions. The species are widely spread in Asia, Africa, and America. (*Treas. of Bot.*)

**chō-rī-sis**, *s.* [Gr. *χωρισίς* (*chōrisis*) = a separating; *χωρίς* (*chōris*) = apart, separately.]

*Bot.*: (See *extract*.)

"Sometimes the parts of a flower are increased in number by the growth of additional parts, or by the splitting of organs during their development. . . . This *chorisis* consists in the formation of two parts out of one, the separated parts being either placed one in front of the other by *transverse chorisis*, or side by side by *collateral chorisis*."—*Balfour: Botany*, p. 194.

**chō-ris-ma**, *s.* [Gr. *χωρισμός* (*chōrismos*) = a separation, a parting.]

*Bot.*: A name formerly given to a genus of plants consisting of a single species, *Chorisma repens*, a little plant belonging to the Compositæ, and a native of the sandy sea-shore of China. It is nearly related to the Sow-thistles. It has been called *Chorisis repens*, and is now transferred to the genus *Ilexis* (q.v.). (*Treas. of Bot.*)

**chōr-ŷ-spōr-a**, *s.* [Gr. *χωρίς* (*chōris*) = separately, and *σπόρα* (*spora*) = a seed; in allusion to the seeds being enclosed separately in the pods.]

*Bot.*: A genus of annual plants, natives of Siberia and the Altai, with purple, white, or yellow flowers. They belong to the Crucifera (*Treas. of Bot.*)

**\*chōr-ist**, *s.* [Fr. *choriste*.] A chorister.

"Behold the great chorist of the angelical quire."—*Partheneta Sacra*, p. 150 (1638).

**chōr-ŷ-tēr**, **\*chōr-ŷ-ter**, **\*quer-ŷ-ter**, **\*quir-ŷ-ter**, **\*queer-es-ter**, *s.* [Either from Fr. *choriste*(s), with Eng. suff. -*er*, or from *choir* with suff. -*ster*.]

1. One who sings in a choir.

"Sometimes there are on the cathedral foundation minor canons, and always presentors, by vicars, and choristers."—*A. Fontanque, Jun.*: *How we are Governed*, let. 10.

2. The leader of a choir. (*American.*)

†3. A singer generally.

"Of airy choristers a numerous train Attending his wondrous progress."—*Dryden: Threnodia Augustalis*, 266.

**chōr-ŷ-tēs**, *s.* [Gr. *χωριστής* (*chōristēs*) = separating; *χωρίς* (*chōris*) = apart, separately.]

**bēl**, **hōy**; **pōt**, **jōvī**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **gem**; **thīn**, **thīs**; **sin**, **aç**; **expect**, **Xenophon**, **exist**. **ph = f**.  
-**çian**, -**çtan** = **shan**. -**çton**, -**çsion** = **shūn**. -**çion**, -**çsion** = **shūn**. -**çtious**, -**çsious**, -**çcious** = **shūs**. -**çble**, -**çdle**, &c. = **bēl**, **dēl**.

Bot.: A genus of much-branched shrubs, natives of Mexico, belonging to the Cinchonaceae (Cinchonads).

† **chör-is-tic**, a. [Eng. *chorist*; -ic.] Or of pertaining to a choir; choral. (Crabb.)

**chör-is-tō-phyl-loūs**, a. [From Gr. χωριστός (*choristos*) = separated; and φύλλον (*phullon*) = a leaf.]

Bot.: Separately leaved; having separate leaves.

**chō-ris-tō-pōd**, s. [From Gr. χωριστός (*choristos*) = separated, and πούς (*πους*), genit. ποδός (*podos*) = a foot.]

Zool.: A crustacean, with the feet separated.

"We recognise three groups of the choristopoda."—*Dana: Crustacea*, pt. 1, p. 11.

**chō-rī-sty-lis**, s. [Gr. χωρίς (*chōris*) = apart, and στῦλος (*stulos*) = a stylo.]

Bot.: A genus of plants, natives of South Africa, belonging to the Escalloniaceae. It consists of a single species, a shrub with panicles of small green flowers. The fruit is a capsule twisting into two pieces to liberate the many seeds it contains. (*Treas. of Bot.*)

**chō-rī-zā-tion**, s. [Gr. χωρίζω (*chōrizō*) = to separate; χωρίς (*chōris*) = apart, separate.]

Bot.: The separation of a layer from the inner side of a petal, either presenting a peculiar form, or resembling the part from which it is derived. (*Balfour*). Also called *unfolding* by Lindley and *deduplication* by Henfrey. [CHOROSIS.]

**chō-rī-zōn-tēs**, s. pl. [Gr. nom. masc. pl. of the pr. par. of χωρίζω (*chōrizō*) = to separate.] A name applied to those critics who deny the identity of the authors of the Iliad and the Odyssey.

"The chorizontes, so called because they separate the authorship of the Iliad from that of the Odyssey."—*Gladstone: Juvenius Murili*, ch. 1.

**chork**, v. t. [CHIRK.] (Scotch.)

**chorl**, s. [Ety. doubtful.] The angle at the junction of the blade of a penknife with the square shank which forms the joint.

**chōr-ō-hāte**, **chōr-ōh-a-tēs**, s. [Gr. χώρα (*chōra*) = a place; and ἄτης (*hātēs*) = traversing, βαίνω (*baínō*) = to go.] The Greek level. [LEVEL.]

**chōr-ō-grāph**, s. [Gr. χώρα (*chōra*) = a district, a place, and γράφω (*grāphō*) = to write, to describe.] An instrument contrived by Professor Wallace, of Edinburgh, "To determine the position of a station, having given the three angles made by it to three other stations in the same plane whose positions are known." (*Knight*.)

\* **chōr-ōg-rāph-ēr**, s. [Gr. χωρογράφος (*chorographos*) = describing countries; χώρα (*chōra*) = a country, a place; γράφω (*grāphō*) = to write, to describe, and Eng. suff. -er.]

1. One who describes or plans particular districts or countries.

"... the others should indeed be termed topographers or chorographers."—*Milton: Hist. Eng.*, bk. 1v.

2. A geographical antiquarian or critic who, in the comparison of modern with ancient geography, investigates the locality of places mentioned in the older writers, and discusses the question of names for which the site, and sites for which the name, is uncertain.

"Places unknown better harped at in Camden and other chorographers."—*Milton: Hist. Eng.*, bk. 1v.

**chōr-ō-grāph-ic**, \* **chōr-ō-grāph-i-cal**, a. [Eng. *chorograph(y)*; -ical.] Pertaining to chorography; descriptive of particular regions or countries.

"I have added a chorographical description of this terrestrial Paradise."—*Raleigh: History of the World*.

**chōr-ō-grāph-i-cal-ly**, adv. [Eng. *chorographical*; -ly.] In a chorographical manner; according to the rules and principles of chorography.

"I may perhaps be found fault withal, because I do not chorographically place the funeral monuments in this my book."—*Weever: Anc. Fun. Mon. Great Britain, Ireland, and Islands adjacent*.

**chō-rōg-rāph-ŷ** (1), s. [Fr. *chorographie*; Lat. *chorographia*, from Gr. χωρογραφία (*chorographia*) = a description of countries or regions; χώρα (*chōra*) = a district, a region; γράφω (*grāphō*) = an account, from γράφω (*grāphō*) = to write, to describe.] The science or practice of describing various countries or

regions, or of laying down their limits and boundaries on maps. It is thus distinguished from, and has a wider meaning than, *topography*, which deals with the description and history of single places.

"I think there might be good use made of it for chorography."—*Watson: Belg. Wotton*, p. 300.

\* **chō-rōg-rāph-ŷ** (2), s. [Gr. χορός (*choros*) = a dance; γραφία (*graphia*) = a description, γράφω (*grāphō*) = to write, describe.] A description of or treatise on dancing. [CHOROGRAPHY.]

"A Treatise of Chorography or the Art of Dancing Country Dances after a new character."—*From the French of M. Pouillet*. . . By John Essex (1719).

**chōr-ōid**, a. & s. [Gr. χοροειδής (*chōroeidēs*) (*chōroeidēs*) = the grape-coloured coating of the eye; χορίον (*chōrion*) = skin, leather, and εἶδος (*eidos*) = form, appearance.]

A. As adjective:

Anat.: Resembling the chorion; an epithet applied to several membranes, especially to the plexus and web of the *pia mater*, and to the inner tunic of the eye.

"The choroid coat of the eye."—*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. 11, p. 60.

"The choroid arteries which supply the choroid plexus."—*Ibid.*, ch. x, p. 233.

B. As substantives:

Anat.: The vascular, as opposed to the specially nervous, portion of the retina.

"The optic nerve penetrates the sclerotic. . . The choroid is thick, and coloured by a deep-brown pigment."—*Owen: Anatomy of Vertebrates*.

**choroid coat**, s.

Anat.: A vascular membrane, black on the inner side, lining the sclerotic portion of the eyeball.

**choroid membrane**, s.

Anat.: A thin membrane which extends from the entrance of the optic nerve to near the anterior margin of the sclerotic, where thickening, it becomes the ciliary body, and is continued into the iris.

**choroid plexus**, s.

Anat.: A congeries of blood-vessels upon the lateral ventricle of the brain. (Often in the plural *plexuses*.)

"In the lateral and fourth ventricles it [the spinal membrane] forms projecting processes or folds, somewhat fringed, highly vascular, and invested by epithelium derived from the membrane which lines the ventricles. These processes are called the choroid plexuses."—*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. x, p. 254.

**chōr-ōi-dal**, a. [Eng. *choroid*; -al.] The same as CHOROID, a. (q. v.).

**choroidal fold**, s.

Anat.: A fold appearing to enclose the lens of the eye, but so as to leave an aperture or depression below. (*Quain*.)

**choroidal fissure**, s.

Anat.: The same as choroidal fold (q. v.). (*Quain*.)

**chōr-ōi-dī-tis**, s. [From Gr. χοροειδής (*choroieidēs*), for χοροειδής (*chōroieidēs*) [CHOROID], and suff. -ίτις (*itis*), denoting inflammation.]

Med.: Inflammation of one of the investing tissues of the eyeball, called the choroid. This highly vascular and pigmentary membrane is seldom the seat of inflammation, but when it does occur it is characterised by pain in and around the eye, intolerance of light, tearfulness, displacement of the pupil, and, as the disease proceeds, the cornea and the whole eyeball swell and protrude. Hectic and emaciation are the common accompaniments of the latter condition, and the digestion throughout is very much impaired. Chronic choroiditis is marked by a very peculiar alteration and variation which takes place in the colour of the eye, and which has been called by Desmarres *choroidé tigrée*.

**chōr-ō-lōg-i-cal**, a. [Eng. *chorology(y)*; -ical.] Of or pertaining to chorology.

"Chorological dilettites."—*Lingard: Hist. Anglo-Sax. Church*, vol. 1, p. 249.

**chō-rōl-ō-gist**, s. [Eng. *chorology(y)*; -ist.] One versed in chorology; a student of faunal and floral areas.

**chō-rōl-ō-gŷ**, s. [Gr. χορῶν (*chōrōn*) = a district, county; λόγος (*logos*) = a discourse, λέγω (*legō*) = to tell, to describe.]

1. The science or act of describing localities; chorography.

2. The geographical and topographical distribution of animal and vegetable species.

"The answer . . . would represent its distribution or chorology."—*Buziz: Crayfish*, p. 46.

\* (2) An interpreter of events; one who explains.

"Ophé. You are a good Chorus, my Lord. Ham. I could interpret between you and your love: if I could see the puppets dallying."—*Shak. sp.: Hamlet*, III. 2.

II. Technically:

1. *Gr. Drama*: The chorus was probably originally a company of dancers in a ring. In later times a choric performance implied the singing or musical recitation of a poetical composition, accompanied by appropriate dancing and gesticulation. As choral performances were especially cultivated in all the Dorian states, and particularly in Sparta, the Dorian dialect came to be regarded as the appropriate dialect for such compositions. Arion, a contemporary of Periander, first gave the chorus a regular choral form. It consisted of about fifty men or youths, who danced round the altar of Dionysus. From these cyclic choruses was developed the Attic

čate, čát, čare, amidst, whát, fáll, father: wē, wēt, hère, camēl, hēr, thère: pine, pít, síre, sír, marine: gō, pōt, er, wóre, wəlf, wōrk, whō, sōn; mūte, cūb, cūre, uníte, cūr, rúle, rúll; trŷ, Sŷrian. s, ce = é. ey = ā. qu = kw.

tragedy. [TRAGEDY.] The exact number of the chorus in the times of the earlier tragic poets is uncertain; from Sophocles onwards the regular number was fifteen. It was arranged in a quadrangular form, and entered the theatre by a passage to the right of the spectators in three lines. To guide them in their evolutions lines were marked upon the boards of the orchestra. The functions of the chorus in the Greek tragedy were very important. It acted the part (1) of a dispassionate and right-minded spectator, inculcating the lessons of morality and resignation to the will of heaven, as taught in the piece being acted; and (2) of a guide to explain events supposed to happen in the intervals between the acts and scenes. In comedy the number of the chorus was twenty-four, consisting half of males and half of females.

2. *Musio*: (1), (2), & (3). The same as I. 1, (2), (3), & (4).

(4) The name given to the mixture and compound stops in an organ. (*Stainnes & Barrett*.)

**THE ANOINTED ONE**: The appellation given to Our Lord as His official title, and corresponding to the Hebrew Messiah (*q. v.*)

"And he saith unto them, But whom say ye that I am? And Peter answereth and saith unto him, Thou art the Christ."—*Mark* viii. 29.

¶ Used in the plural to signify persons who would pretend to be the true Christ.

"For false Christs and false prophets shall rise..."—*Mark* xiii. 22.

¶ The two names, *Jesus Christ*, are not analogous to a modern Christian name and surname; in reality the great Being so designated had but one personal appellation—*Jeans*: *Christ* being superadded at a later period to designate his office, function, or mission. *Jesus*, Gr. *Ἰησοῦς* (*Iēsoús*), is the equivalent of the Heb. *יְהוֹשֻׁעַ* or *יֵשׁוּעַ* (*Yehoshua*), *i. e.*, *Joshua*, meaning *Jehovah-Saviour*, *Deliverer*, or *Helper*. [*JESUS*.] It was borne by the military leader in the wars of Canaan (*Joshua* i.—xxiv., actually called *Jesus* in the authorized version

of Acts vii. 45, and Heb. iv. 8), by *Jesus* surnamed *Justus*, a fellow-labourer with Paul (*Col.* iv. 11), and by about a dozen of other persons figuring in the pages of Josephus; in fact the name seems to have been not uncommon among the Jews. But we learn from St. Matthew that in this particular case the appellation was given previous to birth by Divine authority. "... thou shalt call his name *Jesus*, for he shall save his people from their sins." The year [CHRISTIAN ERA], the month, and the day [CHRISTMAS], when the child *Jesus* was born are matters of more or less uncertainty, not having been recorded with precision at the time. The salient features, however, of the life thus begun were narrated by four evangelists [EVANGELISTS], who are believed by the immense majority of Christians to have written with infallible accuracy and trustworthiness under the guidance or inspiration of the Spirit of God. [INSPIRATION.]

The circumstances heralding or attendant upon the birth of John, afterwards the Baptist, and the miraculous conception and nativity of *Jesus*, the last-named event at Bethlehem, are told at length by St. Luke (*Luke* i. ii.); while St. Matthew relates the visit of the Magi, the slaughter of the infants at Bethlehem, and the flight of the holy family to Egypt (*Mat.* ii.).

These occurrences took place while Augustus, the first Roman Emperor, was upon the throne (*Luke* ii. 1). Thirty years later, under the reign of Tiberius, John, now grown to full manhood, appeared in the wilderness of Judea, as an ascetic and preacher of repentance, the necessity of which he urged on the ground that the kingdom of heaven was at hand. Those who confessed their sins he baptized in the river Jordan, and thus a new religious community arose, separated to a certain extent from the ordinary professors of Judaism (*Mat.* iii. 1—10, *Luke* iii. 1—14). Some suspected that he might be the "Christ" or "Messiah" of ancient prophecy, but he disclaimed the honour, indicating that he was but the forerunner of another who should baptize with the Holy Ghost and with fire, that is as with fire. (*Mat.* iii. 11, 12; *Luke* iii. 16; *John* i. 20—23.)

Meanwhile *Jesus*, now about thirty years of age, had come forth from the obscurity in which he had hitherto resided at Nazareth. (*Luke* ii. 51, fil. 23.) Having sought and obtained baptism from John, with Divine recognition as the Son of God, and having overcome temptation in the wilderness, He without further delay addressed Himself to His life-work in the world. (*Mat.* iii. 13—17, iv. 1—11; *Luke* iii. 21, 22, iv. 1—14.) He claimed to be the Messiah spoken of by holy men of old (*Dan.* ix. 25, 26, &c.), nay more, to be, in one sense, the subordinate (*John* x. 29), and in another the equal of His Heavenly Father (*v. 30*). His ministry, whilst not ignoring repentance (*Luke* xii. 8—5), was one chiefly of faith (*John* iii. 14—19) and love (*John* xiii. 34; *Mat.* v. 43—46). Twelve apostles (*Mat.* x. 1—6), and afterwards seventy other disciples, were chosen to aid him in his ministry (*Luke* x. 1, &c.), the former baptizing converts as they arose (*John* iv. 2). John the Baptist saw his own reputation pass away under the greater glory of his Divine successor, but never allowed this to evoke jealousy within his breast (*Mat.* iii. 11; *Luke* iii. 15; *John* i. 15, 27, 29, iii. 28—31), and when his faithfulness in reproving sin, even in high places, led to his suffering a martyr's death (*Mat.* xiv. 3—12), his baptized followers, either at once or gradually, transferred themselves to *Jesus* (*John* i. 35—37; *Acts* xix. 1—5).

The latter holy teacher thus left alone, continued His ministry, it is believed, for about three years in all, chiefly at Capernaum and other places near the Lake of Galilee (*Mat.* iv. 13; *Luke* vi. 1), as well as in other places of that province (*Luke* vii. 1, &c.; *Mat.* xvi. 13), in Peraea beyond Jordan (*Mat.* xix. 1; *Mark* x. 1; *Luke* viii. 37), in Samaria (*John* iv. 1—42), beyond the Holy Land in Phenicia (*Mark* vii. 24), and, chiefly on occasions of the great festivals, at Jerusalem, which necessitated His visiting other parts of Judea (*Mat.* xx. 29; *John* ii. 23, vi. 1, 2, 10). He supported His claims to be the Messiah by miracles of knowledge, *i. e.*, prophecies (*Mat.* x. 19, &c.; *Luke* xix. 41—44) and miracles of power, such as healing the sick (*Mat.* ix. 35, &c.), nay, even raising the dead (*Mark* v. 22—43; *Luke* viii. 41—56; *John* xi. 1—44).

The chief priests and other dignitaries who held sway in the Jewish synagogues, were stirred up nearly to madness by jealousy of His success, and eagerly accepted the offer of an unworthy apostle, Judas Iscariot (*i. e.*, apparently of Kerioth in Judea) to betray the Lord. A manufactured charge of blasphemy led to the condemnation of *Jeans* by His deadly foe, the high priest, but as his power of life and death now rested not with the Jewish authorities, but with the Roman governor, Pontius Pilate, a charge of disaffection to the imperial government was manufactured, as it was felt that the heathen Roman would not attach any weight to the alleged blasphemy. The procurator had discernment to see clearly that what he was required to do was to sanction a judicial murder, and for some time refused to become partner in the Jewish ruler's guilt. But as the cry, "Crucify him," "crucify him," continued to rise from the multitude, he resolved to avoid unpopularity at the expense of moral principle, and gave sentence that it should be as the Jews required. The crucifixion therefore took place (*Mat.* xxvii. 1; *Mark* xv. 1; *Luke* xxiii. 1; *John* xix. 1). Friday was the day when the nefarious deed was done, and three days later, or early on Sunday morning, news was brought to the Apostles, and the Church generally, by certain women of their company who had visited the sepulchre, that a resurrection had taken place (*Mat.* xxviii. 1; *Mark* xvi. 1; *Luke* xxiv. 1; *John* xx. 1, xxi. 1). At a subsequent interview with their risen Lord He gave the Apostles and their successors a commission to make disciples of all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost (*Mat.* xxviii. 19, &c.) and about forty days after the crucifixion He led them out as far as Bethany and lifted up His hands and blessed them. "And it came to pass, while he blessed them, he was parted from them, and carried up into heaven" (*Luke* xxiv. 50, 51). He had predicted His cruel death, His resurrection on the third day (*Mat.* xx. 19), and His ascension (*John* x. 17), and had intimated that at a future period He would again return to the earth in glory (*Mat.* xxvi. 64, &c.) For the leading dates connected with the life of *Christ*, see CHRISTIAN ERA; for more details regarding the doctrines, and for the subsequent history of the Christian Church, see CHRISTIANITY.

Trench draws attention to the fact that we never in the New Testament find the word applied to the followers of Jesus, except by their adversaries, and that it was not introduced till the preaching of Paul to the Gentiles of Antioch, and other causes, showed that the disciples of the Crucified One indicated by their devout Master aimed at making their religion that of the entire world. The application of the name Christian showed that the faith so designated was perceived to be not a Jewish sect, but a religion freed from nationality or from locality, that it might better discharge its mission to the world. (Trench: On the Study of Words, pp. 99, 100.)]

A. As substantive:

1. One who believes or professes the religion of Christ; a follower of Christ.

"This Mekometh was a cristene."—Langland: P. Plowman, 10418.

"The disciples were called Christians first in Antioch."—Acts, xi. 26.

2. One who is born in a Christian country or of Christian parents.

3. Plural:

(1) A name assumed by a denomination in the United States, to express their alleged renunciation of all sectarianism. They are rather numerous. They have no creed, nor authority in matters of doctrine, but leave to each individual the interpretation of Scripture, and the determination thereby of his belief. They may be regarded as a sect of Unitarian Baptists (gen. pron. Christ'-i-an).

(2) In the British Registrar-General's lists for 1881 of religious denominations having certified places of worship in England and Wales, the two following occur—(a) Christians owning no name but the Lord Jesus; and (b) Christians who object to be otherwise designated.

B. As adjective:

1. Believing in or professing the religion of Christ.

"Cristene men egen ben so fagen."—Genesis and Exodus.

"... the most Christian barbarian who had perpetrated on Christians outrages of which his infidel allies would have been ashamed."—Macaulay: Hist. Eng., ch. xl.

¶ There exist a considerable number of minor religions sects, having an appellation beginning with the adjective Christian. In the United States we have the Christian Connection (otherwise Christians, or Disciples of Christ), and the Christian Union, or, more fully, The Church of Christ in Christian Union. Each has over 100,000 members. In England and Wales there are the Christian Believers, Brethren, Disciples, Eliasites, Unionists, &c.

2. Pertaining to Christ or his religion.

3. Pertaining to the Church of Christ; ecclesiastical.

"In briefly recounting the various species of ecclesiastical courts, or, as they are often styled, Courts Christian, I shall begin with the lowest."—Blackstone: Commentaries.

4. Civilized.

¶ The most Christian king, a title bestowed by Pope Gregory the Great upon Charles Martel, and retained by subsequent French kings, as the great supporters of the Church.

"William declared aloud at his table before many persons that he would make the most Christian King repeat the outrage..."—Macaulay: Hist. Eng., ch. vii.

Christian architecture, s. The introduction of Christianity naturally had its effect on the style of architecture adopted for religious buildings. The Roman Early Christian style appeared first in basilicas and circular churches. The former were, doubtless, originally built on the model of the Roman basilicas (BASILICAE), but the requirements of the new religion soon necessitated various modifications in the original plan. The Christian basilicas were constructed generally with three aisles: the central one broader than the others, the left or north being reserved for males, and the right or south for females. Sometimes we find five aisles. The building terminated in a semi-circular apse. The decorations consisted of paintings and mosaics, used mainly in the apse. The pillars were generally of the Corinthian order. [CORINTHIAN.] Symbols were largely introduced. These were the cross, the monogram of Christ, a lamb or a dove, as typifying the Holy Spirit, and a fish, used as a symbol of Christ from the letters of the Greek word ἰχθύς (ichthys) = a fish, forming the initials of the title of our Lord, Ἰησοῦς Χριστός Θεοῦ υἱός ἁγίου (Iēsous Christos, Theou huios, hōiōs) = Jesus Christ, the Son of God, the Saviour. The roofing was of beams with flat panelling, frequently gilt. The altar stood at the east end in front of the apse. The space round the altar was raised off and called the sanctuary. Adjoining the entrance was generally a narrow space called the Narthex, [NARTHEX.] In the middle of a portico in front of the building was a bowl for washing the hands. [CAN-THARUS.] A crypt was constructed under the altar for the reception of the bones of the patron-saint. The most magnificent specimen of Byzantine architecture is the Church of St. Sophia at Constantinople, built originally by Constantine, and rebuilt after its destruction by fire, by Justinian in the sixth century. [BYZANTINE.] Russian church architecture was at first a deterioration of Byzantine, modified in the fifteenth century, by the introduction of bulb-shaped domes, adopted from the Tartars. The Gothic, or Pointed style, the most familiar to us in religious architecture, is distinguished by the pointed arch, formed of two segments of a circle meeting in a point. [GOTHIC.] The Perpendicular and Flamboyant styles are deteriorations of the Gothic (FLAMBOYANT, PERPENDICULAR), deriving their names from the form of the tracery, of the windows, and ornaments. The Classic styles of architecture have been comparatively rarely adopted in church architecture. The Cathedral of St. Paul, which by its dome recalls St. Peter's at Rome, is an example of the Renaissance, or revived Roman style. In plan, English churches generally form a Latin cross, consisting of a nave, transepts, and chancel—(see these words)—their direction being almost invariably east and west. In a few isolated instances, such as St. Sepulchre's, at Cambridge, the plan is circular.

Christian courts, s. pl. Law: The same as ECCLESIASTICAL COURTS.

tive or because he modestly believed his mental powers small, which they were not. It is thought that he fixed the advent too late by four years, and that consequently Jesus was born, if the contradiction in terms can be permitted, in a.c. 4. Mr. J. W. Bosanquet considers that it was in a.c. 3. On these views the year 1832 of the Christian era is really 1886 or 1885. The Christian era is sometimes called the Dionysian era.

**Christian name, s.** The name given to a child on its admission into the Christian Church at baptism, as distinguished from the surname or family name.

- 1. Christendom; the professors of the Christian religion.
- 2. The Christian religion; the doctrines and precepts taught by Christ.

¶ To take a comprehensive view of Christianity, attention should be given to (1) its doctrines, (2) its government and discipline, and (3) its history from the time that it was introduced into the world until now.

(1) *The Doctrines of Christianity* : Though the professors of Christianity have separated into many sects, as have the Mohammedans, the Brahmanists, and others, yet all but a small minority are really at one with respect to certain great fundamental doctrines. Christians believe in a Supreme Being—the one living and true God. The immense majority hold that it is not inconsistent with monotheism to accept the tenet that in the Divine Unity there is a Trinity, the Father, the Son, and the Holy Spirit, to all of whom worship of the highest kind can be paid. Jesus Christ is identified by them with the second person of the Godhead, and is held to be at once God and Man. As God He existed from eternal ages, and was not first brought into being when born at Bethlehem. They consider that He was miraculously conceived by the Holy Ghost, and that His mother remained the Virgin Mary after having brought Him into the world. The reason why He came to this earth is held to have been that He had been commissioned by His Eternal Father to undertake a mission of mercy to the earth. Another tenet of their faith represents man as having been created innocent, but to have fallen, and now to be guilty and in need of a Saviour. Christ is believed to have been that Divine

Saviour. His life on earth is regarded as having been perfect, so that He constitutes the exemplar for all mankind. His death is held to have been an atonement for sins not His own, and to have been so important that to all Jewish ceremonies and symbols and all Messianic prophecy, as with a finger, pointed. Faith in His Divine mission and work, and specially on the efficacy of His death, are insisted on to put sinners in possession of the benefits purchased by their Redeemer's death. The historic facts of His resurrection and ascension are pointed to as evidences of the sanction and acceptance of His work by His Heavenly Father, and implicit trust is expressed in His coming again agreeably to His promise to earth, and in His ultimately becoming the Judge of the world. At the final assize it is believed that those whose good deeds show that they have believed in Him, shall be rewarded by eternal felicity, whilst everlasting misery shall be in store for those who have been faithless and wicked. The acceptance of this creed by man in his fallen state, is held to be impossible without Divine assistance, and it is considered that the Holy Ghost, if solicited, will give the requisite spiritual power to produce faith in the most unbelieving heart. The Scriptures of the Old and New Testaments are regarded as possessing inspiration in a sense in which no other book has it, and as being, therefore, in the highest degree fitted to enlighten inquiring minds as to religious duty.

(2) *The government and discipline of Christianity* : [For these see CHURCH GOVERNMENT.]

(3) *The history of Christianity* : [For this see CHURCH HISTORY.]

¶ Christianity is part of the law of England, though certain statutes in its support, now regarded as persecuting, have either been formally annulled. Similar laws, making offences against Christianity punishable existed in some of the Colonies, but no such statutes can exist in the United States.

**Christ-mas** (f. silent), \***cris'tmas**, \***cris'temesse**, \***crystonmas**, \***chrystmas**, \***cris'tomasse**, & *a.* [A.S. *Crist* = Christ; *masse* = mass, festival.]

**A. As substantive** :  
1. The festival of the Nativity of Christ, observed by the Christian Church yearly on the 25th December.

- ¶ Augustine considered the fast of Good Friday, and the festivals, Easter, Ascension, and Whitantide, as the only holy days which had an Apostolic origin and the sanction of a general council. Christmas he deemed to be of later origin and lesser authority. When the first efforts were made to fix the period of the year when the advent took place, there were, as we learn from Clement of Alexandria, advocates for the 20th May, and for the 20th or 21st April. The Oriental Christians generally were of opinion that both the birth and baptism of Jesus took place on the 6th of January. Julian 1, bishop of Rome from A.D. 337–352, contended for the 25th December, a view to which the Eastern Church ultimately came round, while the Church of the West adopted from their brethren in the East the view that the baptism was on the 6th of January. When the festival was at length placed in December, it afforded a substitute to the various nations who had observed a festival of rejoicing that the shortest day of the year had passed, besides spanning over the great interval between Whitsuntide of one year and Good Friday of the next. Coming to the Roman Christian converts in lieu of the saturnalia, to which they had been accustomed while yet they were heathens, its purity became snuffed almost at the first by revelry which had crept into it from this source. Similarly the Yule log, the mistletoe, &c., among ourselves, are relics of an older faith.

2. The season of Christmas, i.e., from Christmas-eve to Old Christmas-day, or Twelfth-night, January 6th.

"The sylvan festes are at *Crismetesse*."—*Aemilius of Inwyg*, p. 114

3. The holly (*Ilex aquifolium*), or other decorations for Christmas. (*Stainer & Barrett*.)

**Christmas-tide, s.** The season of Christmas.

**Christmas-tree, s.** A small tree, generally a young fir, on the branches of which presents for children are hung at Christmas.

† **chris-tō-lōg'-y-cal, a.** [Eng. *christology*]; -cal.] Of or pertaining to Christology.

† **Chris-tōl'-ō-gy, s.** [Gr. *Χριστός* (*Christos*) = Christ; *λόγος* (*logos*) = a discourse, *λέγω* (*legō*) = to tell, to discourse.] A discourse concerning Christ, or the doctrines of the Christian Church.

"The reader will find in this author an eminent excellence in that part of divinity which I make bold to call *Christology*, in displaying the great mystery of goodness, God the Son manifested in human flesh."—*French: On the Study of Words*, p. 122.

**chris-tō-lyte, s.** [Gr. *Χριστός* (*Christos*) = Christ, and *λύω* (*lyō*) = to loose.] One of a sect of Christians in the sixth century, who held that, when Christ descended into hell (Hades), He left both His body and soul there, and rose with His Divine nature alone. (*Ogilvie*.)

\* **chris-tōm, a.** [A mistake for *chrisom* (q.v.).]

**chris-tōph'-an-ty, a.** [Gr. *Χριστός* (*Christos*) = Christ, and *φαίνω* (*phainō*) = to bring to light, to make to appear.] An appearance of Christ, used especially of His several appearances to His disciples between His resurrection and His ascension.

"The order in which he enumerates his christophanies."—*Strauss: Life of Jesus*; *Trans.* (1846), p. 128.

**chris-tō-phite, s.** [From St. Christophe mine at Breitenbrunn, where it is found; and suff. -ite (*Min.*) (q.v.).]

Min.: A brilliant black blende, a variety of Sphalerite or Blende (q.v.). Sp. gr., 3.91-3.923.

**chrō-as'-ta-cōs, s.pl.** [Gr. *χρῶα* or *χρῶα* (*chroa* or *chrota*) = colour, and *αστακος* (*astakos*) = a crab.] A class of pellucid gems, comprehending all those of variable colours, as viewed in different lights. (*Webster*.)

**chrō-ma-scope, s.** [Gr. *χρῶμα* (*chrōma*) = colour; *σκοπέω* (*skopēō*) = to view, to examine.] An instrument to exhibit the three optical effects of colours: (1) The refraction of prisms and lenses; (2) The transmission of light through transparent media; (3) The reflection of specularly.

**chrō-māte, s.** [CHROMIUM.]

Chromate of iron:

Min.: The same as *Chromite* (q.v.).

**Chromate of lead:**

1. Chem.:  $PbCrO_4$ . A lead salt of chromic acid. [CHROMIUM.]

2. Min.: The same as *CROCOITE* (q.v.).

3. Dyeing, &c.: The various chromates of lead are used to give yellow and red colours.

**Chromate of lead and copper:**

Min.: The same as *VAQUELLINITE* (q.v.).

**Chromate of potassium:**

Chem., &c.: The potassium salt of chromic acid, much used, as is the bichromate, in calico-printing, and for making pigments. Soluble chromates are detected by giving a yellow precipitate with plumbic acetate, a crimson red precipitate with argentic nitrate, and by forming green solutions of chromic chloride,  $Cr_2Cl_6$ , when boiled with alcohol and hydrochloric acid. A dry chromate heated with  $NaCl$  and strong  $H_2SO_4$  gives off orange-red vapours of chromochromic acid. Insoluble chromates fused with potassium nitrate yield  $K_2CrO_4$  potassium chromate.

**chrō-māt'-io, \*chrō-māt'-yck, a.** [Fr. *chromatique*; Lat. *chromaticus*, from Gr. *χρωματικός* (*chrōmatikos*) = suited for colour; *χρῶμα* (*chrōma*) = colour.]

1. Relating to colour, or colours; coloured.

"These actions often display themselves in chromatic phenomena of great splendour."—*Tyndall: Frag of Science*, 3rd ed., v. 116.

2. Pertaining to a scale of semitones in music; including notes not belonging to a diatonic scale. [CHROMATIC SCALE.]

**chromatic aberration, s.**

Optics: (See extract.)

"In the refracting telescopes . . . the different refrangibility of the different coloured rays presents an obstacle to the extension of their power beyond very moderate limits. The focus of a lens being shorter as its refractive index is greater. It follows, that one and the same lens refracts violet rays to a focus nearer to its surface than red. . . . If the paper be held in the focus for mean rays, or between the vertices of the red and violet cones, these will then form a distinct image, being collected in a point; but the extreme, and all the other intermediat rays, will be diffused over circles of sensible magnitude, and form coloured borders, rendering the image indistinct and hazy. This deviation of the several coloured rays from one focus is called *chromatic aberration*."—*Encyclopædia Metropolitana*; *Light*.

**chromatic chord, s.**

Music: A chord which contains a note or notes foreign to diatonic progression. (*Stainer & Barrett*.)

**chromatic harmony, s.**

Music: Harmony made up of chromatic chords. (*Stainer & Barrett*.)

**chromatic interval, s.**

Music: An interval which is augmented or diminished. (*Stainer & Barrett*.)

**chromatic modulation, s.**

Music: Modulation in which, by means of chromatic harmony, there is a passing into an extreme key. (*Stainer & Barrett*.)

**chromatic printing, s.** The art of printing in colours. [CHROMOTYPE.] (For a description of the process, see *Knight: Dict. of Practical Mechanics*, i. 544.)

**chromatic scale, s.**

Music: A scale which proceeds by semitones.

**chromatic thermometer, s.** When the edge of a rectangular plate of glass is applied to a piece of heated metal, or other substance having a temperature different from that of the glass, and exposed to a beam of polarised light, coloured fringes are developed. As the different tints depend on the different temperatures of the glass (which is supposed to be known), and that of the object to which it is applied, the colour of the central fringe affords a means of inferring approximately the temperature of the substance. (*Knight*.)

**chromatic type, s.** Type made in parts, which are inked of various colours and separately impressed, so as to unite into a variegated whole.

\* **chrō-māt'-y-cal, a.** [Eng. *chromatic*; -al.] Chromatic.

**chrō-mā-tism, s.** [Gr. *χρωματισμός* (*chrōmatismos*) = a colouring, a dyeing.]

Bot.: The same as *CHROMISM* (q.v.).

**chrōm-a-tō-dys-ops'-y-a, s.** [Gr. *χρῶμα* (*chrōma*), *χρῶματος* (*chrōmatos*) = colour; *δυσ* (*dys*) = bad, and *ὤψ* (*ops*) = the eye.]

Med.: The same as *CHROMATOPSEUDOPSIS* (q.v.).

\* **chrō-mā-tōg'-raph-ŷ, s.** [Gr. *χρῶμα* (*chrōma*) = colour; *γράφη* (*graphē*) = a writing, a treatise, *γράφω* (*graphō*) = to write, to describe.] A discourse or treatise on chromaties.

\* **chrō-mā-tōl'-ō-gy, s.** [Gr. *χρῶμα* (*chrōma*) = colour; *λόγος* (*logos*) = a discourse.] A treatise on colours. (*Field*.)

**chrōm-a-tō-mēt-a-blēs'-y-a, s.** [Gr. *χρῶμα* (*chrōma*), *χρώματος* (*chrōmatos*) = colour, and *μεταβλέπω* (*metablepō*) = to look from one place to another.]

Med.: The same as *CHROMATOPSEUDOPSIS* (q.v.).

**chrō-mā-tōm'-ē-tēr, s.** [Gr. *χρῶμα* (*chrōma*) = colour, and *μέτρον* (*metron*) = a measure.] A scale for measuring the degrees of colours.

**chrō-māt'-ō-phōre, s.** [Gr. *χρῶμα* (*chrōma*), *χρώματος* (*chrōmatos*) = colour, and *φορέω* (*phorēō*) = to bear.]

1. Zoology: (1) A pigment-cell in the skin, to which the change of colour in some animals is due.

(2) One of the blue, bead-like bodies in the common Sea-anemone (*Actinia mesembryanthemum*).

2. Bot.: An inclusive name for the granules in the protoplasm of plants.

**chrōm-a-tōph'-ōr-ōūs, a.** [Eng. *chromatophore*]; -ous.]

1. Containing pigment.

2. Having chromatophores.

**chrōm-a-tō-psēū-dōp'-sis, s.** [Gr. *χρῶμα* (*chrōma*), *χρώματος* (*chrōmatos*) = colour, and *ψευδῆ* (*pseudē*) in compos. = false, &c.]

Med.: A term used synonymously with *chromatodyaopsia* and *chromatometaleptia* to signify a defect in the power of distinguishing different colours. [COLOUR-BLINDNESS.]

**chrō-mā-trōpe, chrō-mō-trōpe, s.** [Gr. *χρῶμα* (*chrōma*) = colour; *τροπή* (*trope*) = a turning, *τρέπω* (*trepō*) = to turn, to twist.] An arrangement in a magic-lantern similar in its effect to the kaleidoscope. The pictures are produced by brilliant designs being painted upon two circular glasses, and the glasses being made to rotate in different directions.

**chrō-mā-type, s.** [Gr. *χρῶμα* (*chrōma*) = colour; *τύπος* (*typos*) = type.]

Photog.: A process in which the chromic acid is deoxidized. There are several modes of getting photographs by the chromic salts, preferably the bichromate of potash. (Also attrib.)

**chrōm'-chlōr'-ite, s.** [Gr. *χρῶμα* (*chrōma*) = colour, and Eng. *chlorite*.]

Min.: A reddish-violet micaceous mineral from Texas; a variety of *Pealinite* (q.v.).

**chrōme, s. & a.** [CHROMIUM.]

**chrome-alum, s.**

Chem.:  $K_2SO_4 \cdot Cr_2(SO_4)_2 \cdot 24H_2O$ . It is a crystallisable purple double salt of sulphate of chromium and sulphates of potassium, sodium or ammonium, having the formula of common alum, the alumina being replaced by sesquioxide of chromium.

**chrome-colour, s.** Properly, any colour prepared from the salts of chromium, but

hōll, hōy; pōut, jōvī; cat, çell, chorus, chin, bench; go, gem; thin, this; sin, ay; expect, Xenophon, exist. -iāg, -cian, -tian = shān. -tion, -sion = shūn; -tīa, -tīon = shūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bēl, dēl.

generally applied to any colour which, when dry, is of a soft powdery consistence, and may be mixed with oil without grinding. (*Ogylvic.*)

**chrome-green, s.** A pigment of a beautiful dark-green colour, prepared from the oxide of chromium.

**chrome-iron, s.** [CHROMIUM.]

**chrome-ochre, s.**

*Min.*: A clayey material, containing some oxide of chrome. It occurs of a bright-green shade of colour. Compos.: Silica, 57.0—64.0; alumina, 22.5—30.00; oxide of chromium, 2.00—10.5; sesquioxide of iron, 0.00—3.5; water, 0.00—11.0. (*Dana.*)

**chrome-orange, s.** A pigment of a dark-orange colour, prepared from the subchromate of lead.

**chrome-red, s.** A pigment of a beautiful red colour; a basic red chromate.

**chrome-yellow, s.** A yellow pigment of various shades prepared from lead chromate. [CHROMIUM.]

**chrōme, v.t.** [CHROME, s.]

*Dyeing*: To treat (as wool) with bichromate of potash.

**chrō-meid'-ō-scōpe, s.** [Gr. χρῶμα (*chrōma*) = colour; εἶδος (*eidos*) = form, appearance; σκοπέω (*skopeō*) = to see.] The same as DEBUSCOPE (q.v.).

**chrō-mic, a.** [Eng. *chromic*; -ic.] Pertaining to chrome, or prepared from it.

**chromic acid, s.**

*Chem.*: Chromium trioxide, CrO<sub>3</sub>+H<sub>2</sub>O, a substance obtained from chromium, much used by dyers and calico-printers for dyeing orange or red colours. It may be prepared by adding gradually from 120 to 180 parts, by volume, of pure concentrated sulphuric acid to 100 parts of a cold saturated solution of bichromate of potash. The crystals of this trioxide separate as the solution cools. The mother liquor should be poured off, and the crystals dried upon a tile; they may be purified by recrystallization from solution in water. With excess of sulphuric acid, chromic acid is a valuable reagent for dissolving the intercellular substance of plants; it is also much used in organic chemistry as a powerful oxidizing agent. Chromic acid is readily decomposed by organic matter, as dust, &c., and must therefore be preserved in a well-stoppered bottle. Its aqueous solution, which should be of a pale-yellow colour, is used for hardening and preserving nervous and muscular tissues, &c. It should be prepared when required. Chromic acid, H<sub>2</sub>CrO<sub>4</sub>, only exists in solution. It dyes wool and silk yellow, but will not dye cotton. Chromic acid boiled in wine dyes wool a clear brown colour, if no colouring matter, acted upon by chlorine acid, has been added to the wine.

**chromic iron, chromic iron ore, s.**

*Min.*: The same as CHROMITE (q.v.).

**chromic mica, s.**

*Min.*: The same as FUCHSITE (q.v.).

**chrō-mid, s.** [CHROMIDÆ.] Any fish of the family Chromidæ (q.v.).

**chrōm'-i-dæ, s. pl.** [From Mod. Lat. *chromis* (q.v.), and fem. pl. subj. suff. -i-dæ.]

*Ichthy.*: A family of Pharyngognathous fishes. They have fleshy lips, and the lateral line interrupted. They are found mostly in fresh water in the hotter parts of the world, though one species is in the Mediterranean.

**chrō-mi-ōm'-ē-tēr, s.** [Gr. χρῶμα (*chrōma*) = colour, and μέτρον (*metron*) = a measure.] An instrument for determining the purity of water by its colourlessness. It consists of a glass tube of about a yard in length, closed at the end by a cork, and resting upon a white dish of porcelain. A green tinge is produced by minute algae; a white opacity often by fungoid growths; iron salts are indicated by a peculiar ochry colour. (*Katigh.*)

**chrō-mis, s.** [Gr. χρῶμα (*chrōma*) = colour.] *Ichthy.*: The type-genus of the family Chromidæ (q.v.).

**chrōm'-ism, s.** [Gr. χρῶμα (*chrōma*) = colour; and Eng. suff. -ism.]

*Bot.*: An abnormal colouring of plants. It is called also Chromatism.

**chrō-mite, s.** [Eng. *chrome*, and suff. -ite (*Min.*)]

*Min.*: An isometric mineral of a submetallic lustre; colour between iron-black and brownish-black, streak brown; opaque, and brittle. It is widely distributed in America, Asia Minor, &c. Hardness, 5.5; sp. gr., 4.321. Comp.: Protoxide of iron, 18.0—38.95; magnesia, 0.0—18.13; oxide of chromium, 39.51—63.38; alumina, 0.0—19.84; silica, 0.0—10.60. (*Dana.*)

**chrō-mi'-ūm, s.** [Gr. χρῶμα (*chrōma*) = colour.]

*Min.*: A metallic tetrad element discovered by Vauquelin in 1797; symbol, Cr.; atomic weight, 52.2; sp. gr., 6. The chief ores of this metal is chrome-iron, FeO.Cr<sub>2</sub>O<sub>3</sub>, found in the Shetland Islands, and a lead chromate PbCrO<sub>4</sub>. The metal is obtained by the action of sodium vapour on red-hot chromium trichloride. It forms hard grey cubic crystals, infusible, insoluble in concentrated acids. Chromium forms with oxygen the following oxides:—CrO, Cr<sub>2</sub>O<sub>3</sub>, Cr<sub>3</sub>O<sub>4</sub>, CrO<sub>2</sub>. All compounds of chromium are prepared from the chromates. Chrome-iron ore is fused with carbonate of potassium and chalk, and the fused mass is treated with water, and a soluble yellow chromate of potassium, K<sub>2</sub>CrO<sub>4</sub>, is obtained; it crystallises in yellow rhombic anhydrous crystals, isomorphous with potassium sulphate; it dissolves in 2 parts of water at 16°; its solution is of a strong yellow colour, even when dilute. *Chromium dichromate*, or bichromate of potassium, K<sub>2</sub>Cr<sub>2</sub>O<sub>7</sub>, is obtained by adding sulphuric acid to the chromate; it crystallises red triclinic crystals; it is used for making pigments. It dissolves in 10 parts of water at 16°. Lead chromate, PbCrO<sub>4</sub>, a fine yellow precipitate, is obtained by adding a soluble lead salt to a solution of potassium chromate; it is called *chrome-yellow*. By heating it with saltpetre it is converted into a basic red chromate, called *orange-chrome* or *chrome-orange*. Chromium trioxide CrO<sub>3</sub> is formed by adding excess of H<sub>2</sub>SO<sub>4</sub> to potassium chromate; it furnishes soluble red needle crystals, which are reduced by organic matter to *sesquioxide of chromium*. By heating to redness potassium dichromate it is converted into neutral chromate and *sesquioxide of chromium*, Cr<sub>2</sub>O<sub>3</sub>, which is a beautiful green powder, giving a green colour to glass and porcelain; it is nearly insoluble in acids. The pigment used to produce a pink colour on earthenware is made by heating to redness a mixture of thirty parts of peroxide of tin, ten of chalk, and one of potassium chromate; the product is powdered, and washed with hydrochloric acid. The hydrated oxide can be obtained as a green precipitate by adding ammonia to one of its salts. Chromic chloride Cr<sub>2</sub>Cl<sub>6</sub> and chromic sulphate Cr<sub>2</sub>(SO<sub>4</sub>)<sub>3</sub> are obtained by dissolving the hydrated oxide in the acid. The salts of chromium sesquioxide exist in green and in violet-red modifications. Potassium dichromate is easily reduced by boiling it with hydrochloric acid and alcohol to chromium sesquichloride and chloride potassium. When sulphuric acid is used, chrome-alum, a double sulphate of chromium and potassium, is obtained, which has a deep violet tint. *Chromium monoxide* chromous oxide, CrO, absorbs oxygen rapidly; it is only known in the form of hydrate Cr(OH)<sub>2</sub>. *Chromium dichloride*, CrCl<sub>2</sub>, is a powerful deoxidizer. Chromium salts are easily detected by giving in both the inner and outer blowpipe-flame green beads with borax, by forming a yellow soluble salt when fused with an alkali, which is converted into a green solution by reducing agents. Ammonia gives a green precipitate with the sesqui-salts. Potash and soda hydrates give a precipitate of Cr<sub>2</sub>(OH)<sub>6</sub>, soluble in excess, reprecipitated on boiling. Ammonium sulphide precipitates the hydrated green sesquioxide of chromium Cr<sub>2</sub>(OH)<sub>6</sub>. Chromium can be detected in the presence of the other metals of this group, by fusing the precipitate with KNO<sub>3</sub>, or platinum-foil, treating the fused mass with water, filtering, acidifying with acetic acid, and adding plumbic acetate, which precipitates yellow plumbic chromate.

**chrō-mō (2), s.** [See def.] A contraction of chromo-lithograph (q.v.).

**chromo-lithograph, v.** To produce by chromo-lithography.

**chromo-lithographer, s.** A printer of chromo-lithographs.

**chromo-lithography, s.** The art of printing chromo-lithographs.

(1) *Hist.*: Colour-printing was first used in Europe in illuminating missals and making playing-cards, but it was not successful till it was combined with lithography, invented between A.D. 1796 and 1800 by Alois Senefelder of Prague.

(2) *Present Process*: An outline-drawing is first traced, then various stones are taken, one for each colour, to which the drawing is transferred. Then the artist puts in the colours, with soap, of the tints required. Next the slab is put upon the press and damped, after which the oil colour is applied with a leathern roller; the parts which contain no drawing, being wet, resist the ink, while the drawing itself, being oily, repels the water while retaining the colour.

**chromo-lithograph, a.** Pertaining to, or executed in, chromo-lithography.

**chromo-cyclograph, s.** A coloured picture produced by a succession of wooden blocks, each bearing its separate colour. [CHROMATIC PAINTING.]

**chrō-mō (2), s.** [See def.] A contraction of chromo-lithograph (q.v.).

**chromo-type, s.**

1. *Printing*: A sheet printed in colours. The modes are various, but the usual plan is to prepare a block for each colour, or a form for each colour, and to place the paper upon each in succession, the exact place being preserved at each impression by means of register pins or a similar device. [CHROMATIC PRINTING; CHROMO-LITHOGRAPHY.]

2. A photographic picture produced in the natural colours. This was long sought by Niepce de St. Victor, and he announced his success even with yellow, but no way has been discovered of fixing these heliochromic pictures. (*Knight.*)

**chrōm'-ō-chre, s.** [Eng. *chromic*; *ochre*.]

*Min.*: The British Museum Catalogue makes it a variety of Wolchonskoite (q.v.).

**chrō-mō-fer'-rite, s.** [Eng. *chromo*; *ferrite* (q.v.).]

*Min.*: The same as CHROMITE (q.v.).

**chrōm'-ō-gēn, s.** [Gr. χρῶμα (*chrōma*) = colour, and γεννάω (*gennao*) = to produce.]

*Chem.*: The compound which requires only the presence of a salt-forming group to convert it into a dye-stuff. [ΣΥΝΧΡΟΜΩΝΕ.]

**chrō-mō-graph, s.** [Gr. χρῶμα (*chrōma*) = colour, and γράφω (*grapho*) = to write.]

An instrument used for obtaining several copies of written matter. A substance is prepared by heating gelatine and water with glycerine, and then adding any insoluble white powder to make it firm. It is poured while hot into a shallow tin, and it sets on cooling into a firm mass. It is used as follows: The letter, &c., is written on paper, and a solution of aniline dye is used instead of ink. This is then pressed on the slightly damp surface of the chromograph, to which the writing is transferred, and from it many copies of the original can be obtained. Common forms of chromographs have been formed by using glue and treacle, &c.

**chrō-mō-lēp'-tis, s.** [Gr. χρῶμα (*chrōma*) = colour; λεπτός (*leptos*) = small.]

*Ichthy.*: A genus of fishes, belonging to the sub-family Serraninæ, and family Percidæ, or Perches. The body is usually covered with coloured spots.

**chrō-mō-lith'-ic, a.** [Gr. χρῶμα (*chrōma*) = colour, and λίθος (*lithos*) = a stone.] Chromo-lithographic.

"An impression of a drawing on stone, printed at Paris in colours, by the process termed chromolithic." — *Proceed. of Soc. of Antiquaries*, L. 22 (1844).

**chrō-mō-phōre, s.** [Gr. χρῶμα (*chrōma*) = colour; φέρω (*phero*) = to bear, to produce.]

*Chem.*: The body whose presence in conjunction with a salt-forming group determines the possession of tinctorial power. NO<sub>2</sub> is the chromophore of nitraniline and nitrophenol, and nitrobenzene is their chromogen.

fāte, fāt, fāre, amidst, whāt, fāll, fāther; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pēt, er, wōre, wōlf, wōrk, whō, sōn; mātē, cūb, cūre, unite, cūr, rūle, fūll; trȳ, Sȳrian. æ, œ = ē. ey = ā. qu = kw.

chrō-mō-sphēre, s. [Eng. chromo (1); sphere (q.v.).] The gaseous envelope of the sun, through which the light of the photosphere passes.

† Stellar chromosphere: The gaseous envelope supposed to exist round each star.

chrō-mō-sphēr-ic, a. [Eng. chromospher(e); -ic.] Of or pertaining to the chromosphere.

chrō-mōūs, a. [Eng. chrōm(e); and suff. -ous.] Of the nature of or pertaining to chrome. [CHROMIUM.]

chromous chloride, s.

Chem.: CrCl<sub>2</sub>, a white powder obtained by heating chromic chloride in a stream of hydrogen.

chrō-mūle, s. [Gr. χρώμα (chrōma) = colour; ūlē (hulē) = matter as a principle of being.]

1. The same as CHLOROPHYLL (q.v.).

"The colouring secretion . . . termed chromale, on which the colour of all green parts depends."—Carpenier: Vegetable Physiol., § 367.

† 2. The colouring matter of petals.

chrōn-ic, \*chrōn-ī-cal, a. [Fr. chronique; Lat. chronicus = pertaining to time.]

1. Ord. Lang.: Relating or pertaining to time.

2. Pathol.: Applied to diseases of long duration, in opposition to acute (q.v.).

"Cases which hold an equivocal rank, which are neither decidedly acute nor plainly chronic."—Watson: Principles and Practice of Physic, lect. viii.

chrōn-ī-cal-ly, adv. [Eng. chronic(al); -ly.] In a chronic manner; of long duration; always.

chrōn-ī-cle, \*cron-ī-cle, \*cron-y-cal, s. [Formed as a dimin. from Mid. Eng. cronique or cronike, used by Gower; from O. Fr. cronique, pl. croniques = chronicles, annals; from Low Lat. chronica = a catalogue; from Gr. χρονικά (chronika) = annals, neut. pl. of χρονικός (chronikos) = pertaining to time; χρόνος (chronos) = time. (Skeat.)]

I. Ordinary Language:

1. Literally:

(1) A register or history of events in regular order of time, a diary, annals. It differs from a history proper in that the events are set down in order of succession barely and simply without any attempt at connection, colouring, or philosophic treatment.

(2) A history; a narrative of events (generally in the plural).

2. Fig.: Anything which conveys or suggests the course of events in history.

"Every mouldering stone is a chronicle."—Irving.

II. Scripture Canon (Pl.): A name applied to two books of the Canonical Old Testament, which immediately follow 1 and 2 Kings. In the Hebrew Bible they form but a single composition, entitled כְּתוּבֵי יָמִים (Dibre Hayamim) = words of days, i.e., diaries or journals. The Septuagint translators were the first to divide the one volume into two, which they called Παραλειπομένων πρῶτον (Paraleipomenōn prōton) = the first and the second of things left over, i.e., passed by or omitted by the writers of the books of Samuel and Kings. In the Vulgate, Wycliffe, and the earlier printed versions, they were termed 1 and 2 Paralipomenon (q.v.). Jerome called the undivided book Chronicon, and the Vulgate Chronica or Chronicon liber (CHRONICON), from the former of which two appellations we derive the name Chronicles. To a certain extent the Chronicles are supplementary to the books of Samuel and Kings, but in part they also travel over the same ground, the books of Kings, however, regarding events from the prophetic standpoint, whilst the Chronicles do so from the Levitical point of view. The traditional opinion, both among Jews and Christians, regards Ezra as having been the author or compiler of the books of Chronicles. If so, then a later hand must have added ch. iii. 19-24, where the descendants of Zerubbabel are enumerated apparently to the third generation. If, on the contrary, that passage was penned by the writer of the other parts of the book, then the

composition of the volume itself must be brought down to B.C. 330, if not to 300—nay, there have been advocates for even a lower date, viz., 270 or 260. At even the earliest of these dates the Jewish commonwealth consisted chiefly of the two tribes of Judah and Benjamin, the ten tribes not having returned from captivity. In the books of Chronicles, consequently, the former kingdom of Israel holds but slight prominence, whilst that of Judah, to which the writer was passionately attached and of which to a certain extent he was the apologist, is treated at length. He shows that Judah was prosperous when it followed Jehovah, and fell into misery and decay whenever it rejected Him as its king.

The writer of the books of Chronicles seems to copy or allude to Genesis, Exodus, Numbers, Joshua, Ruth, 1 and 2 Samuel, 1 and 2 Kings, Ezra, and Nehemiah; between xi. 3-24 of the last-named of these books and 1 Chron. ix. 2-34 there is a striking parallelism.

Some of the numbers in Chronicles differ from those in Kings, possibly from errors of copyists, figures in the very nature of things being much more liable than words to undergo alteration. Where Kings and Chronicles differ in this respect, the numbers in the former books are to be preferred.

"Out of an anonym cronicleter manuscript."—Fuller: Worthies; Lincoln, li. 9.

chrōn-ī-clīng, pr. par., a., & s. [CHRONICLER, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The act of recording in a chronicle or a history; the writing of a history or chronicle.

†chrōn-ī-clīst, \*crōn-ī-clīst, s. [Eng. chronicle(e); -ist.] A chronicler. (Skelton.)

chrōn-ī-con, s. [Gr. χρονικός (chronikon), neut. of χρονικός (chronikos) = concerning time; χρόνος (chronos) = time.]

Literature, Ch. Hist., &c.: A chronicle, as Chronicle Alexandrinum, the Alexandrian Chronicle; Chronicon Paschale, the Paschal Chronicle.

\*chrōn-ī-que, \*crōn-ī-que (que as k), \*cron-y-ke, s. [O. Fr. cronique; [CHRONICLE, a.] A chronicle; a record of events.

"As the cronique telleth."—Gower, l. 81.

"The best chronique that can be now compiled of their late changes. . . ."—L. Addition: West Barbury.

chrōn-ō-gram, s. [Fr. chronogramme, from Gr. χρόνος (chronos) = time; γράμμα (gramma) = a writing, γράφω (graphō) = to write.] An inscription in which a certain date is included and expressed in numeral letters. (See an example under the following word.)

"He may apply his mind to heraldry, antiquity;—make epigrammatics, &c., anagrams, chronograms, acrosticks upon his friends' names."—Burton: Anat. of Melancholy, p. 282.

chrōn-ō-gram-māt-ic, chrōn-ō-gram-māt-ī-cal, o. [Fr. chronogrammatique, from chronogramme.] Pertaining to, or of the nature of, a chronogram.

"Gloria lausque Deo, ac Lor' M in assec' la sunt. A chronogrammatical verse, which includes not only this year, 1660, but numeral letters enough to reach above a thousand years further, until the year 2667."—Hocel.

\*chrōn-ō-gram-māt-ī-cal-ly, adv. [Eng. chronogrammatique; -ly.] In manner of a chronogram.

"These elegies and epitaphs are printed in several forms, some like pillars, some circular, some chronogrammatically."—Wood: Athena Ozoniensis, li. 111.

\*chrōn-ō-gram-mā-tīst, s. [Eng. chronogrammat(ic); -ist.] A writer of chronograms.

"There are foreign universities, where, as you praise a man in England for being an excellent philosopher, or poet, it is an ordinary character to be a great chronogrammatist."—Addison.

chrōn-ō-graph, s. [Fr. chronographe, from Gr. χρόνος (chronos) = time; γράφη (graphē) = a writing, γράφω (graphō) = to write.]

\* 1. A chronogram.

2. A time indicator. Astronomical intervals are noted by pressing a key which makes one dot or puncture on a travelling strip of paper and another at the end of the observation. Such a time-paper becomes a record. The racer's chronograph is one which deposits ink-spots on a travelling paper at the start and arrival of the horse. (See Chronometer and Chronoscope.)

†chrōn-ōg-rā-phēr, s. [Eng. chronograph(y); -er.] A writer of chronography; a chronologer.

"Dionysius compares them with the Greek chronographers."—Lewis: Cred. Early Roman Hist. (1856), ch. iii., § 11, vol. 1, p. 91.

chrōn-ō-graph-ic, a. [Eng. chronograph(y); -ic.] Pertaining to, or recorded by, the chronograph (q.v.).

chrōn-ōg-rā-phy, s. [Gr. χρονογραφία (chronographia), from χρόνος (chronos) = time; γράφω (graphō) = a writing.] An account or description of past time; a history.

chrōn-ōl-ō-gēr, s. [Gr. χρονολόγος (chronologos), from χρόνος (chronos) = time; λόγος (logos) = an account, λέγω (legō) = to tell.] One who devotes himself to, or is skilled in the chronology of history.

" . . . that is to say 300 years before the foundation of Naxos, which is fixed by the ancient chronologers at 136 B.C."—Lewis: Cred. Early Roman Hist. (1856), ch. viii., § 2, vol. 1, p. 274.

\*chrōn-ō-lōg-ic, \*chrōn-ō-lōg-ick, a. [Fr. chronologique; Gr. χρονολογικός (chronologikos) = pertaining to chronology (q.v.).] Chronological.

"May chronologic spouts Contain no cypher legible!"—T. Warton: Kiviat, from T. Hearne.

chrōn-ō-lōg-ic-al, a. [Eng. chronologie; -al.]

1. Pertaining to chronology; containing an account of events in the order of time.

" . . . the chronological account of some times and things past. . . ."—Hale: Origin of Mankind.

2. Arranged according to order of time.

"They are not arranged in logical nor in chronological order."—Times, Nov. 24, 1874.

chrōn-ō-lōg-ī-cal-ly, adv. [Eng. chronological; -ly.] In a chronological manner; according to chronology or the succession of time.

\*chrōn-ōl-ō-gīst, s. [Fr. chronologiste; Gr. χρονολόγος (chronologos).] The same as CHRONOLOGER (q.v.).

"According to these chronologists, the prophecy of the Bahin, that the world should last but six thousand years, has been long disproved."—Brouce: Vulgar Errors.

chrōn-ōl-ō-gy, s. [Fr. chronologie; Gr. χρονολογία (chronologia) = computation of time, chronology; χρόνος (chronos) = time; λόγος (logos) = a discourse.] The science of computing and adjusting dates and periods of time by divisions and periods, and of assigning to events their proper dates.

" . . . the system, or many systems, of chronology framed out of the Egyptian monuments. . . ."—Mann: Hist. of Jews (3rd ed.), Pref., vol. 1, p. xxix.

† The following are the leading systems of chronology existing among the several nations of the world. Want of space forbids that the list should be exhaustive:—

1. Chinese and Japanese Chronology: In this calculation is made by cycles of sixty years, each year of the cycle separately named.

2. Hindoo Chronology:

(1) Historical: No system is universal in India or exclusive. Two of the chief are the era of Salivshana (A.D. 77), and that of Vicramaditya (B.C. 57).

(2) Astronomical: The Hindoos have four ages (YUGA). We are now in the Kali Yuga, beginning about 3094 B.C.

3. Egyptian Chronology:

(1) Historical: Julius Africanus and Eusebius have preserved some fragments of a work by Manetho, an Egyptian priest, who lived in the time of Ptolemy Lagus, in the 3rd century B.C. In these fragments the successive rulers of Egypt, from the very first to nearly the time of Alexander the Great in the 4th

century B.C., are arranged in thirty or thirty-one dynasties. Increasing importance has been given to his work, as it has been found that one after another of his statements, once unsupported, have been confirmed by the hieroglyphics of the monuments. A long period is, of course, requisite for so many dynasties. Lane, Stuart Poole, and others largely reduce this by making certain of the first seventeen dynasties contemporaneous, whilst Bunsen, Lepsius, and their followers make them successive, and contend for a lengthened chronology.

(2) *Astronomical*: The Egyptians, moreover, calculated by a tropical cycle of 1,500, and a Sothic cycle of 1,460 Julian years. [CYCLE.]

4. *Greek Chronology*: In the time of Herodotus, and subsequently in that of Thucydides, the Greeks had no chronology spanning wide intervals of time. It was not till B.C. 194 that Eratosthenes, the "father" of Greek chronology, began to count by Olympiads, the first of which was dated from what we now should call B.C. 776. He was followed by Apollodorus, B.C. 115, Censorius A.D. 238, &c. There were other Greek methods of computation than by Olympiads; thus the era of the Seleucidae was B.C. 324.

5. *Roman Chronology*: The method of Roman reckoning was by the consulships, which, of course, could give no indication of time unless their order was carefully preserved, and even then was clumsy. A much simpler and better plan was by calculating years from the building of the city. This Varro, whom the moderns follow, placed in what would now be called B.C. 753, while Cato preferred 752. It does not materially diminish the value of this date that Rome would seem to have come into existence earlier than that year. It is enough for chronology that the date to be reckoned from is a fixed one.

6. *Jewish Chronology*: Up till the 15th century the Jews followed the era of the Seleucidae [4]. Since then they have dated from the creation of the world, which they fix 3760 years and three months before the commencement of the Christian era.

7. *Muhammadian Chronology*: Dates are counted from the Hegira, i.e., the time of Muhammad's flight from Mecca to Medina, 16th or 15th July, A.D. 622.

8. *Christian Chronology*: Since the 6th century dates have begun to be reckoned from the birth of our Lord [CHRISTIAN ERA], though the system did not become universal in Europe till many centuries subsequently. The chief disadvantage of this method is that it requires a counting backward as well as forward; its advantage is that it evades dating the creation of man and of the earth, though, of course, investigations have been made as to how many years B.C. these events, formerly believed to have occurred almost at the same time, took place. Hales brought together 120 opinions on the subject, the extremes varying by 3,268 years, whilst it has been affirmed that even 300 diverse views on the subject exist. One great reason of the discrepancy is that the Hebrew, the Samaritan, and the Greek Pentateuchs all differ as to certain numbers in Genesis v. and elsewhere, so that Archbishop Usher, following the Hebrew, makes the creation B.C. 4004, while Hales, preferring the Septuagint Greek, fixes the date at 5,411.

9. *Scientific Chronology*: Wherever the occurrence of an eclipse of the sun or moon has been noted by an ancient or other historian in the annals of any year, which he accurately notes, astronomy will ultimately fix that eclipse with unerring exactitude to the day, hour, minute, and second. The only uncertainty at present is that the value of certain tables, called Hansen's, by which the moon's motion is computed, has excited differences of opinion. Geology has proved finally and irrefragably that the world was in existence many millions of years before man came upon the scene, and that the two events must not be confounded by chronologists. Occurrences marking the several stages in the earth's past history, it has hitherto dated by geological periods, or subdivisions of them, not by historic time. It is only now beginning cautiously to feel its way to date in years a few events of the Post-Pliocene, or at furthest, of the Newer Pliocene period. [GLACIAL PERIOD.] The first appearance of man (a very recent geological event) it carries back further than his-

tory has as yet ventured to do. [ANTIQUITY OF MAN, PALEOLITHIC, &c.]

**chrōn-ōm-ē-tēr**, s. [Fr. *chronomètre*, from Gr. *χρόνος* (*chronos*) = time, and *μέτρον* (*metron*) = a measure.]

1. *Horol.*: An instrument for the exact measurement of time. This general meaning would include clocks, watches of all kinds, clepsydras, and some other devices, such as hour-glasses and the graduated candles of the famous King Alfred. The term is, however, applied in a restricted sense to those having adjustments and compensations for the fluctuations of temperature. Chronometers are known as ship's and pocket. The rating of chronometers is usually conducted at government observatories. The instruments are sent from the different watchmakers and received at stated periods. They remain the greater part of a year, their rates being noted daily by two persons. The best receive prizes and are purchased for the navy; others receive certificates of excellence; others are unrewarded. On their arrival in January, they are left to the ordinary atmospheric temperature for some months; their rates are taken under these conditions. The apartment is then heated to a tropical temperature, and the rate taken. They are then placed for a certain period in trays over the stove, and the rate taken. They are then placed in a refrigerating chamber cooled by a freezing mixture, and the rate taken under this artificial arctic temperature. Their capacity to stand these variations constitutes their value, and their actual range of exposure may be estimated at 180°—from the + 120° of Aden and Fernando Po to the - 60° of the Arctic regions when frozen in the pack of ice and watching through the long, long night. [Knight.]

2. *Musical*: An instrument to indicate musical time; a metronome.

"An instrument under the . . . name *chronometer* is also used by musicians for the accurate measurement of time. Two sorts have been invented for different purposes. The first supplies the motion of the conductor, and regularly beats time. . . . The second is used by tuners of instruments to measure the velocity of beats."—*Encyclopædia Metropolitana*.

**chronometer-escapement**, s. An escapement invented by Berthoud, and improved by Harrison, Arnold, Earnshaw, and Dent. It is the most perfect, delicate, and satisfactory in its operation, of all the escapements. It is also kept more carefully, at least in marine chronometers, as the gimbal-joint hanging enables it to maintain a constant position relatively to the horizon, and it is carefully guarded from jars.

**chrōn-ō-mēt-ric**, **chrōn-ō-mēt-ri-cal**, a. [Fr. *chronométrique*.] Pertaining to a measurer or the measurement of time; pertaining to, or measured by, a chronometer.

" . . . to carry a chain of *chronometrical* measurements round the World."—*Darwin's Voyage Round the World* (ed. 1870), ch. 1. 1.

**chronometric-governor**, s. A device by which a time-measurer set to work at a prescribed and equable rate is made to regulate the motion of an engine. Invented by Wood, and improved by Siemen.

**chrōn-ōm-ēt-ry**, s. [Fr. *chronométrie*.] The art or science of the division and measurement of time. [Maund.]

**chrōn-ō-scope**, s. [Gr. *χρόνος* (*chronos*) = time; *σκοπέω* (*skopeō*) = to see, to examine.]

1. An instrument invented by Prof. Wheatstone in 1840, to ascertain the velocity of projectiles by measuring small intervals of time. Two wire targets are placed, one about twenty yards from the gun, and the second about the same distance farther on. These are connected by a fine insulated wire with the instrument, which is about 400 yards in the rear of the ordnance. The instrument is adjusted on a plan similar to an electro-ballistic machine. When the shot is fired it cuts the wire in the first target, and then in like manner cuts the wire in the second target, the instant each wire is severed being recorded by the instrument. The interval of time occupied by the ball in passing from one target to the other furnishes the data for obtaining the initial velocity of the shot.

2. An instrument to measure the duration of luminous impressions upon the retina. [Webster.]

3. A metronome. [Craig.]

**chrō-ō-cōc-cā-cē-sē**, s. pl. [Gr. *χρῶς* (*chrōs*), genit. *χρῶος* (*chrōos*) = colour; *κόκος* (*kōkōs*) = a kernel, and Lat. fem. pl. adj. suff. *-acea*.] *Bot.*: An order of microscopical unicellular plants, from salt and fresh water.

**chrō-ō-lēp-i-dæ**, a. pl. [From Mod. Lat. *Chroolepys* (*χρῶς*), the type; and Lat. fem. pl. adj. suff. *-idæ*.]

*Bot.*: A family of Fungi or Algæ, of which *Chroolepus* is the type.

**chrō-ō-lēp-ōid**, a. [From Gr. *χρῶς* (*chrōs*) = colour; *λεπίς* (*lepis*) = a scale; *εἶδος* (*eidos*) = form, appearance.]

*Bot.*: Made up of small yellow scales. [R. Brown, 1874.]

**chrō-ō-lēp-ūs**, s. [Gr. *χρῶς* (*chrōs*) = colour, and *λεπίς* (*lepis*) = a rind, husk, shell.]

*Bot.*: A generic name applied to certain byssoid structures found on rocks, bark of trees, &c. *Chroolepus aureum* is composed of rigid opaque, ultimately brittle filaments, forming soft cushions of a yellowish colour; *C. Jolidus*, *odoratum*, *lichenicola* are of orange or fulvous colour. Another series of species, *C. ebenea*, &c., are black. These plants have been regarded sometimes as Fungi and sometimes as Algæ. Rabenhorst describes eleven species. The genus forms the type of the family *Chroolepidae*. Reproduction by biciliated zoospores. [Griffith & Henfrey.]

**chrÿs-a-lid** (pl. **chrÿs-āl-i-dēs**), s. & a. [Fr. *chrysalide*; Lat. *chrysalis*; Gr. *χρυσάλλης* (*chrysalis*) = the gold-coloured sheath of a butterfly, a chrysalis, from *χρῶς* (*chrōs*) = gold.]

\* *A. As subst.*: [CHRYSALIS.]

*B. As adj.*: Pertaining to or resembling a chrysalis.

**chrÿs-āl-i-dī-na**, a. [Eng. *chrysalid*; and Lat. neut. pl. adj. suff. *-ina*.]

*Zool.*: A Textularian Foraminifer, with a triserial arrangement of chambers and with large pores, and sometimes tubes, opening from chamber to chamber. *Chrysalidina gradata* is from the Cretaceous strata of France. A dimorphic form, which is universal in its old state, lives in the Indian Ocean and Panama Bay. [Griffith & Henfrey.]

**chrÿs-a-lis** (pl. **chrÿs-āl-i-dēs**), s. [CHRYSALID.]

1. *Nat. Hist.*: The last stage through which most insects pass before reaching their winged

CHRYSALIDES.  
A Vanessa Io. B Danaus Crypsippus. C Iphias Glaucippus. D Callidryas eubule. E Adollas acontes.

or perfect state. In this stage the insect is externally quiescent, but is the subject of internal changes, the chief among which are the development of wings and sexual organs. The case of the chrysalis varies greatly in the different orders. [Cocoon.]

2. *Fig.*: Applied to the state of man while in this world: the soul enclosed in the body being compared to the perfect insect enclosed in its case.

"This dull chrysalis  
Creeps into spinning wings, and hope ere death"  
Tennyson: *St. Simon Stylites*.

**chrÿs-ām-ic**, a. [Gr. *χρῶς* (*chrōs*) = gold; Eng. am- contr. for *ammonia*; and suff. *-ic*.]

† These various chemical terms compounded with *chrÿs-* owe their derivation

fāte, fāt, fāre, amidst, whāt, fāll, father; wē| wēt, hōre, camel, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wōlf, wōrk, whā, sōn; mūte, oūb, oūre, unīte, cūr, rāle, fūll; try, Sÿrian. æ, œ = ē. ey = ā. qu = kw.

from Gr. χρυσός (chryso) = gold, to the fact of their golden or rich yellow colour.

**chrysamide acid, s.**

*Chem.*: Tetranitro-chryszin, or tetranitro-dioxy-anthraquinone,  $C_{14}H_6(NO_2)_4(OH)_2O_2$ . An acid obtained by heating aloes with strong nitric acid. It crystallizes in golden-yellow scales. It is slightly soluble in water, and has a bitter taste; its potassium salt resembles murexide. It is converted by chloride of lime into chloro-picric. With ammonia it forms chrysamate of ammonia, consisting of black adamantine crystals, and with potash, a beautiful carmine-red powder called chrysamate of potash.

**chryś-am-ide, s.** [Gr. χρυσός (chryso) = gold, and Eng. amide (q.v.)]

*Chem.*: The same as tetra-amido-chryszin,  $C_{14}H_6(NH_2)_4(OH)_2O_2$ . It is obtained by the action of reducing agents on chrysamie acid. Chrysamide forms indigo-blue needle crystals having a metallic copper lustre.

**chryś-ām-māte, s.** [Gr. χρυσός (chryso) = gold; and Eng. amate (q.v.)]

*Chem.*: A salt of chrysamie acid.  
*Chrysamate of ammonia (Chem.)*: [CHRYSAMIC ACID].  
*Chrysamate of potash (Chem.)*: [CHRYSAMIC ACID].

**chryś-a-nis'-io, a.** [Gr. χρυσός (chryso) = gold, and Eng. anisete (q.v.)]

*Chem.*: Of golden hue, and having anisic acid in its composition.

**chrysanisio acid, s.**

*Chem.*: Dinitro-paramidobenzoic acid,  $C_6H_3(NO_2)_2(NH_2)CO_2H$ . It is prepared by heating dinitro-anisic acid with aqueous ammonia. It crystallizes in yellow needles, which melt at 259°. It is a strong monobasic acid.

**chryś-ān-thē-mūm, s.** [Gr. χρυσός (chryso) = gold, and ἀνθεμον (anthemon) = a flower.]

*Bot.*: A genus of herbaceous or slightly shrubby plants, belonging to the corymbiferous group of the order Compositae. The family is represented in the United States and Europe by the Ox-eye Daisy, *leucanthemum*, and in England by the Corn Marigold, *C. Segetum*.

CHRYSANTHEMUM (OX-EYE DAISY).  
1. Floret of the ray. 2. Floret of the disk.

The development of the Chrysanthemum by cultivation has been extraordinary. Hundreds of varieties are now raised in the gardens and conservatories of America and Europe, and magnificent new ones annually appear. This development began in China and Japan.

**chryś-a-or, s.** [Gr. χρυσός (chryso) = gold; ἄορ (aor) = a sword.]

*Zool.*: A name given by De Montfort to a genus of Belemnites.

**chryś-ā-ō-ra, s.** [Gr. χρυσός (chryso) = gold; ἄορ (aor) = a sword.]

*Zool.*: A genus of Medusas belonging to the family Pelagiidae.

**chryś-a-zin, a.** [Gr. χρυσός (chryso) = gold; ἀζίη (azie), and suff. in.]

*Chem.*: A chemical compound which crystallizes in red needles, melting at 191°.

**chryś-ēl-ē-phān'-tine, a.** [Gr. χρυσός (chryso) = gold; ἐλεφάντινος (elephantinos) = made of ivory, ἐλέφας (elephas) = an elephant.] Made partly of gold and partly of ivory.

... a Doric edifice in which the celebrated chryselephantine statue of the god by Pheidias was placed about B.C. 453.—*Mr. Newton, of British Museum; On Discoveries at Olympia, in Times, Feb. 1, 1878.*

**chryś-ēna, s.** [Gr. χρυσός (chryso) = gold.]

*Chem.*:  $C_8H_4-CH$  or  $C_{10}H_8-CH$  an aromatic hydrocarbon,  $C_{10}H_{12}$ . It is obtained along with benzene by heating diphenyl in a sealed tube with hydrogen. Also obtained in the distillation of tar pitch, &c. Chrysenes is insoluble in alcohol and ether, but crystallises from boiling oil of turpentine. It is a golden yellow colour when pure.

**chryś-ē-ōne, s.** [Gr. χρυσός (chryso) = gold.]

*Chem.*: An orange-coloured substance,  $Si_2H_4O_2$ . It is obtained by digesting calcium chloride with strong hydrochloric acid. It is insoluble in water, alcohol, and in nearly all solvents. Exposed to sunshine it becomes lighter in colour, gives off hydrogen, and is converted into leukone, or silico-formic acid,  $H_2SiO_3H$ .

**chryś-id'-ī-dē, chryś-ī-dēs, s. pl.** [From *chrysis*, the typical genus, and Lat. fem. pl. adj. suff. -īda.]

*Entom.*: A family of Hymenopterous insects, distinguished by being furnished with a tubiferous ovipositor. They are all parasitic, and coloured with the richest metallic hues.

**chryś-ī-mē-ni'-e, s.** [Gr. χρυσός (chryso) = gold, and μένω (menō) = to remain (?)]

*Bot.*: A genus of Laurenciaceae (Florideous Algae). *Chrysemium clavellosa* is a rare seaweed, three to twelve inches high, forming a feathery frond composed of a branched, tubular, long, not constricted or chambered, cellular structure, filled with a watery juice. The spores are angular, and are contained in dense tufts, in ceramidia borne on the sides of the branchlets. The tetraspores are tripartite and immersed in the branchlets. (*Griffith & Henfrey.*)

**chryś-in, s.** [Gr. χρυσός (chryso) = gold, and Eng. suff. -in (Chem.)]

*Chem.*: A substance obtained from the buds of species of *Populus* (Poplar). Chrysin when pure forms bright yellow shining plates, which melt and sublime at 275°. Ferric chloride gives a violet colour with an alcoholic solution of chrysin; it is insoluble in water. It forms a yellow solution with alkalies; on boiling this solution it is decomposed into pheroglucin, acetic and benzoic acids, and methyl-phenyl ketone.

**chryś-ip-tēr-a, s.** [Gr. χρυσός (chryso) = gold, and πτερον (pteron) = a wing, a fin.]

*Ichthy.*: A genus of oval-bodied fishes, belonging to the family Chaetodontidae. They have large pectoral fins.

**chryś-īs, s.** [Gr. χρυσός (chryso) = gold.]

*Entom.*: The Golden Wasp, or Ruby-tail fly, a genus of Hymenoptera. They are magnificently coloured with metallic hues. They are parasitic, depositing their eggs in the nests of the solitary Mason-bees or other Hymenoptera, on the larvae of which their larvae live. *Chrysis ignita* has the head, thorax, and legs of a rich blue or green, and the abdomen copper coloured. It is constantly in motion. It may be seen in summer on sunny walls poking into holes in quest of the nest of other hymenopterous insects, of which its larvae may make a prey.

**chryś-ō-bāc-trōn, s.** [Gr. χρυσός (chryso) = gold, and βάκτρον (baktron) = a staff, a stick.]

*Bot.*: A genus of liliaceous plants from the Auckland and Campbell Islands, New Zealand. They have linear leaves, and racemose flowers (occasionally diecious) of a bright yellow colour. *Chrysoactron Hookeri*, a pretty little bog-plant, is cultivated in greenhouses in Britain. (*Treas. of Bot.*)

**chryś-ō-hāl-an-ā-čē-sa, s. pl.** [From Mod. Lat. *chrysohalan(us)* = the type, and Lat. fem. pl. adj. suff. -acea.]

*Bot.*: An order of dicotyledons, closely allied to Rosaceae, and containing about twelve genera. They are all trees or shrubs with alternate stipulate leaves, and several of

them produce edible fruits. They are classed by Lindley in his "Rosal Alliance" between Calycanthaceae and Fabaceae.

**chryś-ō-bāl'-a-nūs, s.** [Gr. χρυσός (chryso) = gold, and βάλανος (balanos) = an acorn, in reference to the yellow fruit of some species.]

*Bot.*: A genus of trees, the typical one of the order Chrysoalanaceae, with simple leaves, and racemes or panicles of insignificant flowers. The fruit of *Chrysoalanus lincei*, the cocoa-plum, is eaten in the West Indies, as is another species, *C. luteus*, in Sierra Leone.

**chryś-ō-bēr-yl, s.** [Lat. *chrysoberyllus*, from Gr. χρυσός (chryso) = gold, and βήρυλλος (beryllos) = a beryl.] A green, greenish-white, or yellowish-green orthorhombic mineral, of which there are two varieties: (1) Ordinary Chrysoberyl, and (2) Alexandrite (q.v.).

**chryś-ō-chlōr'-e, chryś-ō-chlōr's, s.** [Fr. *chrysochloré*, from Gr. χρυσός (chryso) = gold, and χλωρός (chlōros) = green.]

*Entom.*: A genus of Dipterous insects, belonging to the family Netaceanthae. They are of a beautiful golden-green colour. The larvae live in cow-dung.

**chryś-ō-chlōr'-is, s.** [Gr. χρυσός (chryso) = gold, and χλωρός (chlōros) = green.]

*Zool.*: A genus of Talpidae (Moles), the fur of which reflects most brilliant hues of green and gold. *Chrysochloris aureus*, or *aurea*, is the Golden Mole of Africa.

**chryś-ō-chroūs, a.** [Gr. χρυσός (chryso) = gold, and χρῶς (chros) = skin.]

*Bot.*: Having a yellow skin.

**chryś-ō-cōl'-la, \*chryś-o-cholle, s.** [Gr. χρυσοκόλλα (chrysokollos) = gold solder; from χρυσός (chryso) = gold, and κόλλα (kolla) = glue.]

*Mineralogy*:  
1. A name of borax.  
2. A silicate of protoxide of copper of a fine emerald-green colour, apparently produced from the decomposition of copper ores, which it usually accompanies. It derives its name from the weak resinous lustre, and the peculiar transparency of the fractured edges. (*Page.*)

"Much *Chrysocholle* and also silver fire."—*Sylvester: Magnificence*, 601. (*Davies.*)

**chryś-ōc'-ō-ma, s.** [Gr. χρυσός (chryso) = gold, and κομή (komē) = hair.]

*Bot.*: A genus of South African shrubs or undershrubs of the composite family, nearly allied to *Linosyris*, from which it differs in the hairs of its pappus being in a single series. About fifteen species are enumerated. The leaves in most cases are linear in form and entire. The yellow nearly spherical flower-heads are about the size of a pea, and single on the ends of the branches. *Chryso-coma aurea* is in cultivation, and is said to be a very common species about Cape Town. Its leaves are linear, and about half an inch long. (*Treas. of Bot.*)

**chryś-ō-cō-rŷ'-nē, s.** [Gr. χρυσός (chryso) = gold, and κορυφή (korufē) = a club.]

*Bot.*: A curious genus of small annual Australian plants, belonging to the composite family. They are branched from the base, and seldom exceed three inches in height. The leaves are small, linear, and covered with loose white wool; but the most marked feature in the plants is the arrangement of the flower-heads. These are disposed in short yellow club-shaped spikes, and each flower-head is almost hidden by a yellow bract and contains but two florets. Five species are known; they are chiefly found in the western and southern parts of Australia.

**chryś-ōd'-ō-mūs, s.** [Gr. χρυσός (chryso) = gold, and ὄμιος (omios) = a house, a building.]

*Zool.*: A genus of Mollusca, the shells of which are large, and of a beautiful orange colour. The basal channel is comparatively short, and the body whorl ventricose. Family, Muricidae. It is now reduced to a sub-genus of *Fusus*.

**chryś-ō-gās-tēr, s.** [Gr. χρυσός (chryso) = gold, and γάστρη (gastēr) = a stomach.]

*Entom.*: A genus of Dipterous insects, belonging to the family Syrphidae. *Chryso-gaster splendens* has the head and thorax green and

the abdomen purple-black, the sides greenish, the antennae yellow. It is half an inch long. It occurs in England.

**chrys-ō-gōn, s.** [Gr. χρυσός (*chrysos*) = gold; and γεννάω (*gennao*) = to produce.]

*Chem.*: An orange-coloured hydrocarbon, contained in crude anthracene. It melts at 290°, and is soluble in concentrated sulphuric acid. Traces of this substance give a yellow colour to colourless aromatic hydrocarbons.

\* **chrys-ōg-raph-ŷ, s.** [Gr. χρυσογραφία (*chrysographia*), from χρυσός (*chrysos*) = gold; γράφω (*graphō*) = a writing, γράφω (*graphō*) = to write.]

1. The art of writing or illuminating in letters of gold.

2. A letter or other writing executed in letters of gold.

**chrys-ō-g-dine, s.** [Gr. χρυσός (*chrysos*) = gold; εἶδος (*eidos*) = like, and Eng. suff. -ine (*Chem.*)]

*Chem.*: Metadiamidazobenzene, C<sub>12</sub>H<sub>12</sub>N<sub>4</sub> or C<sub>6</sub>H<sub>5</sub>-NNC<sub>6</sub>H<sub>4</sub>(NH<sub>2</sub>)<sub>2</sub>. The hydrochloride is sold commercially as chrysoidine. It is an orange-yellow colouring matter. Chrysoidine is prepared by mixing a one per cent. solution of a diazobenzene salt with a ten per cent. solution of metadiamidazobenzene; the resulting blood-red precipitate is dissolved in boiling water, the solution is cooled to 50°, and precipitated with ammonia, and then crystallized from alcohol of 30 per cent., then from boiling water. Chrysoidine forms golden needles, soluble in alcohol, melting at 117°. It is a base from mono-acid salts which dissolve in water forming a yellow solution, which is turned crimson by excess of acid. By the action of tin and hydrochloric acid it is resolved into aniline C<sub>6</sub>H<sub>5</sub>.NH<sub>2</sub> and triamidobenzene, C<sub>6</sub>H<sub>3</sub>(NH<sub>2</sub>)<sub>3</sub>.

**chrys-ō-lēp-ic, a.** [Gr. χρυσός (*chrysos*) = gold, and λέπις (*lepis*) = a scale.] Resembling golden scales.

**chrysoleptic acid, s.**

*Chem.*: An acid obtained in beautiful golden-yellow scales from the mother liquid and washings of chrysmic acid. It has been discovered to be the same as picric acid. [CARBAZOTIC ACID.]

**chrys-ō-lite, s.** [Fr. *chrysolithe*; Lat. *crusolitus*; Gr. χρυσόλιθος (*chrysolithos*), from χρυσός (*chrysos*) = gold, and λίθος (*lithos*) = a stone.]

*Mineralogy*:

1. A green-coloured orthorhombic mineral of a vitreous lustre, transparent or translucent. Hardness, 6-7; sp. gr., 3.33-3.5. Compos.: Silica, 31.63-44.67; protoxide of iron, 6.0-29.71; protoxide of manganese, 0-1.81; magnesia, 32.40-50.49. It is generally divided into two classes:—(1) *Precious*: Of a pale yellowish-green colour and transparent, so as to be fit for jewelry. This is found in the Levant. (2) *Common*: Dark yellowish-green to olive, or bottle-glass green; common in basalt and lavas, at times in large masses, having a rectangular outline. The *chrysolite* of Plooy was probably our topaz, and his topaz our chrysolite. It frequently changes colour, becoming brownish or reddish-brown through the oxidation of the iron. Under the action of carbonated waters, the iron is carried off instead of being peroxidized, and also some of the magnesia is removed at the same time; and thus may come serpentine and picrosamine, which often retain the crystalline form of chrysolite.

2. The same as ZIRCON (q.v.).

3. The same as TOPAZ (q.v.).

4. A variety of Tourmaline, also called Brazilian Emerald or Peridot of Brazil. It is green and transparent.

5. The same as APATITE (q.v.).

*Iron chrysolite*:

*Min.*: The same as FAYALITE (q.v.).

*Iron manganese chrysolite*:

*Min.*: A mineral near Fayalite, but containing besides protoxide of iron, some protoxide of manganese and lime and a little magnesia, thus approaching hyaloseridite. Compos.: Silica, 29.16; alumina, 1.56; protoxide of iron, 55.87; protoxide of manganese, 8.47; magnesia, 3.23; lime, 2.29. It occurs in a gneissoid rock consisting partly of augite and garnet at Tunaberg in Sweden. (*Dana.*)

*Titaniferous chrysolite*:

*Min.*: A massive reddish-brown mineral from the talcose schist of Pfunders, in the Tyrol, having some resemblance to beryl; sp. gr., 3.25. It contains 3.5 to 5.3 of titanate acid, with 6 per cent. of protoxide of iron.

\* **chrys-ōi-ō-gŷ, s.** [Gr. χρυσός (*chrysos*) = gold, money, and λόγος (*logos*) = a discourse.] A discourse or treatise on wealth. (*Brande.*)

**chrys-ōi-ō-phŷs, s.** [Gr. χρυσός (*chrysos*) = gold, and φῦσ (*ophos*) = a crest.]

*Ornith.*: The Walking Tyrants, a genus of birds belonging to the Tyrant Shrikes. Family, Laniidae. They are natives of Brazil.

**chrys-ōi-ō-pūs, s.** [Gr. χρυσός (*chrysos*) = gold, and λωπός (*loros*) = a piece, a slice.]

*Entom.*: A genus of Coleopterous insects, belonging to the family Melyncophora.

**chrys-ō-ma, s.** [Gr. χρυσός (*chrysos*) = gold, and σῶμα (*sōma*) = a body.]

*Bot.*: A genus of North American composite plants, considered by the authors of the "Flora of North America" to be the same as that of the Golden Rod (*Solidago*). The species are perennial plants, with alternate lance-shaped entire or serrated leaves, sometimes furnished with pellucid dots; and they bear terminal corymbs of yellow flower-heads, each of which contains from six to eight florets, one to three of them being strap-shaped.

\* **chrys-ō-māg-net, s.** [Gr. χρυσός (*chrysos*) = gold, and Eng. *magnet* (q.v.).] The loadstone. (*Addison.*)

**chrys-ō-mē-la, s.** [Gr. χρυσομηλόληθιον (*chrysomelolonthion*) = a little golden beetle.]

*Entom.*: The typical genus of the family Chrysmelidae (q.v.). Sixteen species are British.

**chrys-ō-mēl-ŷ-dæ, s. pl.** [Mod. Lat. *chryso-mel(a)*; and fem. pl. adj. suff. -idæ.]

*Entom.*: A family of Coleopterous insects, tribe Cyclia. They have ovate, convex bodies; tarsi four-jointed; antennae not clavate; larvae generally naked. They live on the leaves of plants. Thirty-eight genera are enumerated by Sharp as British. These insects are often very brilliantly coloured green, purple, blue, brown, &c., a commixture of colours being met with even in the English species.

**chrys-ō-phāne, s.** [Gr. χρυσός (*chrysos*) = gold, and φαίνω (*phainō*) = to appear.]

*Min.*: A variety of Seyberite, occurring in reddish-brown to copper-red brittle foliated masses. Sp. gr., 3.148. The British Museum Catalogue makes Chrysothane a synonym of Clintonite (q.v.).

\* **chrys-ō-phān-ŷc, a.** [Gr. χρυσός (*chrysos*) = gold; φαίνω (*phainō*) = to appear; suff. -ic.] Appearing like or resembling gold in colour.

**chrysophanic acid, s.**

*Chem.*: Parietic acid, rheic acid. A modification of dioxymethylanthraquinone C<sub>12</sub>H<sub>10</sub>O<sub>4</sub>=C<sub>14</sub>H<sub>8</sub>.CH<sub>2</sub>(OH)<sub>2</sub>O<sub>2</sub>. Chrysophanic acid occurs in the lichen *Parmelia parietina*, in senna leaves, and in rhubarb root, and is extracted by ether. It forms golden yellow prismatic crystals, which melt at 162°, and is reduced by zinc-duct to methyl-anthracene. It dissolves in alkalis, forming a red solution.

\* **chrys-ō-ph-ŷl-ŷc, a.** [Gr. χρυσός (*chrysos*) = gold, and φίλος (*philos*) = a lover.] A lover of gold. (*Lamb.*)

**chrys-ōph-ōr-a, s.** [Gr. χρυσός (*chrysos*) = gold; φερός (*pheros*) = bearing; φέρω (*phero*) = to bear.]

*Entom.*: A genus of Coleopterous insects, belonging to the family Lamellicornes. The species are of most beautiful golden and green colours.

**chrys-ō-phrŷs, s.** [Gr. χρυσός (*chrysos*) = gold, and φρύς (*phrus*) = the brow.]

*Ichthy.*: A genus of fishes belonging to the family Chetodontidae, having bodies attenuated at each end.

**chrys-ō-phŷll, s.** [From Gr. χρυσός (*chrysos*) = gold, and φύλλον (*phullon*) = a leaf.] A

golden colouring matter found in leaves. (*Rosier.*)

**chrys-ō-phŷl-lŷm, s.** [Gr. χρυσός (*chrysos*) = gold, and φύλλον (*phullon*) = a leaf; in allusion to the golden colour on the under side of the leaves.]

*Bot.*: A genus of Sapotaceae, consisting of trees with milky juice, alternate leaves with numerous transverse closely-aggregated ribs, and golden hairs on the under surface. The fruit of *Chrysophyllum Catnito* is in the West Indies esteemed a delicacy under the name of the Star-apple.

**chrys-ō-pi-ā, s.** [Gr. χρυσός (*chrysos*) = gold, and πῶς (*pos*) = juice.]

*Bot.*: A genus of beautiful trees, natives of Madagascar. When the bark is cut they emit a yellow juice.

**chrys-ō-prāss, \* crys-ō-pāse, \* crys-ō-pāse, s.** [Fr. *chryso-prasse*; Gr. χρυσό-πρασος (*chryso-prasos*), from χρυσός (*chrysos*) = gold, and πράσον (*prason*) = a leek, from the colour.]

*Mineralogy*:

1. An apple-green variety of chalcocopyrite, the colour due to the presence of oxide of nickel.

2. A variety of beryl, of a pale yellowish-green colour.

\* *The chryso-prase the teathe is tyght.*—*E. E. Auld Poems*; *Part*, 1012.

**chryso-prase earth, s.**

*Min.*: A variety of Pimelite (q.v.).

\* **chrys-ōp-ra-sŷs, s.** [Lat. *CHRYSO-PRASE.*] The tenth of the precious stones with which the walls of the New Jerusalem were to be adorned (Rev. xxi. 20, A. V.). Probably the Chryso-prase (q.v.), as it is rendered in the Revised Version.

**chrys-ōps, a.** [Gr. χρυσός (*chrysos*) = gold, and ψ (ops) = the face.]

*Entom.*: A genus of Dipterous insects, belonging to the family Tabanidae. Three species occur in this country, where they are known as cleg-flies or gad-flies. They are all blood-suckers, and are exceedingly troublesome to cattle and horses in summer.

**chrys-ōp-sis, s.** [Gr. χρυσός (*chrysos*) = gold, and ὄψις (*opsis*) = a face, appearance.]

*Bot.*: A genus of annual or perennial North American composite plants, the greater portion of the species having all their parts covered with villous or silky hairs. *Chryopsis villosa*, a plant with oblong hairy leaves about an inch and a half long, and numerous yellow flower-heads, half an inch in diameter, is said to be one of the commonest plants on the prairies of the Saskatchewan. *C. graminifolia* extends southwards to Mexico; its leaves are clad with beautiful clove-pressed silvery hairs. (*Treas. of Bot.*)

**chrys-ōp-tēr-ŷs, s.** [Gr. χρυσός (*chrysos*) = gold, and πτερίς (*pteris*) = a kind of fern.]

*Bot.*: A synonym of Phlebodium, a genus of ferns, which includes Linnaeus's *Polygodium aureum*, the specific appellation seeming to have suggested this generic name.

**chrys-ōp-tēr-ŷx, s.** [Gr. χρυσός (*chrysos*) = gold, and πτέρυξ (*pteryx*) = a wing.]

*Ornith.*: A genus of birds belonging to the sub-family Ampelinae, or Typical Chatterers, and family Ampelidae, or Chatterers.

**chrys-ōp-til-ŷs, s.** [Gr. χρυσός (*chrysos*) = gold, and πτελον (*ptilon*) = a wing or plume.]

*Ornith.*: A genus of birds belonging to the sub-family Picinae and family Picidae, or Woodpeckers. They are natives of tropical America.

**chrys-ō-quin-ōne, s.** [Eng. *chryso(ene)*, and *quinone*.]

*Chem.*: C<sub>10</sub>H<sub>10</sub>O<sub>2</sub>. It is obtained by the action of chromic acid on chrysaene dissolved in acetic acid. It crystallizes in red needles, melting at 235°. It dissolves in a solution of sodium disulphite and the concentrated solution deposits colourless crystals which are decomposed by water with liberation of chrysoquinone. The reactions of chrysoquinone resemble those of pbenanthrenequinone. It yields when heated with soda-lime a hydrocarbon C<sub>10</sub>H<sub>12</sub>.

chrys-ör-rhō-ē, s. [Gr. χρυσός (chrysolos) = gold; and ῥῥῶ (rhoe) = a stream, 's flowing, ῥέω (rhē) = to flow.]

Bot.: A genus of Chamælauciaceæ, consisting of a rigid shrub from the Swan river, with narrow terete leaves and terminal corymbs of a bright-yellow flower.

\*chrys-ō-spërma, s. [Gr. χρυσός (chrysolos) = gold, and σπέρμα (sperma) = a seed.] A means of creating gold. (E. Jonson: Alchemists.)

chrys-ō-splē-ni-ūm, s. [Gr. χρυσός (chrysolos) = gold, and σπλήν (splēnē) = the spleen; in reference to its supposed efficacy in diseases of the spleen.]

Bot.: Golden Saxifrage. A small genus of unimportant herbaceous plants, belonging to the Saxifragaceæ, among which they are discriminated by their one-celled seed-vessel, and by being destitute of petals. Two species are indigenous to Britain, and scarcely differ from one another, except that one has the leaves opposite, the other alternate. The flowers, which are bright yellowish-green, appear in April and May, growing in flat tufts at the summit of the stems. Chrysosplenium oppositifolium is the commoner species. C. alternifolium is more abundant in the north. It was formerly used as a slight tonic. (Lindley.) The genus is represented in various parts of the world by plants of similar habit, none of which are worthy of cultivation.

chrys-ōs-tach-ys, s. [Gr. χρυσός (chrysolos) = gold, and στάχυς (stachys) = an ear or spike of corn.]

Bot.: A genus of climbing shrubs, belonging to the order Combretaceæ. They are natives of Brazil.

chrys-ō-tī-lo, s. [Gr. χρυσός (chrysolos) = gold, and τίλος (tilos) = fine hair.]

Mfn.: A delicately fibrous variety of Serpentine. Colour, greenish-white, green, olive-green, yellow, and brownish. Sp. gr., 2.219. It often constitutes seams in Serpentine. It includes most of the silky amianthus of serpentine rocks. The original chrysotile was from Reichenstein. (Dana.)

chrys-ō-tūs, s. [Gr. χρυσός (chrysolos) = gold, and οὖς (ous), genit. ὄτος (otos) = an ear.]

Ornith.: A genus of South American parrots, having the face and ears yellow.

chrys-ō-tōx-ūm, s. [Gr. χρυσός (chrysolos) = gold, and τόξον (toxos) = an arrow, a shaft.]

Entom.: A genus of Dipterous insects.

chrys-ō-tūs, s. [Gr. χρυσός (chrysolos) = gold, and οὖς (ous), genit. ὄτος (otos) = an ear.]

Entom.: A genus of Dipterous insects, belonging to the family Tanytoms.

chrys-ō-týpe, s. [Gr. χρυσός (chrysolos) = gold, and τύπος (typos) = an impression.]

Photography:

1. A process discovered by Sir John Herschel, in which a sheet of paper is saturated with a solution of ammonio-citrate of iron dried in the dark. Exposed in a camera or printing-frame, the faint picture is developed by brushing over with a neutral solution of chloride of gold washed in water repeatedly, fixed by a weak solution of iodide of potassium and then finally washed and dried. (Knight.)

2. A picture obtained by the process described in 1.

chrys-ōx-ý-lōn, s. [Gr. χρυσός (chrysolos) = gold, and ξύλον (xylon) = wood.]

Bot.: The name of a South Bolivian tree, now referred to Howardia (q.v.). It derived its name from the yellow colour of its wood.

chrys-tál-lō-týpe, s. [Eng. chrysalis = crystal, and type.]

Phot.: A name given to a kind of picture on a translucent material; an opalotype.

\*chry-stis-mess, s. [CHRISTMAS.] (O. Scotch.)

chrys-ūr-ūs, s. [Gr. χρυσός (chrysolos) = gold, and οὐρά (oura) = a tail.]

Bot.: A genus of grasses belonging to the tribe Festucæ. Only one species is described, Chrysurus cynosuroides, which is the Lamackia aurea of some authors. This hand-

some dwarf-habited annual grass is a native of the south of Europe and north of Africa, and is occasionally cultivated in botanical gardens.

chthō-ni-an, a. [Gr. χθώνιος (chthonios) = earthy.] Belonging to the earth.

"The terrestrial Earth-mother and her chthonian and telluric daughter."—R. Brown: Great Dionysiac Myth, l. 290.

chüb, \*chübbe, s. [Cf. Dan. kobbe = a seal; Sw. kubb = a block, a log. (Skeat.)]

Ichthy.: A river fish, Leuciscus cephalus, belonging to the genus Leuciscus and family Cyprinidæ. It is a coarse-fleshed fish, full of bones, very timid, and frequenting the deepest holes of rivers. It is also called a cheven or chevin.

\*chub-cheeked, a. Having chubby or fat cheeks.

\*chub-faced, a. Having a chubby or fat face. (Marston: Antonio's Revenge, iv. 2.)

Chüb, s. & a. [From the name of the inventor and maker, a London locksmith.]

A. As subst.: The person referred to in the etymology.

B. As adj.: (See the compounds.)

Chubb-key, s. A key specially intended for a Chubb-lock.

Chubb-lock, s. A patent lock constructed on the tumbler system (TUMBLER), and having in addition, a lever called a detector, which is so fitted that if any one of the tumblers be raised higher than it should be the whole of the apparatus is fixed immovably by a bolt, thus completely preventing the picking of the lock.

\*chubbed, a. [Eng. chub; -ed.] Chubby, chub-faced.

"Young Skinker . . . a chubbed unlucky boy."—H. Brooke: Fool of Quality, l. 22. (Davies.)

\*chüb-bëd-nëss, s. [Eng. chubbed; -ness.] Chubbiness (q.v.).

chüb-bi-nëss, s. [Eng. chubby; -ness.] The quality or state of being chubby or chub-faced.

chüb-bÿ, a. [Eng. chub; -y.] Fat and plump like a chub, especially said of the face.

\*chück (1), \*chük, v. t. & i. [A variant of chuck (q.v.).]

I. Intransitive:

1. To chuck or make a noise like a hen when calling her chickens together.

"He chucketh when he hath a corn-founde, And to him rennet that his wife alle."—Chaucer: Nonne Prestes Tale, v. 16,608.

2. To laugh in a suppressed or convulsive manner, to chuckle.

"But, bold-fard' Satyr, strain not over high, But laugh and chuck at mesner gullery."—Marston: Satires, II.

II. Trans.: To call, as a hen her chickens.

"Then crowing clapped his wings, th' appointed call, To chuck his wives together in the hall."—Dryden: Cuck & Fox, 490.

chück (2), \*chock, v. t. [Fr. choquer = to give a shock to; Dut. schokken = to jolt, to shake; schok = a shock, a jolt.] [Chock, Shock.]

1. To strike gently under the chin.

2. To throw with force, to fling.

"As if her hand had chucked a shilling."—Combe: Dr. Syntax, II. 1.

\*chuck-farthing, s. & a.

I. As subst.: An old game in which money was thrown so as to fall into a hole prepared for the purpose. It is alluded to in "The Woman turned Bully," A. D. 1675. (Halliwell.)

"He lost his money at chuck-farthing, shuffle-cap, and all-fours."—Arbutnot: Hist. of John Bull.

II. As adj.: Trifling, pitiful.

" . . . at was together about some pitiful chuck-farthing thing or other."—Richardson: Clarissa, iv., 340.

chuck-hole, s.

1. A deep hole in a wagon rut. (Webster.)

2. Chuck-farthing (q.v.).

†chück (3), v. t. [CHUCK (3), s.]

Mech.: To place or hold in a chuck in turning.

chück (1), s. [A variant of chicken.]

1. The voice or call of a hen, the sound by which fowls are called together to be fed.

"He made the chuck four or five times, that people use to make to chickens when they call them."—Sir W. Temple.

\*2. A term of endearment.

"How dost thou, chuck!"—Shakspeare: Twelfth Night, III. 4.

\*3. A slight noise.

chück (2), s. [CHUCK (2), v.]

1. A slight tap or blow under the chin.

2. A throw.

3. A marble used in the game of taw. (Scotch.)

chück (3), s. [Probably connected with chuck (2), s.]

1. Meck: An appendage to a lathe. Being screwed on to the nose of the mandrel, it is made to grasp the work to be turned. There are several varieties, such as the eccentric chuck, which is designed for changing the centre of the work; the elliptic or oval; the geometric, &c. [NOSE-POINCE.]

2. Naut.: A warping chuck is one in which hawsers or ropes run. Friction rollers prevent the wearing of the rope. It is used on the rail or other portion of a ship's side.

chuck-lathe, s. A lathe in which the work is held by a socket or grasping device attached to the revolving mandrel of the head-stock. It is used for turning short work, such as cups, spools, balls, and a great variety of ornaments and useful articles.

CHUCKS.

chuck-will's widow, s. Ornith.: A species of Gatsucker, Caprimulgus carolinensis, a native of the Southern States of North America. The name is an attempt to reproduce the note of the bird.

"It wanted but a few minutes of midnight, when suddenly the clear and distinct voice of the chuck-will's widow rose up from a pomegranate tree in the garden below the widow where I was sitting, and only a few yards from me. It was exactly as if a human being had spoken the words, 'chuck-widow-widow.'"—Gosse: Romance of Natural History, p. 174.

chück-ët, s. [From the voice of the bird.] A name given to the Blackbird, Island of Hoy, Orkney.

"In winter—it has only a squeaking voice, like the word chuck, chuck, several times repeated, whence the Hoy name."—Lowe: Fauna Orcada, p. 58.

chück-ÿe, s. & a. [A dimin. of Eng. chuck (2), s.]

1. A barn-door fowl.

"Though its no like our barn-door chuckies at Cheries-hope."—Scott: Guy Mannering, ch. xv.

2. A chuckie-stone.

3. (Pl.) A game like chuck-farthing (q.v.), in which stones are used instead of coins.

chuckle-stane, s. A pebble such as children play at chuckies with.

" . . . and its pease-dirt, as pizenless as chuckie-stanes."—Scott: Rob Roy, ch. xiv.

chück-le (le as el), (1), v. t. & i. [A frequent. form from chuck (1) v. (Mahn): probably more immediately related to choke (Skeat).]

\*A. Transitive:

1. To call together as a hen her chickens.

" . . . if these birds are within distance, here's that will chuck 'em together."—Dryden.

2. To fondle.

" . . . he must chuckle you, and moan you."—Dryden: Spanish Friar.

B. Intrans.: To laugh convulsively or in a suppressed and broken manner.

\*chück-le (2), v. t. [A frequent. form from chuck (2), v. (q.v.).] To throw together, to mix up.

"She chuckles together a whole covey of essences and perfumes."—Gentleman Instructed, p. 117.

chück-le, s. [CHUCKLE (1), v.] A short convulsive or suppressed laugh.

\*chuckle-chin, s. A double-chin.

'The dewlaps from his chuckle-chin  
That had with gorging paupered been.'  
T. D'Urfay: Athenian Jilt. (Davies.)

† **chuckle-head**, *s.* A thick-headed fellow, a numskull.  
"Is he not much handsomer and better built than that chuckle-head."—Smollett: Roderick Random, ch. 11.

† **chuckle-headed**, *a.* Thick-headed, dull, stupid.

**chuck-líng**, *pr. par., a., & s.* [CHUCKLE, *v.*]  
**A. & B.** *As pr. par. & particip. adj.*: (See the verb).

**C.** *As subst.*: The act of making a chuckling noise; a chuckle.

\* **chüd**, *v.t.* [CUD.] To champ, to bite.  
"When she rides, the horse chüde his bit so cheerfully, as if he wished his burthen might grow to his back."—Stagford: Nibda diabolö & into a Nibsa, p. 118.

**chüd-dér**, *s.* [Hind. *chudur*, a corruption of *chadur* = a sheet.] In India, a sheet made of alk, muslin, or cambric, thrown over the head of Musulman and some Hindoo women, and reaching to the ground. When they go into the street they generally wrap themselves in it, as they do also when going to sleep. (Herklots & Jaffur Shurreef.)

**chüd-rème**, **cüd-rème**, *s.* [I. *cudthrom* = a weight, a load.] An ancient designation of what is called a stone weight.  
"... cum antiqua mensura farino ibi apposita, triginta Casaeorum quilibet facit Chudrema, et octo male de Brasso, et Decem de male, et Cheshier male."—Oleari: Sic. Antiq. Crassus's Officers of State, p. 431.

\* **chü-öt**, *s.* [CHEWET.] A kind of forcemeat.  
"As for *chucts*, which are likewise minced meat, instead of butter and fat, it were good to moisten them partly with cream, or almond or pistachio milk."—Bacon: Natural History.

\* **chuf**, *s.* [COOF.] (Scotch.) (Maitland: Poems.)

\* **chüff**, \* **chuffe**, *a. & s.* [Ety. doubtful; Cf. *chub* and Welsh *cyff* = a atock, a atump.] [CHOFFE.]

**A.** *As adj.*: Fat-faced, with fat or puffed out cheeks.  
"Chuff; bouffe."—Palsgrave.

CHUPRASSEE.

**chürgh**, \* **chirghe**, \* **chyrche**, \* **cherche**, \* **churche** (Eng.), **kirk**, \* **kirke**, \* **kyrke** (Mid. Eng. & Scotch), *s. & a.* [Gr. *κυριακον* (*kyriakon*) = pertaining to the Lord, from *κύριος* (*kyrios*) = the Lord; A.S. *circe*, *cirice*, *cyrc*; O. Sax. *kirika*; O. H. Ger. *chirikidä*; M. H. Ger. *kirche*; Ger. *kirche*; Dut. *kerk*; Dan. *kirke*; Sw. *kyrka*; Icel. *kirja*.] It is believed that the word *κυριακή* (*kyriakē*) originally passed over from the Greeks to the Goths, the first Teutonic tribe converted to Christianity. From the Goths it diffused itself over the other Teutonic tribes, ultimately reaching the Saxons, and through them becoming introduced into the English tongue. Walafrid Strabo, who wrote about A.D. 840, gave this explanation of the origin of the word "kyrch." (Trench: On the Study of Words, pp. 67, 68.)

**A. As substantive**:  
\* **1.** Originally used in a wide sense for a Christian church, a Jewish synagogue, or a heathen temple.

"And lo the velle of the church was torn in two parts from the top downwards."—Matt. xviii. 61. (Sir John Cheke.)

"To all the gods devoutly she did offer frankincense,  
But most above them all the church of Jesus she did cense."  
Golding: Ovid's Metamorphoses, bk. xi.

**2.** A building set apart and consecrated for Christian worship.  
"Chirche is holl Godes hus . . . and is clyped in boe *kyriaki* i dominicalia."—O. Eng. Homilies (ed. Morris), II, 23.

"It comprehends the whole church, viz. the nave, or body of the church, together with the chancel, which is even included under the word church."—Ay-liffe: Parergon.

**3.** A body of Christian believers, worshipping together in one place, under the same minister, and with the same form of worship.  
"They ordained them elders in every church."—Acts xiv. 23.

**4.** The whole body of Christians collectively.  
"It is certainly lawful not to worship images, not to pray to Angels, or Saints, or the blessed Virgin; otherwise the primitive church would not have borne these practices for three hundred years, as is acknowledged by the church of Rome."—Tillotson (3rd ed. 1720), vol. I, ser. ix.

"The visible Church of Christ is a congregation of faithful men, in which the pure Word of God is preached."—Book of Common Prayer, Art. xii.

**5.** A distinct section or division of Christians organized for worship under a certain form. Thus we speak of the Roman Catholic, the Presbyterian, the Greek, the Latin Churches, &c.

**6.** The religious influence exercised by Christians in the aggregate; ecclesiastical authority or influence, as distinguished from the civil power.

"The same criminal may be absolved by the church, and condemned by the state; absolved or pardoned by the state, yet censured by the church."—Lestie.

\* **I. Church of England**:  
† (1) *Hist.*: The foregoing designation is used in two senses; first, a general one signifying the Church regarded as continuous, which, from the first triumph of Christianity till now, has been that of the English people, and secondly, in a more specific sense, the Protestant Church now established in England as distinguished from the Church of Rome.

As early as the 2nd century, Tertullian says that those parts of Britain which were inaccessible to the Romans had become subject to Christ. They received the gospel from Gaul and not from Rome. This Celtic Church was driven from E. and S. England by the Saxons.

These invaders were gradually converted by Augustin and his companions sent from Rome for the purpose, and by the early part of the 7th century, the seven kingdoms of the heptarchy were all nominally Christian. In England, as elsewhere, the centuries between the 7th and the 15th were marked by the growth and ultimate domination of the Papacy, and in 1213, King John, to the disgust of his subjects, surrendered his crown to the Roman legate. But the submission was never complete, and certain Parliamentary measures in the 14th century, designed to protect the civil power against the encroachments of the Church, look as if they had been proposed at a much later period. In the same century, Wycliffe on the one hand, and Chancer and the author of "Piers Plowman" on the other, inflicted heavy blows upon the Church's reputation. Thoroughly alarmed in the 15th century for its supremacy, it became increasingly cruel in its treatment of "heretics," and in the 16th the Reformation came. In 1531, the royal supremacy, which was intended to supersede the papal one, was imposed on the clergy by Henry VIII., and was made use of to produce other changes. In the same year Coverdale's Bible was appointed to be read in churches. In 1549, the first book of Common Prayer was published, and permission given to the clergy to marry. In the reign of Edward VI., A. D. 1547 to 1553, more sweeping measures of reform were carried out under the auspices of foreign rather than English Protestant leaders, but these were completely swept away in the great reaction in favour of Roman Catholicism which arose when Mary came to the throne. There is evidence that in 1553, when Queen Mary began to reign, the Protestants were in a minority, but in 1558, when Queen Elizabeth came to the throne, they had become a majority, the fires of Smithfield and other places having produced an effect the exact opposite of that which they had been intended to accomplish. The work of reformation was resumed under Queen Elizabeth, and in 1563 the thirty-nine articles became, as they still continue to be, the authoritative statement of the Church's creed. Two parties subsequently came into antagonism in the Church: the Puritans, who wished to constitute it on a basis like that of the churches of Geneva and of Scotland; and an Anglican party, who were reluctant to break so completely with the past. A conference, held from 14th to 16th January, 1604, at Hampton Court, between the leaders on each side, failed to effect their reconciliation, and they went their separate ways. In 1611 was published the version of the Bible which is now called the authorised one, that which maintains its place at present, notwithstanding the issue of the revised version. The disputes between the Puritans and the Anglicans continued during the remainder of the reign of Elizabeth, and during those of James I. and Charles I. During the Civil War, which commenced in 1640, it was a great object with the Parliamentary party to obtain assistance from the Scotch, who had preceded them in rebellion by three years, having risen in 1637 against an effort to force upon them a liturgy which they abhorred. An ecclesiastical, as well as a political, union was proposed by the Scotch, who were then, as now, Presbyterian; and in 1644, the Book of Common Prayer was suppressed and the directory of public worship produced by the Westminster Assembly of divines substituted in its room. A reaction against the new arrangements was not long in arising, and with the return of monarchy episcopacy was restored. In 1662, the Act of Uniformity was passed, which compelled about 2,000 clergymen, mostly Presbyterians in sentiment, to resign their livings, and laid the foundation of modern Nonconformity. The Act is still in force. The effort of James II., in violation of his coronation oath, to undo the reformation in the English Church, injured not it but himself, and the attempt has never been renewed on the part of any subsequent sovereign. The evangelistic zeal of Whitfield, Wesley, and various other clergymen, in the 18th century, awoke the Church to new life, which did not pass away even when the followers of the two great preachers just named ceased to belong to the English Church. The evangelistic party, still the most numerous in the Establishment, is, in large measure, the fruit of 18th century revival effort. In the 19th, the movement has been in other directions. With 1833, just

after the passing of the first Reform Bill, the first of a series of "Tracts for the Times" came forth, and ninety, in all, were issued within the next eight years. The ritualistic party, at a later date, carried on the work which the tractarians had begun. In 1860 the *Essays and Reviews*, and in 1862 a work by Bishop Colenso on the Pentateuch, gave prominence to the opposite pole of thought, being what theologians call strongly rationalistic. Church Congresses, bringing the representatives of these three parties face to face, soften their antagonisms, and fear of common danger renders them more united than they otherwise would be.

(2) *In the United States:* The first Church of England services in the American Colonies took place at Jamestown, Virginia, in 1606, the holy communion being celebrated by the Rev. Robert Hunt, under an awning suspended between the trees. The Protestant Episcopal Church continued to prevail in Virginia during the colonial period, and was also established in the Carolina and Georgia, while in Maryland the freedom of religion proclaimed by the Roman Catholic settlers became an intolerance of Catholicism when the English Church gained the ruling power. In the Middle Colonies the Church was never established, and in New England it was bitterly opposed, but made its way to some extent in that stronghold of Puritanism, particularly in Connecticut. After the Revolution the church in America was organized under bishops consecrated in England, though for a long time its growth was very slow. Within the present century, however, the growth has been rapid, its progress becoming so marked in the larger states that the original assignment of a bishop to each state was found to be inadequate, and new dioceses were formed within the limits of the states, New York, for instance, now having seven. The church, though still low in members as compared with the other denominations, is in an active and promising condition. In England and Wales its adherents number more than 13,000,000.

3. *Church of Ireland, Irish Church:* A popular name sometimes given, prior to 1871, to what was not an independent denomination, but was an integral part of the United Church of England and Ireland. It constituted the Established Church of the two countries. When on 1st January, 1871, the Act of Parliament, disestablishing and disendowing the portion of the United Church which was in Ireland, took effect, those affected by the measure, rejecting the name proposed by the Government for the new organization, adopted that of the Irish Church or the Church of Ireland.

#### 4. *Church of Scotland:*

(1) *Hist.:* The original Scottish Church seems to have been that of the Culdees, then in medieval times the Roman Catholic Church was, to a certain extent, the national church in Scotland, not merely as having within its pale at least by profession all the people, but as maintaining its independence of its powerful southern neighbour. The church resisted the claims to supremacy over it put forth at one time by the Archbishop of York, at another by the Archbishop of Canterbury; and, in 1176, in self-defence cast itself into the arms of the Roman Pontiff. When the 16th century opened, the royal power in Scotland was weak and was jealous of, and in conflict with, a very powerful nobility. When the Reformation struggle began, the Crown remained adherent to the old faith, whilst the nobility tended to adopt the new. From the war of independence, Scotland had considered it good policy to guard against any aggression on the part of England by a close alliance with France, and when the Reformation began there were actually French troops in Scotland. On these the Crown rested to resist the religious movement which had been begun, but the Protestant "Lords of the Congregation," who had taken up arms to defend their cause, applied for aid to Queen Elizabeth, who sent troops to aid them in expelling the French. By a treaty signed on the 7th July, 1560, it was stipulated that both the French and the English troops should withdraw from Scotland. On the 24th August, of the same year, the Scottish Parliament abolished the papal jurisdiction, prohibited the celebration of the mass, and rescinded all the laws made in favour of Roman Catholicism. The reformers adopted what is now called Presbyterian

Church government, though certain superintendents were appointed, with the sanction of John Knox, the great Scottish reformer, whose offices after a time were swept away. [CHURCH GOVERNMENT, PRESBYTERIANISM.] The first General Assembly was held on 20th December, 1560. When the victory over the Church of Rome was complete, the alliance between the nobility and the Protestant preachers which had effected the triumph, showed symptoms of dissolving, and a large section of the former viewed with distrust and even active hostility, what they regarded as the too democratic measures which Knox aimed at carrying out. But one inextinguishable boon was gained ere they parted, the universal establishment of parish schools.

The semi-republican constitution of the Church, which became more marked after the office of superintendent had been swept away, and the second book of discipline published (the latter event in 1578), created jealousy in the minds of regents and of sovereigns, and four or five generations of Stuart kings put forth long and determined efforts to transform Presbyterianism into Episcopal government. The project cost the lives and liberties of far more people than the short, sharp Reformation struggle had done, and ended at last in failure. The Revolution settlement of 1690, re-established Presbyterianism, and the General Assembly, which had been interrupted for nearly forty years, began again to sit and has done so annually from that time till now. Prior to the union with England in 1707, an Act of Security was passed, designed to preserve the Scotch national church from being overthrown by southern voters.

In 1712, an Act of Parliament re-introduced patronage which had been swept away. The operation of this enactment was one main cause of three secessions: that of the Secession, preceminently so called, in 1733; the Relief in 1752; and, the greatest of all, that which created the Free Church in 1843.

(2) *Present State:* The Church of Scotland claims about half the people as at least its nominal adherents. Besides the "General Assembly," it had in 1881 sixteen synods, eighty-four presbyteries, 1,500 churches including mission-rooms, and 1,660 ministers and probationers engaged in ministerial work. It has missions in India, Africa, and elsewhere. In 1874 the Patronage Act of 1712 was repealed, and each congregation now elects its own pastor. Its chief rivals in Scotland are the Free Church and the United Presbyterians, the latter resulting from a union of the old Secession and Relief Churches.

**church-goer, s.** One who attends church.

**church-government, s.** The regulation and ordering of spiritual matters, or those pertaining to the discipline and work of the Church.

Four leading views are at present entertained regarding church government. The first three agree that the rudiments of a scheme of church government are laid down in the New Testament. They differ, however, as to what that scheme, which the greater number believing it to be *episcopacy*, though one large minority are in favour of *presbyterianism*, and another in favour of *congregationalism*. (See these words.) The fourth view, which has not a large number of advocates, is that no scheme of government was laid down in the New Testament, applicable to all times and places, but that the church has the power of adapting its government to the special circumstances in which it finds itself at any particular time.

The relation in which a church stands to the state has also a practical influence on its government. [ROYAL SUPREMACY.]

**\* church-grith, \* chirochegriith, s.** [A.S. *cyricgrith.*] The right of sanctuary belonging to a church.

"He was war, withouten doute  
Of the fir in the chirochewawe."

*Sevyn Sages*, 2, 524.

**church-history, s.** The history of any Church, but especially of the Christian Church.

Church history naturally divides itself into four periods: (1) From the advent of Christ to the time of Constantine; (2) From Constantine to Muhammad (usually spelt Mohammed or Mahomet), or by the arrangement of Mosheim and others, to Charlemagne; (3) From Muhammad, or alternatively from Charlemagne to the Reformation; (4) From the Reformation to the present time.

**Period 1.** (From the advent of Jesus Christ, B.C. 4, to the Conversion to Christianity of the Emperor Constantine, A.D. 312, or to his establishment of that faith as the state religion, in or before A.D. 321.) This period may be naturally divided into three sub-periods, (1) The ministry of Jesus; (2) That of His apostles; and (3), That of the Christian fathers after the last of the apostles had died.

The first sub-period has been already treated of. [CHRIST.] Immediately after the ascension means were taken to fill up by election the vacancy left in the apostolic college by the apostasy and death of Judas (Acts i. 15-26). The descent of the Holy Spirit, which had been promised by Christ (John xiv. 16, 17, and xvi. 7-14, &c.), took place soon afterwards on the day of Pentecost, accompanied by the gift of tongues (Acts ii.), and then the apostles were qualified to go forth and carry into effect the Saviour's last charge to make disciples of all nations. Under the preaching of Peter and the other apostles, thousands were converted and baptised, and such a spirit of love prevailed among the converts that a Christian socialism sprang up, but ere long it produced an Ananias and Sapphira, and we hear of it no more (Acts iv. 32-37, v. 1-11).

The same jealousy which had prompted the

Jewish rulers to seek the death of our Lord, led to the persecution of His followers, and Stephen, stoned to death for alleged blasphemy, was the first of the great army of Christian martyrs. A scattering of the Christians took place, which resulted in the founding of other churches, the chief of which was at Antioch in Syria, where the disciples of Jesus for the first time received the name of Christians (Acts xi. 26.) [CHRISTIAN.]

Previous to this, Peter, moved by a vision, had begun to preach to the Gentiles (Acts xi. 1-18), and not long afterwards Saul of Tarsus, once a bitter persecutor of the Christians but now a convert, was sent out as colleague to Barnabas, on a missionary journey chiefly through Asia Minor, and ultimately became the splendidly successful apostle of the Gentiles (Acts xiii. 2, &c.). No complete coalescence ever took place between the Jewish and the Gentile elements in the early church. The Jews, with a few honourable exceptions, imbued with caste pride, attempted to impose a Judaic yoke on their Gentile brethren, and not ultimately succeeding, many of them in the second century withdrew from the church catholic, and formed the two sects of the Nazarenes and the Ebionites, the former of which retained, while the latter rejected, belief in the divinity of Christ. Whilst Jerusalem stood the unconverted Jews lost no opportunity of persecuting Christianity, but their influence was to a large extent swept away by the partial destruction of Jerusalem by Titus in 70 A.D., and its total destruction after the revolt of Barchochab in the second century. Before the first of these events had taken place, persecution on the part of the heathen Romans had begun, and it continued at intervals during the whole of the first period. The Roman persecutions are generally called ten; but if only those which were universal be reckoned, they were fewer than that number, while if those which were local be taken also into account, they were more. After the last and severest of these—called Diocletian's persecution, though its real instigator was his son-in-law Galerius—a convert of high rank, Constantine, was obtained, who became emperor in A.D. 312, and in 321 or earlier established Christianity as the State religion.

**Period 2.** (From the Conversion of Constantine or his establishment of Christianity as the state religion, to the rise of Muhammad.) Whilst all along there had been a general agreement as to Christian doctrine, the several tenets had not been exactly defined, but when controversy regarding any one of them arose, it was for the first time precisely stated. The question whether our Lord was equal with the Father, and truly and absolutely Divine, or whether, as Arius alleged, he was but the first of created beings, was settled by the Council of Nice in 325 in favour of the former view, and though a long struggle between the Trinitarians and the Arians took place, and though sometimes one and sometimes the other party prevailed, the church ultimately settled into belief in the Three-One God. [ARIANISM.] Other doctrines were settled by the decision of councils. (For these see COUNCIL.) The fall of the Western empire in the fifth century almost dissolved the civil power in Italy and elsewhere, but the church was equal to the crisis, and was ultimately enabled to convert the barbarous nations to the Christian faith. In those ages of political confusion and intellectual darkness, whilst as yet society was not fully reconstituted, primitive Christianity became considerably modified, and finally in 750 the worship of images was introduced into the church.

In A.D. 569 or 570 Muhammad was born, and when he sought for religious light, his mind revolted from the Arab and all other idolatry. He was opposed also to the doctrines of the Trinity, and of the Sonship of Christ, against which his religion may be considered as a reaction. [MUHAMMADANISM.] This second period may be made to end with the first preaching of Muhammad, about A.D. 611, or with the Muhammadan era—the Hegira, 15th July, 622,—preferably the former. Or it might be made to terminate with Charlemagne's donation to the Papacy, or with the separation between the Eastern and the Western Churches, for which see PERIOD 3.

**Period 3.** (From the rise of Muhammadanism to the Reformation under Luther, the latter event dating from A.D. 1517.) Whilst the Greeks, indolging their natural ability, took the lead in hair-splitting definitions of doctrine, the Imperial Romans were more practically en-

gaged in building up a world-embracing ecclesiastical power in lieu of the secular empire which they had lost, and from the seventh to the thirteenth century the growth of the Papacy was continuous. In 756 Pepin, having defeated Astolphus, King of the Lombards, compelled him to give to the church and the republic the exarchate of Ravenna and the Pentapolis. In 774 Charlemagne confirmed this cession and enlarged the territory given, thus laying the foundation of the Pope's temporal power. [PAPACY.] In the eighth century a schism took place between the Patriarchs of Constantinople and Rome, and the separation which still exists between the Eastern and Western Churches began. During the early part of this third period the Eastern Church was sorely trampled down by the Muhammadans, and during the twelfth and thirteenth centuries the Western one came into the conflict in hope of recovering the holy sepulchre, but the Christian success was only temporary. [CRUSADES.] During the fourteenth century the Papacy was declining, during the fifteenth it was attempting to put down evidently imminent revolt by cruel persecution, and in the sixteenth the crisis of its fate came.

**Period 4.** (From the commencement of the Reformation under Luther, A.D. 1517, to the present time.) For details see REFORMATION, PROTESTANTISM, ROMAN CATHOLICISM, &c. Suffice it here to say that the Reformation struggle continued in one form or other during nearly the whole of the sixteenth and seventeenth centuries. During the eighteenth all the churches which had been engaged in that arduous struggle slept, till rudely awakened by the French Revolution of 1789, while the nineteenth century has been mainly a reaction against the irreligion of that revolution and the cruelties of the reign of terror. The Bible and the Tract Societies, as well as the great religious missionary organisations, sprang into life while that revolution was working itself out, and have constituted this century to a certain extent an era of missions. [MISSIONS.]

2. *Pl. (Church-parties):* Parties existing within any church to which reference at the time is being made.

High Church, Low Church, and Broad Church: Three leading parties existing in the Church of England, as corresponding tendencies do in every Church of Christendom. The High Church party, holding the tenet that no religious body is a Church unless it has episcopal government, naturally hold aloof from Nonconformists. What may be called the extreme right of this party tend strongly towards the Church of Rome, adopting its vestments and its ceremonies, embracing its doctrines, and, in some cases, even entering its pale. The Low Church party, the most numerous of the three, agreeing in the main

fåte, fât, färe, amidst, whât, fáll, father; wë, wët, hère, camél, hër, there; pine, pít, síre, sír, marine; gô, pôt, or, wöre, wölf, wörk, whò, sön; müte, öüb, cüre, unite, cür, rüle, füll; trÿ, Sÿrian. æ, œ = ö. ey = ä. qu = kw.

in doctrine with the Nonconformists, and regarding government as of subordinate importance, more or less fraternal with dissenters, and are defenders with them of Protestantism. A third party, the *Broad Church*, aim at comprehending various forms of belief within the Established Church. The extreme members of this party consider that a Church is not really national unless it comprehend the professors of all beliefs held in the country. As a rule, they are themselves rationalistic in sentiment. This party, the smallest at present of the three, had the powerful advocacy of Dr. Arnold, and more recently of Dean Stanley, and of late has made surprising way.

1. *Ord. Lang.* : A vessel in which milk or cream is agitated or beaten in order to effect the separation of the serous parts from the rest; a vessel in which butter is made. Formerly the churn was an upright wooden vessel, in which the milk was agitated by a staff with a wooden disk at the lower end. Modern churns are generally circular, fitted with dashers inside. The milk is agitated by the revolution of the churn, or, in some cases, of the dashers.

"Her skward fist did ne'er employ the churn."  
*Gay: Pastorals.*

2. *Porcelain* : The block or chuck on a porcelain turner's lath, on which the thrown and baked articles are turned by thin iron tools to give truth and smoothness to circular articles.

**churn-dasher**, s. The moving agent in

SECTION OF CHURN.

a churn, rotary or reciprocating, by which the milk or cream is agitated.

**churn-drill**, s. A large drill used by miners. It is several feet long, and has a chisel-point at each end.

**churn-owl**, s.

*Ornith.* : A local name for a bird, the Night-jar or Goatsucker, *Caprimulgus europaeus*. The first element is prob. a corruption of *churr*, from the noise made by the bird.

**churn-power**, s. A motor for driving churns or churn-dashers to agitate the milk or cream.

**churn-staff**, \* **scharnestafe**, s.

1. *Ord. Lang.* : The staff or implement employed in the operation of churning by hand in an upright churn.

2. *Bot.* : A plant, *Euphorbia helioscopia*.

**chürn**, \* **cherne**, \* **chirne**, \* **chyrne** (Eng.), **kirn** (Scotch), v. t. & i. [A.S. *ceran* (Somner); O. Icel. *kirna*; Sw. *kärna*, *tjärna*; Dan. *kierne*; Dut. *kernen*; Ger. *kernen*.]

**A. Transitive** :

† 1. Generally :

(1) To agitate or shake violently; to champ, to chaw.

(2) To mix or work up together.

2. *Spec.* : To agitate milk or cream in a churn for the purpose of making butter.

**B. Intrans.** : To perform the operation of churning.

**chürned**, *pa. par.* & *a.* [CHURN.]

**chürn-íng**, *pr. par.*, *a.*, & *s.* [CHURN, v.]

**A. & B.** *As pr. par. & particip. adj.* : (See the verb.)

**C. As substantive** :

1. The act or process of agitating or beating

milk or cream in a churn for the purpose of making butter.

\* **The churning** of milk bringeth forth butter.—*Prov. xix. 13.*

2. The quantity of butter made at one operation.

\* **chür**, \* **churl**, \* **chirle**, v. i. [CHIRRE.] To coo, to murmur.

"The churth moor-cock woe his valentine,  
Courtin' coyly to his widdin' tread."  
*Davidson: Seasons, p. 2.*

**chür-rüs**, s. [Hindust. *chürüs*.]

*Comm.* : The resinous exudation of the leaves and flowers of Indian Hemp, *Cannabis indica* (q. v.). It is used by the natives of India as an intoxicating drug. According to Jaffur Shurreef, a man covers himself with a blanket and runs through a field of hemp early in the morning; the dew and gum of the plant naturally adhering to it are first scraped off and the blanket afterwards washed and wrung. Both products are boiled together and an electuary formed. The smoking of five grains of it will produce intoxication.

\* **chür-worm**, s. [A.S. *ceran* = to turn; and Eng. *worm*. (Bailey).]

*Entom.* : An insect that turns about nimbly; called also a fan-cricket; the mole-cricket (*Gryllotalpa vulgaris*). (As this insect is also called the "croaker," Bailey's etymology seems doubtful; cf. *churn-owl*.)

\* **chüse**, v. t. & i. [CHOOSE.]

**chüs-íte**, s. [Cl. Gr. *χῶς* (*chous*), contr. of *χῶος* (*choos*) = earth heaped up . . . alluvial earth, with suff. *-ite* (*Min.*) (q. v.).]

*Min.* : A variety of Olivine. Dana considers that it has been derived from chrysolite, the common variety of what he makes the same as Olivine. Chusite is from Limburg, to Brisgan. (*Dana, d. c.*)

**chüte**, s. [Fr. *chute* = a fall. The meaning of the def. appears to be confused with Eng. shoot (q. v.).]

*Mech.* : An inclined trough. On a moderate scale it forms a leader, or feeder, to machines. On a large scale it leads water from a penstock to a water-wheel, or an inclined plane down which logs are passed from a higher to a lower level. These are sometimes used in mountainous countries for land transport, and sometimes are the links of a slack-water system, as on the Ottawa; called slides.

**chüt-née**, **chüt-něy**, s. [Maharatta, & c. *chutnee*, *chutni*.]

*Cookery* : An acid and highly pungent seasoning, an Indian condiment generally composed partly of sweet fruits, as mangoes and raisins, with acids, such as lemon-juice and sour herbs, to which are added also spices and cayenne pepper.

**chýd-ör-ús**, s. [Etym. unknown.]

*Zool.* : A genus of Entomostraca, of the order Cladocera, and family Lynceidae. They are nearly apherical; beak very long and sharp, curved downwards and forwards; inferior antennae very short. (*Griff. & Henfrey*.) *Chydorus sphaericus* and *C. globosus* are British, the former common.

**chý-lá-geoús**, a. [Eng. *chyl(e)*; -aceous.] Pertaining to, or consisting of, chyle (q. v.).

"When the spirits of the chyle have half fermented the *chylaceous* mass, it has the state of drink not ripened by fermentation."—*Playfer: On the Ferments.*

**chý-lá-qué-ús**, a. [Eng. *chyl(e)*, and *aqueous*.] Consisting of, or containing, chyle much diluted with water: said of a liquid which forms the circulating fluid of some inferior animals. (*Carpenter & Webster*.)

**chylaqueous canal**, s. *pl.*

*Zool.* : A canal system designed for the reception of the Chylaqueous fluid (q. v.).

**chylaqueous fluid**, s.

*Zool.* : A fluid consisting, as its name imports, partly of water and partly of chyle. The former derived from the exterior, and the latter a product of digestion. It is found in the body cavity of many invertebrate animals, such as Annelida, Echinoderms, and Rotifers. (*Nicholson*.)

\* **chýld**, s. & v. [CHILD.]

\* **chýld-íng**, *pr. par.* & *a.* [CHILDING.]

**chyle**, \* **chý-lüs**, s. [Fr. *chyle*; Mod. Lat. *chylus*; Gr. *χυλός* (*chulos*) = juice; *χεῖν* (*chein*) = to pour out.]

*Anat.* : The fluid of the lacteal vessels; lymph, coloured by a finely granular matter, named by Mr. Gulliver the molecular base. From the presence of fibrine in a fluid form, as in the blood, chyle coagulates into a jelly shortly after being withdrawn from its appropriate vessel. There are in chyle, as in lymph, many small globular bodies called capcicles. Chyle also has in it more albumen than lymph possesses. It is very rich in alkalies combined partly with albumin, partly with lactic and sebatic acids; the chlorides of sodium and potassium occur in large quantity. It differs from blood by the want of red particles, as also by possessing a smaller proportion of albumen and fibrine. (*Todd & Bowman: Phys. Anatomy, vol. ii. (1856), pp. 269-280.*)

"Chylus in the stomach . . ."—*Bacon: Nat. Hist., cent. ix. § 87. (French.)*

**chý-lí-fác-tion**, s. [Eng. *chyle*; Lat. *chylus*, and Eng. *factio*, Lat. *facio* = to make.]

*Physiol.* : The act or process of the formation of chyle in animal bodies from food.

"Drinking excessively during the time of *chylifac-tion*, stops perspiration."—*Arbuthnot: On Aliment.*

**chý-lí-fác-tive**, a. [Eng. *chyle*, and *factive* (q. v.).] Having the power or property of forming chyle; chylifactory.

"Whether this be not effected by some way of corrosion, rather than any proper digestion, *chylifac-tion*, or alimental conversion."—*Brown: Vulgar Errata.*

**chý-lí-fác-tör-y**, \* **chí-lí-fác-tör-y**, a. [Eng. *chyle*; Lat. *facio* = to make; Eng. suff. *-ory*.] The same as CHYLIFACTIVE (q. v.).

"We should rather rely upon a *chylifactory* menstruum, or digestive preparation drawn from species or individuals, whose stomachs peculiarly dissolve lapidaceous bodies."—*Sir T. Brown: Vulgar Errata.*

**chý-lif-ër-ús**, a. [Mod. Fr. *chylifère*; Lat. *chylus*; Gr. *χυλός* (*chulos*), and Lat. *fero* = to bear, to produce.] Forming or producing chyle; changing into chyle; chylific.

"Purges clear and empty the lower part of the *chyliferous* tubes."—*Chemie: Essay on Respiration, p. 6.*

**chyliferous vessels**, s. *pl.* Vessels bearing chyle, that is, constructed to afford passage of chyle.

"The *chyliferous vessels* probably have the same office for the intestinal tissues as the lymphatics in other parts."—*Todd & Bowman: Phys. Anat., vol. ii. (1856), p. 288.*

**chý-lif-íc**, a. [Eng. *chyle*; Lat. *chylus*, and *facio* = to make.] Chylifactive. The term is applied to one of the stomachs when a plurality of them exist, as, for instance, in insects.

**chý-lif-í-cá-tion**, \* **chí-lif-í-cá-tion**, s. [Eng. *chyle*; Lat. *chylus* = chyle, and *facio* = to make.] Chylification; the act or process of making chyle.

"Nor will we affirm that iron is indicated in the stomach of the ostrich; but we suspect this effect to proceed from any liquid reduction, or tendency to *chylification*, by the power of natural heat."—*Brown: Vulgar Errata.*

**chý-lif-í-cá-tör-y**, **chí-lí-fác-tör-y**, a. [Eng. *chyle*; Lat. *chylus*, and *facio* = to make.] Chylifactive, chylific. (*Walker*.)

chym-ō-car-pūs, s. [Gr. χυμός (chymos) = juice, and καρπός (karpos) = fruit.]

Bot.: A genus of acandent herbs belonging to the Tropealaceae. The sessile three-lobed, three-celled ovary grows into a three-lobed, sweet, fleshy, edible berry, which remains attached to the front of the persistent calyx. This black juice berry, which is not unlike, in appearance and flavour, to the Zante or currant grape, is the most remarkable peculiarity of the genus, which was founded on Chymocarpus pentaphyllus. (Treas. of Bot.)

chym-ous, a. [Eng. chym(e); suff. -ous.] Pertaining to, or of the nature of, chyme.

chib-ār-i-ous, a. [Lat. cibarius = pertaining to food; cibus = food.] Pertaining to or useful for food, edible.

\* chib-ation, s. [Fr. cibation, from Lat. cibus = food.]

Phya.: A term for the taking of food; also an alchemical term of various signification having reference to that act.

chib-bōls, chib-ōl, \*chib-oule, s. [Fr. ciboule; Sp. cebolla, from Low Lat. cepula, cepola, dim. of cepa, ceppe = an onion.] A small variety of onion, Allium Ascalonicum.

"Ciboules, or scallions, are a kind of degenerate onloux."—Mortimer.

chib-ōr-i-um, s. [Lat. ciborium; Gr. κισβόριον (kibōrion) = a drinking-cup made of the seed-vessel of the Egyptian bean. In Low Lat. also an arched chamber supported by four columns. In Ital. ciborio; Fr. ciborre; Sp. ciborio.]

1. Arch.: An insulated erection open on each side, with arches, and having a dome of ogee form, like the bowl of a reversed cup, carried or supported by four columns, the whole covering the altar. It is now called a baldachino (q.v.). The earliest known instance of a ciborium appears to have been one in the church of St. George at Thessalonica, supposed to have been in use about A.D. 325. (Gwilt.)

2. Eccles.: The vessel in which the small hosts are consecrated at mass. From this vessel they are administered to communicants, and in it those remaining are preserved in the tabernacle.

3. Conch.: The glossy impression on the inside of valves, to which the muscles of the animals have been attached.

chib-ō-ti-um, s. [Gr. κισβόριον (kibōrion) = a little chest, from the form of the indium.]

Botany:

1. A genus of Polypodiaceous ferns. [AONUS SCYTHICUS, BAROMETZ.]

2. A noble tree-fern from New Holland. (McNicoll.)

\* cib-bur, \*chy-bur, s. [Arab.]

Chem.: An old term for sulphur.

chic-a-dā, s. [Lat. cicada; Fr. cigale; Ital. cigala.] [CICALA.]

Entom.: A genus of Homopterous insects, tribe Cicadariae, sub-tribe Stridulantia, or it may be made a family Cicadidae. They have three ocelli or simple eyes, with the short antennae in front. The tarsi are three-jointed. The male has a drum or musical apparatus placed in a cavity on each side of the abdomen, and concealed by scale-like plates. A muscle pulls the drum in and again lets it out with the effect of producing a sharp continuous sound. These insects are familiar in the south of Europe, in India, in Bermuda, the West Indies, the warmer parts of America, &c. The Greeks, who considered the cicadas happy in having "voiceless wives," called the animal τέτραξ (tettix). The observation that the female cicadas do not emit the sharp continuous sound described is accurate. The Grasshopper and Cicada, though popularly believed the same, are not even of the same order. The former belongs to the Orthoptera, the latter to the Homoptera. The former possesses mandibles, while the latter has a suctorial apparatus instead. The antennae of the former are very long, and those of the latter very short. The former emits its "voice" by night, the latter in the brightest sunshine. Many other differences between the two exist. Cicada hematodes, like the rest of the genus a large insect, occurs in the New Forest, in Hampshire. An American species of Cicada, C. Septendecim, appears only once in seventeen years, hence it is popularly known as the seventeen-year locust. It is no more akin to the locust than to the grasshopper.

chic-a-dār-i-a, chic-a-dār-i-æ, s.pl. [From Lat. cicada, and the neut. or the fem. pl. of Lat. suff. -arius.]

Entom.: A tribe of the sub-order Homoptera. The tarsi are three-jointed, the antennae minute, and usually terminated by a bristle, and the wings with many nervures or cells. It contains the families Cercopidae or Cicadellina, Membracidae or Membracina, Fulgoridae, and Cicadidae (q.v.).

chic-a-dēl-lā, chic-a-dēl-lī-nā, s. pl. [A dimia. formation from Lat. cicada = a grasshopper.]

Entom.: A family of Homopterous insects, better called Cercopidae (q.v.). The name was given because they resemble typical Cicadas, but are much smaller.

chic-cād-i-dōe, a. pl. [From Lat. cicada (q.v.), and fein. pl. adj. suff. -idae.]

Entom.: The family of insects of which the cicada is the type. The species, which are large insects with broad heads and breasts, are from the warmer parts of the world. Swainson made the family comprehensive enough to include the frog-hoppers as well as the cicadas proper, but the former are now made a separate family, Cercopidae (q.v.).

\* chic-cā-lā, s. [Ital. cigala.] [CICADA.] Either a cicada or a grasshopper.

"At eve a dry cicada sung."—Tennyson: Mariana in the South.

chic-cāt-ri-cle, chic-cāt-ri-cule, \*chic-a-tric-i-lā, s. [Fr. cicatrice, from Lat. cicatrūla, dimia. of cicatrix = a scar.]

1. Biol.: The germinating or fetal point in the embryo of a seed, or the yolk of an egg.

2. Botany:

(1) The scar of a fallen leaf.

(2) The hilum (q.v.).

chic-cāt-ri-cōse, a. [From Lat. cicatrix (genit. cicatrix) (q.v.), and Eng. suff. -ose.]

Bot.: Marked with scars, cicatrinate.

\* chic-a-trine, a. [Lat. cicatrix, and Eng. suff. -ine.] Scarring, wounding.

"Thy also cicatrize tongue."—Dekker: Batromastix.

chic-cāt-ri-sāte, a. [From Lat. cicatrix (genit. cicatrix) (q.v.), and Eng. suff. -ate.]

Bot.: The same as CICATRICOSE (q.v.).

chic-a-tri-sive, a. [Lat. cicatrix (genit. cicatrix) = a scar.] Proper or useful to induce a cicatrix.

chic-a-trix, chic-a-trice (pl. chic-a-tric-eg), s. [Lat. cicatrix (genit. cicatrix) = a scar.]

1. Ord. Lang. & Med.:

(1) A scar or mark remaining after a wound.

(2) Any mark or impression resembling the scar of a wound.

"Lean out upon a rush, The cicatrice and capable Impression Thy palm some moments keeps."—Shakspeare: As You Like It, III. 5.

2. Bot.: A scar formed by the separation of one part from another.

chic-a-triz-ant, a. & s. [Fr. cicatrissant, pr. par. of cicatriser = to scar; Lat. cicatrix = a scar.]

A. As adj.: Healing or tending to heal a wound, or to induce a cicatrix.

B. As substantive:

Med.: Any medicine or preparation proper or useful to induce a cicatrix, or heal a wound.

† chic-a-triz-ā-tion, s. [Eng. cicatrix, and suff. -ation.]

1. The act or process of inducing a cicatrix, or healing a wound.

"A vein bursted, or corroded, in the lungs, is looked upon to be for the most part incurable, because of the mucus and pouging of the lungs tearing the gap wider, and hindering the conglutination and cicatrization of the vein."—Harvey.

2. The state of being cicatrised.

"The first stage of healing, or the discharge of matter, is called digestion; the second, or the filling up with flesh, incarnation; and the last, or skinning over, cicatrization."—Sharpe: Surgery.

chic-a-trize, v.t. & i. [Fr. cicatriser, from Lat. cicatrix = a scar.]

I. Transitive:

1. To apply or administer medicines or preparations calculated to induce a cicatrix.

2. To heal or induce the skin over a wound.

"We incarned, and in a few days cicatrized it with a smooth cicatrix."—Wiseman: On Tumours.

II. Intrans.: To be healed or cicatrized, to become covered with skin.

chic-a-trized, pa. par. or a. [CICATRIZE.]

chic-a-triz-ing, pr. par., a., & s. [CICATRIZING.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of healing a wound by inducing a cicatrix; the state of becoming cicatrized.

"... the cicatrizing of those being for the most part the work of the surgeon."—Wiseman.

2. An American name for *Osmorrhiza*, a genus of Umbellifera.

*Wild cicely* : *Anthriscus sylvestris*.

**ci-cēn-ā-dī-a**, s. [Etyim. doubtful. Hooker and Arnott suggest Gr. *κίκιννος* (*kikinnos*) = a curled lock, a ringlet, on account of the slender entangled stems and branches.]

Bot. : A genus of plants, order Gentianeæ, sub-order Gentianeæ. It consists of small annual branched herbs. Two are British, *Cicendia filiformis*, which has yellow flowers, and *C. pusilla*, which has pink flowers. Both are somewhat rare in Britain. *C. filiformis* is by some botanists called *Exacum filiforme*.

**ci-cēr**, s. [Lat. *cicer* = a chick-pea. Possibly the Roman family of Cicero, which produced the world-renowned orator, derived their name from *cicer*, either, as Plutarch says, because one of the family had a flat excrescence like a chick-pea on his nose, or, as Pliny asserts, because the first of the name successfully cultivated vetches.]

Bot. : A genus of Leguminous plants, sub-order Papilionaceæ, tribe Viciæ. *Cicer arietinum*, the Chick-pea, is a native of Egypt and the Levant. It is cultivated in the south of Europe, in India, and elsewhere. It bears pale solitary violet flowers. A field in full bloom, and glistening with dew, is a beautiful spectacle, but an acid which it contains destroys the boot-leather of anyone who, walking over it, treads it down. Anglo-Indians call the seeds, gram. They are used in India for feeding horses.

**ci-cēr-ō-nē** (or as **ci-chēr-ēr-ō-nē**), s. [Lat. *Cicero*, the Roman orator; so called from the talkativeness of guides.] A guide; one who explains the curiosities and interesting features of a place to strangers.

"He had not proceeded many steps from the monument before he beckoned to our *cicerone*."—Shenstone.

**ci-cēr-ō-nī-an**, a. & s. [From Cicero.]

A. As adj. : Resembling the style of Cicero; noting an easy flowing style.

**ci-ch-līng**, s. [CHICKLING.]

**ci-ch-ōr-ā-çē-sa**, s. pl. [Lat. *cichorium*; Gr. *κικχόριον* (*kikchōrion*), *κικχόρι* (*kichōri*) = succory, chicory; Lat. fem. pl. adj. suff. -accæ.]

Bot. : A sub-order of Composite plants, distinguished by their corollas being slit. The name was given by Jussieu. Lindley, following Decandolle, called it Ligulifloræ in his *Vegetable Kingdom*, though in his *Natural System of Botany* he had retained the name Cichoraceæ. The corolla, as stated before, is ligulate, or strap-shaped; the seeds, which are erect, have no albumen, and the stem has milky juice. [CICHORIUM, LIGULIFLORÆ.]

**ci-ch-ōr-ā-çē-ōūs**, a. [Lat. *cichor(ium)*; -accous.] Of the nature of or possessing the qualities and properties of chicory or succory.

"Diatreksa evacuat the salt serum; as all acid diuretica, and the testaceous and bitter *cichoraceous* plants."—Floyer.

**ci-ch-ōr-ī-ūm**, s. [Fr. *cichorie*. Name written *κικχόριον* (*kichōreion*), according to Pliny, of Egyptian origin.]

Bot. : Succory or chicory, a genus of Composite plants. *Cichorium Intybus*, distinguished by having the lower leaves runcinate and the heads usually in pairs, is a British plant, the origin of the cultivated chicory. It is found wild also on the Continent of Europe, in North Africa, in Siberia, and the North-west of India. The roots are boiled and eaten, or they are dried and used as coffee. (Dr. Joseph Hooker, &c.) *C. Endivia* is the common Endive. It is extensively cultivated in Europe, into which it was introduced from its native country India, in many parts of which it is called *Kasnee*. Properly speaking, Succory consists of the blanched leaves of *Cichorium Intybus* and Endive those of *C. Endivia*. *C. Endivia*, or Endive, is a wholesome salad, possessing bitter and anodyne qualities.

**ci-cin-dē-la**, s. [Lat. *cicindela* = a glow-worm, from *candela* = a candle. This is not the *cicindela* of modern entomologists. See def.]

Entom. : A genus of Coleopteran insects, the typical one of the family Cicindelidæ. They have very prominent eyes. They are of predatory habits, and are sometimes called Tiger-beetles. They are the most highly organized of all the Coleoptera. They can fly as well as run, and all their movements are agile. They are remarkable for the beauty of

CICINDELA.

their colours. Four species are British. The best known is *Cicindela campestris*, which is above half an inch in length, the anterior and posterior margins of the thorax, the basal joints of the antennæ of a rich copper colour, the rest of the thorax green, the elytra green, each with six cream-coloured spots; the under side of the body glossy bluish-green. It is common near London. The larvæ may be found in cylindrical burrows from six inches to a foot in depth, at the mouth of which they lurk for their prey, and the perfect insect in sandy spots during the summer months.

**ci-cin-dē-lī-dæ**, s. pl. [Lat. *cicindela*, and fem. pl. suff. -idæ.]

Entom. : A family of carnivorous Coleoptera, section Adephaga, sub-section Geodephaga. Only one genus, Cicindela, is British.

**ci-cin-ōb-ūl-ūs**, s. & a. [Gr. *κικίννος* (*kikinnos*) = a curled lock, a ringlet, and *ὀβάλος* (*obalos*) = an old Greek coin worth about three half-pence.] [OBOLUS.]

2. A cloak or garment made of such material.

**ci-cō-nī-a** (Lat.), **ci-con-ic**, **cy-con-ye** (Eng.), s. [Lat. *ciconia* = a stork.] [STORK.]

Ornithology :

1. A stork, a member of the family *Ciconiæ*.

"The somer foul that is clepid *cyconye*."—*Wycliffe*: *Jeremias* vii. 7.

2. A genus of Wading Birds, the typical one of the sub-family *Ciconiina*. It belongs to the family *Ardeidæ* (Herons). The species

have long conical bills, long red legs, with the three toes, which point forward, united by a membrane as far as the first joint, the hinder toe on the same level. The wings are of moderate length, the third, fourth, and fifth quills largest, the second a little shorter, and the first a little shorter still. There are two British species, *Ciconia alba*, the White Stork, and *C. nigra*, the Black Stork. [STORK.]

¶ *Wild cicory* : *Cichorium Intybus*.

**ci-cō-rā-te**, v.t. [Lat. *cicurutus*, ps. par. of *cicuro* = to tame; *cicur* = tame, gentle.] To tame, to soften the character of.

**ci-cō-rā-tion**, s. [CICURATE.] The act of taming or softening in character.

"This holds not only in domestic and mansoet birds, for then it might be the effect of *cicuration* or institution; but in the wild."—Ray: *On the Creation*.

**ci-cū-ta** (Lat.), **ci-cute** (Eng.), s. [Lat. *cicuta* = the hemlock given as poison; Sp. *Port.*, & Ital. *cicuta*; Prov. *ciguda*; Fr. *ciguë*.]

1. Bot. : The Water-hemlock, or Cowbane. A genus of plants, order Umbellifera. It has compound umbels with many rays; few or no bracts, but many small bracteoles. The

fate, fat, färe, amidst, whät, fällt, father; wä, wët, hère, camel, hër, thère; pine, pit, sire, sir, marine; gö, pöt, er, wöre, wöf, wörk, whô, sön; müte, cüb, cüre, unte, oür, räle, fällt; trÿ, Sÿrian. æ, œ = ö; øy = ä. qu = kw

flowers are white, the fruit orbicular, or broadly ovoid, with solitary vittae in the interstices of the ridges. The leaves are pinnate or decomposed. *Cicuta virosa*, which has doubly serrate lanceolate leaflets, is a tall plant of three or four feet high, found, though not very commonly, in England and the lowlands of Scotland by roadsides or the margins of lakes. It is a deadly poison. It may be the *κικύων* (*kikyonion*) (Hemlock) of the Greeks, which Socrates and others condemned to death were required to drink. An analogous species, *C. maculata*, found in America, is equally deadly.

2. The name for a shepherd's pipe made of the hollow stalks of hemlock. (*Buchanan.*)

**cicū-tine, s.** [Lat. *cicuta*, and Eng. suff. *-ine* (Chem.).]

Chem.: An alkaloid supposed to exist in Water-hemlock, *Cicuta virosa*.

**cid, s.** [Arab. *sedid* = lord.]

1. An Arabian name for a chief or commander; applied specially in Spanish literature to Ruy Diaz, Count of Bivar, the celebrated champion of Christianity in the eleventh century.

"The helmet was down o'er the face of the dead,  
But his steed went proud, by a warrior led,  
For he knew that the *Cid* was there."  
*Hemans: The Cid's Funeral Procession.*

2. The name of a Spanish epic poem, celebrating the exploits of Ruy Diaz.

**cid-dār'-ī-dāo, s. pl.** [From Lat. *cidaris* (q. v.), and fem. pl. adj. suff. *-īdāo*.]

Zool.: A family of Echinodermata; the body is subglobular, and covered with long, club-shaped spines.

**cid-ar-is, s.** [Lat., a turban or mitre; Gr. *κίδαρις* (*kídaris*), *κίταρις* (*kítaris*) = a cap of state worn by the Persian kings; Heb. קֶתֶר (*kether*) = a Persian diadem, Esther i. 11, ii. 17, vi. 8; קֶתֶר (*kathar*) = to surround.]

1. *Jew. Antiq.*: A name given to the mitre of the Jewish high-priests.

2. *Zoology*:  
(1) A genus of Echini of hemispherical form, so called from their supposed resemblance to this cap of state. *Cidaris papillata*, a British species, occurring off the coasts of Shetland, is called the Piper-urchin, because the body presents a rude resemblance to a diminutive bagpipe.  
(2) A genus of the Seneclinae or Snake-shells. They are pearly, turbinate, generally smooth, with a round, not oblique aperture.

3. *Palæont.*: *Cidaris* ranges from the Trias to recent times.

**cid-ar-ite, s.** [Eng. *cidaris* (q. v.), and suff. *-ite*.]

*Palæont.*: A fossil specimen of the genus *Cidaris*; a fossil resembling *Cidaris*. The genus *Cidaris* occurs in the secondary strata. *C. florigemma* is a characteristic fossil of the Coral rag.

**qi-dēr, \*cy-dor, \*cy-ser, \*sy-dir, \*ei-dir, s. & a.** [Lat. *sicera*; Gr. *σίκερα* (*síkera*), from Heb. שִׂקָר (*shikar*) = strong drink; Fr. *cidre*; Sp. *sidra*; Port. *cidra*.]

**A. As substantive**:  
\*1. Strong drink; liquor made of the juice of any fruit pressed.  
"He schal sot drynke wyn and sydr."—*Wycliffe: Luke i. 16.*

\*2. A kind of cider made of a fruit of that country. . . —*Bacon.*  
2. A liquor made from the juice of apples expressed and fermented.

"A tank of cider from his father's vats  
Prime, which I knew; and so we sat out eat."  
*Tennyson: Audley Court.*  
To make good cider the apples should be quite ripe, as the amount of sugar in ripe apples is 11.0, in unripe apples 4.9, in over-ripe apples 7.95. The fermentation should proceed slowly. The strongest cider contains, in 100 volumes, 9.87 volumes of alcohol of 92 per cent., the weakest 5.21 volumes. (*Brande.*)

**B. As adj.**: Productive of cider; producing cider.

"Worcester, the queen of the *cider* land, had but eight thousand."—*Macaulay: Hist. Eng.*, ch. 111.

**cider-brandy, s.** A kind of brandy distilled from cider.

**\*cider-mill, s.** A mill in which apples are ground into pulp for the purpose of making cider.

**cider-press, s.** A press in which the juice is expressed from the apples after they have been ground into pulp.

**cider-tree, s.** *Eucalyptus Gunnii*, from the sap of which a kind of cider is prepared.

**cid-ēr-āge, s.** [Etyim. doubtful.] The N.E.D. suggests that it may be a misprint for *culerage* (q. v.).

**Bot.**: A plant, *Polygonum Hydropiper*.

**\*ci-dēr-ist, s.** [Eng. *cider*; *-ist*.] One who makes cider.

"When the *ciderists* have taken care for the best fruit, and ordered them after the best manner they could, yet hath their *cider* generally proved pale, sharp, and ill tasted."—*Mortimer.*

**†ci-dēr-kin, s.** [Eng. *cider*; dimin. suff. *-kin* (q. v.).] An inferior kind of cider made by adding water to the crushed mass of apples remaining after the juice has been pressed out in the manufacture of cider.

**ci-devant** (pron. *cē-dēv-on*), *a.* [Fr. = hitherto, formerly; from Lat. *hinc* = here, and *de ab ante* = down or from before.] Former, previous.

**\*ciel-ling, s.** [CEILING.]

**\*ci-ēr'ge, \*cerge, \*serge, s.** [Fr., from Lat. *ceruus* = waxen, *cera* = wax.] A wax candle used in the worship of the Roman Catholic Church.  
"That berry in heaven her *clergis* clere."  
*The Romances of the Rose*, 6250.

**\*cietezour, s.** [CITY.] A citizen.

"The *clercouris* of Teruana in Flanders (to whom their ancestors first came) sycht desyrus to recover their lyberte, refusit nocht their offeris."—*Beilend. Cron.*, fo. 30. b.

**ci-gar, \*se-gar, s. & a.** [Fr. *cigare*; Sp. *cigarro*; originally a kind of tobacco in the island of Cuba.] A small, cylindrical roll of tobacco for smoking.

"The fermented leaves being next stripped of their middle ribs by the hands of children, are sorted anew, and the large ones are set apart for making cigars."—*Ure: Dict. of Arts*, &c.

Obvious compounds: *Cigar-box, cigar-holder, &c.*

**cigar-bundler, s.** A machine for placing cigars in bundles that they may be tied together. It consists of a clamping-press having jaws of such shape and capacity as the size of the cigar and the number desired in a bundle may warrant.

**cigar-lighter, s.** A device for lighting cigars. It consists of a little gas-jet suspended by an elastic tube.

**cigar-machine, s.** A machine for making fillers of cigars and wrapping them.

**cigar-press, s.** A press having a motion in two directions, one to compress the cigars in their rows, and the other to press them vertically.

**cigar-steamer, s.** A peculiar form of craft, shaped like a spindle, and constructed by Winans, of Baltimore. The first was built in Baltimore—length 635 feet, diameter 16 feet; the second in St. Petersburg—length 70 feet, diameter 9 feet; the third in Havre—length 72 feet, diameter 9 feet; the fourth in Isle of Dogs—length 256 feet, diameter 16 feet. The propeller of the first was placed around the middle of the vessel; the second had a propeller beneath her bottom; the third is fitted for trying propellers in various positions; and the fourth has a propeller at each end. (*Knight.*)

**ci-gar-ēt-te, s.** [A dimin. of Fr. *cigare*.] A small cigar; more generally, a small quantity of fine tobacco rolled in paper and used for smoking.

"We shall celebrate our reconciliation in a *cigarette*."  
—*Black: Princess of Thule*, ch. 1.

**cigarette-filler, s.** A little implement for introducing the finely-cut tobacco into the paper envelope. It has two forms: a tube and a wrapper. (*Knight.*)

**cigarette-machine, s.** A machine used in the production of cigarettes. Adorno's cigarette-machine uses an endless roll of paper. It cuts, wraps, and folds the paper around a regulated quantity of tobacco, which is supplied

at one end of the machine, while the finished cigarettes emerge at the other end. (*Knight.*)

**\*cild, s.** [A.S.] [CHILD.]

**ci-l-ēr-ŷ, s.** [CELONER.]

*Arch.*: The drapery or foliage carved on the heads of columns, in Moorish or Spanish architecture.

**ci-l-ŷ, s. pl.** [Lat. nom. pl. of *cilium* = an eyelash.]

1. *Anat.*: Hair-like processes of extreme delicacy of structure and minuteness of size. They are from  $\frac{1}{100}$  of an inch in length. They are arranged in rows, and are affixed by their bases to the epithelium which covers the surface on which they play.

2. *Bot.*: Long hairs, like eyelashes, situated upon the margins of leaves, &c.

"Isolated cells, as spores of sea-weed, occasionally have free filaments, or *cilia*, developed on their surface."—*Balfour: Botany*, pt. 1, § 7.

3. *Zool.*: Hair-like filaments, which project from animal membranes, and are endowed with quick vibratile motion, as in the Infusoria, sponges, and polyzoa.

**ci-l-i-ar-ŷ, a.** [Fr. *ciliatre*, from Lat. *cilium* = an eyelash.]

1. *Anat.*: Belonging to the eyelashes.  
2. *Zool. & Bot.*: Pertaining to the cilia in plants and animals.

**ciliary arteries, s. pl.**

*Anat.*: The arteries supplying various parts of the eye with blood. They are divisible into three sets, the short, the long, and the anterior ciliary arteries. (*Quain.*)

**ciliary ganglion, s.** The same as the ophthalmic or lenticular ganglion. (*Quain.*)

**ciliary ligament, s.**

*Anat.*: The circular portion dividing the choroid membrane from the iris, and adhering to the sclerotic coat. [*CHOROID.*]

**ciliary motion, s.** A motion of cilia or any part of any organism possessing them. In animals they move like a field of grain agitated by the wind. Ciliary motion exists in man in various parts, as for instance on the mucous membrane of the nasal cavities on the inner surface of the lacrymal sac and canal, on the membrane of the larynx, trachea, and bronchial tubes. (*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. 2, p. 64.)

"The terms vibratory motion and *ciliary motion* have been employed to express the appearance produced by the moving cilia; the latter is here preferred, but it is used to express the whole phenomenon, as well as the mere motion of the cilia."—*Dr. Sharpe, in Todd's Cyclopaedia of Anat. and Physiol.*

**ciliary muscle, s.**

*Anat.*: A muscle attached to the choroid of the eye.

**ciliary nerves, s. pl.**

*Anat.*: Two or three nerves situated at the inner side of the optic nerve. Their full appellation is *Long ciliary nerves*. (*Quain.*)

**ciliary processes, s. pl.**

*Anat.*: White folds at the margin of the uvea in the eye, and proceeding from it to the crystalline lens.

"The *ciliary processes*, or rather the ligaments, observed in the inside of the sclerotic tunic of the eye, do serve instead of a muscle, by the contraction, to alter the figure of the eye."—*Ray: On the Creation.*

**ciliary zone, s.**

*Anat.*: A term for the appearance which the pigment between the ciliary processes leaves on the hyaloid membrane, like the disc of a flower; also called *Corona ciliaris*.

**ci-l-ā-ta, s. pl.** [Lat. *cili(um)* = an eyelash, and neut. pl. adj. suff. *-ata*.]

*Zool.*: An order of Infusoria, having the body more or less completely clothed with cilia. These cilia are vibratile, and are used for locomotion or obtaining food. Genera, *Vorticella*, *Vaginicola*, &c.

**ci-l-ŷ-tō, ci-l-ŷ-tōd, a.** [Lat. *cili(um)* = an eyelash, and Eng. suff. *-ate, -ated*.] Furnished with cilia or fine hair. Used—

- 1. Bot. : Of a leaf with parallel filaments or bristles, resembling fine hairs.
- 2. Anat. : Of a surface covered with filaments.

"But a ciliated surface is not effected at all in its movements."—*Todd & Bowman: Physiol. Anat.*, vol. I, ch. II, p. 8.

- 3. Zool. : Provided with vibratile cilia.

**cil-i-ā-tion**, s. [As if from Lat. *ciliatio*.]

- 1. Ciliated state or condition.
- 2. The ciliary apparatus of any organism.

**cil-i-ā-tō**, in compos. [Mod. Lat. *ciliat(us)*, with o connective.] Having cilia.

- ciliato-dentate**, a.
- Bot. : Having teeth, and those ciliated.
- ciliato-serrate**, a.
- Bot. : Having serrations, each of which terminates in a hair.

\* **cil'-īce**, s. [Fr. *cilice*; Lat. *cilicium*, from Gr. κιλίκιον (*kilikion*) = coarse cloth, orig. of Cilician goats' hair.] A rough garment worn next the skin as a penance; a hair shirt.

"We have heard so much of monks . . . with their shaven crowns, hair cilices, and vows of poverty."—*Garidge: Past and Present*, bk. II, c. I.

\* **cil-ī'-cī-ōis**, a. [Eng. *cilice*.] Made of goats' hair.

"A coarse garment, a cilicious or sackcloth habit."—*Brown: Vulgar Errors*, bk. v., ch. xv.

**cil-i-ēl'-la**, s. [Lat. *cilia* = fine hair, and dimin. suff. *-ella*.]

Entom. : A fringe. (McNicol.)

**cil-i-ī-form**, a. [Lat. *cilia* = fine hair, and *forma* = form.] Having the form of cilia, very fine or slender. Especially applied to the teeth of certain fishes, as of the perch, when very numerous and all equally fine.

\* **cil-i-ō-brāch-i-ā-ta**, s. pl. [Lat. *cilia* = eyelashes, and *brachia*, pl. of *brachium* = having branches like arms.]

Zool. : Owen's name for the Polyzoa (q.v.).

\* **cil-i-ō-brāch-i-ate**, a. [Lat. *cilia* = fine hair; *brachium* = the arm, and Eng. adj. suff. *-ate*.]

Physiol. : Having the arms furnished with cilia, as in Polyzoa.

**cil-i-ō-flāg-ēl-lā-ta**, s. pl. [Mod. Lat. from *cilium* and *flagellum* (both which see).]

Zool. : A group of free-swimming Infusorians, moving by means of lash-like flagella, and having a more or less complete ciliation.

**cil-i-ō-flāg-ēl-late**, a. [CILIOFLAGELLATA.] Belonging to the Cilioflagellata.

**cil-i-ō-grā-da**, **cil-i-ō-grā-dī**, s. pl. [CILIOGRADE.]

Zool. : The name given by De Blainville to the Ctenophora (q.v.).

**cil-i-ō-grāde**, a. & s. [Fr. *ciligrade*, from Lat. *cilia* = fine hair, and *gradior* = to step.]

- A. As adj. : Belonging to the Ctenophora.
- B. As subst. : An animal belonging to the Ctenophora (q.v.).

**cil-i-ūm**, s. [The sing. of *cilia* (q.v).]

**cill**, s. [SILL.]

Arch. : The timber or stone at the foot of a door, &c.

¶ *Ground-cills* are the timbers on the ground which support the posts and superstructure of a timber building. The name of *cill* is also given to the bottom pieces which support quarter and truss partitions. (Gwill.)

\* **cil-i-būb**, s. [SILLABUR.]

**cil-lō**, **cil-lō'-sis**, s. [Lat. *cilium* = an eyelash, and suff. *-osis* (Med.).]

Med. : A spasmodic trembling of the upper eyelid.

**cil-lōt-īo**, a. [Eng. *cillo*; *t* connect., and suff. *-īo*.] Pertaining to, or affected with, cillo (q.v.).

**cills**, s. pl. [CILL.] A naval term applied to horizontal pieces of timber to ports or scuttles. Generally pronounced by sailors *sell*, as *port-sell*. (Smyth: *Sailor's Word-Book*.)

**cil'-ma**, s. [Gr. κύμα (*kuma*) = a wave.] [CYMA.]

Arch. : A moulding, taking its name from its contour resembling that of a wave, being hollow in its upper part, and swelling below.

Of this moulding there are two sorts, the *cima* (or *cyma*) *recta*, just described, and the *cima reversa*, where in the upper part it swells and the lower is hollow. By the workmen these are called *ogees* (q.v.). (Gwill.)

**cil'-mar**, s. [CHIMERE, SIMAR.]

\* **cil'-māl** (1), s. [Ital. *ciambella*.] A kind of confectionery or cake.

\* **cil'-māl** (2), \* **cil'-māle**, s. [CYMBAL.]

**cil'-mēx**, s. [Cl. Gr. κίμβη (*kimbē*) = a miser.]

Entom. : A genus of hymenopterous insects, family Tenthredinidae. Mr. Stephens enumerated eight British species of the genus, some of which may not be properly distinct from each other. *Cimex Griffini* is about an inch long. It is reddish-brown, with a yellow abdomen.

**cil'-mī-a**, s. [Gr. κύμβιον (*kumbion*) = (1) a small cup, (2) see *κῆψ*, dimin. of κύβη (*kumbē*) = the hollow of a vessel.]

Arch. : A fillet, string, list, or cornice.

**Cil'-mri-an**, a. & s. [Lat. *Cimbria*.]

A. As adj. : Cimbric; pertaining to Cimbria. "The event commonly called the 'Cimbrian Deluge' is supposed to have happened about three centuries before the Christian era."—*Leell: Principles of Geology*, ch. xxi.

B. As subst. : A native of Cimbria.

**Cil'-mric**, a. & s. [Lat. *Cimbricus*.]

A. As adj. : Pertaining to the Cimbric, an ancient tribe inhabiting Northern Germany, and the Chersonese now called Jutland.

"On helm and harness rings the Saxon hamma, Through Cimbric forest roars the Norseman's song."—*Longfellow: The Arsenal at Springfield*.

B. As subst. : One of the tribe of the Cimbric; a Cimbrian.

\* **cil'-ēl'-i-arch**, s. [Lat. *cimeliarcho*; Gr. κειμηλιάρχης (*keimeliarcho*) = a treasurer; κειμηλιον (*keimelion*) = a treasury, and *άρχης* (*archos*) = a leader, a chief.]

1. Eccles. : A superintendent or keeper of plate and other valuable things belonging to a church; a church-warden. (Bailey.)

2. Arch. : A name given to the apartment where the plate and vestments are kept in churches. (Gwill.)

\* **cil'-ēnt**, s. & v. [CEMENT.]

\* **cil'-ē-tēr**, s. [CIMETER, SCIMETER, SCYMITAR.]

\* **cil'-ē-tēr-ŷ**, \* **cil'-ē-tōr-ŷ**, s. [CEMETERY.]

**cil'-mēx**, s. [Lat. *cimex* (genit. *cimicis*) = a bug.]

- 1. Ord. Lang. : A bug.
- 2. Entom. : A genus of hemipterous insects, the typical one of the family Cimicidae. *Cimex lectularius* is the Bed-bug. [Bro.] There are analogous species parasitic on pigeons, swallows, and bats.

**cil'-ŷ-a**, s. [CIMBLA.]

\* **cil'-īce**, s. [Ital. *cimice*, from Lat. *cimex* (genit. *cimicis*).] A bed-bug. [CIMEX.]

**cil'-īc'-īo**, a. [Lat. *cimex* (genit. *cimicis*) = a bug.] Of or pertaining to the cimex or bug.

**cimelic acid**, s.

Chem. :  $C_{15}H_{23}O_6$ , a yellow crystallizable acid, having a rancid odour, extracted by alcohol and ether from a kind of bug (*Rhaphigaster punctipennis*).

**cil'-īc'-ī-dæ**, s. pl. [Lat. *cimex*, genit. *cimicis*, and pl. adj. suff. *-īdæ*.]

Entom. : A family of hemipterous insects, of which Cimex is the type. It is of the tribe Geocores (Land-bugs). They have a short rostrum consisting of two or three joints only, depressed bodies, and, with the exception of the typical genus Cimex, wings. British genera, Cimex, Aneuris, Aradus, Agramma, Tingia, and Dictyonota.

**cil'-īc'-ī-fū'-ga**, s. [Lat. *cimex* (genit. *cimicis*) = a bug, and *fugo* = to drive away. So named because in Siberia one of the species is used to drive away bugs and similar insects.]

Bot. : A genus of perennial herba, with racemes of whitish flowers, and drastic poisonous roots. Order, Ranunculaceae. Four species are cultivated in Britain, the best-known being *Cimicifuga fetida*, the "Stinking Snake-root," or Bug-wort. It was introduced in 1777 from Siberia. It occurs also on the Carpathian Mountains, and the north-west coast of America. *C. serpentaria*, formerly called *Actæa racemosa*, is the Black Snake-root of America, supposed to be an antidote to the venom of serpents.

**cil'-ī-cine**, a. [Lat. *cimex* (genit. *cimicis*), and Eng. suff. *-ine*.] Smelling of buga.

**cil'-miss**, s. [CIMEX.] The bed-bug.

\* **cil'-ī-tēr**, \* **cil'-ē-tār**, **sc'ym'-ī-tār**, \* **sc'ym'-ī-tēr**, s. [Fr. *ciméterre*; Sp. & Port. *cimelarra*; Ital. *cimeliarra*, from Biscayan *cimelarra* = with a sharp edge; or corrupted from Per. *schimschir* (*Mahn*).] A short curved sword with a convex edge, used by the Persians and Turks.

**Cil'-mēr'-ī-an**, a. [Lat. *Cimmerius*, from Gr. κίμμεριος (*kimmerios*).]

1. Lit. : Pertaining to the Cimmerii, a fabulous race stated by Homer to have lived "beyond the ocean stream," and in later ages said to have lived in very ancient times in the Tauric Chersonese (now called the Crimea), in a state of perpetual darkness.

2. Fig. : Without any light; intensely and profoundly dark.

"Let cimmerian darkness be my only habitation."—*Shakspeare: Aeneid*, bk. 2.

**cil'-mō'-lī-a**, s. [CIMOLITE.]

**cil'-mō'-lī-an**, a. [Eng. *cimolite* (a); -an.] Pertaining to cimolite.

**cil'-mō'-lī-or'-nis**, s. [Gr. κίμωλια (*kimolia*) = Cimolian earth [CIMOLITE], and *ornis* (ornis) = a bird.]

Palæont. : A genus founded on remains from the Maidstone Chalk. The late Prof. Owen thought they were avian, but Bowerbank identified them with *Pterodactylus gigantus*.

**cil'-mō'-lī-ite**, s. [Fr. *cimolite*, from Gr. κίμωλια (*kimolia*) = Cimolian earth, from Κίμωλος (*kimolos*), Lat. *Cimolus*, an island of the Cyclades, distinguished for its chalky soil, now Cimoli or Argentiara.]

Min. : A light grey, white, or reddish silicate of alumina, occurring sometimes massive, or of a stony texture. It is very soft. Sp. gr., 2.18—2.30. Compos. : Silica, 62.30—65.98; alumina, 20.97—24.23; sesquioxide of iron, 0—1.25; water, 9.31—12.34. It occurs at Argentiara; also at Nagpore, Central India, and in some parts of Russia. (*Dana*.) The Nagpore specimens have been called also Hunterite (q.v.).

**cil'ch**, s. A saddle-girth made of leather, horse-hair, canvas or cordage, with long thong of leather at the ends; hence (U. S. Slang) "a firm grasp, complete control, a "sure thing."

**cil'ch**, v. To gird with a cinch; hence to subdue by force, to control. (U. S. Slang)

**cil'-chō-mēr'-ōn'-īc**, a. [From Eng. *cincho* (na) (q.v.); Gr. *mepos* (*mepos*) = a part, and Eng. suff. *-īc*.]

**cinchomeronic acid**, s.

Chem. :  $C_{17}H_{25}N_3O_6$ . An acid formed by the action of nitric acid on cinchoninic acid. It is easily soluble in dilute nitric acid. Its calcium salt yields by dry distillation pyridine  $C_5H_5N$ .

**cil'-chō'-na**, s. [Said to have been named in honour of the Countess de Chinchon, vice-queen of Peru, who was cured of a fever, in 1638, by the use of this remedy.]

1. Bot. : A genus of trees found exclu-

sively on the Andes in Peru, and adjacent countries, and recently introduced into India, producing a medicinal bark of great value

1. Plant. 2. Bud. 3. Flower. 4. Fruit.

known as Peruvian bark, Jesuit's bark, &c. The Jesuits introduced it into Europe. There are many species of this genus.

2. *Med.*: The bark procured from the Cinchona-trees.

**cinchona bark, s.**

*Pharm.*: The barks of several species of Cinchonaceæ are used in medicine, or for the extraction of the alkaloids, quinine, cinchonine, &c., which they contain. The following are the most important:—*Chinchona fava* Cortex, Yellow Cinchonine, which occurs as quills covered with a brown epidermis, mottled with whitish yellow lichens, and also in flat cinnamon-coloured pieces. They break with a fibrous fracture and the escape of a powder. Yellow bark is rich in quinine, and 100 grains should yield not less than two grains of alkaloid. It is derived from *C. Calisaya*, which grows in the peculiar cloudy regions of the Andes.—*C. pallida* Cortex, Pale Cinchona Bark, from *C. condaminea*. It occurs always in quills, covered with crustaceous lichens. Its fracture is short and not fibrous. It contains chiefly cinchonine. Two hundred grains of the bark yield about one grain of alkaloid.—*C. rubra* Cortex, Red Cinchona Bark. The bark of *C. succirubra*. This species appears to thrive in India. It occurs in flattened, rough fibrous, dark-brown red pieces, which are covered with a brown-red epidermis. It breaks with a red fibrous fracture. It contains about equal quantities of cinchonine and quinine, and 100 grains of the powdered bark should yield not less than one-and-half grains of alkaloid. The yellow bark is used in the form of decoction, extract, infusion, and tincture. The pale bark is contained in *Tinctura Cinchonæ Composita* and in *Mistura Ferri Aromatica*. The cinchona bark contains, besides the alkaloids, also certain acids having astringent properties, and are valuable as tonics in cases of great debility. (*Garrod's Mat. Medica*.) For properties of the alkaloids see QUININE and CINCHONINE. Cinchona barks rich in quinine generally contain mucic lime, and their solutions are precipitated by sodium sulphate. Cinchona barks are examined as follows: 100 grains of the yellow bark are reduced to powder, and are thoroughly exhausted by boiling, maceration, and percolation, with water acidulated with hydrochloric acid. The colouring matter is precipitated from the liquid by adding plumbic acetate, the solution being kept acid. It is then filtered, and to the filtrate caustic potash is added till the precipitate first formed by it is redissolved. This solution is then shaken with successive quantities of ether, till a drop of the ether evaporated to dryness leaves no residue. The ether solutions are then evaporated to dryness, and the residue of alkaloids is weighed. In testing the pale and red barks use choloform instead of ether. When a bark containing quinine or cinchonins is heated in a test-tube a characteristic red vapour is given off, condensing to a carmine red liquid. It is also called Jesuit's bark and Peruvian bark.

**cinchona bases, s. pl.**

*Chem.*: Alkaloids contained in Cinchona bark. These can be separated from each other by adding ether, which dissolves the quinine and amorphous alkaloid, evaporating and dissolving in proof spirit acidulated with one-twentieth of sulphuric acid, and adding alco-

holic iodine, which precipitates the quinine as iodo-sulphate, which is dried at 100°. One part equals 0.565 of quinine. To the liquid sulphurous acid is added, neutralised with caustic soda, and the alcohol expelled by evaporating on a water bath; on adding excess of soda the amorphous alkaloid is precipitated. The part insoluble in ether is dissolved in 40 parts of water and a little sulphuric acid, the solution being faintly alkaline. A solution of Rochelle's salt  $KNaC_4H_4O_6$  is then added, and it is allowed to stand for twelve hours. The cinchonins is precipitated as tartarate, which is dried at 100°, and one part represents 0.804 of cinchonidine. To the filtrate iodide of potassium is added, which precipitates quinine as hydroiodide. One part dried at 100° equals 0.718 of quinine. To the filtrate caustic soda is added, which precipitates the cinchonine, which is dried at 100°. (See *Watts: Dict. of Chem.*)

**çin-çhôn-â-çö-æ, s. pl.** [Mod. Lat. *cinchon(a)*, and Lat. fem. pl. adj. suff. -*accæ*.]

*Bot.*: A large order of plants belonging to an alliance called after it, Cinchonales. The calyx, which is simple, is superior, as is the corolla, which is tubular and of regular form. The stamens, which are definite in number, arise from the corolla all on the same line and alternate with its segments; the anthers are straight, bursting longitudinally. The ovary is inferior, usually two-celled, with few or many seeds; the fruit splitting into two cocci, or indehiscent and dry, or succulent. The leaves, which are simple, are opposite or verticillate, with interpetiolar stipules; this last character distinguishing them from the Galiceæ, to which they are much akin. Lindley divides it into two tribes: *Coffeæ*, in which the ovary has only one or two seeds in each cell, and *Cinchonæ*, in which it is many-seeded. (See these words.) In 1845, Lindley enumerated 269 genera, and estimated the known species at 2,500. Though none are British, yet they are so abundant in tropical countries as to constitute about one twenty-seventh part of the flowering plants. Some are trees, others shrubs, and yet others herbaceous plants. Many are most valuable tonics, febrifuges, emetics, and purgatives. [CINCHONA.] A few are poisonous, whilst, on the contrary, Coffee, which belongs to this order, is highly nutritive. Some have eatable fruits, and others are used in dyeing.

**çin-çhôn-nâ-çö-öü, a.** [Eng. *cinchon(a)*, and suff. -*accous*.]

*Bot.*: Of, or pertaining to, Cinchona.

**çin-çhôn-nads, s. pl.** [Mod. Lat. *cinchon(a)*, and Eng., &c. suff. -*ads*.]

*Bot.*: The English rendering or equivalent of the term Cinchonaceæ (q.v.).

**çin-çhôn-nal, a.** [Mod. Lat. *cinchon(a)*, and Eng. suff. -*al*.]

*Bot.*: Pertaining to the alliance Cinchonales, as the Cinchonin alliance.

**çin-çhôn-nâ-lö, s. pl.** [Mod. Lat. *cinchon(a)*, and Class. Lat. pl. suff. -*ales*.]

*Bot.*: An alliance of epigynous exogens, with dichlamydeous monopetalous flowers, and a minute embryo lying in a large quantity of albumen. Lindley includes under it the following orders: Vacciniaceæ, Columelliaceæ, Cinchonaceæ, Caprifoliaceæ, and Galiceæ (q.v.).

**çin-çhôn-âte, s.** [Eng. *cinchon(a)*, and suff. -*ate* (Chem.) (q.v.).]

*Chem.*: A salt of cinchonic acid.

**çin-çhôn-nö-æ, s. pl.** [Mod. Lat. *cinchon(a)*, and Class. Lat. pl. suff. -*ecæ*.]

*Bot.*: A tribe of Cinchonaceæ (q.v.). It contains the families Hamelidæ, Isertidæ, Hedyotidæ, Cinchonidæ, and Gardenidæ (q.v.).

**çin-çhôn-nî-ä, a.** The same as CINCHONINE.

**çin-çhôn-ic, a.** [Eng. *cinchon(a)*, and suff. -*ic*.] Of, or derived from, Cinchona (q.v.).

**cinchonic acid, s.**

*Chem.*:  $C_{11}H_{14}O_6$ . An acid formed by treating cinchononic acid with sodium amalgam  $C_{11}H_{14}N_3O_6 + 6H + 8HgO = 2NH_3 + C_{11}H_{14}O_6$ . It forms deliquescent white crystals.

**çin-çhôn-i-çine, s.** [Eng., &c. *cinchonin*, and suff. -*ine*; or Mod. Lat. *cinchon(a)*; or

*çinçôn* (çinçôn) = figure, image, resemblance (?), and Eng. suff. -*ine*.]

*Chem.*:  $C_{20}H_{24}N_2O$ . An alkaloid obtained by heating acid sulphate of cinchonidine for several hours to 130°. The base is liberated by caustic soda, and taken up by absolute ether; it forms a slightly yellow viscous mass, which melts at 60°. It gives no colour with chlorine and ammonia. The hydrochlorate gives a white precipitate with hypochlorite of sodium which distinguishes it from cinchonine, and cinchonidine, which give no precipitate. It forms crystalline salts. It turns the plane of polarisation feebly towards the right. (*Watts: Dict. of Chem.*)

**çin-çhôn-i-dö, s. pl.** [Mod. Lat. *cinchon(a)*, and fem. pl. adj. suff. -*idæ*.]

*Bot.*: A family of plants, tribe Cinchonæ.

**çin-çhôn-i-dinc, s.** [Mod. Lat. *cinchon(a)*, and Gr. *είδος* (*eidos*) = form, appearance.]

*Chem.*:  $C_{20}H_{24}N_2O$ . An organic alkaloid found in Peruvian bark. It crystallises from alcohol in anhydrous needles, gives no fluorescence when pure, and no green colouration with chlorine and ammonia. It differs from cinchonins by its turning the plane of polarisation powerfully towards the left.

**çin-çhôn-in, çin-çhôn-ine, s.** [Eng. *cinchonin(a)*; suff. -*in*, -*ine* (Chem.).]

*Chem.*:  $C_{20}H_{24}N_2O$ . cinchonin, an organic alkaloid contained with quinine in Peruvian bark, especially in *Cinchona condaminea*. It is separated from quinine by its sulphates being more soluble. Cinchonins crystallises in small transparent four-sided prisms. It is slightly soluble in water, but dissolves easily in hot alcohol. It melts at 165°. It is a powerful base, and forms crystalline salts with acids. It turns the plane of polarisation powerfully towards the right.

**çin-çhôn-nin-ic, a.** [Eng. *cinchonin*; -*ic*.]

**cinchoninic acid, s.**

*Chem.*:  $C_{20}H_{14}N_2O_4$ . A dibasic acid obtained by the oxidation of cinchonine by nitric acid. Sp. gr. 1.4. It is a white crystalline substance soluble in water; when treated with nitric acid it is converted into quinolic and cinchoneric acids.

**çin-çhôn-içm, s.** [Eng. *cinchon(a)*, and suff. -*ism*.]

*Path.*: The disturbed condition of the body caused by over-doses of cinchona.

"The condition here called *cinchonism* is marked by the occurrence of giddiness, deafness, and a sense of buzzing . . . in the ears."—*Watson: Lectures on the Principles and Practice of Physic*, lect. 83.

**çin-çhôn-a-tine, s.** [Mod. Lat. *cinchon(a)*; *ovata* (a), and suff. -*ine*.] The Cinchons ovata being the white quinquina of Condamine, a species of the Cinchona genus.

*Chem.*: Aricine,  $C_{23}H_{26}N_2O_4$ , occurs with Cuscoine in Cusco Cinchona bark, which gives off brown vapours when heated. Aricine crystallizes in white prisms, which melt at 188°.

**çin-çin-nüs, s.** [Lat. = a curl.]

*Bot.*: A cyma developed in a curled manner.

**çin-clid-ö-tüs, s.** [Gr. *κίγκλις* (*kingklis*) = a lattice, and *ὄδους* (*odous*), genit. *ὀδοντός* (*odontos*) = a tooth.]

*Bot.*: A genus of Mosses, found floating in streams. Tribe, Evaginati. The name is derived from the manner in which the cilia of the peristomes are united in net-like parcels. *Cinclidotus fontinaloides* grows in tufts on the margin of lakes and rivers, or on stones in the channel of streams.

**çin-clî-næ, s. pl.** [Mod. Lat. *cinclus*]; Lat. fem. pl. adj. suff. -*inæ*.]

*Ornith.*: The Dippers, a sub-family of dentirostral birds, belonging to the family Merulidæ or Turdidæ.

**çin-clis** (pl. **çin-öi-dö, s.** [Gr. *κίγκλις* (*kingklis*) = a lattice.]

*Animal Physiol.*: One of the openings in the bodies of sea-anemones, probably serving to discharge the thread-cells or cnidæ.

**çin-clö-sö-mä, s.** [Gr. *κίγκλις* (*kingklis*) = a water-ouzel, and *σῶμα* (*sōma*) = the body.]

**Ornith.** : A genus of birds, closely allied to the Shrike. They are natives of Australia and the East Indies.

**cin-clūs, s.** [Gr. κίγκλος (*kingklos*) = a wag-tail or onsel.]

**Ornith.** : The type-genus of the sub-family Cinclinae (q.v.). They have a very straight slender bill, with a notched lip; wings rounded, of moderate length; a very short even tail; and large exceedingly strong feet. One species (*C. aquaticus*), the Common Dipper or Water-ouzel, occurs in Britain. It is rather more than seven inches long, with the upper parts ashy-brown, the breast pure white, the belly rusty, the bill blackish. It is found throughout Europe and part of Asia. It breeds, among other places, in England, making a mossy nest ten or twelve inches in diameter by seven or eight deep, and places it in a cavity in a moss-covered rock near the mountain streams, which it frequents and into which it dips and dives.

**cin-clō-plān-y-lā, s.** [Mod. Lat., from Lat. *cinclus* = gird, girdled, and *planula* (q.v.).]

**Biol.** : The collared embryo of a sponge.

**cin-clō-plān-y-lar, a.** [Eng., &c., *cinclō-planul(a)*, -*ar*.] Resembling a collared Infusorian, as does the embryo of a sponge.

**cin-clūre, s.** [Lat. *cinclura* = a girdle, from *cingo* = to gird; Ital. & Sp. *cintura*; Prov. *centura*; Fr. *ceinture*.]

**I. Ordinary Language :**

**Lit.** : A belt, a girdle, something worn round the body, to fasten or confine the dress.

"Such is her sovereign mien; her dress  
A vest, with woollen *cinclure* tied."

*Wordsworth: The White Doe of Rylstone, a. vii.*

**\* 2. Fig.** : An Inclosure, a ring-fence.

"The court and prison being within the *cinclure* of one wall."—*Bacon: Henry VII.*

**II. Arch.** : The ring, list, or fillet at the top and bottom of a column, which divides the shaft of the column from its capital and base. (*Gwilt*.)

**cin-clūre, v.t.** [CINCLURE, *s.*] To surround, as with a girdle; to gird, to encircle.

"On high the palms their graceful foliage spread,  
Cinclured with roses the magnolia towa."  
*Hemans: Modern Greece.*

**cin-clūred, a.** [CINCLURE, *v.*] Having a cinclure or girdle; girdled. (*Sir W. Scott*.)

**cin-dēr, \*cyn-dir, \*cyn-dyr, \*syn-der, \*syn-dyr, s. & a.** [A.S. *sinder, synder*; Icel. *sindr*; Sw. *sinder* = slag, dross; Dut. *sintels* = cinders; Dan. *sinder, sinner* = a spark of ignited iron; Ger. *sinter* = dross of iron, scale; Icel. *sindra* = to glow, to throw out sparks. Not from Fr. *cinde*, though this word has affected the spelling.]

**A. As substantive :**

**I. Ordinary Language :**

**1. Literally :**

(1) The residue of coal after combustion, in which fire is extinct.

"*Syndyr* of the staphys *lyro*. *Casusma*."—*Prompt. Para.*

"Saint James's Square was a receptacle for all the offal and *cinders*, for all the dead cats and dead dogs of Westminster."—*Macaulay: Hist. Eng., ch. iii.*

(2) A small piece of coal which has ceased to flame, but still retains heat.

**\* 2. Figuratively :**

(1) The ashes of the dead.

"Beauty, truth, and rarity,  
Grace in all simplicity,  
Here enclosed in *cinders* lie."

*Shakspeare: The Passionate Pilgrim; Threnos.*

(2) Spirits or wine used to fortify mineral waters. (*Slang*.)

**II. Metallurgy :**

1. The slags or dross produced in the processes of iron manufacture. (*Ure*.)

2. A scale thrown off in forging metal. (*Webster*.)

3. (Pl.) Coke.

**B. As adj.** : (See the compounds.)

**cinder-bed, s.**

**Geol.** : A bed of oyster shells, of the species *Ostrea distorta*, found in the Middle Purbeck series, so named from its loose structure. Its thickness is about twelve feet.

**cinder-cone, s.** A conical formation due

to successive deposition of fine volcanic matters, as ash, scoria, &c.

**cinder-dust, s.**

**Metal** : Slag from a refining furnace.

**cinder-fall, s.**

**Metal** : The inclined plane on which the melted slag from a blast-furnace descends. (*Weale*.)

**cinder-flue, s.**

**Metal** : The cinder from the re-heating furnace.

**cinder-frame, s.**

**Engin.** : A framework of wire, &c., in a chimney, or in front of the tubes of a locomotive, to prevent the escape of cinders.

**cinder-hole, s.**

**Metal** : The front plate of the hearth of a German refinery-furnace

**cinder-hook, s.**

**Metal** : A hook for drawing off slag.

**cinder-notch, s.**

**Metal** : A notch in the upper part of a dam of a blast-furnace through which the melted slag escapes. (*Weale*.)

**cinder-path, s.** A pathway composed of, or covered with, cinders, esp. one for foot or cycle races.

**cinder-sifter, s.** A perforated shovel or sieve for sifting cinders.

**cinder-tip, s.** A heap of cinders; a place where cinders are tipped or shot.

**cinder-tub, s.** An iron track for the reception of the melted slag after the latter has flowed from a blast-furnace over the cinder-fall. (*Weale*.)

**\* cinder-wench, \* cinder-woman, s.**

A woman whose occupation it is to rake over ashes for the purpose of picking out the cinders.

**cinder-wool, s.** [MINERAL-COTTON.]

**Cin-dēr-ōl-lā, a.** [From the heroine of the fairy tale.] An informal dance which breaks up at midnight. Also called Cinderella dance.

**\* cin-dēr-īng, \* cin-drīng, a.** [CINDER, *s.*] Reducing to a cinder; utterly consuming.

**\* cin-dēr-ōūs, \* cin-drōūs, a.** [Eng. *cinder*; -*ous*.] Resembling, or composed of, cinders.

"Or of a certain sharp and cindrous humor."  
*Sylvestre: The Magnificence, 436.*

† **cin-dēr-ŷ, a.** [Eng. *cinder*; -*y*.] Pertaining to, or resembling, cinders; consisting of cinders.

**cin-ē-fac-tion, s.** [Fr., from Lat. *cinerfactio*, from *cinis* = ashes, and *factio* = a making, *facio* = to make.] The act or process of reducing to ashes, incineration. (*Crabb*.)

**cin-ē-māt-ic, cin-ē-māt-ī-cal, &c.** [KINEMATIC, &c.]

**cin-ēn-chŷ-ma, s.** [From Gr. κίνησις (*kinēō*) = to set in motion; *εγχυμα* (*engchuma*) = infusion; *εν* (en) = in; and *χέω* (*cheō*) = to pour.]

**Bot. Physiol.** : A kind of tissue consisting of irregularly branching and anastomosing vessels. They are largest in plants having milky juice, and smallest in those which have transparent juice. It is called also LATICIFEROUS TISSUE (q.v.).

**cin-ēn-chŷm-a-toūs, a.** [Eng. *cinenchyma*; *t* connective, and suff. -*ous*.] Pertaining to, or composed of, cinenchymus; laticiferous.

**cin-ēr-ā-geōūs, a.** [Lat. *cinereus*, from *cinis* = ashes.] Like ashes, ash-coloured, ash-like.

**cin-ēr-ār-ī a, s.** [Lat. *cinerarius*, from *cinis* = ashes. The genus is so called from the ash-coloured down covering the surfaces of the leaves.]

**Bot.** : A genus of plants akin to Senecio, or according to Sir Joseph Hooker, ranked under it as a sub-genus. London enumerates thirty-one species cultivated in English gardens, but there are endless varieties produced by seed.

They are all of various shades of red or blue, with or without white markings.

**cin-ēr-ā-rŷ, a.** [Lat. *cinerarius* = pertaining to ashes; *cinis* = ashes.] Pertaining to, or containing, ashes.

**cinerary urn, s.** An urn or vessel used by the ancients to preserve the ashes of the dead; a sepulchral urn.

**\* cin-ēr-ā-tion, s.** [Fr. *cinération*, from Lat. *cinis* (genit. *cineris*) = ashes.]

**Old Chem.** : The act or process of reducing to ashes, incineration.

**cin-ēr-rē-a, s.** [Lat. fem. sing. of *cinereus* = ashy-gray.]

**Anat.** : The gray matter of the brain and apical chord.

**cin-ēr-rē-al, a.** [Eng., &c. *cinere(a)*; -*al*.] Pertaining or consisting of cinerea (q.v.).

**cin-ēr-ē-ōūs, a.** [Lat. *cinereus*, from *cinis* (genit. *cineris*) = ashes.] Ash-like; of the colour of ashes; ashy-grey.

"The hair is red at the tips, *cinereous* beneath."—*Pennant*.

**cin-ēr-ēs-cēt, a.** [Lat. *cinereus*, pr. par. of *cinereus* = to turn to ashee.]

**Physical Science** : Becoming grey, approaching to a grey colour. (*R. Brown, 1874*.)

**cin-ēr-ŷ-tious, a.** [Lat. *cineritius, cineritius*, from *cinis* (genit. *cineris*) = ashes.] Having the form, state, quality, or colour of ashes; cinereous.

"Broken and burnt rocks, ruins of buildings, and *cineritious* earth."—*Delany: Revelation examined with Candour, li. 28.*

**Cineritious substance of the nervous system :**

**Anat.** : A grey substance constituting with a white one the chief material of the nervous system. In the brain it is called also the cortical substance, while the white is denominated the medullary one. (*Quain: Anat.*)

**\* cin-ēr-ŷ-lēt, a.** [Formed from Lat. *cinis* (genit. *cineris*) = ashes, on the analogy of *virulent*, &c.] Full of ashes. (*Bailey*.)

**cin-ēr-tŷ-ca, s. pl.** [Gr. κινήτικος (*kinētikos*) = pertaining to motion, from κίνησις (*kinēō*) = to move.]

**Med.** : Diseases affecting the muscles, and characterised by irregular action of the muscles, or muscular fibres, commonly denominated spasm. The third order in the class Neurotica of Good. Also agents that affect the voluntary or involuntary motions. (*Dunglison*.)

**Cin-gā-lē-se, a. & s.** [Fr. *cingalais*.]

**A. As adj.** : Of or belonging to Ceylon.

**B. As subst.** : A native or inhabitant of Ceylon.

**cin-gle, s.** [Lat. *cingulum*.] [SURCINOLE.]

1. A girdle worn by sailors. (*Smyth: Sailor's Word-Book*.)

\* 2. A girth for a horse.

**cin-gū-lum, s.** [Lat. = a girdle, from *cingo* = to gird, to surround.]

1. **Med.** : A cinclure, a girdle. The part of the body situate below the ribs, to which the girdle is applied; the waist. (*Dunglison*.)

2. **Zool.** : The neck of a tooth, or that constriction which separates the crown from the fang. The term is also used for the transverse series of long bands in the armour of the Armadillo, &c. (*Craig*.)

**cin-ŷ-hōn-ŷ-dæ, s. pl.** [Lat. *ciniflos* (genit. *ciniflosis*), and fem. pl. suff. -*idæ*.]

**Entom.** : A family of Arachnida.

**\* cin-ŷ-ŷŷ, \* cin-ē-ŷŷ, v.t.** [Lat. *cinis* = ashes, and *facio* (pass. *ŷo*) = to make.] To reduce to ashes, to incinerate.

**\* cink, a.** [CINQUE.]

**\* cink-foyle, s.** [CINQUE-FOIL.]

**cin-na, s.** [Gr. καίω (*kaiō*) = to heat.]

**Bot.** : A genus of American grasses, allied to Agrostis; order, Gramineæ. So called from its heating qualities. (*Craig*.)

**cin-na-bar, s. & a.** [Fr. *cinnabre*; Ital. *cinnabro*; Sp. & Port. *cinnabrio*; Ger. *sinnaber*, from Lat.

*cinnabaris*; Gr. *κινναβάρις* (*kinnabaris*), from Pers. *qinbar*; Hind. *shangarf*.]

**A. As substantive:**

1. *Mín.*: A rhombohedral mineral, generally of adamantine lustre, though in friable varieties dull. Colours: cochineal red, brownish red, and lead grey, streak scarlet. A native mercuric sulphide, HgS. It has refraction and circular polarisation. There are two varieties.

(1) Ordinary cinnabar, crystallised, massive or earthy.

(2) *Hepatic cinnabar*. An impure cinnabar of a liver-brown colour and submetallic lustre. (*Dana*.) Cinnabar is found in Spain, in Austria, in China and Japan, in California, in Peru, &c.

2. *Comm.*: Red sulphuret of mercury used as a pigment; vermilion. It is prepared artificially by triturating mercury and sulphur together, and heating the black sulphide HgS until it sublimes.

3. *Bot. & Med.*: The red resinous juice of a tree, *Calamus rotang*, a native of the East Indies, formerly called Dragon's blood, and used as an astringent.

**B. As adjective:**

1. Consisting more or less of the substance described under A.

2. *Bot. &c.*: Coloured like it; scarlet with a slight mixture of orange.

**cinnabar moth**, *s.* *Callimorpha Jacobea*.

**cín-na-bar'-í-o**, *a.* [Eng. *cinnabar*; *-ic*] Pertaining to, or consisting of, cinnabar; cinnabarine.

**cín-na-bar'-í-ne**, *a.* [Fr. *cinabarin*.] Pertaining to or containing cinnabar.

**cín-na-má-te**, *s.* [Eng. *cinnam(ic)*, and suff. *-ate* (*Chem.*) (q.v.).] [CINNAMIC ACID.]

**cín-na-mein**, *s.* [Eng. *cinnam(on)*, and suff. *-ine* (*Chem.*) (q.v.).]

*Chem.*:  $C_9H_7C_6H_5O_2$ . Benzyl cinnamate occurs in Peru and Tolu balsams, the produce of species of *Myroxylum* growing in South America. Also prepared by heating sodium cinnamate with benzyl chloride.

**cín-na-mé-ne**, *s.* [Eng. *cinnam(on)*, and suff. *-ene* (*Chem.*).]

*Chem.*:  $C_9H_8$  or  $C_9H_6$ -CH = CH<sub>2</sub>. Styrene, styrol, cinnamol, ethenyl-benzene, phenyl-ethylene. An aromatic hydrocarbon, obtained by distilling cinnamic acid with baryta; also by passing the vapour of xylene or a mixture of benzene vapour and ethene through a red-hot tube; also by distilling liquid storax and carbonate of sodium with water; synthetically by heating acetylene  $C_2H_2$  in a glass tube over mercury to the softening point of the glass, four mois. of acetylene being condensed into one mol. of cinnamene. Cinnamene is a colourless oil. Sp. gr., 0.924. It boils at 145°. When heated to 200° in a sealed tube it is converted into a white transparent refractive solid called meta-cinnamene or metastyrole, which when distilled yields liquid cinnamene. By the action of hydriodic acid cinnamene is chiefly converted into octane,  $C_8H_{18}$ . When cinnamene is agitated with a concentrated solution of iodine in potassium iodide, and the liquid is then diluted with water, crystals of iodide of cinnamene separate out. When cinnamene is oxidized with an alkaline solution of potassium permanganate, it yields benzoic and carbonic acids.

**cín-nám'-í-o**, *a.* [Eng. *cinnam(on)*, and suff. *-ic*.] Of or pertaining to cinnamom; derived from cinnamom.

**cinnamic acid**, *s.*

*Chem.*: Phenyl acrylic acid. Cinnamomic acid,  $C_9H_8O_2$  or  $C_9H_6$ -CH=CH-CO-OH. A monatomic aromatic acid, obtained by the oxidation of cinnamom oil; it occurs in Peru and Tolu balsams. It unites directly with hypochlorous acid, HClO, forming  $C_9H_7$ -CHCl-CH(OH)-CO-OH, phenyl-chlorolactic acid. It can be extracted by boiling these resins with milk of lime and filtering while hot, and decomposing the calcium cinnamate with hydrochloric acid. It has been formed by heating benzole aldehyde in close vessels with acetyl chloride. It forms small crystals, which melt at 129°, and boil at 293°. Fused with potash, it yields potas-

sium salts of benzoic and acetic acids, with evolution of hydrogen. It is slightly soluble in water and soluble in alcohol. It forms salts called cinnamates.

**cinnamic aldehyde**, *s.*

*Chem.*:  $C_9H_7$ -OH. An aromatic aldehyde, found in the volatile oils of cinnamon and cassia, which are obtained from the genus *Cinnamomum*, order Lauraceæ. The aldehyde is separated as a crystalline compound with acid potassium sulphite. It is a colourless oil, boiling at 248°, which readily oxidises into cinnamic acid. When heated with nitric acid it yields benzoic acid and benzoyl chloride,  $C_6H_5$ -CO-H. By the action of chromic acid it is converted into benzoic and acetic acids.

**cín'-na-mí-de**, *s.* [Eng. *cinn(amon)*, or *cinnam(yl)*, and *amide*.]

*Chem.*:  $C_9H_7$ -O-H<sub>2</sub>N. A white crystalline substance, melting at 141.5°. It is obtained by treating cinnamyl chloride with concentrated aqueous ammonia, washing with water, and recrystallizing from boiling water.

**cín-na-mô-dên'-drôn**, *s.* [Gr. *κινναμόν* (*kinnamón*), *κίναμον* (*kínamon*) = cinnamom, and *δένδρον* (*dendron*) = a tree.]

*Bot.*: A genus of plants, doubtfully referred by Lindley to the order Pittosporaceæ. *Cinnamodendron azilare*, a Brazilian tree, is aromatic. Its bark, which is a tonic and antiscorbatic, is prescribed in low fevers, and is made into gargles used when the tonsils are feeble.

**cín-na-mô-míc**, *a.* [Eng. *cinnamon*; Lat. *cinnamomum*; and Eng. suff. *-ic*.] Pertaining to cinnamom, cinnamic.

**cinnamomic acid**, *s.* [CINNAMIC.]

**cín-na-mô-miúm**, *s.* [Gr. *κινναμόνον* (*kinnamómōn*), *κιννάμωμον* (*kinnámōmon*) = cinnamom.]

1. *Bot.*: A genus of plants, order Lauraceæ. They have hermaphrodite flowers, with the abortive stamens apparently perfect with four-celled anthers. The leaves, which are three-ribbed, or triple-ribbed, are evergreen, often

CINNAMOMUM.

approaching each other in pairs. Another product of the genus *Cinnamomum* is CAASSIABARK (q.v.). *Cinnamomum Cullinawan* yields Cullinawan bark. Cinnamom proper is from *Cinnamomum zeylanicum*. *C. nitidum* has similar properties, that of Santa Fé from *Nectandra cinnamomoides*, and that of the Isle of France from *Oreodaphne cupularis*. All are of the Laurel order. [CINNAMOM, CAASSIA.]

2. *Palæont.*: Two species of *Cinnamomum* are said to exist in the Miocene.

**cín'-na-môn**, *s. & a.* [Gr. *κινναμόν* (*kinnamón*), *κιννάμωμον* (*kinnámōmon*); Lat. *cinnamomum*, *cinnamum*, from a Phœnic. word equivalent to Heb. *קִינָמוֹן* (*qinnamōn*), construct state *קִינָמוֹן* (*qinnamōn*).]

**A. As subst.**: An aromatic substance consisting of the bark of a tree or trees. [CINNAMOMUM, CINNAMOM BARK.] The Phœnicians, the Arabs, or both, imported the genuine cinnamon into Palestine remotely from Ceylon or the Eastern Archipelago, but probably from some mercantile port much nearer at hand. It is represented, however, as growing in at least one Jewish garden (Song of Sulomon, iv, 14), unless, indeed, the whole description be figurative. It was one of the ingredients in the holy anointing oil, which Moses was

commanded to make for the anointing of the tabernacle and its furniture (Exod. xxx, 22-29). It was used also for the perfume of beds (Prov. vii, 17). It is mentioned as an article of merchandise also in the mystic Babylon (Rev. xviii, 13).

*Wild cinnamon*: The genus *Cinnamodendron* (q.v.).

**B. As adj.**: Bright brown, mixed with yellow and red.

**cinnamon bark**, *s.*

*Pharm.*: *Cinnamomi Cortex*. The inner bark of shoots from the truncated stocks of *Cinnamomum zeylanicum*, order Lauraceæ. It is imported from Ceylon. It occurs in closely rolled, brittle, bright-brown quills having an aromatic odour and warm astringent taste. It is used to prepare *Aqua cinnamomi*, *Tinctura cinnamomi*, and *Pulvis cinnamomi compositus*, compound cinnamon powder. Cinnamon is a stimulant, aromatic, carminative, and is useful in cases of diarrhoea.

**cinnamon oil**, *s.*

*Pharm.*: *Cinnamomi oleum*. An essential oil distilled from cinnamon bark. It is of a bright yellow colour, which gradually darkens. It consists chiefly of cinnamic aldehyde (q.v.). When exposed to the air, it gradually absorbs oxygen and forms a resin and cinnamic acid.

**cinnamon root**, *\*cinnamom roote*, *s.*

*Bot.*: The book-name given by Gerard to *Inula Conyza*.

**cinnamon sedge**, *s.*

*Bot.*: An endogenous plant, *Acorus calamus*.

**cinnamon-stone**, *s.*

*Mín.*: A mineral of cinnamon-red colour, a variety of garnet. The finest specimens are brought from Ceylon. Dana considers it a sub-variety of Garnet, ranking it under the Lime-alumina Garnet, or Grossularite (q.v.).

**cinnamon water**, *s.*

A medicinal drink prepared by distilling twenty ounces of cinnamon with two gallons of water till one gallon boils over.

**cín-na-môn'-í-trí-le**, *s.* [Eng. *cinnamo(n)*, and *nitril*.]

*Chem.*:  $C_9H_7$ -N. A substance, boiling at 255°, soluble in alcohol. It is obtained by the action of  $PCl_5$  on cinnamide.

**cín-na-mýl**, **cín-na-mú-le**, *s.* [Eng. *cinnamom*; Gr. *κινναμόν* (*kinnamón*) = cinnamom, and *μάλη* (*hulé*) = . . . matter.]

*Chem.*:  $C_9H_7$ -O. An aromatic monatomic radical.

**cinnamyl chloride**, *s.*

*Chem.*:  $C_9H_7$ -O-Cl. Obtained by the action of pentachloride of phosphorus,  $PCl_5$ , on cinnamic acid. It is a heavy oil, boiling at 262°. Heated with cinnamate of sodium, it yields cinnamic anhydride.

**cinnamyl hydride**, *s.*

*Chem.*:  $C_9H_7$ -O-H. [CINNAMIC ALDEHYDE.]

**cín-nýl**, *a. & a.* [Gr. *κινναμόν* (*kinnamón*), and *μάλη* (*hulé*) = matter as a principle of being.]

*Chem.*:  $C_9H_7$ -C. A monatomic aromatic hydrocarbon radical.

**cinnyl cinnamate**, *s.*

*Chem.*: *Styracin*,  $C_9H_7C_6H_5O_2$ . It is contained in liquid storax, which exudes from *Styrax calamita*, a shrub growing in Asia Minor. Distilled with potash it yields cinnyl alcohol and cinnamic acid.

**cín-nýl'-í-c**, *a.* [Eng. *cinnyl*; *-ic*.] Pertaining to, or derived from cinnyl (q.v.).

**cinnyl alcohol**, *s.*

*Chem.*:  $C_9H_7$ -OH. Cinnyl hydrate, cinnamic alcohol, styryl alcohol, styrylene. A monatomic aromatic alcohol, obtained by heating cinnyl cinnamate with caustic alkalis. It crystallizes in soft silky needles, melts at 35°, and is soluble in water. By oxidizing agents it is converted into cinnamic aldehyde and cinnamic acid.

**cín-nýr'-í-d**, *s.* [CINNYRIDÆ.] Any bird of the family Cinnyridæ.

**cín-nýr'-í-dæ**, *s. pl.* [Lat. *cinnyris*, the type, and fem. pl. adj. suff. *-idæ*.]

*Ornith.*: A lapsed synonym of Nectariniidæ (q.v.), containing the Sun-birds.

**šól**, **boý**; **póut**, **jówi**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **çem**; **thin**, **thís**; **sin**, **aç**; **expect**, **çenophon**, **çexist**. **ph = f**

cin'-nŷr-ŷs, s. [Ety. uncertain.] Ornith.: The Sun-bird, a genus of birds, the typical one of the family Cinnyridæ.

\* cin'-ô-për, s. [CINNABAR.] "I know you have arsenic, Vitriol, sal-tartre, alkaly, Cinopur." Ben Jonson: Alch. 1. 1.

cinque, \* cink, \* sink, s. & a. [Fr. cinq; O. Fr. cinque; Ital. cinque; Prov. cinc; Sp. & Port. cinco, from Lat. quinque = five.]

A. As substantive: 1. Ord. Lang.: The number five; a group of five treated as one.

2. Music (Pl. cinques): The name given by change-ringers to changes on eleven bells, probably from the fact that five pairs of bells change places in order of ringing in each successive change. (Grove's Dict. Music.)

¶ \* Cinque and quater: One who has entered his fiftieth year.

"Take pity, yethree Upoon a poor old Cinque and Quater." Cotton: Burlesque upon Burlesque, p. 17a.

\* To set all on cinque and six: A phrase probably = to be fearless or desperate.

"[Misgivings] for their carelessness of life, setting all at cinque and six."—Dr. Casus, in English Garner, III, 255.

B. As adj.: The fifth.

cinque-cento, s. & a. [Ital.]

A. As substantive:

Arch.: Literally 500, but used as a contraction for 1,500, the century in which the revival of ancient architecture took place in Italy. The term is applied to distinguish the style of architecture which then arose in that country. In France the style, as introduced there, is called *Style Français premier* and *Renaissance*; and in England, the Revival and Elizabethan. (Gentil.)

B. As adj.: Pertaining to or constructed in the style described in A.

"What is given the student as next to Raphael's work? Cinque-cento ornament generally."—Ruskin.

cinque-foil, \* cynk-foley, s. [O. Fr. cinque = five, and foil; Fr. feuille; Lat. folium = leaf.]

1. Botany:

(1) The common name of plants of the genus *Potentilla*, order Rosaceæ, also called Five-finger, from the resemblance of its leaves to the fingers of the hand.

(2) *Oenothera sativa*. (Audrey, Wilts.)

2. Arch.: An ornament used in the Middle Pointed style of architecture.

It consists of five cuspidated divisions or curved pendants inscribed in a pointed arch, or in a circular ring, applied to windows and panels. The cinque-foil, when inscribed in a circle, forms a rosette of five equal leaves, having an open space in the middle, the leaves being formed by the open spaces, bounded by the solids or cusps.

3. Her.: This plant, as a charge, answers to the five senses of man, and denotes that the bearer conquers his affections and appetites. (Crabb.)

¶ *March cinque-foil*: A modern book-name for a plant, *Comarum palustre*.

† cinque-foiled, a. [Eng. cinque-foil; -ed.]

Arch.: Furnished with cinque-foils.

\* cinque - outposts, s. pl. The five senses.

"I was fallen soundly asleep: the cinque-outposts were slant up closer than usual."—A. Winter Brown, 1.649 (Bark. Miscel., III, 202). (Davies.)

cinque-pace, s. A kind of dance (called also *Galliard*), the steps of which were regulated by the number five. Also translated *five-paces*. Sir John Davies thus describes it—

"Five was the number of the most's feet, Which still the dance did with five paces meet."

cinque-port, \* sink-pors, s.

1. (Of the form cinque-port): A kind of fishing-net having five entrances.

2. (Pl.): Ports, as the latter half of the design.

nation implies, "five" in number, and deemed the five most important ports on the Southern Coast facing France. At first there were really only five, viz., Dover, Sandwich, Romney, Hastings, and Hythe. Two have since been added, viz., Winchelsea and Rye, and the "Cinque"-ports at present number seven. Formerly the king's ordinary writ did not run within them, but legal cases arising were tried, at least in the first instance, in the local courts. There lay an appeal from them to the Lord Warden in his court of Shepway, and thence again to the King's Bench. (Blackstone: Comment., bk. III, ch. 6.) They have a Lord Warden, but his power is now abridged, the 13 & 19 Viet. c. 48, altered by the 20 & 21 Viet. c. 1, and other acts, having swept the old jurisdiction away. (Wharton.)

"The sink-pors scarcelye midelnes eightetene."—Robert of Gloucester.

\* 3. A representative of one of the Cinque-ports named in 2.

"A canopy borne by four of the Cinque-ports; under it, the queen in her robe . . ."—Shakspeare: Henry VIII., IV, 1.

\* cinque-posts, \* cinc-posts, s. pl. The same as Cinque-outposts (q.v.).

"My cinq-posts (my five outward senses) had been trebly lockt up."—Howell: Parly of Beasts, p. 22.

\* cinque-spotted, a. Having five spots.

"A mole cinque-spotted."—Shakspeare: Cymbeline, II, 2.

cin'-tre, s. [Fr.]

Arch.: Centre or centering (q.v.).

\* cî-ôn (I), s. [SCION.]

cî-ôn (2), s. [Gr. κίων (kîôn)] = a column, the nvula.]

Anat.: The nvula. (Dunglison.)

cî-ôn-îs-tês, s. [Gr. κωνίστις (kônistês)] = a small pillar.] A genus of Hydroid Polypes belonging to the family Podocoryniæ.

cî-ô-nî-tis, s. [Eng., & c. çion (2); -itis.]

Pathol.: Inflammation of the nvula.

cî-ôn-ô-tôme, s. [Gr. κίων (kîôn), genit. κίονος (kionos) = the nvula; and τόμη (tomê) = a cutting.]

Surg.: An instrument for excising a portion of the nvula. (Knight.)

cî-ôn-ûs, s. [Gr. κίων (kîôn)] = a pillar.]

Entom.: A genus of Coleopterous insects, tribe Rhynchopora, family Curculionidæ. They have a long curved rostrum inserted in a groove beneath the thorax, which is small. The elytra are nearly spherical, furnished with velvety tufts. Seven British species are known. *Cionus verbasci*, of a deep ash colour with other parts buff, grey, or yellow, is nearly globular. It is found on *Scrophularia*, *Verbascum*, and other plants.

\* cî-per (1), \* cî-pre, \* cî-pur, \* çy-pyr, a. [O. Fr. cypress.] [CYPRESS.] A cypress.

"A ciper by the church seat abrideth."—Banyhurst: Æneid, II, 740.

\* cî-per (2), s. [Probably a corruption of cîpher (q.v.).] Anything of little value, a sham.

cîper-tunncl, a. A false chimney, placed on a house for ornament or uniformity. (Knight.)

cî-phër, \* zi-fer, çy-pher, s. [O. Fr. cifre; Fr. chiffre, from Low Lat. cifra = nothing, from Arab. sifr = a cipher (Skert); Sp. & Port. cifra; Ital. cifra, cifra; Ger. ziffer.]

A. Ordinary Language:

I. Literally:

1. In the same sense as B. 1.

\* 2. A character of any kind used in writing or in printing.

\* 3. (In pl.): Shorthand.

"His speeches were much heeded, and taken by divers in ciphers."—Bacon: Life of Williams, I, 22.

II. Figuratively:

1. A person of no worth or moment.

"If the people be somewhat in the election, you cannot make them nulls or ciphers in the privation or translation."—Bacon.

\* 2. Worthlessness, sham, unreality.

"Mine were the very cipher of a function."—Shakspeare: Measure for Measure, II, 2.

B. Technically:

1. Math.: A mark or character (0) which of itself possesses no value, but when placed after any number increases its value tenfold.

In decimal fractions the placing of a cipher before a number decreases its value in the same proportion.

"The cipher of itself implies a privation of value: but when disposed with other characters on the left of it, in the common arithmetic, it serves to augment each of their values by ten; and in decimal arithmetic, to lessen the value of each figure to the right of it, in the same proportion."—Chambers.

2. Engraving: A combination or interweaving of two or more letters, especially the initials of a name; a monogram.

3. Correspondence: A secret or occult code or alphabet used in carrying on correspondence between two parties when it is important that the contents should be unintelligible to any third person into whose hands it might accidentally come, and who did not possess the key.

"This paper was signed in cipher by the seven chiefs of the conspiracy . . ."—Macaulay: Hist. Eng., ch. IX.

\* 4. Astrol.: An occult sign or figure.

"With that he circles drowa, and squares, With ciphers, astral characters."—Bulwer: Hudibras, II, 2.

5. Music: The sounding of a note on an organ or wind instrument, by an escape of wind through it, without that note having been touched by the player.

cipher-key, s. A key which enables the holder to read writings in cipher.

cî-phër, v. i. & t. [CIPHER, s.]

A. Intransitive:

1. Ord. Lang.: To practise arithmetic; to work out sums.

"We have long drawn our supply of roofing-slates from such quarries; school-boys ciphered on these slates . . ."—Tyndall: Frag. of Science (3rd. ed.), xiv, 408.

2. Music: Used of an organ or harmonium, when through some defect the wind escapes and sounds through any note without that note having been touched by the player.

B. Transitive:

1. Lit.: To write in cipher or secret characters.

2. Figuratively:

(1) To designate, to characterize, to depict.

"The face of either ciphered either's heart."—Shakspeare: Rape of Lucrece, I, 202.

(2) To decipher, to interpret.

"To cipher what is writ in learned books."—Shakspeare: Rape of Lucrece, III.

\* cî-phër-hood, s. [Eng. cipher; -hood.] The quality or state of being only a cipher; nothingness.

"Therefore God to confute him, and bring him to his native cipherhood threatened to bring a sword against him."—Godewin: Works, vol. V., 1st. ed. (Rich.)

cî-phër-îng, pr. par., a., & s. [CIPHER, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As substantive:

1. Elementary arithmetic; the act or science of doing sums.

2. The act or art of writing in cipher.

cîp-ô-lîn, cî-pô-lîne, cî-pô-lî-nô, s. [Ital. cipollino = a small onion; Lat. cepola = a small onion, a chive, dimin. of cepa = an onion.]

Min.: An Italian marble, a variety of calcite, containing a slight admixture of quartz and oxide of iron. Its colour is white with pale greenish shadings, and is so called because its veins, like those of onions, consist of different strata, one lying upon another. It does not stand the weather well.

cîp-për, s. & a. [Cf. A.S. cipe = an onion.] A term occurring only in the subjoined compound.

cupper-nut, s. *Bunium flexuosum*.

cîp-pûs, s. [Lat. cippus = a stake, a post.]

Arch.: A small low column, sometimes without a base or capital, and most frequently

CIPPUS.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camêl, hêr, thêre; pîne, pît, sûre, sîr, marine; gô, pôl, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unîte, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ê. ey = ä. qu = kw.

bearing an inscription. Among the succents the cippus was used for various purposes; when placed on a rood it indicated the distance of places; on other occasions, cippi were employed as memorials of remarkable events, as landmarks, and for bearing sepulchral epitaphs. (Gwilt.)

\* **ci-pre**, \* **ci-pur**, \* **cy-pyr**, s. [CYPRESS.] "The clustre of cypre tree my lemman to me." *Wycliffe: Song of Sak.* l. 13.

\* **ci-pres**, \* **cy-pres**, \* **cy-press**, \* **cy-prus**, s. [CYPRUS, CRAPE.] A thin, transparent stuff, annexed to resemble modern crape. Both black and white were made, but the black was most common, and was used as now for mourning.

"Lawn as white as driven snow,  
Cyprus black as'er was crow."  
*Shakespeare: Winter's Tale*, iv. 3.

¶ The following passage refers to its transparency. (Nares.)

"A cyprus, not a bosom,  
Hides my poor heart."  
*Shakespeare: Twelfth Night*, iii. 1.

\* **ciro** (1), s. [CIRCUS.] A prehistoric stone circle.

"Circs of the same sort are still to be seen in Cornwall, so famous at this day for the athletic art."  
*Warton: Hist. Eng. Poetry*, l. Diss. 1.

\* **ciro** (2), s. [CHURCH.]

**ci-r-ca**, prep. [Lat. = about.] Used to denote an approximation in a date. It is generally contracted to c.

**ci-r-ca-da**, s. [Lat. circus.]

*Old Eccles. Law*: A tribute aciently paid to the bishop or archdeacon for visiting the churches. (*Tomlin: Law Dictionary*.)

**ci-r-cæ-a**, s. [Lat. Circus = pertaining to Circe, a fabulous enchantress.]

Botany:

1. *Sing.*: A genus of plants, order Onagraceæ. Calyx-tube ovoid, with a two-parted limb. Petals obovate, stamina two, ovary 1-2 celled, style filiform, stigma capitate two-leaved. Fruit ovoid or pyriform, 1-2 celled, indehiscent, covered with hooked bristles. Slender erect herbs. Two species are British, *Circea lutetiana* (the Enchanter's Nightshade), and *alpina*.

2. *Pl.*: A tribe of Onagraceæ, of which *Circea* is the type. [CIRCEÆA.]

**ci-r-cæ-ë-tüs**, s. [Gr. *κίρκος* (*kirkos*) = a falcon that moves round in a circle, and *ætes* (*ætes*) = an eagle.]

*Ornith.*: A genus of the Aquilinæ, or Eagles, belonging to the family Falconidæ. *Circæetus cheela* is common in Lower Bengal, where it frequents the margins of tanks to feed upon the frogs which there abound at certain seasons of the year. The type-species is *C. aquila*, a European form, sometimes known as *Aquila brachydaclctus*.

**ci-r-car**, s. [Maharatta, Hind., &c. *sürkar* = the government.] (*Anglo-Indian*.)

*Geog. (Pl. Circars)*: The name formerly given to the Northern Circars, five districts in the Madras presidency. They were Chicacole, Rajahmundry, Ellore, Coudapilly, and Guntoor. The Northern Circars were obtained by the French in 1753, and were taken by Clive in 1759. (For other meanings of Circar see SIKKAR.)

**ci-r-cas-si-an**, a. & s. [Eng. *Circassia* (a); -an.]

A. *As adj.*: Pertaining to Circassia.

B. *As subst.*: A native of Circassia.

**ci-r-cas-si-ënne**, s. [Fr.] A light kind of cashmere. (*Knight*.)

**ci-r-cê**, s. [The mythic daughter of Helios (the Sun) and Persæa, who lived in the island of Æa and was reputed to possess powers of enchantment, by means of which she first charmed her victims, and then changed them into beasts.]

1. *Mythol.*: The fabulous creature described in the etymology.

"Will give thee back to day and Circe's shores.  
There, plous, on my cold remains attend."  
*Pope: Homer's Odyssey*, bk. xi., l. 84, 87.

2. *Zoology*:

(1) A genus of molluscs, family Cyprinidæ. The shell is suborbicular and compressed: it

is thick, and is often sculptured with diverging striae. The hinge teeth are 3-3, the lateral ones obscure, the pallial line entire. It ranges from eight to fifty fathoms. There are forty recent species from Australia, India, the Canaries, and Britain.

(2) A synonym of *Trachynemus* (q.v.).

3. *Astron.*: An asteroid, the thirty-fourth found, discovered April 6th, 1855.

† **ci-r-cê-an**, a. [Lat. *circæus*.] Pertaining to Circe; magic, noxious.

**ci-r-cê-î-dæ**, **ci-r-cê-æ-dæ**, s. pl. [Lat. *Circe*, and fem. pl. suff. *-idæ*, *-adæ*.]

*Zool.*: An old name for a family of Trachomedusæ, now known as Trachynemidæ (q.v.).

**ci-r-cê-li-üm**, s. [From Lat. *circellus* = a small ring.]

*Zool.*: A genus of Coleopterous insects. Family, Lamellicornes.

\* **ci-r-cên-si-al**, † **ci-r-cên-si-an**, a. [Lat. *circensis* = pertaining to the circus: *ludii circensis* = the games in the Circus Maximus at Rome.] Pertaining to the Circus Maximus, or to the games precised in the Roman Amphitheatre.

**ci-r-ci-næ**, s. pl. [From Gr. *κίρκος* (*kirkos*) = a kind of falcon which flies in wheels or circles. Probably *Accipiter Nisus*, the Sparrowhawk. This is not the Circus of modern ornithologists.]

*Ornith.*: A sub-family of Falconidæ, containing the Harriers. [CIRCUS.]

**ci-r-ci-nal**, a. [Fr. *circinal*; Lat. *circinus*; Gr. *κίρκινος* (*kirkinos*) = a circle.]

*Bot.*: An epithet applied to leaves of plants rolled up in a spiral manner downwards, the tip being in the centre; used in reference to foliation or leafing, as in ferns. (*Gray*.)

\* **ci-r-ci-n-äte**, vt. [Lat. *circinatus*, pa. par. of *circino* = to make round; Gr. *κίρκινος* (*kirkinos*) = a circle.] To form into a circle, to make a circle round, to encircle, to encompass.

**ci-r-ci-n-äte**, a. [Lat. *circinatus*, pa. par. of *circino* = to make round.]

1. *Ord. Lang.*: Round, in a circle; encircled.

2. *Bot.*: The same as *Circinal* (q.v.).

"The manner in which the young leaves are arranged within the leaf-bud is called foliation or vernation. . . . The vernation . . . of the ferns and cycas is *circinata*."—*Lindley: Intrad. Bot.*, b. 1, sect. 2, § 1.

\* **ci-r-ci-n-ä-tion**, s. [Lat. *circinatio*, from *circinus* = a circle, a pair of compasses.] An orbicular motion, a turning round, a measuring with the compasses. (*Batley*.)

**ci-r-ci-nüs**, s. [Lat. = a circle, a pair of compasses.]

*Astron.*: The Compasses, a constellation near the South Pole, lying between Norma and Musca Australis.

**ci-r-cle**, \* **cer'-cle**, \* **ser'-cle**, s. [A.S. *circol*, *circul*; Fr. & Prov. *cercle*, *sercle*; Sp. & Port. *circulo*, from Lat. *circulus*, dimin. of *circus* = a circle; Gr. *κίρκος* (*kirkos*) = a circle, a ring.]

A. *Ordinary Language*:

1. *Literally*:

1. In the same sense as B. 1.

2. A ring, a round figure or mark.

"And aft with water which she kept  
She made a sercle about him thrice."  
*Gower*, li. 264.

3. A round body, a globe, orb, or sphere.

"It is he that sitteth upon the circle of the earth."  
—*Isaiah* xl. 22.

\* 4. A ring, a circlet.

"A golden cercle in the noethrills of e sow."  
—*Wycliffe: Prov.* xl. 22.

\* 5. A coronet or hand worn round the helmet.

"He carle awaye with myght and mayne  
The cerles that sat upon his crowne."  
*Boudan of Babylon*, 1182.

"A great magician obscured in the circle of the forest."  
—*Shakespeare: As You Like It*, v. 4.

7. A district, a territory.

† \* *Circles of the Holy Roman Empire*: Such provinces and principalities as had a right to

be present at the diets. They were ten in number

8. A number of persons standing or seated in a ring.

" . . . announced to the splendid circle assembled round the font . . ."—*Macaulay: Hist. Eng.*, ch. xiv.

9. An assembly generally.

10. Any series ending as it begins, and perpetually repeated; a cycle, a succession.

"There be fruit trees in hot countries, which have blossoms and young fruit, and young fruit and ripe fruit, almost all the year, succeeding one another; but this circle of ripening cannot be but in succulent plants and hot countries."—*Bacon*.

II. *Figuratively*:

1. A sphere of acquaintance; a class or division of society.

"In private society he [Mr. Canning] was amiable and attractive, though, except for a very few years of his early youth, he rarely frequented the circles of fashion. . . ."—*Brougham*.

\* 2. Circumlocution; indirectness of language.

"Has he given the lyse  
In circle, or oblique, or semicircle?"  
*Fletcher: Queen of Corinth*.

B. *Technically*:

1. *Geometry*:

(1) A plane figure defined by a curved line which is its circumference, every point in which is equally distant from a certain point within the circle, called its centre. (CENTRE.) A straight line drawn from the centre of a circle to its circumference is called a radius, and a straight line drawn through the centre and terminated both ways by the circumference is called the diameter of a circle. The space enclosed within the circumference is called the area of the circle. The circumference of a circle is to its diameter as about 3.14159 to 1. For the quadrature of the circle see QUADRATURE.

\* (2) The curved line defining such figure; the circumference.

2. *Logic*: An inconclusive and deceptive line of argument, in which two or more statements are brought forward to prove each other, i.e., the first proposition is assumed as proved by that which follows it, and the second again is assumed from that which precedes it.

3. *Astron.*: An instrument of observation, the limb of which is graduated to 360° and forms a complete circle. There are several kinds: a *mural circle*, one affixed to a wall; a *transit circle*, one fitted with a telescope on an axis, and mounted in the plane of the meridian; a *reflecting circle*, one working by reflection, as a sextant; a *repeating circle*, one repeating the angle several times continuously along the limb. (See these words, and also ALTITUDE, AZIMUTH, CIRCUMFERENTOR.)

4. *Archæol.*: The name given to one of the megalithic remains, as at Stonehenge, Avebury, and other places. (*Gwilt*.)

5. *Vehicles*: The fifth wheel of a carriage.

¶ (1) *Circle of altitude*:

*Astron.*: A circle parallel to the horizon, having its pole in the zenith.

(2) *Circle of curvature*: That circle the curvature of which is equal to that of any curve at a certain point. Called also the *Circle of equi-curvature*.

(3) *Circles of declination*: Great circles intersecting each other in the poles of the world.

(4) *Circles of excursion*: Circles parallel to the ecliptic, and at such a distance from it (usually 10°), as that the excursions of the planets towards the poles of the ecliptic may be within them.

(5) *Circle of illumination*: A circle passing through the centre of a planet perpendicular to a line drawn from the sun to the respective body. This is supposed to separate the illuminated part from the unilluminated, which it does nearly.

(6) *Circles of latitude*:

(a) *Astron.*: A great circle perpendicular to the plane of the ecliptic, passing through its poles.

(b) *Spherical projection*: A small circle of the sphere whose plane is perpendicular to the axis.

(7) *Circles of longitude*: Lesser circles parallel to the ecliptic, diminishing as they recede from it.

(8) *Circle of perpetual apparition*: One of the lesser circles parallel to the equator, described by any point of the sphere touching the northern point of the horizon, and carried

bell, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -iug. -cian, -tian = shan. -tion, -sion = shün. -tion, -sion = zhün. -tions, -sions, -cions = shüs. -cle, -tre, &c. = epl, tär.

about with the diurnal motion. All the stars within this circle never set.

(9) *Circle of perpetual occultation*: A lesser circle parallel to the equator, and containing all those stars which never appear in our hemisphere. The stars situated between the circles of perpetual apparition and perpetual occultation alternately rise and set at certain times.

(10) *Circle of the sphere*: A circle upon the surface of the sphere, called a great circle when its plane passes through the centre of the sphere; in all other cases a small circle.

A great circle of a sphere is one whose centre coincides with that of the sphere, and which therefore divides the sphere into two equal parts.

(11) *Circle of Willis*: An anastomosis between the primary trunks of the arteries of the brain, to equalize and carry on the circulation of blood in the brain when an obstruction to one of the main trunks occurs. It encloses a space somewhat of an oval figure, within which are found the optic nerves, the tuber cinereum, the infundibulum, the corpora mammillaria, and the interpeduncular space. (Todd & Bowman: *Physiol. Anat.*, vol. 1., ch. 10, p. 294.)

(12) *Astronomical Circle*:

*Astron. Instrum.*: The name given to any one of the instruments designed to be used for measuring angles of altitude or zenith distance. [MURAL CIRCLE, TRANSIT CIRCLE, ALTITUDE, and AZIMUTH INSTRUMENT.]

(13) *Diurnal Circles*: Supposed to be described by the several stars and other points in the heavens in their apparent diurnal rotation round the earth.

(14) *Horary Circles (Dialling)*: The lines on dials which show the hours.

(15) *Polar Circles*: Immovable circles, parallel to the equator, and at a distance from the poles equal to the greatest declination of the ecliptic.

(16) *Reflecting Circle*: [SEXTANT.]

(17) *Repeating Circle*: [REPEATING.]

(18) *Transit Circle*: [TRANSIT.]

† Crabb brings into comparison the words a circle, a sphere, an orb, and a globe. Without adverting further to his views, it may be simply added that a circle, mathematically viewed, is a plane figure; while a sphere, an orb, and a globe are solids. It is, we think, from arbitrary usage and not for a deeper reason that we speak of the circle of one's friends, and the sphere of one's activity.

**circle-iron, s.**

1. A hollow punch for cutting planchets, wads, wafers, and circular blanks.
2. The fifth wheel of a carriage; the iron circle between the fore-axle and the body.

\* **circle-learning, s.** An encyclopædia. [Trench: *English Past and Present*, p. 81.]

**circle-like, \* cerclelyk, a.** Like or resembling a circle: round, circular.

"Cerclelyk shappe is most perfite figure."  
Ocellus: *De Reg. Princ.*, 5, 107.

\* **gir'-cuat, a.** [Lat. *circuitus*.] Encircled, surrounded.

\* **gir'-cûe, v.t.** [Lat. *circueo* or *circueo* = to go round; *circum* = around, about; *eo* = to go.] To make a circuit of, to visit.

"He then vssayed and circued his lands in ministrying iustices to all person."  
Fabyan, l. 84.

\* **gir'-uit, \* gyro'-ute, s.** [Fr. & Prov. *circuit*; Ital., Sp., & Port. *circuito*, from Lat. *circuitus*, from *circueo* or *circueo* = to go around, from *circum* = around, and *eo* = to go.]

**A. Ordinary Language:**

**I. Literally:**

1. The act of revolving or moving round anything.

"... carried along with him in his periodical circuit round the sun."  
Watts: *On the Mind*.

2. The place enclosed in a circle; an enclosure.

"A woody mountain, whose high top was plain,  
A circuit wide inclosed."  
Milton: *P. L.*, VIII. 304.

3. Space, extent, circumference.

"This towne is grete in opprete and of small defence."  
Berners: *Froissart*, II. 62.

- \* 4. That which encircles anything; a ring, a crown.

"Until the golden circuit on my head  
Do calm the fury of this mad-brain'd flaw."  
Shakesp.: *3 Hen. VI.*, II. 1.

5. The act of visiting certain places for the purpose of inspection. [B. 1. (1a).]

6. A number of scattered churches or congregations ministered to and successively visited by one clergyman. [AMERICAN.]

† **Circuit-rider**: A clergyman who performs such duty, which occurs only in sparsely settled districts.

† **Divinity-circuit**: *Bookbinding*: A flexible cover, generally of leather, which projects beyond and folds over the edges of a Bible or other book, thus protecting it from wear.

**II. Fig.:** Circumlocution.

"... (as by long circuit of deduction it may be that even all truth out of any truth may be concluded)..."  
Hooker: *Ecol. Pol.*, II. II. II, ch. 1, § 2.

**B. Technically:**

**1. Law:**

(1) The periodical visitations of the circuit judges, both State and national.

(2) The district or section of the country thus visited.

\* (3) A longer course of proceedings than is actually necessary for the recovery of anything sued for.

2. *Path.*: The period or course of a disease. (Dunglison.)

3. *Elect.*: A continuous electrical communication between the poles of a battery. In telegraphy the wires and instruments forming the road for the passage of the current. At its extremities are the terminals, where it joins the instrument. A *metallic circuit* is when a return wire is used instead of the earth. A *short circuit* is one having as little resistance as possible; nothing but the apparatus and the wire used to connect it with the battery. To *short circuit a battery* is to connect its poles by a wire. A *local circuit* includes only the apparatus in the office. (Knight.)

† **Voltaic or Galvanic Circuit or Circle**: A continuous electrical communication between the two poles of a battery; an arrangement of voltaic elements, or couples, with proper conductors, by which a continuous current of electricity is established.

**circuit-breaker, s.**

*Telegraphy*: An instrument which periodically interrupts an electric current. (Knight.)

**circuit-closer, s.**

*Telegraphy*: A device by which an electrical circuit is closed; usually a key, as the telegraph key. In fire-alarms and many automatic telegraphs it consists of a plain metallic disk, with insulated spaces on the rim or edge. (Knight.)

**Circuit Court, s.**

*Law*: A court to which the judges make stated visits.

† The United States is divided into nine circuits, one for each justice of the Supreme Court. Two justices are appointed to each circuit, who, with the Supreme Court justice for that circuit, constitute a Circuit Court of Appeals. In the various States the formation and functions of the Circuit Courts are varied, being regulated by the statutes of each State maintaining such courts.

**circuit judge, s.**

*Law*: A judge or justice of a Circuit Court, whether State or national.

\* **gir'-uit, v. i. & t.** [CIRCUIT, s.]

**A. Intrans.**: To move in a circle, to revolve, to pass round.

"The cordial cup... quick circuiting."  
J. Phillips.

**B. Trans.**: To go or travel round, to visit periodically for purposes of inspection.

"Geryon, having circuiteid the air."  
T. Watson.

\* **gir'-uit-ër, v. i.** [CIRCUITER, s.] To go on circuit.

\* **gir'-uit-ër, \* gir'-uit-er, s.** [Eng. *circuit*; -er, -er.]

1. *Ord. Lang.*: One who travels or goes round on a circle or circuit.

"Like you fellow circuiter the sun, you travel the round of the earth, and behold all the iniquities under the heavens."  
—Pope.

2. *Law*: One who goes on circuit.

\* **gir'-uit-ër-ing, pr. par. a., & s.** [CIRCUITEER, v.]

**A. As pr. par.:** (See the verb).

**B. As adj.:** Going round on circuit.

"The big-wig'd circuiter Judge."  
Coxman: *Poet. Vagaries*, p. 122.

**C. As subst.:** The act or practice of going on circuit.

"Now to return to his lordship, and his circuiter-ing."  
North: *Life of Lord Gullford*, I., 261.

\* **gir'-u-i-tion, s.** [Lat. *circuito*, *circumitto*, from *circueo* = to go round; *circum* = round, *eo* = to go.]

1. *Lit.*: The act of going round or compassing.

2. *Fig.*: Circumlocution, indirectness, or vagueness of language.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camel, hër, thère; pine, pît, sire, sir, marine; gô, pôê, or, wôre, wôlf, wôrck, whê, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; try, Sÿrian. æ, œ = ê. ey = â. qu = kw.

**circ-ū-it-ōis**, a. [Low Lat. *circuitosus*, from *circuitus* = a going round.] Having the quality of moving or going round in a circuit; indirect, roundabout. (*Burke*.)

**circ-ū-it-ōis-lý**, adv. [Eng. *circuitously*; -ly.] In a circuitous or indirect manner, in a circuit.

"He seeks *circuitously* to reach him through the people."—*Trench: Miracles*, No. xx.

**circ-ū-it-ý**, \***circ-ū-i-te**, s. [Lat. *circuitus*.] [CircuIT.]

**A. Ordinary Language:**

**I. Literally:**

1. The act of moving or going round in a circle.
2. A tendency to assume a circular form or state; the state of being circular.

"The characteristic property of running water is progress, of stagnant is *circuity*."—*Whateley: Observations on Modern Gardening*, p. 67.

**3. Compass, extent, circuit.**

"A dominion of much more large and ample *circuits* than the same which he was Lord of before."—*Edw. 4: Apoph. of Erasmus*, p. 220.

**II. Fig.: Circumlocution, a beating about the bush.**

"Very clear it is, in the prophecy, without all *circuity*, noting, naming, and in a manner pointing to it."—*Andrews: Sermons*, l. 137.

**\* B. Law (circuity of action):** The taking a longer course than requisite in proceeding to recover anything sued for. (*Wharton*.)

**\* circ-ū-la-ble**, a. [Eng. *circul(ate)*; -able.] That may be circulated; capable of being circulated.

"Bills of exchange, therefore, put in circulation the fixed property of nations. They render the houses and streets of Edinburgh, the acres and forests along Susquehanna, *circulable* in London or Amsterdam."—*Taylor: Annual Review*, l. 387.

**circ-ū-lar**, a. & s. [Fr. *circulaire*; Prov. *circular*; Lat. *circularis*, from *circulus* = a little circle.]

**A. As adjective:**

**I. Ordinary Language:**

**1. Literally:**

- (1) Of or pertaining to a circle; of the shape of a circle.
- (2) Revolving, moving in a circle, successive, recurring.

"From whence the innumerable race of things By *circular* successive order springs."—*Boscommon*.

(3) Cyclic; pertaining to or connected with a cycle of events.

"Had Virgil been a *circular* poet, and closely adhered to history, how could the Romans have had Dido?"—*Dennis*.

**\* 2. Fig.: Perfect, complete.**

"In this, sister, Your wisdom is not *circular*."—*Masinger: Emperor of the East*, III. 2.

**II. Technically:**

**1. Comm. & Diplomacy:** Addressed in identical terms to a circle or number of persons. [CIRCULAR-LETTER.]

**2. Logic:** Returning to the same point; arguing in a circle; inconclusive, incomplete.

"One of Cartes's first principles of reasoning, after he had doubted of every thing, seems to be too *circular* to safely build upon; for he is for proving the being of God from the truth of our faculties, and the truth of our faculties from the being of a God."—*Baker: Reflections on Learning*.

**B. As subst.:** A letter or communication addressed in identical terms to a circle or number of persons.

"The Government loudly proclaims to Europe reforms for Poland. It informs the various courts of them by diplomatic *circulars*."—*Edwards: Polish Captivity*, vol. II, ch. 1.

**circular-arc**, s. Any part of the circumference of a circle.

**circular-bolt**, s. A machine employed by the lace-manufacturers in Nottingham in making net. (*Knight*.)

**circular buildings**, s. pl.

*Arch.*: Such as are built on a circular plan. When the interior is also circular, the building is called a rotunda. (*Gwill*.)

**circular canon**, s.

*Music*: A canon closing in the key one semitone above that in which it commences. Twelve repetitions of it would take it through all the known keys. (*Stainer & Barrett*.)

**circular crystals**, s. pl. This term has been applied to the flattened group of radiating, crystalline needles formed by many salts

and other crystalline substances. (*Micrographic Dict.*)

**circular file**, s. A circular saw or serrated disk, adapted to run on a spindle or mandril, and used in cutting the teeth of cog-wheels. (*Knight*.)

**circular head**, a

*Arch.*: The arch or bow of a door or window.

**circular instruments**, s. pl. Astronomical, nautical, or surveying instruments, which are graduated to 360°, that is, around the whole circle. (*Knight*.)

**circular iron-clad**, s.

*Naut.*: An iron-clad war vessel of circular form. The original suggestion of such a type of vessel was made by Mr. E. J. Reed, formerly constructor of the British navy, but the first actually built was by direction of the Russian Admiral, Popoff, and it was called in consequence a Popoffka.

**circular-letter**, s.

**1. Banking:** A letter of credit addressed to several bankers in other countries in favour of a certain person named therein.

"It never was known that *circular letters*. By humble companions were sent to their betters."—*Swift to Sheridan*.

**2. Comm. & Diplomacy:** A circular.

**circular lines**, s. pl.

*Math.*: Lines of sines, tangents, secants, &c.

**circular-loom**, s. A loom in which a shuttle moves in a circular race, and continuously in one direction, through warps arranged in a circle. (*Knight*.)

**circular-micrometer**, a. An annular form of the micrometer first suggested by Boscovich in 1740, and afterwards revived by Olbers in 1798. (*Knight*.)

**circular muscle or circular fibres** (of Santorini).

*Anat.*: A series of circular involuntary muscular fibres wholly surrounding the membranous portion of the urethra.

**circular-note**, s. The same as *Circular-letter* (q. v.).

**circular numbers**, s. pl.

*Arith.*: Those numbers all the powers of which terminate in the same digits as the numbers themselves. Thus all the powers of 5 terminate in 5.

**circular parts**, s. pl. Five parts of a right-angled or a quadrantal spherical triangle; they are the legs, the complement of the hypotenuse, and the complements of the two oblique angles. (*Craig*.)

**circular polarization**, s.

*Phys.*: In the undulatory theory of light a supposed circular rotation of the particles of ether in certain media, when a pencil of plane polarized light is allowed to pass through these media. (*Craig*.)

**circular roofs**, s. pl.

*Arch.*: Such as have the horizontal sections circular.

**circular-sailing**, s.

*Naut.*: The act or system of sailing on the arc of a great circle.

**circular-saw**, s. [SAW.]

**circular shears**, s. A shears for sheet-metal, consisting of two circular blades on parallel pins. (*Knight*.)

**circular-shuttle box-loom**, s. A loom having a box with a number of shuttles, and having means for actuating it so as to bring any one of the shuttles into operation as required by the pattern. (*Knight*.)

**circular sinus**, s.

*Anat.*: A ring-like sinus placed superficially round the pituitary body in the dura mater of the brain, forming a communication between the two cavernous sinuses. It is also called a Coronary sinus.

**circular or cylindro-cylindric work**, s.

*Arch.*: A term applied to any work which is formed by the intersection of two cylinders whose axes are not in the same direction. The line formed by the intersec-

tion of the surfaces is termed, by mathematicians, a line of double curvature. (*Gwill*.)

**circ-ū-lār-i-tý**, s. [Low Lat. *circularitas*, from *circularis* = round, from *circulus* = a circle.]

**I. Ordinary Language:**

**1. The quality or state of being circular.**

**\* 2. That which is circular.**

"The heavens have no diversity or difference, but a simplicity of parts, and equiformity in motion, continually succeeding each other; so that, from what point soever we compute, the account will be common unto the whole *circularity*."—*Brown*.

**\* II. Logic:** Reasoning in a circle; incompleta or inconclusive reasoning.

**circ-ū-lār-lý**, adv. [Eng. *circularly*; -ly.]

**1. In form of a circle.**

**2. With a circular or revolving motion.**

**3. By circular reasoning; indirectly, in a circle.**

"To argue *circularity*."—*Baxter: Inf. Eapt.*, p. 33.

**\* circ-ū-lār-ness**, s. [Eng. *circularly*; -ness.] The quality of being circular, roundness, circularity.

"In forms . . . it doth pretend to some *circularity*."—*Fuller: Worthies*; *Warwick*, II. 402.

**\* circ-ū-lār-ý**, a. [Eng. *circularly*; -y.] Circular, ending in itself, inconclusive.

"Which rule must serve for the better understanding of that, which Damascene hath, touching cross, and *circularity* speeches, wherein there are attributed to God such things as belong to manhood, and to man such as properly concern the duty of Christ Jesus."—*Hooker: Sac. Pol.*, v. § 63.

**circ-ū-lāte**, v. t. & i. [Lat. *circulatus*, pa. per. of *circulo* = to move in a circle.]

**A. Intransitive:**

**I. Ordinary Language:**

**1. Lit.:** To move in a circle, to revolve, to move round and return to the same point.

**2. Fig.:** To be spread about, to move from place to place, or from person to person, or from hand to hand.

"As the mints of calumny are perpetually at work, a great number of curious inventions, issued out from time to time, grow current among the party, and circulate through the whole kingdom."—*Addison*.

**II. Technically:**

**1. Metal.:** To chase, to beat out.

**2. Anat.:** To traverse the arteries and veins of the body. [CIRCULATION.]

**B. Transitive:**

**I. Ordinary Language:**

**1. Literally:**

(1) To cause to move from place to place, to put into circulation.

"In the Civil War the money spent on both sides was *circulated* at home."—*Swift*.

(2) To travel or move round.

"May I not conclude for certain that this man hath been in the moon, where his head hath been indicated with *circulating* the earth."—*Bishop: Croft*, 1665.

**2. Fig.:** To spread abroad, to disseminate.

"This pointed sentence was *fast circulated* through town and country, and was soon the watchword of the whole Tory party."—*Macaulay: Hist. Eng.*, ch. iv.

**II. Metal.:** To beat out, to chase.

¶ For the difference between *to circulate* and *to spread*, see SPREAD, v.

† **circ-ū-lāte**, s. [CIRCULATE, v.]

*Arith.*: A circulating decimal is sometimes so called. (*Buchanan*.)

**circ-ū-lā-ting**, pr. par., a., & s. [CIRCULATE, v.]

**A. As pr. par.:** (See the verb.)

**B. As adjective:**

**1. Ori. Lang.:** Moving in a circle, returning to itself, revolving.

**2. Finance:** Current, passing from hand to hand, constituting currency.

**C. As subst.:** The act of passing or the state of being passed from hand to hand or from person to person; circulation.

**circulating decimal**, s. A decimal which cannot be expressed with perfect exactness in figures, and when to approximate to accuracy the decimal is taken to many places, it is found that the same series of figures is repeated again and again *ad infinitum*. The figures thus repeated are called the period of the circulating decimal. Thus  $\frac{2}{7} = 0.2857142857142857$ , &c., of which the period is 142857.

"A circulating decimal that goes on repeating itself for ever."—*Times*, Sept. 9, 1864.

**circulating library, s.** A library, the books contained in which are circulated by loan amongst the subscribers. The first established in England was at Salisbury by Samuel Fancourt, a dissenting minister, but it was not successful. The first in London was in 1748. The Astor Library in New York, the Boston Public Library, and the Philadelphia and Mercantile Libraries in Philadelphia, are among the largest in this country.

**circulating medium, s.** The medium of exchanges or of sale and purchase, whether it be gold, silver, paper, or any other article. The term, which is used by all economical writers as synonymous with currency, came into common use in the last decade of the eighteenth century. [MEDIUM.]

"Circulating medium is more comprehensive than the term money, as it is the method of exchanges, or purchases, and sales, whether it be gold or silver coin, or any other article."—*Wharton: Law Lexicon*.

**circulating-pump, s.** The cold-water pump, by which condensation water is drawn from the sea, river, or well, and driven through the casing of a surface condenser. (Knight.)

**circ-u-lā-tion, s.** [Fr. *circulation*; Lat. *circulatio*, from *circulus*, pa. par. of *circulo* = to move in a circle; *circulus* = a circle.]

**A. Ordinary Language:**

**I. Literally:**

1. Motion in a circle, or in such a course that the moving body returns to the place whence it started; especially used of the circulation of the blood. [B. 1. (2).]

2. The act or process of spreading or causing to pass from hand to hand or from person to person. [B. 3.]

3. The state of being circulated or passed from person to person or from hand to hand. [B. 3.]

4. The extent to which anything is circulated.

"To increase the circulation of money, at least in banknotes."—*Bp. Burnet*.

**II. Figuratively:**

\* 1. A series, a succession.  
"... thou seest fit to deny us the blessing of peace and to keep us in a circulation of miseries."—*King Charles*.

\* 2. A reciprocal interchange of meaning.  
"The true doctrines of astronomy appear to have had some popular circulation."—*Whewel*.

3. The act or process of disseminating or spreading abroad.

**B. Technically:**

1. *Anat.*, *Animal Physiol.*, &c.: A movement of the blood throughout the human body. (For details see (2).)

(1) *Hist.*: The Spanish physician and theologian, Michael Servetus, whose end was so tragic, gained in 1553 some glancing perception of the lesser or pulmonary circulation of the blood. Cæsalpinus in 1559 made a further advance towards the truth, but it was reserved for the immortal Harvey actually to make the great discovery, which he approached in 1615 and published with many details in 1628.

(2) *Physiol.*: The propelling force in the circulation of the blood is that of the heart, which is a hollow muscular organ placed in the centre of the sanguiferous system. The blood is driven by the heart into the aorta, and then circulated through the body by a set of vessels called arteries, which ramify into smaller and smaller tubes. [ARTERIES.] On reaching the extremities of the arteries it is driven through excessively fine tubes called, from their hair-like tenacity, capillaries. These, constituting the connecting channels between the arteries and the veins, afford it a passage into the latter vessels, by which it is conducted back to the heart. The heart is divided internally into four cavities, two at its base called auricles, and two at its body and apex called ventricles. The right is the venous side of the heart; it receives into its auricle the venous blood from every part of the body by the superior and inferior vena cava and coronary vein. In passing from the arteries to the veins the blood had lost its red color and acquired a dark hue; it is therefore discharged by the right auricle into the right ventricle, and thence transmitted along the pulmonary artery and its branches to the capillaries of the lungs, to be again brought in contact with the oxygen of the air. Returning

to the left auricle it is immediately discharged into the left ventricle, thence to the aorta, to be propelled through the body as before. The current of the blood through the body in general is called the *greater or systemic circulation*; that to and from the lungs the *lesser or pulmonary circulation*. (Quain, &c.) There is a circulation either of blood or of a fluid analogous to it in the inferior animals. For an example see that under No. 2.

2. *Veg. Physiol.*: The circulation of plants is not closely analogous to that in animals. Formerly it was believed that there was an ascending current of sap in spring, and a descending one in autumn. It is now found that both an ascending and a descending current coexist, and when need arises these are supplemented by horizontal currents passing between the tissues. The ascending current enters the leaves, where it is submitted to certain influences which fit it for the nutrition of the plant. The descending carries it thence in an elaborated condition back to the root. (Thomé, Brown, &c.) [CYCLOSIS, ROTATION, &c.]

"The nutrient fluid, however formed, is distributed throughout the textures of the plant, or animal, by vital or physical force, or by the junction of both; and the function, by which this is effected, is called *Circulation*. In plants this function is very simple and is formed without the agency of a propelling organ; but in the greatest number of animals, such as an organ, a heart, is the main instrument in the distribution of the blood. In animals then there is a true circulation, the fluid setting out from and returning to the same place. But in plants, the fluid is found to circulate or rotate, within the interior of cells, as in manuletting with that of the adjacent ones; or to pass up from the spongioles in an ascending current and to descend in another set of vessels. But in many simple animals, some cætesa for example, and polychæta, there is no good evidence of the existence of any circulation at all, their textures imbibing the fluid in which they live."—*Todd & Bowman: Physiol. Anat.*, vol. 1, introd., pp. 23, 24.

3. *Finance*: Currency, circulating coin, notes, &c. In its early stages commerce was carried on by a direct exchange of articles which were reciprocally wanted, and in this form it is usually called "barter" or sometimes "exchange." An intermediate merchandise was then introduced called "money," and transactions in which money is used are not called "barter" but "sales." . . . A transaction in which any commodity or service is exchanged for money, instead of an equivalent, has been well called by J. B. Say a *demi-exchange*. And the conveniences of this method of conducting commerce so greatly preponderate over those of direct exchange or barter, that commerce is now almost entirely resolved into these demi-exchanges or sales. And this is the proper meaning of the word *circulation*. Barter or exchange is where two services of any kind are exchanged directly. Sale or demi-exchange, or *circulation*, is when any service is exchanged for some intermediate merchandise, which will enable its owner to obtain some service in exchange for it at some future time. (Macleod: *Dict. of Pol. Econ.*)

"The weekly issue increased to sixty thousand pounds, to eighty thousand, to a hundred thousand, and at length to a hundred and twenty thousand. Yet even this issue, though great, not only beyond precedent, but beyond hope, was scanty when compared with the demands of the nation. Nor did all the newly-stamped silver pass into circulation."—*Maccarty: Hist. Eng.*, ch. xxii.

¶ *Circulation of a newspaper, journal, or magazine*: The number of copies of each issue printed and sold.

**circ-u-lā-tive, a.** [Formed by analogy from Lat. *circulatus*, pa. par. of *circulo*.] Circulating; causing or contributing to cause circulation.

"The movements impressed upon it by the circulation powers."—*Todd & Bowman: Physiol. Anat.*, vol. 1, ch. iii., p. 76.

**Circulative animals:**

*Zool.*: The name given by Oken to the Mollusca.

**circ-u-lā-tōr, a.** [Lat. *circulator* = a mountebank, a charlatan.]

**I. Ordinary Language:**

1. *Lit.*: One who circulates or puts in circulation.

\* 2. *Figuratively*:

I. Literally:  
1. That which stands round or is attached to another.  
\* (1) Of material things: An adjunct, an accessory.

"The hollow orb of moving circumstance Roll'd round by one fix'd law." Tennyson: The Palaces of Art.

(2) Of immaterial things: Any matter or fact attending on or connected with another; an attendant state of things.

"That it is a known rule amongst all divines, that no certain argument can be drawn from the circumstances of a parable, but only from the main scope and intention of it."—Tillotson (2d ed., 1723, vol. I. Ser. xix.

¶ Hence the phrases:  
In (or under) the circumstances: Taking into consideration all matters connected with that in question; all things being considered.

According to circumstances: In a manner varying according to or dependent on attendant matters.

2. A fact, an event, a particular incident or detail.

†3. Details, minutiae.

". . . they are too full of circumstances and details." Lewis: Creed, Early Roman Hist. (1854), ch. xii., pt. I., § 15, vol. II., p. 56.

¶ (1) Crabb thus distinguishes between a circumstance and a situation: "Circumstance is to situation as a part to a whole; many circumstances constitute a situation; a situation is an aggregate of circumstances. A person is said to be in circumstances of affluence who has an abundance of everything essential for his comfort; he is in an easy situation when nothing exists to create uneasiness. Circumstance respects that which externally affects us; situation is employed both for the outward circumstances and the inward feelings. The success of any undertaking depends greatly on the circumstances under which it is begun; the particular situation of a person's mind will give a cast to his words or actions. Circumstances are critical, a situation is dangerous."

(2) He thus discriminates between circumstance, incident, and fact: "Circumstance is a general term; incident and fact are species of circumstances. Incident is what happens; fact is what is done; circumstance is not only what happens and is done, but whatever is or belongs to a thing. To everything are annexed circumstances either of time, place, age, colour, or other collateral appendages which change its nature. Everything that moves and operates is exposed to incidents, effects are produced, results follow, and changes are brought about; these are incidents: whatever moves and operates does, and what it produces is done or is the fact. . . . Circumstance is as often employed with regard to the operations as the properties of things, in which case it is most analogous to incident and fact: it may then be employed for the whole affair, or any part of it, whatever that can be distinctly considered. Incidents and facts either are circumstances, or have circumstances belonging to them. . . . Circumstance comprehends in its signification whatever may be said or thought of any thing; incident carries with it the idea of whatever may befall or be said to befall any thing; fact includes in it nothing but what really is or is done. A narrative therefore may contain many circumstances and incidents without any fact, when what is related is either fictitious or not positively known to have happened: it is necessary for a novel or play to contain much incident, but no facts, in order to render it interesting; history should contain nothing but facts, authenticity is its chief merit." (Crabb: Eng. Synon.)

\*q̄ir-cūm-staņce, v.t. [CIRCUMSTANCE, a.] To place in a certain situation or position relatively to other things.

"I must be circumstanced."—Shakespeare: Othello, III. 4.

"It beams fly to visit the remotest parts of the world, and it gives motion to all circumstant bodies." Digby: On the Soul.

B. As subst.: One who stands by; a bystander.

"When these circumstant shall but live to see . . ." Herrick: Hesperides, p. 82. (Davies.)

\*q̄ir-cūm-stānt-ial (tial as shall), a. & s. [Fr. circonstanciel; Lat. circumstantialis = pertaining to circumstances.]

A. As adjective:

I. Ordinary Language:  
1. Of things:  
(1) Dependent on circumstances; accidental.

"Would you learn at full How passion runs thro' circumstantial grades Beyond all grades devalued." Tennyson: The Gardener's Daughter.

(2) Incidental, accidental, not essential.

(3) Full of small circumstances or minutiae; particular, precise, minute.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pit, sire, sir, marine; gō, pēt, or, wōre, wōlf, wōrk, whā, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. se, ce = e. ey = a. qu = kw.

"The whole account, from the first appearance of Cleopatra in the popular assembly, to the trial of the counsels, is given with circumstantial minuteness."—*Scott: Cred. Early Roman Hist.* (1853), ch. xli. pt. iii. § 44, vol. II, p. 190.

- \*(4) Full of pomp or show.
- "... and leave all the circumstantial part and pomp of life..."—*Pope: Letter to M. Cromwell* (1710).
- \*2. Of persons: With an excessive attention to small events and details; precise, punctilious.

**II. Law:** Inferred from circumstances deduced indirectly, not by direct proof.

**Circumstantial evidence:** Evidence obtained from circumstances, which necessarily or usually attend facts of a particular nature, from which arises presumption; any evidence not direct and positive. A light, i. e. slight presumption, has no weight or validity. A presumption of any kind is relied on only till the contrary has been proved. Still a probable presumption has considerable weight, and a violent one, that is one in which those circumstances appear which necessarily attend the fact, in many cases held equal to full proof. (*Blackstone*, bk. iii, ch. 23.)

"... what is popularly known as circumstantial evidence. No doubt, circumstantial evidence, when perfect, is the highest of all evidence..."—*Times*, Dec. 2nd, 1875.

\*Crabb thus distinguishes between circumstantial, particular, and minute. "Circumstantial expresses less than particular, and that less than minute. A circumstantial account contains all leading events; a particular account includes every event and movement however trivial; a minute account omits nothing as to person, time, place, figure, form, and every other trivial circumstances connected with the events. A narrative may be circumstantial, particular, or minute; an inquiry, investigation, or description may be particular or minute, a detail may be minute. An event or occurrence may be particular, a circumstance or particular may be minute. We may be generally satisfied with a circumstantial account of ordinary events; but whatever interests the feelings cannot be detailed with too much particularity or minuteness." (*Crabb: Eng. Synon.*)

**B. As subst.:** Anything incidental or not essential to the main subject (generally in the plural).

"Who would not prefer religion that differs from our own in the circumstantial, before one that differs from it in essentials?"—*Addison: Preacher*. (*Latham*.)

"Let me add another hint, concerning the apparatus and circumstantialities of your play."—*Pope: To A. Kill* (1738).

**ċir-ċum-stān-tial-ī-tŷ** (tial as shī-āi), *a.* [Eng. circumstantial; -īty.]

- \*1. The quality or state of being circumstantial or dependent on circumstances.
- 2. Minuteness, extreme attention to details.

**ċir-ċum-stān-tial-lŷ** (tial as shal), *adv.* [Eng. circumstantial; -ly.]

- \*1. According to circumstances; in a manner dependent on circumstances.
- "Of the fancy and intellect, the powers are only circumstantially different."—*Glanville: Scopsia*.
- 2. With extreme minuteness and attention to details; minutely.
- "Lucien agrees with Homer in every point circumstantially."—*Broomer*.

**ċir-ċum-stān-tiate** (tiate as shī-āte), *v.t.* [Formed from circumstance (q.v.), with verb. suff. -ate.]

- \*1. To place in particular circumstances, state, or condition.
- "A number... the best circumstantial are for the succession of Hanover."—*Swift*.
- 2. To prove by circumstances, to enter into details concerning.

"Neither will time permit to circumstantiate these particulars, which I have only touched in the general."—*State Trials; Marquis of Argyll* (1661).

**ċir-ċum-stān-tiate** (tiate as shī-āte), *a.* [CIRCUMSTANTIATE, *v.*] Circumstantial, attended with circumstances.

"The distinct, particular, circumstantiate repentance of a whole life..."—*Jeremy Taylor: Rule and Exercises of Holy Dying*, p. 64.

**ċir-ċum-stān-ti-lŷ**, *adv.* [Eng. circumstant; -ly.] Circumstantially, exactly; in a circumstantial manner.

"A gentleman bareheaded and set on knees, with a knife properly prepared to that use, also with certain gestures, cuttes under certain parts of the wild beast, in a certain order, very circumstantially."—*Whalton: Phrasæ of Fole* (1577). (*Richardson*.)

**ċir-ċum-stġp-ā-ted**, *a.* [Lat. *circum* = about, around; *stġpatus* = attended.] Attended or surrounded.

"He was... circumstipated with his guards."—*North: Examen*, p. 228. (*Davis*.)

**ċir-ċum-tġr-rā-nġ-ġus**, *a.* [Lat. *circum* = around; *terraneus* = pertaining to the earth; *terra* = earth.] Situate or dwelling around the earth. (*Hallivell*.)

"A trout-stream circumundulated the grounds."—*Theodore Hook: Gilbert Gurney*.

**ċir-ċum-vāi-lāte**, *v.t.* [Lat. *circumvallatus*, *pa. par.* of *circumvallo* = to surround with a rampart; *circum* = around; *vallō* = to wall; *vallum* = rampart.] To surround or enclose with a rampart or fortifications.

**ċir-ċum-vāi-lāte**, *a.* [CIRCUMVALLATE, *v.*] Surrounded or enclosed with a rampart or similar formation.

†**Anat.:** Circumvallate or calyciform papillae of the tongue.

"Circumvallate or Calyciform papillae. A kind of papillae found on the tongue. They consist of a central flattened projection of the mucous membrane of a circular figure, and from one-twelfth to one-twelfth of an inch wide, surrounded by a tunate ring of about the same elevation, but less diameter, from which it is separated by a narrow circular fissure with, it is said, a few in mucous ducts opening at the bottom."—*Todd & Bowman: Physiol. Anat.*, vol. I, ch. 18, § 467.

**ċir-ċum-vāi-lā-tion**, *a.* [CIRCUMVALLATE.]

- 1. The act of throwing up fortifications round any besieged place.
- "The circumvallation is supposed to be continued for ten years."—*Lewis: Cred. Early Roman Hist.* (1853), ch. xii, pt. v, § 78, vol. II, p. 309.
- 2. The fortifications thrown up round a besieged place.

"But between him and the lines of circumvallation lay the army of Luxemburg..."—*Macaulay: Hist. Eng.*, ch. xli.

**ċir-ċum-vġe-tion**, *a.* [Lat. *circumvectio* = a carrying round or about, from *circum* = around, about; *vehō* = to carry.]

- 1. The act of carrying round or about.
- 2. The state or condition of being carried round.

**ċir-ċum-vġe-nġ**, **ċir-ċum-vġe-nġ**, *v.t.* [Fr. *circuvenir*; Lat. *circumvenio*.]

- 1. *Lit.:* To environ.
- "Thus war the enemys as circumvent in the middis of Romans, that name of thame had eschapi..."—*Belend: T. Iste*, p. 348.
- 2. *Fig.:* To circumvent.

**ċir-ċum-vġent**, *v.t.* [Lat. *circumvento* = to encompass, to deceive, from *circum* = around, and *vento* = to come. Compare our slang phrase "to get round" a person.]

\***A. Ordinary Language:**

**I. Literally:**

- 1. The act of rolling or turning about.
- "Stable without circumvolution."—*Mora: Song of the Soul*, III, ll. 38.
- 2. The state of being rolled or turned round.
- 3. Any thing rolled or turned round another.

"Consider the obliquity or closeness of these circumvolutions; the nearer they are, the higher may be the instrument."—*Willins*.

†**II. Fig.:** A winding about; artifice, circumvolution.

"He had neither time nor temper for sentimental circumvolutions."—*Disraeli: Coningsly*, bk. vi, ch. ii.

**B. Technically:**

- 1. *Anat.:* One of the sinuous elevations on the surface of the brain in the higher animals.
- 2. *Arch.:* The turns in the spiral of the Ionic capital, which are usually three. (*Guillt*.)

**ċir-ċum-vġolve**, *v.t. & i.* [Lat. *circumvolvo*, from *circum* = around, and *volvo* = to roll.]

**I. Transitive:**

- 1. To roll round or about; to revolve round.
- "So that whenever we circumvolve our eyes."—*Herrick; An Fletcher's Plays*.
- 2. To move round or about; to revolve round.

"... to ascribe each sphere an intelligence to circumvolve it, were unphilosophical."—*Glanville: Scopsia*.

**II. Intrans.:** To roll or turn round; to revolve.

"And slowly circumvolves the labouring wheel below."—*Darwin: Loves of the Plants*.

**ċir-ċum-vġolved**, *pa. par. or a.* [CIRCUMVOLVĒ.]

**ċir-ċum-vġolv-ġng**, *pr. par. or a.* [CIRCUMVOLVĒ.]

"This coat is safeguarded from sand and stealth by a defensive wall, so high as hinders the affrighting sight of a circumvolving wilderness."—*Sir T. Herbert: Travels*, p. 189.

**ċir-ċū** (1), *s.* [Lat. *circus*; Gr. *κίρκος* (*kirkos*) = a circle; Fr. *cirque*.] [CIRCLE.]

**I. Ordinary Language:**

- 1. A place of amusement in which feats of horsemanship and acrobatic displays are exhibited, the entertainment given.
- 2. An enclosure of whatever kind, "The narrow circus of my dungeon wall."—*Byron: Lament of Tasso*.
- 3. The performers or troupe in a circus.
- 4. A circular row of houses.

In ancient architecture the circus was a straight, long, narrow building, whose length to its breadth was generally as five to one. It was divided down the centre by an orna-

mented barrier called the spina, and was used by the Romans for the exhibition of public spectacles. Several existed at Rome, whereas the most celebrated was the Circus Maximus. The spectacles of the circus were called the Circusian Games (Cruilla). The circus was used not only for horse and chariot races, but wrestling, the castus, and other athletic games. It was noted for being the haunt of fortune-tellers.

II. Med.: A circular bandage. (Dunghison.)

**cir-ōūs** (2), s. [In Gr. κίρκος (kirkos) = a hawk, from its flying in circles.]

**Ornith.**: The Harrier, a genus of birds belonging to the family Falconidae, and constituting the typical genus of the sub-family Circine. The bill is moderate, the nostrils sub-oval, the tarsi elongated, the toes generally short, the third quill of the wings the longest, the sides of the head with a circle of feathers like the cap of the owls. Yarrell describes three British species, *Circus arvensis* (the Marsh Harrier), *C. cyaneus* (the Hen Harrier), and *C. montagu* (Montague's Harrier).

**cir-l**, s. [Ital. cirlo, from *ziriare*; Sp. *chirlar* = to twitter. Cf. Lat. *zinzibulo* = to chirp.] Etymologically it means a twitterer. It is not, however, used as an independent word, but only as the first element in the subjoined compound.

**cir-l-bunting, s.**

**Ornith.**: A species of bunting, the *Emberiza cir-lus*.

"The *Cir-l Bunting* is generally found on the coast, and does not appear to go far inland. . . . It is much more shy than the *Yellow Bunting*. The nest is usually placed higher above the ground than that of the *Yellow Bunting*. French *Yellow Ammer*, and *Rickthroated Yellow Ammer*, are the provincial names which have been applied to it. . . . In the northern counties the *Cir-l Bunting* is very rare. . . . The *Cir-l Bunting* is most numerous in the southern parts of the European continent."—*Farrall: British Birds*.

**cir-ō-grille, s.** [Lat. *choerogrillus*, from Gr. χοιρογρύλλιος (choirogryllios) χοιρος (cholos) = a young pig, and γρύλλος (gryllos) = pig.] The hyrax (q.v.) or coney.

"A *cir-grille* which cheweth code."—*Wycliffe: Lev. xi. 5.*

**cirque** (que as k), s. [Fr. cirque.] [CIRCUUS.]

I. Ordinary Language:

1. A circus, or circular erection.

"Vast and edgeways; like a dismal cirque Of Druid stones." Keats: *Hyperion*, l.

2. A circle.

II. Geol.: An encircling cliff. (Scrope.)

**cirque-couohant, a.** Lying or couching in a circle. (Keats: *Lamia*, l. 46.)

**cirr-**, [CIRRE-.]

**cir-rāto, a.** [Lat. *cirratu* = curled.] Having a cirrus or cirri.

**cirrate antennæ, s. pl.** Antennæ in which each joint is furnished with cirri, which are generally fringed with fine hairs.

**cir-rā-téd, a.** [Lat. *cirrus* = a curl.] Curled. (Woodward: *Fossil Shells*.)

**cirrh-**, pref. [See def.] A wrong but very common form of *cirr-*, from the mistaken notion that the Latin *cirrus* = a curl, represented a Gr. κίρρος (kirkhos), which is not found.

**cir-rhā-gra, s.** [Lat. *cirrus* = a curl, and Gr. *ἀγρα* (agra) = a seizure.]

**Med.**: Plica, a disease endemic in Poland, Lithuania, and other parts of Northern Europe, characterised by interlacing, twisting, and agglutination or matting of the hair.

**cir-rhā-tū-lūs, s.** [Lat. *cirrus* = a curl, a tendril; and Gr. *τύλος* (tylos) = a knot.]

**Zool.**: A genus of Annelida, in which the branchiæ consist of very long filaments, and

in which a series of long filaments are situated round the nape. (Craig.)

**cir-rhī-fēr-ōūs, a.** [CIRRIFFEROUS.]

**cir-rhī-form, a.** [CIRRIFORM.]

**cir-rhīg-ēr-ōūs, a.** [CIRRIEROUS.]

**cir-rhī-grāde, s.** [Lat. *cirrus* = a curl; *gradior* = to walk, move about.]

**Nat. Hist.**: Having the power of motion by the cirri, or hair-like appendages.

**cir-rhīs-ōm-ūs, a.** [Lat. *cirrus* = a curl; Gr. *σώμα* (sōma) = a body.]

**Ichthy.**: A genus of fishes, in which the sides of the body are furnished with cirriform processes. (Craig.)

**cir-rhī-tēs, s.** [Lat. *cirrus* = a curl.] A genus of fishes belonging to the Percide, or Perchea, with broad, oval, compressed bodies; pectoral fins, large round; the ventrals behind the pectoral, and the anal and dorsal apices very strong. (Craig.)

**cir-rhō-brān-chī-ā-ta, s. pl.** [Lat. *cirrus* = a curl, and Mod. Lat. *branchiata*, from Gr. βράγχιον (branchion) = a fin, a gill.]

**Zool.**: A group of Gasteropodous Mollusca, comprehending but one family, the Dentaliide.

**cir-rhō-pōde, s.** [Lat. *cirrus* = a curl, and Gr. *πούς* (pous), genit. *ποδός* (podos) = a foot.]

**Zool.**: The same as CIRRIPEDE (q.v.).

**cir-rhō-nōs-ūs, s.** [Gr. κίρρος (kirkhos) = yellow, and νόσος (nosos) = a disease.]

**Med.**: A disease of the foetus in which there is a yellow colouration of the serous membrane. (Dunghison.)

**cir-rhōse, a.** [Mod. Lat. *cirrhosus*, from Class. Lat. *cirrus* = a curl.] The same as CIRRHOS (q.v.).

**cir-rhō-sis, s.** [Gr. κίρρος (kirkhos) = yellow, and med. suff. *-osis* (q.v.).] A yellow colouring matter, sometimes secreted in the tissues, owing to a morbid process. (Dunghison.)

**cirrhosis hepatis, s.** A disease of the liver, in which it becomes smaller and firmer, commonly called "lob-niled" or "gin-drinker's liver."

**Cirrhosis of the Lung:** A disease of the lungs. (Dunghison.)

**cir-rhōt-ic, a.** [Formed on analogy of other words from *cirrhosis* (q.v.).] Affected with, or having the character of cirrhosis.

**cir-rhoūs, cir-rhōse, a.** [Lat. *cirrus* = a curl, a tendril.]

**Bot.**: Terminated by a spiral or flexuose, filiform appendage; as the leaf of *Gloriosa superba*. This is due to an elongation of a costa. (Lindley.)

**cir-rhūs, s.** [CIRRUUS.]

**cir-rī, s. pl.** [CIRRUUS.]

**cir-rī-bar-bī-næ, s. pl.** [Mod. Lat. *cirri-barbus*, and fem. pl. adj. suff. *-inæ*.]

**Ichthy.**: A sub-family of Blenniidae, distinguished by the lower jaw being larger than the upper. (Craig.)

**cir-rī-bar-būs, s.** [Lat. *cirrus* = a curl, and *barba* = a beard.]

**Ichthy.**: A genus of fishes belonging to the family Blenniidae, having the head and mouth furnished with numerous cirri. It constitutes the typical one of the sub-family Cirri-barbine.

**cir-rīf-ēr-ōūs, cir-rhīf-ēr-ōūs, a.** [Lat. *cirrus* = a curl, and *fero* = to bear.]

**Biol.**: Bearing cirri, tendrils, or claspers.

**cir-rī-form, cir-rhī-form, a.** [Lat. *cirrus* = a curl, and *forma* = a form.] Having the form of a tendril.

**cir-rīg-ēr-ōūs, a.** [Lat. *cirrus* = a curl, and *gero* = to bear, to carry.]

1. **Ord. Lang.**: Having the hair curly.

2. **Bot., Zool., &c.**: Having cirri or hair-like appendages.

**cir-rī-grāde, a. & s.** [From Lat. *cirrus* = a curl, and *gradior* = to go.]

A. **As adj.**: Moving by cirri. (Owen.)

B. **As subst.**: An animal moving by cirri. (Owen.)

**cir-rī-pēc-tūs, s.** [Lat. *cirrus* = a curl, and *pectus* = a breast.]

**Ichthy.**: A genus of fishes belonging to the family Blenniidae, furnished with a semicircle of filaments round the nape.

**cir-rī-pēde, cir-rī-pēde, s.** [Lat. *cirrus* = a curl, and *pes* (genit. *pedis*) = a foot.]

**Zool.**: An animal of the sub-class Cirripedia (q.v.).

. . . now we come to a most important diversity in the metamorphosis, or rather, to follow Professor Owen, in the metagenesis, of the young cirripede. — Owen: *Lect. on Comp. Anat.*, lect. xii.

**cir-rīp-ēd-a, cir-rhīp-ēd-a, cir-rī-pēd-i-a, cir-rhī-pēd-i-a, cir-rhōp-ēd-a, a.** [Lat. *cirrus* = a curl, and *pes* (genit. *pedis*); Gr. *πούς* (pous) = a foot.]

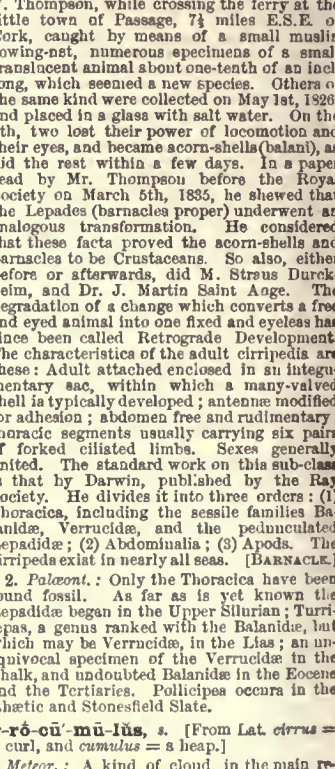

1. **Zool.**: A sub-class of Crustacea, unlike as the Barnacles and Acorn-shells ranked under the Cirripedia may appear to an edible crab or a lobster. For a long time indeed zoologists could not agree where to put the barnacles and acorn-shells till a discovery of their metamorphosis settled, or at least helped to settle, their true situation. On the 23rd April, Mr. V. Thompson, while crossing the ferry at the little town of Passage, 7½ miles E.S.E. of Cork, caught by means of a small muslin towing-net, numerous specimens of a small translucent animal about one-tenth of an inch long, which seemed a new species. Others of the same kind were collected on May 1st, 1826, and placed in a glass with salt water. On the 8th, two lost their power of locomotion and their eyes, and became acorn-shells (balani), as did the rest within a few days. In a paper read by Mr. Thompson before the Royal Society on March 5th, 1835, he shewed that the Lepades (barnacles proper) underwent an analogous transformation. He considered that these facts proved the acorn-shells and barnacles to be Crustaceans. So also, either before or afterwards, did M. Straus Durckheim, and Dr. J. Martin Saint Ange. The degradation of a change which converts a free eyed animal into one fixed and eyeless has since been called Retrograde Development. The characteristics of the adult cirripedia are these: Adult attached enclosed in an integumentary sac, within which a many-valved shell is typically developed; antennæ modified for adhesion; abdomen free and rudimentary; thoracic segments usually carrying six pairs of forked ciliated limbs. Sexes generally united. The standard work on this sub-class is that by Darwin, published by the Ray Society. He divides it into three orders: (1) Thoracica, including the sessile families Balanidae, Verrucidae, and the pedunculated Lepadidae; (2) Abdominalia; (3) Apoda. The cirripedia exist in nearly all seas. (BARNACLE.)

2. **Palæont.**: Only the Thoracica have been found fossil. As far as is yet known the Lepadidae began in the Upper Silurian; Turri-lepas, a genus ranked with the Balanidae, but which may be Verrucidae, in the Liás; an unequivocal specimen of the Verrucidae in the Chalk, and undoubted Balanidae in the Eocene and the Tertiaries. Pollicipes occurs in the Rhetic and Stonesfield Liast.

**cir-rō-cū-mū-lūs, s.** [From Lat. *cirrus* = a curl, and *cumulus* = a heap.]

**Meteor.**: A kind of cloud, in the main re-

sembling a cumulus, but in certain respects like a cirrus too. It consists of a connected

CIRROCUMULUS CLOUD.

ēte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pit, sīre, sir, marine; gō, pēt, or, wōre, wōlf, wōrk, whō, sōu; mūte, cūb, cūre, unīte, cūr, rāle, fāl; trū, Sūrian. ē, ē = ā. ey = ā. qu = kw.

system or series of small roundish clouds placed in order or contact. It resembles the scales of a mackerel. The name was first given by Mr. Luke Howard.

**qir'-rô-lite**, s. [Gr. κίρρός (kírrōs) = pale yellow, and Eng. suff. -ite (Min.) (q.v.).]

*Min.*: A mineral consisting of phosphoric acid, 41.17; alumina, 20.1; lime, 32.9; water, 5.3 = 100. It occurs in an iron mine at Westana in Scania.

**qir' rōse**, a. [CIRRHOS.]

**qir'-rōs'-tōm-i**, s. pl. [Lat. cirrus = a curl; Gr. στόμα (stoma) = a mouth.]

*Ichthy.*: Another name for the Pharyngobranchii (q.v.).

**qir'-rōs'-tō-mōus**, a. [CIRROSTOMI.] Pertaining to, or characteristic of the Cirrostomi.

**qir-rô-strâ-tūs**, s. [From Lat. cirrus = a curl, and stratus = strewed, spread flat.]

*Meteor.*: A kind of cloud blending the characteristics of the stratus and of the cumulus, the former predominating. It consists of

CIRROSTRATUS CLOUD.

a horizontal or slightly inclined sheet of cloud, with the circumference, which is upward, becoming gradually attenuated, whilst its lower part is undulated or concave. Groups or patches of cirrostratus are sometimes scattered over the sky near the horizon. The name cirro-stratus was first given by Mr. Luke Howard.

**qir'-rōus**, a. [CIRRHOS.]

**qir'-rūs**, **qir'-rhūs** (pl. **qir'-rī**, **qir'-rhī**), s. [Lat. cirrus = a curl, a tendril.]

*I. Of both forms:*

1. *Bot.*: The thread-like tendrils or filaments by which certain climbing plants attach themselves to trees, stones, etc.; one of the fulera or prope of plants. (Craig, Buchanan.) A cirrus may be on a corolla, a peduncle, a leaf, or a petiole. Examples, the corolla of Strophanthia, the peduncle of *Smilax horrida*, the leaf of *Gloriosa superba*, or the petiole of the pea. (Lindley.)

2. *Zool.*: A slender, fringe-like appendage in some inferior animals, which aids in locomotion. (Carpenter.)

3. *Ichthy.*: The soft filaments attached to the jaws of certain fishes. (Craig.)

*II. Only of the form cirrus:*

1. *Palæont.*: A genus of fossil spiral shells. The shell is discoidal and has a large umbilic-

cus; the upper surface bears a row of spines, which in the neighbourhood of the aperture

are tubular and have their ends perforated. One genus ranges from the Devonian to the Jurassic. (Nicholson.)

2. *Meteorol.*: A form of cloud, composed of thin filaments, the union of which resembles sometimes a brush, sometimes small patches of woolly hair, and again slender network. The cirrus is the feathery or streak-like cloudlet which is highest of all in the heavens.

**qir'-sī-ūm**, s. [Gr. κίρσιον (kírision) = a kind of thistle, said to cure varicocele.]

*Bot.*: A genus of Compositæ, supposed to have healing qualities.

**qir'-sō-qēle**, s. [Gr. κίρσός (kírros) = a swelled vein, and κήλη (kēlē) = a tumour.]

*Med.*: The varicose dilation of the spermatic vein. (Dunghlison.)

**qir'-sō-i-dēs**, a. [Gr. κίρσός (kírros) = a swelled vein, and εἶδος (eîdos) = resemblance.]

*Med.*: Varicose or resembling a varix. A term once applied to the upper part of the brain, as well as to the spermatic vessels. (Dunghlison.)

**qirs-ōm-pha-lōs**, s. [Fr. *circumphale*, from Gr. κίρσός (kírros) = a swelled vein, and ὀμφαλός (omphalos) = the navel.]

*Med.*: A varicose dilation of the veins surrounding the navel. (Dunghlison.)

**qirs-ōph-thāl-mī-a**, s. [Gr. κίρσός (kírros) = a swelled vein, and ὀφθαλμός (ophthalmos) = the eye.]

*Med.*: A swelled or varicose state of the vessels of the eye.

**qirs-ō-tōme**, s. [Gr. κίρσός (kírros) = a swelled vein; τομή (tomē) = a cutting; τέμνω (temnō) = to cut.]

*Surg.*: An instrument used in the extirpation of a varix or varicose vein. (Knight.)

**qirs-ōt-ōm-ŷ**, s. [Gr. κίρσός (kírros) = a swelled vein, and τομή (tomē) = a cutting.]

*Surg.*: Any operation for the removal of varices by incision. (Dunghlison.)

\* **qir'-ur-gien**, a. [SURGEON.]

**qis (1)**, in compos. [Lat. = on this side.] For definition see etymology.

**cis-equatorial**, a. Situated on this side the equator.

*Bot. Geog.*: The cis-equatorial region of South America constitutes a distinct botanical province. (Thomé.)

**qis (2)**, s. [Gr. κίς (kís) = the corn-weevil.]

*Entom.*: A genus of Coleopterous insects, the typical one of the family Cistidae, inhabitants of the fungi growing on trees. Tribe, Xylophagi. (Craig.)

**qis-āl-pine**, a. [Lat. *calcipinus*, from *cis* = on this side, and *Alpinus* = Alpine, from *Alpes* = the Alps.] Situated south of the Alps; as regards Rome, this side of the Alps; the opposite to Transalpine.

¶ The Cisalpine republic was formed by the French in May, 1797. In 1802 its name was altered to the Italian republic, and in March, 1805, it became the kingdom of Italy, but by no means the ancestor of the kingdom of Italy now existing.

† **qis-āt-lān-tīo**, a. [Formed on analogy of *Cisalpine*, from Lat. *cis* = on this side, and Eng. *Atlantic*.] On this side of the Atlantic.

**qis'-cō**, s. [Etym. unknown.]

*Ichthy.*: The American popular name for several species of the genus *Coregonus*.

\* **qiser (1)**, s. [CIDEA.]

**qiser (2)**, s. [SCISSORS.]

**qis'-leū**, s. [CHISLEU.]

*Jewish Months*: The esme as CHISLEU (q.v.).

**qis'-lie**, s. [CICELY.]

¶ *Silken Cistic*: *Vincetoxicum officinale*. (Gerard.)

**qis-ma-tān**, s. [CHICHM.]

† **qis-mōn-tāne**, a. [Lat. *cis* = on this side of; *montanus* = pertaining to the mountains; *mons* = a mountain.] Situated on this side of the mountains.

\* **qis'-pa-dāne**, a. [Lat. *cis* = on this side, and *Padanus* = pertaining to the *Padus* = the river Po.] Situated on the south side of the Po; as regards Rome, on this side of the Po.

¶ The Cispadans and Transpadane republics were two republics situated respectively on this and the other side of the Po. They were merged in the Cisalpine republic in October, 1797. (Haydn, &c.)

**qiss-ām-pēl-ōs**, s. [Gr. κισσός (kissos) = ivy, and ἀμπελος (ampelos) = a vine, from the plants being like ivy in the green rambling branches, and like the vine in having the fruit in racemes.]

*Bot.*: A genus of climbing shrubs. Order, Menispermaceæ. It grows in almost every mountainous part of the Cape of Good Hope. The root is used as an emetic and cathartic by the Boers. (Dunghlison & Craig.) *Cissampelos ovalifolia* is used in Brazil; *C. Pareira*, and *C. Caecopa* in the West Indies, and *C. Mauritania* in Madagascar, as tonics and diuretics. *C. glaberrima* and *C. ebracteata* are prescribed in Brazil against serpent-bites. The root of *Cissampelos obtecta*, an Indian species, yields an intoxicating spirit. (Lindley.)

**qis'-sī-dæ**, s. pl. [From Mod. Lat. *cis* (2) (q.v.), and fem. pl. adj. suff. -idæ.]

*Entom.*: A family of Coleoptera.

**qis'-sīn-ūm**, s. [Gr. κίσσιον (kission), from κισσός (kissos) = ivy.]

*Med.*: A name given to a plaster of ivy used in wounds of the nerves or tendons.

**qis-sī-tēs**, s. [Gr. κισσός (kissos) = ivy.]

*Entom.*: A genus of Coleopterous insects, belonging to the section Heteromera, and the tribe Trachelides.

**qiss'-ōid**, s. & a. [Gr. κισσοειδής (kissoeidēs) = like ivy, from κισσός (kissos) = ivy, and εἶδος = appearance, form.]

*A. As substantive:*

**Geom.**: A curve invented by Diocles, for the purpose of solving two celebrated problems of the higher geometry, viz., to trisect a plane angle, and to construct two geometrical means between two given straight lines. (Webster.)

**B. As adj.**: Included (as an angle) between two intersecting curves.

**qiss-ōid-āl**, a. [Eng. *cissoïd* : -al.] Pertaining to, or of the nature of a cissoïd.

\* **qis-sor**, \* **qis-sour**, s. [SCISSORS.]

**qis'-sūs**, s. [Gr. κισσός (kissos) = ivy.]

*Bot.*: A genus of vine-bearing plants, belonging to the order Ampellidæ. It is closely akin to *Vitis*, the Vine genus. The leaves of *Cissus cordata* and *C. setosa* are said to possess acid properties. They are deemed useful in bringing indolent tumours to suppuration. The berries of the latter species are also acid. Both the leaves and the fruit of *C. tinctoria* abound in a green colouring matter, which on exposure becomes blue; it is used by the Brazilian Indians as a dye for cotton fabrics. (Lindley.)

**qist**, s. [Fr. *ciste*; Lat. *cista*, from Gr. κίστη (kistē) = a box, a chest.]

1. *Arch. & Sculp.*: A chest or basket. A term used to denominate the mystic baskets used in processions connected with the Eleusinian mysteries. It was originally formed of wickerwork, and when afterwards made of metal, the form and texture were preserved in imitation of the original material. When sculptured on ancient monuments it indicates some connection with the mysteries of Ceres and Bacchus. (Gwillt.)

2. *Antiquities:*

(1) A tomb of the Celtic period, consisting of a stone chest, covered with stone slabs. (Webster.) In Celtic or Druidical buildings, the chamber formed of laterally recumbent blocks of stone. (Gwillt.)

\* (2) A boxlike excavation.

"These oval pits or *cists* were about four feet long, they were neatly cut into the chalk, and were with the skeletons covered with a pyramid of stones and slabs."—*Archæologia*, xi. 340.

(3) A box, usually of bronze, for toilet purposes. Many fine specimens have been found in Italy.

**qis-tā-qē-æ**, s. pl. [Gr. κίστος (kistos) = the Cistus or Rock-rose, and Lat. fem. pl. adj. suff. -æcæ.]

**Bot.** Rock-roses, an order of plants, the typical one of the alliance Cistales. It consists of shrubs or herbaceous plants, often with viciid branches. The leaves are entire, opposite or alternata, feather-veined, or more rarely fan-veined. The flowers, which are very fugacious, are generally in unilateral racemes; their colour is white, yellow, or red; sepals 3-5, persistent unequal, petals five, rarely three, stamens hypogynous distinct, definite or indefinite in number; ovary one or many-celled, with the style and stigma both simple. Fruit capsular, 3-5 or ten-valved, one-celled, with parietal placentae, or imperfectly five or ten-celled. They are found chiefly in the South of Europe and the North of Africa. One is British. Known genera in 1845, seven; species 185. For their qualities see COCHLOSPERMUM and LADANUM.

**çis-tâ'-ocous, a.** [CISTACEÆ.]

**Bot.** Belonging to, or characteristic of the Cistaceæ (q.v.).

**çis-tâl, a.** [Lat. *cistifolius*; Eng. suff. -al.]

**Bot.** Pertaining to Lindley's botanical alliance Cistales (q.v.).

**çis-tâ'-lêg, s. pl.** [From *cistius*, and Lat. fem. pl. adj. suff. -ales.]

**Bot.** An alliance of plants, placed by Lindley under his Hypogynous Exogena. He includes under it the Cistaceæ, Brassicaceæ, Resedaceæ, and Cappariaceæ, though it is hard to believe that Brassicaceæ is not entitled to rank as the type of an alliance.

**çis-tô'-la, çis-tô'-la, s.** [Lat. *cistella* = a little chest, dimin. of *cista* = a chest.]

1. **Entom.** (Of the form *Cistela*.) A genus of Coleopterous insects, the typical one of the tribe Cistellidæ. Sub-section, Stenelytra. There are five British species. (*Sharpe*.) *Cistela cerambyoides* is found on flowers; *C. sulphurea* is confined to the sea-coast.

2. **Bot.** (Of the form *Cistella*.) A capsular alield of some lichens. [CISTULÆ.]

**çis-tô'-l'Y-dêg, s. pl.** [Lat. *cistella*.]

**Entom.** A tribe of Coleopterous insects, of which *Cistela* is the type. Section *Heteromera*, sub-section *Stenelytra*.

**Çis-têr'-cian (cian as shan), s. & a.** [Low Lat. *Cistercium*; Fr. *Cîteaux*, *Cîteaux*, a convent situated near Dijon in France.]

**A. As substantive:**

**Ch. Hist.** A member of a certain monastic order in the Roman Church, founded in 1098 by Robert, abbot of Melesme in Burgundy, who having lost hope of inducing the monks, whose chief he was, to live up to the rule prescribed by St. Benedict, retired with twenty associates to Cîteaux (see etym.) and founded there a congregation which afterwards developed into the order of the Cistercians. It went through the ordinary cycle of such monastic institutions, i.e., at first its members were poor and really holy; then the fans of their sanctity spreading through Europe, branches of the order were established in many places. To aid men so deserving, large contributions were given by pious men and women, and before the twelfth century had run its course, the Cistercian communities were wealthy.

CISTERCIAN MONK.

With the growth of this wealth, the gradual relaxation of the strict Benedictine rules took place, till finally the Cistercians lost their high reputation and sank to the level of the order against which their secession had been a protest, and to that of the monastic order generally. During the time that the order was rising in importance, it enjoyed the advocacy of the celebrated St. Bernard of Clairvaux, who is regarded as its second parent and founder, so that it is sometimes called the Bernardine order, or the order of St. Bernard. Between them and the Cluniacians there

was considerable animosity, and even public controversy. (*Mohelm: Church His'*, cent. xi., xii.)

**B. As adj.:** Pertaining to or connected with the order of monks described in A.

**çis-têrn, \* çis'-terne, \* sis'-terne, s. & a.**

[Lat. *cisterna*; O. Fr. *cisterne*; Fr. *cisterna*.]

**A. As substantive:**

**I. Ordinary Language:**

1. An artificial receptacle or reservoir for the storage of water.

"From some of these *cisterns* Cesar's troops were supplied. . . —*Sharpe: Hist. Egypt*, ch. x.

"There is the *cisterna* where Joseph was cast in of his brethren." —*Mausoleum*, p. 104.

2. A natural reservoir or place where the drainage of a watershed collects.

"In the wide *cisterns* of the lakes confin'd."

*Sir A. Blackmore.*

3. A metal or slate vessel for the storage of water or other liquid.

"A *cistern* containing a hundred and twenty gallons of punch was emptied to his Majesty's health. . . —*Macaulay: Hist. Eng.*, ch. xii.

**II. Technically:**

1. **Mining:** A tank in a deep mine-shaft, set upon a scarcement; it serves to receive the water of the pump below, and apply water to the pump above. The usual length for a set of mining-pumps is twenty-five to thirty fathoms. At such intervals cisterns are placed. (*Knight*.)

2. **Steam-engine:** The vessel enclosing the condenser of a condensing steam-engine, and containing the injection water. (*Knight*.)

3. **Glass Manuf.** The receptacle into which glass is ladled from the pots to be poured on the table in making plate glass, or in casting glass. (*Knight*.)

**B. As adj.:** (See the compounds.)

**cistern-barometer, s.**

**Meteor. Instrum.** A barometer having the tube immersed below in a cistern of mercury.

**cistern-filter, s.** A cistern having a permanent chamber, which has filtering material intervening between the supply and discharge. (*Knight*.)

**cistern-pump, s.** A small pump, lift, or force for pumping water from the moderate depth of a cistern.

**çis-têr'-na, s.** [Lat.] A term applied to various parts of the body which serve as reservoirs for different fluids. The fourth ventricle of the brain has been so called. (*Dunghison*.)

\* **çis-têrn-esse, s.** [O. Fr. *cisterne*.] [CISTERN.] A cistern, a reservoir.

"To that *cisternness* be ran to sea,"

*Genesis and Exodus*, 1960.

**çis-tic, a.** [Eng. *cist*; -ic.] Pertaining to, or of the nature of, a cist.

**çis-tô-gâs-tôr, s.** [Gr. *kis* (*kis*) = the corn-weevil, and *γαστήρ* (*gastêr*) = the belly, from its inflated abdomen.]

**Entom.** A genus of Dipterous insects. They belong to the family Muscidae and sub-tribe *Athericera*.

**çis-tôme (Eng.), çis-tô'-ma (Mod. Lat.), s.** [Gr. *κίστη* (*kistê*) = a small box or chest, and *στόμα* (*stoma*) = a mouth. Apparently a wrong formation for *cistotome*.]

**Bot.** A funnel-shaped prolongation of the cuticle into the openings of the stomata. It is called also the Ostiole.

**çis-tôp-têr-is, çis-tôp-têr-is, a.** [Gr. *κίστος* (*kistos*) = a bladder, and *πτερίς* (*ptêris*) = a fern.]

**Bot.** A species of fern, so called from the indusium being shaped like a bladder. There are several British varieties, of which *C. fragilis* is the best known.

**çis-tû'-dô, s.** [From Lat. *cista* = a box, and *testudo* = tortoise. Apparently a wrong formation for *Cistitestudo*.]

**Zool.** The Box Terrapins, a genus of the Emydæ or River Turtles in which the two divisions of the carapace, or dorsal shell, are movable on the same axis, and can be so closed as entirely to conceal the enclosed animal. This genus contains the American Box Tortoise, *C. Carolina* is the common Box Tortoise of the United States.

**çis'-tû-ly, s.** [Dimin. of Lat. *cista* = a box.]

1. **Zool.:** A sub-genus of Mollusca, genus *Cyclostoma*. About seventy species are known from the West Indies and Tropical America.

2. **Bot.:** A cell-shaped shield found in some lichens. [CISTELLÆ.]

**çis-tûs, a.** [Lat. *cistus*; Gr. *κιστός* (*kistos*) = a rock-rose.]

**Bot.:** The Rock-rose, a genus of elegant shrubs, with beautiful large red or white flowers, resembling a wild rose. Order, Cistaceæ. It has an imperfectly five or ten-celled capsule, a character distinguishing it from the Helianthemum of this country, which has but three cells. The species are fine showy shrubs with gaily coloured but fugaceous flowers. Loudon (ed. 1880) enumerates twenty-seven species as cultivated in British gardens, where, however, they at times require the protection of glass cases. The resinous balsamic substance called *ladanum* is obtained from *Cistus creticus*, *ladon* and *ladaniferus*. [LADANUM.] The latter two are sometimes called Gum Cisti.

**cist-væn, s.** [Wel. *cistfaen* = a British monument consisting of four flat stones placed at right angles with a fifth on the top.]

**Antiq.:** Stone receptacles, rudely coffin-shaped, found in ancient barrows, containing the bones of persons interred there.

\* **çit, s.** [A contracted form of *citizen* (q.v).]

An inhabitant of a city, a townsman, a cockney. Used in disparagement or contempt.

"Bernard, thou art a cit." —*Pope: Satires*, lll. 33.

**çit'-a-hle, a.** [Eng. *cit(e)*; -able.] Capable of being cited. (*Genl. Magazine*.)

\* **çit'-a'-çion, s.** [CITATION.]

**çit'-a-dêl, a.** [Fr. *citadelle*; Ital. *cittadella*, dimin. of *città* = a city; Dan. *citadel*; Ger. *citadelle*; M. Sp. *ciudadela*, dimin. of *ciudad* = a city.] A castle or fortified place in a city, intended for the storage of arms, &c., and as a last point of defence.

**çit'-a-grâde, a.** [CITORADE.]

\* **çit'-tal, s.** [Eng. *cit(e)*; -al.]

1. A summons to appear before a superior or a judge, a citation.

2. A reproof or impeachment.

3. A quotation, a recital.

"He made a blushing *çit* of himself,

And chid his truait youth." *Shaksp. 1 Hen. IV.*, v. 1

**çit'-tâ'-tion, \* çit'-tâ'-çion, \* çit'-tâ'-çion, s.** [Fr. *citation*; Ital. *citazione*; Lat. *citatio*, from *cto* = to summon, to appear.]

**I. Ordinary Language:**

1. A summons. [II. 1.]

2. A quotation of the words of another; the bringing forward another as authority for a statement.

"The letter-writer cannot read these *citations* without blushing, after the charge he hath advanced." —*Bishop Atterbury*.

\* 3. An enumeration, mention, or recital.

"... there remains a *citation* of such as may produce it in any country." —*Harvey: On Consumption*.

**II. Law:**

1. The act of summoning or citing a person to appear before a judge, especially of an ecclesiastical court.

"The ecclesiastical courts proceed according to the course of the Civil and Canon Law, by *citation*, libel, &c." —*Jacob: Law Diet.*

"That in the *londæ citatoum non vers*

Thurf bullie of the pope of Rome." *Life of Becket*, 615.

3. A reference to decided cases or books of authority to prove a point in law.

**çit'-tâ'-tôr, s.** [Lat.] One who cites. (*Webster*.)

**çit'-tâ'-tôr'-y, a.** [Lat. *citatorius* = summoning or pertaining to a summons; *cto* = to cite, to summon to appear.] Pertaining to, in the form or of the nature of, a citation.

"... letters *citatory* affixed on the doors of Rochester Cathedral, three miles off, were torn down and burned." —*Mitman: Hist. Lat. Christianity*, bk. xii. ch. vii.

çate, çat, çare, çamidst, çhât, çáll, çather; wê, wêt, hêre, çamel, hêr, thêre; çine, çit, çire, çir, çarine; çô, çôt, or, wôre, wôlf, wôrck, whê, çém; mûte, çûb, çûre, çuite, çûr, çûle, çûll; try, çýrian. æ, œ = é. ey = â. qu = kw.

**cite**, *v.t.* [Fr. *citer*; Sp. & Port.  *citar*; Ital. *citare*; Lat. *cito*, intens. form of *citeo* = to put in motion, to excite.]

\* 1. To call upon authoritatively, to enjoin, to summon or urge to an action.

"I speak to you, Sir Thauris; For Valentine, I need not cite him to it." *Shaksp.*: *Two Gent. of Ver.*, II. 4.

\* 2. To summon officially to appear in a court.

"He held a late court, to which *Sbs* oft was cited by them, but appear'd not." *Shaksp.*: *Hen. VIII.*, IV. 1.

\* 3. To quote, to adduce as an authority.

"The devil can cite Scripture for his purpose." *Shaksp.*: *Mac. of Venice*, I. 3. " . . . looked and spoke as if when citing a section he was making a discovery."—*Lord Brougham*: *Hist. Sketches*; *Str. V. Gibb.*

\* 4. To bring forward or adduce as an example.

\* 5. To enumerate, to recount.

"We cite our faults." *Shaksp.*: *Two Gent. of Ver.*, IV. 1.

\* 6. To argue, prove, or evidence.

"Aged honour cites a virtuous youth." *Shaksp.*: *All's Well*, I. 3.

¶ (1) Crabb thus distinguishes between to *cite* and to *quote*: "To *cite* is employed for persons or things; to *quote* for things only; authors are *cited*, passages from their works are *quoted*; we *cite* only by authority; we *quote* for general purposes of convenience. Historians ought to *cite* their authority in order to strengthen their evidence and inspire confidence; controversialists must *quote* the objectionable passages in those works which they wish to confute; it is prudent to *cite* no one whose authority is questionable; it is superfluous to *quote* anything that can be easily perused in the original."

(2) He thus discriminates between to *cite* and to *summon*: "The idea of calling a person authoritatively to appear, is common to these terms. *Cite* is used in a general sense, *summon* in a particular and technical sense; a person may be *cited* to appear before his superior; he is *summoned* to appear before a court; the station of the individual gives authority to the act of *citing*; the law itself gives authority to that of *summoning*. When *cite* is used in a legal sense, it is mostly employed for witnesses, and *summon* for every occasion; a person is *cited* to give evidence, he is *summoned* to answer a charge." (*Crabb*: *Eng. Synon.*)

\* **cit'-ē**, *s.* [CITV.]

**cit'-ēd**, *pa. par.* or *a.* [CITV.]

"Of all past ages, to the general doom Shall hasten." *Milton*: *P. L.*, III. 327.

\* **ci-tē'e** (1), *s.* [Eng. *cit(e)*; -*ee*.] A person cited or summoned to appear before a judge.

\* **cit-ee** (2), *s.* [CITV.]

**ci-tēr**, *s.* [Eng. *cit(e)*; -*er*.]

1. One who cites or summons another to appear before a court.

2. One who cites or quotes; a quotr.

"I must desire the *citer* henceforward to inform us of his citations too."—*Asterbury*.

\* **cit'-ēss**, *s.* [Eng. *cit*, and fem. suff. -*ess*.]

1. A female cit or townswoman.

"Cite and *cit-ess* raise a joyful strain; 'Tis a good omen to begin a reign." *Dryden*: *Prot. to Albion and Albanus*.

2. A female citizen; a *citoyenne*.

\* **citayan**, \* **cietyean**, *s.* [CITIZEN.]

"He gaff occasion to the *cietyean* throat to labeo out of the town."—*Belend*: *T. Lu.*, p. 25.

\* **ci-th-a-ra**, *s.* [Lat. from Gr. *κithara* (*kithara*) = a harp.] [CITERN.]

1. *Musical*: A musical instrument resembling the harp.

2. *Zool.*: A genus of molluscs, family Conidae (Cones). About fifty species were discovered by Mr. Cuming in the Philippine Islands. (*S. P. Woodward*.)

CITHARA.

**ci-th-ar-ēx'-yī-ūm**, *s.* [Gr. *κithara* (*kithara*) = a lyre, and *ξύλον* (*xulon*) = wood.]

*Bot.*: The Fiddle-wood, a genus of West India

trees and shrubs. Order, Verbenaceae. The term fiddle-wood naturally suggests that it is used in the manufacture of violins, which is not the case, as it is a corruption of the French word *fiddle* = faithful, this complimentary word having been applied because the wood, which is very hard, is trustworthy for carpentry or for building purposes.

**ci-th-ar-i-nūs**, *s.* [Mod. Lat. *citharinus*, from Class. Lat. *cithara* (q.v.).]

*Ichthy.*: A genus of Salmonidae containing species found in the Nile.

\* **ci-th'-gr-ist**, *s.* [Lat. *citharista* = a harper; *cithara* = a harp.] A harp.

"The Psaltry, the Cithella, the soft *Citharist*, The Croude, and the moaycroude, the gythornis gay." *Houlate*, III. 10.

**ci-th-ar-is'-tic**, *a.* [Gr. *κithαριστικός* (*kitharistikos*) = pertaining to the lyre or harp; *κithάρα* (*kithara*) = a lyre or harp.] Relating to or adapted from the cithara.

\* **ci-th'-ēr** (1), \* **ci-th'-ēr'n**, \* **cyth-ron**, *s.* [CITERN.]

"The *cythron*, the pandore and the theobro." *Dragon*: *Polyglotton*, Song IV.

\* **cither** (2), *s.* [CIDER.]

\* **ci-the-ropes**, *s. pl.* [Etym. of first part of the word doubtful; North. Eng. & Scotch *ropes* = ropes.] The traces by which a plough is drawn in Orkney.

\* **cithill**, \* **cithole**, *s.* [CITOLE.]

\* **ci-t'-y-ism**, \* **ci-t'-y-ism**, *s.* [Eng. *cit* or *city*, and -*ism*.] The manners of a citizen or townsman.

"Although no bred courtling, yet a most particular man of goodly having, -refined and transformed from his original *cityism*."—*B. Jonson*: *Cynthia's Revels*.

"From villages replete with rag'd and sweating clowns, And from the leathome air of smoky *citied* towns." *Dragon*: *Polyglotton*, Song XIII.

**ci-t'-i-grade**, *a. & s.* [Fr. *citigrade*, from Lat. *citius* = swift; *gradus* = a step, from *gradior* = to walk.]

**A.** *As adj.*: Swiftly moving.

**B.** *As substantive*: *Zool. (pl.)*: A tribe of the Arachnidans or Spiders, so named for their nimbleness.

"A spider which was about three-teeth of an inch in length, and which in its general appearance resembled a *Citigrade*."—*Darwin*: *Voyage Round the World* (ed. 1879), ch. VIII, p. 160.

\* **ci-t'-in-ēr**, \* **cyt-ton-ere**, *s.* [Fr. *citoyen* = a citizen, and Eng. suff. -*er*.] A person bred in a city, a cockney, a citizen.

"*He cito, a cittyane*."—*Wright*: *Focad.*, p. 211.

"Our sovereign lord—*Alonso* toane reverend father in God Petre bischope of Dunkeld, and to the *ci'tienis* of the towne of Dunkeld, the privilege and libertie granted to the bischopis of Dunkeld and *ci'tienis* thereof of befor. . . ."—*Acts Jo. VI.*, 1666 (ed. 1814), p. 313.

**ci-t'ing**, *pr. par.*, *a.*, & *s.* [CITE.]

**A. & B.** *As pr. par. & particip. adj.*: (See the verb).

**C.** *As subst.*: The act of summoning to appear before a judge or court.

**ci-t'-i-zen**, \* **ci-t'-e-sein**, \* **ci-t'-i-zein**, \* **ci-t'-e-sain**, \* **ci-t'-e-zein**, \* **ci-t'-e-seyn**, *s. & a.* [O. Fr. *citain*, *citain*, *ci'tein*; Fr. *citoyen*; Ital.  *cittadin*, from *ci'tū* = a city; Sp. *ciudadano*, from *ciudad* = a city.]

**A.** *As substantive*:

\* 1. A member of a state or community, an inhabitant of any state or place.

¶ The "civis Romanus," or Roman citizen, had various and high privileges over foreigners. (*Acts* xvi. 37, 38; xxii. 25-29.) [CIVIS.]

2. A freeman of a city or municipality (opposed to a *foreigner* or a *slave*). [FREEMAN.]

"All inhabitants within these walls are not properly *citizens*, but only such as are called freemen."—*Bulwich*: *History of the World*.

3. An inhabitant of a city or town (opposed to one living in the *country* or engaged in *agriculture*).

4. A tradesman.

"When he speaks not like a *citizen*, You find him like a *solider*." *Shaksp.*: *Coriol.*, III. 2.

**B.** *As adj.*: Pertaining to, consisting, or having the qualities of, a citizen or citizeness.

"So sick I am not, yet I am not well; But not so *citizen* a wanton, as To seem to die ere sick." *Shaksp.*: *Cymbeline*, IV. 2.

**citizen-soldier**, *a.* A volunteer; one who is at the same time a citizen and a soldier.

\* **ci-t'-i-zen-ēss**, *s.* [Eng. *citizen*; fem. suff. -*ess*.] A female citizen. (*Booth*.)

\* **ci-t'-i-zen-ize**, *v.t.* [Eng. *citizen*; -*ize*.] To make into a citizen; to admit to the rights and privileges of a citizen.

"Talleyrand was *citizenized* in Pennsylvania."—*T. Pickering*.

\* **ci-t'-i-zen-ry**, *s.* [Eng. *citizen*; -*ry*.] The body of citizens collectively, the townspeople.

"He sided with the magistracy not with the *citizenry*."—*Taylor*: *Survey of German Poetry*, I. 135. (*Davis*.)

**ci-t'-i-zen-ship**, *s.* [Eng. *citizen*; -*ship*.]

1. State, condition, or quality of a citizen; the state of being vested with the rights and privileges of a citizen.

"Admission to *citizenship* will expose them at court."—*Palfrey*.

2. The freedom of a city. It was obtained by descent from a citizen, by being apprenticed to one, or by purchase; it might and may still be conferred by vote on distinguished persons. [FREEDOM.]

\* **ci-t'-ōle**, \* **ci-t'-hill**, \* **ci'thole**, \* **cytōle**, *a.* [O. Sp. *citola* = cithern.]

*Musical*: A musical instrument, perhaps a dulcimer.

"A *citole* in hire right hand hadde ache, And on hir heed, ful semely on to see." *Chaucer*: *C. T.*, 1,961-2.

**ci-t'-ra-ōn'-ic**, *a.* [Eng. *citric*], and *aconitic* (q.v.). Derived from the genera *Citrus* and *Aconitum*.

**citraconic acid**, *s.*

A diatomic bibasic acid, isomeric with itaconic and mesaconic acids obtained by distilling citric acid; water is first given off at about 175°, vapours of acetone and CO, then the residue consists of aconitic acid; on continuing the distillation CO<sub>2</sub> is given off and itaconic acid is formed; afterwards water is given off, and an oily mass is left in the retort, consisting of citraconic anhydride, which, when exposed to the air, absorbs moisture and crystallises into citraconic acid, which melts at 80°. It unites readily with bromine, forming dibromopyrotartaric acid C<sub>6</sub>H<sub>4</sub>Br<sub>2</sub>O<sub>4</sub>. By the action of sodium amalgam, a solution of citraconic acid is converted into pyrotartaric acid C<sub>6</sub>H<sub>4</sub>H<sub>2</sub>O<sub>4</sub>. When citraconic acid is subjected to electrolysis, it gives off 2CO<sub>2</sub> and 2H<sub>2</sub>, and yields allylene CH<sub>2</sub>=C=CH. By the action of hypochlorous acid HClO, citraconic acid is converted into chlorocitraconic acid C<sub>6</sub>H<sub>4</sub>ClO<sub>4</sub>.

**ci-t'-ra-māl'-ic**, *a.* [Eng. *citric*, and *malic*.] Having the citric and malic acids in its composition.

**ci-tramalic acid**, *s.*

*Chem.*: C<sub>6</sub>H<sub>6</sub>O<sub>5</sub>. A dibasic acid obtained by the action of zinc on an aqueous solution of chlorocitraconic acid.

**ci-t'-ra-mīde**, *s.* [Eng. *citric*], and *amide* (q.v.).

*Chem.*: N<sub>3</sub>(C<sub>6</sub>H<sub>5</sub>O<sub>4</sub>)H<sub>2</sub>. A crystalline compound, slightly soluble in water. Obtained by the action of alcoholic ammonia on citric ethers.

**ci-t'-ra-tar-tār'-io**, *a.* [Eng. *citric* and *tar-taric*.]

**ci-trartartario acid**, *s.*

*Chem.*: C<sub>6</sub>H<sub>6</sub>O<sub>8</sub>. A syrupy deliquescent dibasic acid obtained by heating chlorocitraconic acid in a sealed tube, with water, acetone CH<sub>3</sub>CO.CH<sub>3</sub>, hydrochloric acid and carbon dioxide being also formed.

**ci-t'-rate**, *s.* [From *citric*], -*ate* (*Chem.*) (q.v.). [CITRIC ACID.] Citrate of calcium occurs in onions and in potatoes, citrate of potassium in artichokes and in potatoes.

**bēl**, **hōy**; **pōūt**, **jōwī**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. -**ing**. -**cian**, -**tian** = **shan**. -**tion**, -**sion** = **shūn**; -**tion**, -**sion** = **zhūn**. -**ci-ous**, -**tious**, -**si-ous** = **shūs**. -**hie**, -**cie**, &c. = **bel**, **cel**.

**cit-rô-an**, a. [Lat. *citro*(um) = a citron, and Eng. adj. suff. -an.] The same as **CITRINE** (q.v.).

**cit-rône**, s. [Eng. *citric*(ic), and suff. -ene.]  
Chem.: C<sub>10</sub>H<sub>16</sub>. An aromatic hydrocarbon, boiling at 168°. It is obtained from the rind of *Citrus Limonum*.

**cit-rô-ôis**, a. [Lat. *citrosus*=pertaining to the citron.] Lemon-coloured, citrinous.

**cit-ri-o**, a. [Fr. *citrique*; Lat. *citrus* = the citron-tree.]

Chem.: Of or pertaining to an acid obtained from the juice of the lemon and other fruits.

**citric acid**, s.

1. Chem.: C<sub>6</sub>H<sub>8</sub>O<sub>7</sub> or HOOC-CO.OH A

tetratomic tribasic acid, which occurs in the juice of lemons, also in gooseberries, currants, &c. It is obtained by allowing the juice to undergo an incipient fermentation, filtering and neutralising by means of powdered chalk, after which milk of lime, the insoluble calcium citrate, is precipitated, and is then decomposed by dilute sulphuric acid. It forms white crystals, soluble in water, and has an acid taste. It is used in dyeing and in calico-printing, and in the preparation of effervescent summer beverages. Citric acid fused with potash is decomposed into oxalic and acetic acids, thus C<sub>6</sub>H<sub>8</sub>O<sub>7</sub> + H<sub>2</sub>O = C<sub>2</sub>H<sub>2</sub>O<sub>4</sub> + 2(CH<sub>3</sub>CO.OH). Citric acid forms ethers. Citric acid has been formed synthetically from glyceric acid CH<sub>2</sub>OH.CH(OH).CH<sub>2</sub>OH, by converting it into symmetrical dichlorhydrin, CH<sub>2</sub>Cl.CH(OH).CH<sub>2</sub>Cl by oxidizing this into dichloroacetone CH<sub>2</sub>Cl.CO.CH<sub>2</sub>Cl, which forms with strong hydrocyanic acid an addition compound, cyano-dichloroacetone, which by the action of HCl and H<sub>2</sub>O is converted into dichloroacetic acid

This is neutralised by Na<sub>2</sub>CO<sub>3</sub> and heated with two mols. of KCN cyanide of potassium, which replaces the Cl by 2CN, forming sodium dicyanoacetate; the solution is then saturated with HCl and heated in a water bath, and the citric acid precipitated by milk of lime as calcium citrate. Citric acid forms three series of salts with the alkalies, called citrates. It gives no precipitate with potassium acetate. Citrates of calcium, lead, and silver are insoluble. Citric acid, added to a solution in excess, prevents the precipitation of ferric oxide and of alumina by ammonia.

2. Pharm.: Citric acid acts as a refrigerant, and allays thirst and irritation of the skin. Citrate of ammonium increases the secretions. Citrate of iron and ammonia occurs in thin transparent deep-red scales, soluble in water, but almost insoluble in rectified spirit. It acts as a tonic, and is not astringent, and is given to restore the blood to a healthy condition. Citrate of iron and quinine occurs in greenish-yellow deliquescent scales soluble in water. It combines the therapeutic properties of iron and of quinine. Citrate of potassium, a white deliquescent powder, acts as a diuretic.

**cit-ril**, s. & a. [From Lat. *citrus* (q.v.).] A term signifying yellow, citron-coloured. It occurs only in the subjoined compound.

**citric finch**, s. A finch, *Fringilla citrinella*, found in Italy, where it is prized for its song. It must not be confounded with the Yellow Ammer, *Emberiza citrinella*, though both have a yellow breast.

**cit-rin-â-tion**, \* **cit-rin-â'-ci-onn**, s. [Low Lat. *citrinatio*.] A process by which anything takes the colour of a lemon or orange, the state so induced, yellowness. Originally a term used in alchemy, but still used in medicine.

"Our silver citrination,  
Our cementing and fermentation."  
Chaucer: C. T., 16, 264

**cit-rine**, \* **cit-rÿn**, \* **çyt-ryne**, a. & s. [Fr. *citrin*; Lat. *citrinus*, from *citrus* = the citron-tree.]

A. As adj.: Resembling a citron or lemon; lemon-coloured, of a greenish-yellow colour.

"His nose was heigh, his eyen were çyt-ryne."  
Chaucer: C. T., 2, 168.

**B. As substantive:**

1. Ord. Lang.: A greenish-yellow or lemon colour.

2. Min.: A yellow pellucid variety of quartz.

"A species of crystal of an extremely pure, clear, and fine texture, generally free from flaws and blemishes. It is ever found in a long and slender column, irregularly hexagonal, and terminated by an hexangular pyramid. It is from one to four or five inches in length. This stone is very plentiful in the West India. Our Jewellers have learned to call it *citrine*; and cut stones for Jewels out of it, which are mistaken for topazes."—HULL: On Foetia.

**citrine lake**, s. A pigment prepared from the quercitron bark. It is a brown pink, which is durable and dries well. (Weale.)

**citrine ointment**, s.

Med.: A mercurial ointment, composed of four parts of mercury, twelve of nitric acid, fifteen of prepared lead, and thirty-two of olive-oil.

**cit-ri-nous**, a. [From Mod. Lat. *citrinus* = citron-coloured or yellow.] Lemon-coloured, citreous.

**cit-rôn**, s. & a. [Fr. *citron*; Low Lat. *citro*, from Gr. *κίτρον* (*kitron*); Lat. *citreum* (*malum*) = a citron or lemon; *citrus* = the lemon-tree.]

**A. As substantive:**

**Botany:**

1. The citron-tree (q.v.).  
2. The fruit of the citron-tree, resembling a lemon, but less acid in taste. It is a native of Asia.

**B. As adj.:** Pertaining to, derived from, or having the qualities of the citron.

**citron-tree**, s.

**Botany:**

1. The tree, *Citrus medica*, which produces the citron. It has short and stiff branches, oblong toothed leaves, flowers purple externally, and fruit generally large, warted, and furrowed, having a protuberance at the apex, with a very thick spongy adherent rind and a subacid pulp. The Romans brought it from Media, where, however, it is not now, if it ever was, indigenous. It is at present cultivated in gardens in the warmer parts of both hemispheres. It furnishes oil of citron and oil of cedar.

2. A genus of plants of which the lemons, citrons, and oranges are species. Order Aurantiaceæ. (Craig.)

*Fingered citron:* A citron with a remote resemblance to the human fingers. It constitutes the genus *Sarcodactylis*.

**citron-water**, s. A water distilled from the rinds of citrons.

**citron-wood**, s. The wood of *Callitris quadrivalvis*, an Algerian tree, much used in cabinet-making.

**cit-rô-nâ-tion**, s. [CITRINATION.]

**çi-trô-nêl-la**, s. [Mod. Lat. dimin. of Eog., &c. *citron* (q.v.).]

Bot.: A species of grass, *Andropogon citratus*. It yields an essential oil used in perfumery. It is cultivated in Ceylon.

**çi-trôn-êl-lôl**, s. [From Mod. Lat. *citronella* (q.v.), and Class. Lat. *oleum* = oil.]

Chem.: C<sub>10</sub>H<sub>16</sub>O, boiling point 220°. It is isomeric with camphor, and is the chief constituent of oil of citronella. Citronellol unites with bromine, forming a dibromide C<sub>10</sub>H<sub>16</sub>Br<sub>2</sub>O, which when heated splits up into water hydrobromic acid HBr and cymene C<sub>10</sub>H<sub>14</sub>.

\* **cit-rôn-ize**, v.t. [Eng. *citron*; -ize.] To assume a citron hue. (Ben Jonson: *Alchemist*, iii. 2.)

**çi-trôn-wôrts**, s. pl. [Eng. *citron*; -worts.] [Went, suff.]

Bot.: Lindley's name for the Aurantiaceæ.

**cit-rül**, **cit-rüle**, s. [CITRULLUS.]

Bot.: The water-melon (*Citrullus vulgaris*), named from its yellow colour.

**cit-rül-lüs**, s. [A dimin. from Lat. *citrus*, from the colour of the fruit when cut.]

Bot.: A genus of plants belonging to the order Cneurbitaceæ. *Citrullus colocynthis* furnishes the drug Colocynth (q.v.).

**çit-rüs**, s. [Lat. *citrus*; Gr. *κίτρος* (*kitros*).]

Bot.: A genus of trees, the typical one of the order Aurantiaceæ. The leaves, which theoretically are compound, are reduced to a single leaflet, jointed to a leaf-like petiole. The stamens are numerous, and irregularly grouped into several parcels; the fruit, a heperidium, has a leathery rind formed of the epicarp and mesocarp, which can easily be separated from the pulp below. The endocarp sends prolongations inwards, forming triangular divisions, in which pulpy cells are developed, so as to surround the seeds which are attached to the inner angle. The appropriate seat of the genus is believed to be the inferior ranges of hills in Nepal and the sub-Himalayas, from which it may extend also into China. How many species are distinct is doubtful. Lindley and others think only one—the Citron (*Citrus medica*), a view to which the advance of Darwinism since Lindley's time will probably direct increased attention. There are various distinct forms in the genus Citrus, whether species or varieties, viz., the Citron, already mentioned, the Orange (*Citrus Aurantium*), the Lemon (*C. Limonum*), the Lime (*C. Limetta*), the Shaddock (*C. decumana*). Other varieties or sub-varieties are the Seville or Bitter Orange, sometimes called the Bigarade (*C. Bigaradia*), the Bergamot (*C. Bergamia*), the Mandarin Orange (*C. nobilis*), &c. [BERGAMOT, CITRON, ORANGE.]

**çit-ryl**, s. [Eng. *citric*(ic), and suff. -yl (Chem.) (q.v.).]

Chem.: A name given to the trivalent radical (C<sub>6</sub>H<sub>5</sub>O<sub>2</sub>)<sup>3</sup> contained in citric acid. The symbol Ci<sup>3</sup> is often used to express this radical, as in Citric acid, Ci<sup>3</sup>(OH)<sub>3</sub>.

**çit-tern**, \* **çith-ern**,

\* **çit-tern**, s. [The *ti* is excrescent, the word being derived from A.S. *cyter*; Ger. *cither*, *citter*; Lat. *cithara*; Gr. *κίθαρα* (*cithara*) = a lyre or harp; Ital. *citharra*, *cithara*; Prov. *cithara*, *cithra*; Sp. *cithara*, *guitarra*.] [GUITAR.] A musical instrument, resembling a guitar, but strung with wire instead of gut.

"For grant the most barbarous can play on the cithern."

B. Jonson: *Vision of Delight*.

\* **cithern-head**, s. A

hockhead, a dunce, so called from the cithern usually having a head grotesquely carved at the extremity of the neck and finger-board.

CITHERN.  
(17TH CENTURY.)

\* **çi-tyr**, \* **çy-tyr**, s. [Lat. *citrus*.] A citron.

"Çytr lre. Citrus"—*Prompt. Pars.*

"Now planted I sallows of citr trees."  
Palsgrave, viii. 5.

**çit-ÿ**, \* **çetc**, \* **çite**, \* **çitee**, \* **çitle**,

\* **çitty**, \* **syte**, \* **çyte**, s. & a. [O. Fr. *cite*; Fr. *citè* = a town; Ital. *città*; Sp. *ciudad*, from Lat. *ciuitatem*, an abbreviated form of *ciuitatem*, acc. of *ciuitas* = a city, a state, from *ciuis* = a citizen.]

**A. As substantive:**

1. Ord. Lang.: A large town or collection of houses; a community.

2. Spec.: In England, a town corporate, which is the see of a bishop, and contains a cathedral church. In the United States, any town incorporated and governed by a mayor and corporation.

3. The inhabitants of a town collectively.  
"The whole city came out to meet Jesus."—*Matt.* viii. 24.

¶ **The City:** The central or business part of London, to which the jurisdiction of the Lord Mayor is confined. It is divided into wards, and has a corporation consisting of a Lord Mayor, 25 aldermen, and 206 common councilmen, entrusted with special powers in regard to various administrative matters.

**B. As adj.:** Of or pertaining to a town or city.

"In thee no wanton ears, to win with words,  
Nor lurking toys, which city life affords."  
Lodge: *Pleasant History of Glauce*, &c. (1610).

¶ Obvious compounds: *City-born*, *city-dame*, *city-gate*, *city-life*, *city-woman*, &c.

**city-article**, s. In newspapers the edi-

çâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camel, hêr, thêre; pine, pît, sire, sir, marine; gô, pôt, or. wôre, wôlf, wôrk. whô, sôn; müte, cüb, cüre, unite, cür, rüle, füll; try, Sÿrian. sê, cê = ê. ey = â. qu = kw.

torial summary of and remarks on the financial and commercial events and transactions of each day.

**city-avens, s.** A book-name for *Geum urbanum*, of which it is simply a translation.

**city-court, s.** The municipal court of a city, consisting of the mayor, or recorder, and aldermen (U.S.). (Webster.)

**city-editor, s.** In the United States the editor who superintends the collection and classification of local news. In Great Britain, the editor of the so-called city articles, a commentative summary of the commercial or financial news of the day.

**city-hall, s.** A building devoted to the uses of municipal administration.

**city-ward, s. & adv.**  
\* **A.** As subst.: A watchman of a city.  
\* **B.** As adv.: In the direction of the city.

**civ-ör-y, s.** [Etym. doubtful.]  
**Arch.:** A bay or compartment of a vaulted ceiling. (Knight.)

**cives, s. pl.** [Fr. *cive*, from Lat. *cepa, coepa, coepe* = an onion.] [CHIVES.]

**civ-ët (1), s.** [Fr. *civette*; Ital. *sibetto* = civet, or s civet-cat; Gr. *σαβίτιον* (*sabition*), from Per. *sabād* = civet; Ar. *zabād* and *zabād* = the froth of milk or water, civet.]

1. **Comm.:** A resinous substance, of an odour like musk, obtained from several species of carnivorous animals of the genus *Viverra*, especially the civet, or civet-cat. The substance is secreted in a pouch, near the anus of the animal. It is used for a perfume.

"This substance approaches in smell to musk and ambergris; it has a pale yellow colour, a somewhat acrid taste, a consistence like that of honey, and a very strong aromatic odour. It is the product of two small quadrupeds of the genus *Viverra*, of which one inhabits Asia, the other Africa. They are reared with tenderness, especially in Abyssinia. The civet is contained in a sac situated between the anus and the parts of generation in each sex. . . . According to M. Boutron-Chabard, it contains a volatile oil, to which it owes its smell; some free ammonia, resin, fat, extractive matter, and mucus. It affords by calcination an ash, in which there is some carbonate and sulphate of potash, phosphate of lime, and oxide of iron."—*Encyc. Dic. of Arts, Manufactures, and Mines.*

2. **Zool.:** The same as CIVET-CAT (q.v.). *Viverra civetta*, an animal of the family

CIVET.

Viverridae, of which it is the type. It is found in North Africa. It climbs trees with facility. Its food consists of small mammals, reptiles, and birds, as well as roots and fruits. It is sometimes kept in the region which it inhabits for the sake of the perfume which it furnishes. There is an allied species, *Viverra zibet*, in Java.

**civet-cat, s.**

1. **Literally:**  
**Zool.:** The animal that produces civet.  
\* 2. **Fig.:** A bescented dandy, a fop.  
"So does Flattery mize;  
And all your courtly *Civet-cats* can vent,  
Perfume to you, to me is Excrement."  
Pope: *Epilogue to the Satires*, Dial. II. 182-4.

\* **civ-ët (2), s.** [See def.] A dish prepared with venison or chicken, flavoured with onions or garlic. [CIVES; cf. also CIVET (3).]

**ci-vët (3), s.** [Fr. *cive, civette*.] [CHIVE.] A plant, *Allium Schœnoprasum*.

\* **civ-ët, v. t.** [CIVET (1), s.] To scent with civet.

\* **civ-ët-éd, pa. par. or a.** [CIVET, v.]

**civ-ic, \* civ-ick, a.** [Fr. *civique*; Ital. *civico*; Lat. *civicus* = pertaining to a citizen; *civis* = a citizen.] Pertaining to a city, or to its inhabitants, government, or customs.  
"At *civic* revel, pomp, and game."  
Tennyson: *Death of Wellington*.

**civico crown, s.**

1. **Roman Ant.:** A crown or garland of oak-leaves and acorns, given as a mark of public approbation to any soldier who had in battle saved the life of a comrade. It was considered more honourable among the ancient Romans than any other crown.  
"Behold, Rome's genius waits with *civico* crowns,  
And the great father of his country owns."  
Pope: *Temple of Fame*, 242.

2. **Arch.:** A garland of oak-leaves and acorns often used as an architectural ornament. (Gwill.)

\* **civ-ic-al, a.** [Eng. *civic*; -al.] Civic.  
"Civical crowns of laurel, oak, and myrtle."  
Browne: *Garden of Cyrus*.

**civ-ic-al-ly, adv.** [Eng. *civical*; -ly.] Civically  
in a civic sense. (Morley; Rousseau, II. 185.)

**civ-ics, s.** [The pl. of *civico* used substantively; cf. *mathematics, politics*, &c.] The science of the rights and obligations of citizenship.

**civ-il, \* civ-ile, \* civ-ill, a.** [Fr. & Sp. *civil*; Ital. *civile*, from Lat. *civillis* = pertaining to a citizen; *civis* = a citizen.]

**A. Ordinary Language:**

1. **Literally:**  
1. Of or pertaining to a city or state, or the members and inhabitants thereof collectively.  
"God gave them laws of civil regimen, . . ."  
Hooker: *Eccles. Polity*, bk. III. § 11.

2. Pertaining to any individual member of a community or city.  
". . . either out of your natural, or out of your civil power."  
Jeremy Taylor.

3. Pertaining to persons or actions relating to private life, as distinguished from those connected with war.  
"Fair shone his arms in history enroll'd;  
Whilset humbler lyres his *civil* worth proclaim."  
Shenstone.

4. Pertaining to matters or persons connected with secular matters, as distinguished from ecclesiastical.  
"Unto whom the chief government of all estates of this realm, whether they be ecclesiastical or *civil*, doth appertain."  
Articles of Religion, art. 87.

\* 5. The same as CIVIC (q.v.).  
"With *civile* crowns."  
Douglas: *Virgil*, bk. vi.

**B. Figuratively:**

1. Having the manners or habits of a member of a civilized community; civilized, not rude.  
"That wise and *civil* Roman . . ."  
Milton: *Areopag.*

2. Courteous, affable, obliging in manners or speech.  
3. Courteous, not coarse or rude (applied to speech or actions).

\* 4. Sober, grave, serious.  
"A *civil* habit  
Oft covers a good man."  
Beaumont and Flot.: *Beggars Bush*.

\* 5. Subdued, calm, quiet.  
"Once I sat upon a promontory,  
And heard a mermaid on a dolphin's back  
Uttering such dulcet and harmonious breath  
That the rude sea grew *civil* at her song."  
Shakespeare: *Mids. Night's Dream*, II. 1.

**B. Technically:**

1. **Mill.:** Intestine; applied to a war waged between citizens of the same country, and not with foreigners. [CIVIL WAR.]  
"Prosper this realm, keep it from *civil* broils."  
Shakespeare: 1 Hen. VI., I. 1.

2. **Polit.:** Connected with, or pertaining to, the internal or domestic government of a state. [CIVIL LIST, CIVIL SERVICE.]

3. **Law:**  
(1) Pertaining to an action in a private suit, as distinguished from a criminal trial.  
(2) Not natural, but only so far as relates to the rights or privileges of any person as a citizen.  
"In case any estate be granted to a man for his life generally, it may determine by his *civil* death; as if he enter into a monastery, whereby he is dead in law."  
Sir W. Blackstone.

(3) (See extract.)  
"Civil law is defined to be that law which every particular nation, commonwealth, or community, has established peculiarly for itself . . . now more properly distinguished by the name of municipal law, the term *civil* law being chiefly applied to that which the old Romans used."  
Wharton.

¶ (1) Crabb thus distinguishes between *civil* and *polite*: "These two epithets are employed to denote different modes of acting in social intercourse: *polite* expresses more than *civil*; it is possible to be *civil* without being *polite*: *politeness* supposes *civility* and something in addition. *Civility* is confined to no rank, age, condition, or country; all have an opportunity with equal propriety of being *civil*, but not so with *politeness*, that requires a certain degree of equality, at least the equality of education; it would be contradictory for masters and servants, rich and poor, learned and unlearned, to be *polite* to each other. . . . *Civility* is rather a negative than a positive quality, implying simply the absence of rudeness. *Politeness* requires positive and peculiar properties of the head and heart, natural and acquired. . . . The term *civil* may be applied figuratively, but *politeness* is a characteristic of real persons only."

(2) He thus distinguishes between *civil*, *obliging*, and *compliant*: "*Civil* is more general than *obliging*; one is always *civil* when one is *obliging*, but one is not always *obliging* when one is *civil*: *compliance* is more than either, it refines upon both; it is a branch of *politeness* (v. *Civil, polite*). *Civil* regards the manner as well as the action, *obliging* respects the action, *compliant* includes all the circumstances of the action: to be *civil* is to please by any word or action; to be *obliging* is to perform some actual service; to be *compliant* is to do that service in the time and manner that is most suitable and agreeable: *civility* requires no effort; to be *obliging* always costs the agent some trouble; *compliance* requires attention and observation; a person is *civil* in his reply, *obliging* in lending assistance, *compliant* in his attentions to his friends. One is habitually *civil*; *obliging* from disposition; *compliant* from education and disposition: it is necessary to be *civil* without being free, to be *obliging* without being officious, to be *compliant* without being affected." (Crabb: *Eng. Synon.*)

**civil-architecture, s.** The branch of architecture which is employed in the construction of buildings for the purposes of civil life, such as private houses, warehouses, churches, &c., in distinction from military and naval architecture.

¶ For the different orders of architecture, see ORDER. See also COLUMN, CORINTHIAN, DORIC, IONIC, &c.

**civil death, s.** [CIVIL, B. 3. (2).]

**civil-engineer, s.** One who follows the art or science of civil-engineering.

**civil-engineering, s.** The science or art of constructing machinery for manufacturing purposes, constructions, and excavations, for general transit, as canals, docks, railroads, &c. It is so called in contradistinction to military engineering, which is confined to war. Other branches of engineering are *mechanical engineering* and *sanitary engineering* (q.v.).

\* **civil gown, s.** The dress of a citizen or civilian.

**civil law, s.** The law of a state, city, or country; appropriately the Roman law comprised in the Institutes, Code, and Digest of Justinian, and the Novel Constitutions. (Blackstone.) [ROMAN LAW.]

**civil list, s.**

1. **Originally:**  
\* 1. A list of the entire expenses of the civil government.

2. The revenue appropriated to support the civil government.

3. The officers of the civil government who were paid from the public treasury.

II. **In England:** The three meanings given above became more limited in their extent till finally they were confined to the list of expenses, the revenues and the dependents of the crown instead of the country.

¶ Originally it embraced the list of expenses of the crown, what now would be called the civil service, the army, the navy—everything.

¶ From the conquest in A.D. 1066 to the Restoration of Monarchy in A.D. 1660, all governmental expenses, whether those of the crown, the civil officers, the army, or the navy, now defrayed from a common fund, furnished partly by the revenues of the unsold crown

lands, and partly by taxation, the sovereign being left free to spend the money with uncontrolled freedom. At the restoration the military and naval expenses, which during war were necessarily great, were deemed extraordinary, and were withdrawn from the common fund, which was then appropriately called civil, as distinguished from military and naval. It supported the royal family, the judges, the various pensioners, &c. In 1830 the Civil List was limited to the charges required for the sovereign and his dependents. On the accession of Queen Victoria arrangement was made again regarding the Civil List, and in December, 1837, it was settled at £385,000. In 1881 it amounted to £407,468.

**civil remedy, s.**

**Law:** That given to a person injured by action, as opposed to criminal prosecution.

**civil servant, s.** A covenanted non-military servant of the crown.

**civil service, s.**

1. That branch of the public service which includes the covenanted non-military servants of the government.

2. The body of civil servants collectively.

**civil service reform, s.** Officers in the Civil Service of the United States were appointed by the President or Heads of Departments until 1883, when a Civil Service Reform bill was passed for the purpose of doing away with the inefficiency resulting from this method and the political use made of it. This law required that candidates for all except certain leading positions should be subjected to a Civil Service Examination, and those who passed best be appointed to the positions, without regard to political affiliation. The law has worked well, though it has not been strictly observed.

**civil state, s.** The entire body of the laity or citizens, as distinct from the military, ecclesiastical, and maritime. (*Craig*.)

**civil suit, s.**

**Law:** A suit for a private claim or injury.

\* **civil-suited, a.** Modestly, not gaudily arrayed.

"Thus, night, oft see me in thy pale career,  
Till civil-suited morn appear."  
*Milton: Il Penseroso*, 121.

**civil war, s.** A war between citizens of the same country.

¶ The passage of the Rubicon by Julius Cæsar, which commenced the civil war between him, and Pompey, took place in January, 49 B.C. The battle of Pharsalia, which decided its issue, was on August 9, 48 B.C. The assassination of Julius Cæsar, which led to the immediately succeeding civil war, was on March 15, 44 B.C., and the sea-battle of Actium, which finally decided its issue, on September 2, 31 B.C.

Coming to England, the first battle of St. Albans, the earliest in the wars of the Roses, was in A.D. 1455. That civil war may be supposed to have extended to the battle of Bosworth, August 22, 1485, and the accession of Henry VII., in whom the Houses of Lancaster and York, the antagonists in the late strife, were united. The first battle in the civil war which produced the Commonwealth and the Cromwellian Protectorate was that of Edgehill, October 23, 1642; that of Naseby, which decided the issue, was on June 14, 1645, though the struggle cannot be said to have finally terminated earlier than the accession of Charles II., who was proclaimed king on May 8, 1660.

The capture of Fort Sumter, at Charleston, in South Carolina, by the Secessionists, which was the first military operation in the American civil war, was on April 13, 1861. The surrender of General Lee to General Grant, on April 9, 1865, and that of General Kirby Smith, commandant of Galveston, on June 5 of the same year, were its final scenes.

**civil year, s.** The legal year, or annual account of time which a government appoints to be used in its own dominions, as distinguished from the solar year, measured by the revolution of certain of the heavenly bodies. (*Whevell*.)

**I. Ordinary Language:**

1. The act or process of civilizing.

¶ Not used in Johnson's time in the sense in which we now employ it. The only meaning assigned to it in the edition of his dictionary published in 1773, the last which received his corrections, is the legal definition given below. [H.]

"It had the most salutary consequences in assisting that general growth of refinement and the progression of civilization."—*T. Burton*.

2. The state of being civilized; refinement.

"... occupied with taming the wild earth, and performing the functions of pioneers of civilization."—*Sir G. C. Lewis: On the Influence of Authority in Matters of Opinion*, ch. iii.

¶ Civilization consists in what may be broadly called culture in a nation; and a nation may be considered as civilized when a large proportion of those belonging to it have their intellectual and moral faculties and all their higher natures in large measure developed and becoming increasingly so with the advance of years. Before this can take place, a considerable amount of material prosperity must have been achieved, between which and the culture already described there are continual action and reaction.

At present barbarism, semi-civilization, and civilization are seen contemporaneously existing in the world, and the question suggests itself, How has this phenomenon been produced? In solving it inquiry needs to be made as to the original state of man. Individuals can move backward as well as forward in culture, and it is axiomatic that those aggregations of individuals called nations or races can do the same. The mass of men in this country believe Scripture to have decided that the present population of the earth has sprung from Noah's family, and that he and his household were far removed from barbarism. The contrary view that the original state of man was a barbarous one, an opinion generally held

by the old Romans, has of late been revived, and has been embraced by many Darwinists and others. The Duke of Argyll has ably defended the more common hypothesis, whilst that recently revived is strongly maintained in Sir John Lubbock's "Origin of Civilization" (1870), Dr. Edward B. Tylor's "Primitive Culture" (1871), and other publications.

Regarding progression in material prosperity, certain stages tend to occur: (1) a barbarous one, in which one feeds on roots, fruits, and fishes, when these last can be caught without effort; (2) the state of a hunter; (3) that of the shepherd, in which, to avoid the uncertainty of the result in hunting, wild animals are domesticated; (4) the agricultural state, and (5) that of manufactures and commerce. Regarding mental advance, M. Auguste Comte, in publications issued between 1830 and 1854, maintained that nations necessarily passed through a theological, a metaphysical, and a positive or scientific stage. Littré in France (1845), and Buckle in England (1857—1861), ably and earnestly supported the same view.

\* **II. Law:** A law, act of justice, or judgment, which renders a criminal process civil; which is performed by turning an information into an inquest, or the contrary. (*Harris*.)

"Alle called on that corynse and *claymed* his grace."  
E. Eng. *Allit. Poems*; *Cleanmess*, 1397.

Crabb thus distinguishes between to ask or ask for, to claim, and to demand. "Ask, in the sense of beg, is confined to the expression of wishes upon the part of the asker without involving any obligation on the part of the person asked; all granted in this case is voluntary or complied with as a favour; but ask for, in the sense here taken, is involuntary, and springs from the forms and distinctions of society. . . . To ask for denotes simply the expressed wish to have what is considered as due; to claim is to assert a right or to make it known; to demand is to insist on having without the liberty of a refusal. . . . Asking for supposes a right not questionable; claim supposes a right hitherto unacknowledged; demand supposes either a disputed right [not always] or the absence of all right, and the simple determination to have."  
(Crabb: *Eng. Synon.*)

**clāim**, \* **clame**, \* **clayme**, s. [O. Fr. *claim*; Low Lat. *clameum*, from Lat. *clamo* = to call or cry out.]

**clán, \*clach-in** (clá gntural), \*clah-yanhe, s. [Oael. clann = offspring, descendants; Ir. clán, clann = children, a clan.]

1. A tribe or number of families, bearing the same surname, claiming to be descended from the same ancestor, and united under a chieftain representing that ancestor. The clan system is essentially the same as that existing among the Arabs, the Tartars, and tribes similarly situated. The clan system was said to have sprung up in Scotland about

1008, while Malcolm II. was reigning, but it may have been of greater antiquity. In the Act 20 Geo. II. c. 43, passed in 1747, the legal authority of the chiefs over their followers was abolished as a punishment for the part which the former had taken in the insurrection which ended in 1745 at Culloden. Whilst the clans flourished they were divided into two, the clans of the borders and those of the highlands.

\* 2. Any number of persons united in a common cause.

"They around the flag Of each his faction, in their several clans, Swarm populous, unnumbered." *Milton: P. L., II. 201.*

\* 3. A body or sect of persons, a clique (used in contempt).

"Each buskpin of the clan, Instead of saying what he owes, Will cheat him if he can." *Cowper: The Hearty Distress.*

¶ Crabb thus distinguishes between clandestine and secret: "Clandestine expresses more than secret. To do a thing clandestinely is to elude observation; to do a thing secretly is to do it without the knowledge of any one: what is clandestine is unallowed, which is not necessarily the case with what is secret. With the clandestine must be a mixture of art; with secrecy, caution and management are requisite; a clandestine marriage is effected by a studied plan to escape notice; a secret marriage is conducted by the forbearance of all communication." (*Crabb: Eng. Synon.*)

**clán-dés-tíne-ly, adv.** [Eng. clandestine; -ly.] In a clandestine manner, secretly, privately, not openly.

**clán-dés-tíne-ness, s.** [Eng. clandestine; -ness.] The quality of being clandestine; secrecy, privacy, concealment.

\*clán-dés-tín'-i-tý, s. [Lat. clandestinus = clandestine.] Clandestineness, secrecy, concealment.

A. *As substantive*:

1. *Lit.*: A name originally given to wines of a light-red color, but now ordinarily applied to the red wines imported from France, chiefly from Bordeaux. These wines vary in composition according to the locality, season, and age, but the produce of each vineyard usually retains its own peculiar characteristics. The most esteemed are those produced at the vine-

yards of Lafitte, Latour, Chateau Margaux, and others. Many of the clarets sold in this country are nothing more than the *vin ordinaire* used by the French peasants and working classes. A genuine claret should contain from 16 to 20 per cent. of proof-spirit. Fictitious clarets are sometimes prepared by mixing a rough elder with a cheap French wine, and colouring with cochineal, logwood, elderberry, hollyhock, indigo, litmus, red cabbage, beetroot, or rose-aniline. To detect these colouring matters make a jelly by dissolving five grammes of gelatine in 100 cubic centimetres of warm water, and pour it into a square flat mould. From this cake of jelly cubes about three-quarters of an inch square are cut with a sharp wet knife, and are immersed in the wine; they are taken out after twenty-four to forty-eight hours, washed slightly, and sections cut in order to see how far the colouring matter has penetrated. If the wine is pure, the colour will be confined to the edges of the slice, or will not have penetrated more than one-eighth of an inch. This colouring matters mentioned above permeate rapidly, and colour the jelly. For other adulterations of wine, &c., see *Blyth's Manual of Practical Chemistry*.

4. *Zool. & Bot.*: See *CLASSIFICATION*.

† Crabb thus distinguishes between *class*, *order*, *rank*, and *degree*: "Class is more general than *order*; *degree* is more specific than *rank*. *Class* and *order* are said of the persons who are distinguished; *rank* and *degree* of the distinction itself; men belong to a certain *class* or *order*; they hold a certain *rank*, they are of a certain *degree*. Among the Romans all the citizens were distinctly divided into *classes* according to their property; but in the modern constitution of society *classes* are distinguished from each other on general, moral, or civil grounds; there are reputable or disreputable *classes*; the labouring class, the class of merchants, mechanics, &c. *Order* has a more particular signification; it is founded upon some positive civil privilege or distinction; the general *orders* are divided into higher, lower, or middle. . . . [Though we say the lower *orders* or *classes*, yet the expression the upper *classes* and the middle *classes* is the common one, and the term *orders* is rarely used of them.] *Rank* distinguishes one individual from another; it is peculiarly applied to the nobility and the gentry, although every man in the community holds a certain *rank* in relation to those who are above or below him. *Degree*, like *rank*, is applicable to the individual; but only in particular cases; literary and scientific *degrees* are conferred upon superior merit in different departments of science. There are likewise *degrees* in the same *rank*, whence we speak of men of high and low *degree*." (*Crabb: Eng. Synon.*)

**B. As adj.:** (See the compounds.)

**class-fellow**, *s.* One who is for the time a member of the same class or group united for purposes of instruction.

**class-man**, *s.* A term in use at Oxford for one who is placed by the examiners in an honour class, as opposed to pass-men, who are not classified at all.

**class-mate**, *s.* A class-fellow.

"He was always among the leaders of his *class-mates*."—*Trans. Amer. Philos. Soc.*, 1873, vol. xiii., p. 133.

**class**, *v.t. & i.* [*CLASS, s.* In *Fr. classer*.]

**A. Transitive:**

1. To arrange in a class; to group according to different characteristics or natural distinctions.

"I considered that, by the *classing* and methodizing such passages, I might instruct the reader."—*Arbutnot: On Cicero*.

2. To form into or place in a class, or number of persons temporarily associated for purposes of instruction.

3. To assign a certain standing or position to, after examination.

**fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hère, camel, hër, thère; pine, pít, síre, sír, marine; gô, pôt, or. wöre, wöf, wörk, whô, sôn; müte, cüb, eüre, uníte, eür, rüle, füll; trý, Sýrian. æ, œ = é. ey = ä. qu = kw.**

a class; to fall naturally into a certain division or group.

Crabb thus distinguishes between to class, to arrange, and to range: "The general qualities and attributes of things are to be considered in classing; their fitness to stand by each other must be considered in arranging; their capacity for forming a line is the only thing to be attended to in ranging. Classification serves the purposes of science; arrangement those of decoration and ornament; ranging those of general convenience: men are classed into different bodies according to some certain standard of property, power, education, occupation, &c.; furniture is arranged in a room according as it answers either in colour, shade, convenience of situation, &c.; men are ranged in order whenever they make a procession . . . When applied to spiritual objects, arrangement is the ordinary operation of the mind, requiring only methodical habits: classification is a branch of philosophy which is not attainable by art only; it requires a mind peculiarly methodical by nature, that is capable of distinguishing things by their generic and specific differences; not separating things that are alike; nor blending things that are different: books are classed in a catalogue according to their contents; they are arranged in a shop according to their size or price; they are ranged in a counter for convenience." (Crabb: Eng. Synon.)

classed, pa. par. or a. [CLASS, v.]

class-able, a. [Eng. class; -able.] Capable of being classed or assigned to a certain group or division. (Elect. Rev.)

class-ic, a. & s. [Fr. classique; Ital. classico; Lat. classicus = belonging to a classis or division of the Roman people, and especially to the first division. The Roman citizens were divided into several classes, a man of the highest of all being emphatically called classicus, that is, of the class pre-eminently so designated—the highest in the scale. (Trench: On the Study of Words, pp. 196-7.)]

A. As adjective:

I. Ordinary Language:

1. Literally:

(1) Of or belonging to the first class or rank, standard; superior in authority or dignity.

"Give, as thy last memorial to the age, One classic drama, and reform the stage." Byron: English Bards and Scotch Reviewers.

(2) Of or belonging to the ancient Greeks and Romans, especially of their authors and writers, but also of their localities.

"Though thro' the midst Latin's classic plains The Eternal City's towers and fane." Hemans: The Widow of Creescentua.

"A very slender provision of classical learning." Brougham: Hist. Sketches. (Sheridan.)

3. According to or founded on the classic authors; pure, refined.

II. Fig.: Of standard and acknowledged authority.

"From this standard the value of the Roman weights and coins are deduced: in the settling of which I have followed Mr. Greaves, who may be justly reckoned a classical author on this subject." Aroustinos: On Coins.

B. Eccles.: Of or pertaining to a classis.

The Independents had no disposition to enforce the ordinances touching classis, provincial, and national synods." Macaulay: Hist. Eng., ch. II.

class-ic-al-ism, s. [Eng. classical; -ism.]

A classical style, idiom, or expression; a classicism.

class-ic-al-ist, s. [Eng. classical; -ist.]

Art.: One devoted to classicism; one who scrupulously adheres to the canons of classic art. (Ruskin.)

class-ic-al-ity, s. [Eng. classical; -ity.]

1. The quality of being classical; classicalness.

2. Classical knowledge.

"... appeared to have no other object for his present visit than thus to make a display of this scrap of classicity which he had just acquired." Foreign Quarterly Review, No. 1.

class-ic-al-ly, adv. [Eng. classical; -ly.]

1. According to classes, by way of classes.

"If they were not classically arranged." Ker.

2. In a classical manner; according to or in the manner of the classic authors.

class-ic-al-ness, s. [Eng. classical; -ness.]

The quality of being classical.

class-ic-ism, s. [Eng. classic; -ism.]

1. A classical idiom, expression, or style.

2. An affectation or preference for classical authors or idioms.

"Catholicism, classicism, sentimentalism, cannibalism; all ideas that make up man in France, are rushing and roaring in that gulf." Origin: French Revolution, pt. III, bk. v., ch. I.

class-ic-ist, s. [Eng. classic; -ist.]

One skilled or learned in the classics. (Hallam.)

class-ic-fi-able, a. [Eng. classify; -able.]

Capable of being classed or arranged according to classes.

"These changes are classifiable as the original sensations are." J. S. Mill: System of Logic, I. 200.

class-ic-ic, a. [Lat. classis = a class, and facio (pass. fit) = to make.]

1. Consisting of or constituting a class or division.

2. Relating to classification.

class-ic-i-cā-tion, s. [Formed on analogy from classify (q.v.).]

1. Ord. Lang.: The act of bringing into or arranging in classes or orders.

"In the classification of the citizens, the great legislators of antiquity made the greatest display of their powers." Burke.

2. Nat. Science: Animals, plants, and minerals are carefully classified by naturalists. Though the use of the term classification may seem to imply that these are placed in classes only; yet these are only one of the numerous designations of the several categories in which they are placed. Linnaeus arranged all natural objects in the earth under the head Imperium Naturæ (the Empire of Nature). He divided it into Regnum animale (the Animal Kingdom), Regnum vegetabile (the Vegetable Kingdom), and Regnum lapideum (the Stony or Mineral Kingdom). Each is next divided by him into Classes (Classes), Ordines (Orders), Genera and Species, what are now called varieties being occasionally discriminated. His categories, larger or smaller, were consequently seven: Empire, Kingdom, Class, Order, Genus, Species, Variety. The most comprehensive term now employed in zoology is Sub-kingdom, immediately below which comes the Phylum (a term very generally substituted for Class, and intended to show genetic relationship), then Order, Family, Sub-family, Genus, Species, and finally Variety or Sub-species. Synonymous terms, such as group, section, sub-section, &c., are sometimes used in lieu of some of those given above. The names of zoological families should properly end in -idae, and sub-families in -inae, and in botany alliances end in -ales and orders as a rule in -aceæ. Uniformity in such terminology is very desirable, and the present practice is in that direction.

For the difference between natural and artificial systems of classification, see SYSTEM. For particular systems, now obsolete, see BINARV and QUINARV. As bearing on present views of the philosophy of classification, see also DARWINISM, SPECIES, &c. In classifying animals or plants, care must

be taken to distinguish between analogy and affinity (see these words). It is only when there is affinity between two species, two genera, &c., that they should be put together. A linear classification is not conformable to nature. For the binomial method of naming objects of natural science, see NOMENCLATURE.

class-ic-i-cā-tōr, s. [Mod. Lat.] One who classifies; a classifier, a taxonomist.

class-ic-i-cā-tōr-y, a. [Formed by analogy from Eng. classification (q.v.).] Pertaining to classification.

"... but to inquire what is the value of the difference between them under a classificatory point of view." Darwin: Descent of Man (1871), pt. I, ch. vii., vol. 1, p. 214.

class-ic-i-fy, pa. par. or a. [CLASSIFY.]

class-ic-i-fy-er, s. [Eng. classify; -er.] One who classes, or arranges things in classes or divisions.

"If man had not been his own classifier, he would never have thought of founding a separate order for his own reception." Darwin: Descent of Man (1871), pt. I, ch. vii., vol. 1, p. 191.

class-ic-i-fy, v. t. [Lat. classis = a class, and facio (pass. fit) = to make.]

1. To distribute in classica or divisions.

2. To arrange according to a system.

class-ic-i-fy-ing, pr. par., a., & s. [CLASSIFY.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The act or process of arranging in classes or according to a system; classification.

class-ic-ing, pr. par., a., & s. [CLASS, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

C. As subst.: The act of arranging in classes or divisions, classifying.

"It may be true that our conscious inferences involve acts of classing. But it does not, therefore, follow that our conscious acts of classing involve inferreces." J. S. Mill: System of Logic, I. 174.

class-ic-is (pl. class-ic-sōs), s. [Lat.]

1. Ord. Lang.: A class, order, or body [CLASS.]

"He had declared his opinion of that classis of men, and did s. he could to hinder their growth." Lord Clarendon.

2. Eccles.: A body or convocation having judicial authority in certain churches.

"Give to your rough gown, wherever they meet it, whether in pulpit, classis, or provincial synod, the precedence and the pre-eminence of deceiving." Milton: Observations on the Articles of Peace between the Earl of Ormond and the Irish.

clās-tic, a. [Gr. κλαστός (klastos) = broken.]

clastic rocks, s. pl. Clastic or fragmental rocks are divided by Naumann into psephtic, psammitic, and pelitic. They are composed of materials derived from the waste of various rocks. Sandstones and grits differ from breccias and conglomerates merely in the size of the fragments of which they are composed, and therefore should be included among the clastic rocks. (Rutley: Study of Rocks.)

clāt, s. [CLON, CLOT, s.]

1. That which is raked together.

"What are all men on earth, but a number of worms crawling and creeping upon a clat or clod of clay?" Z. Boyd: Last Butch, pp. 86, 948.

2. An instrument for raking together mire, weeds, &c.; a hoe. (Sir Walter Scott.)

3. The act of raking together.

clāt, claut, clawt, v. t. [CLOT, v.]

1. Lit.: To clean, to scrape; to rake to gether. (Scott.) (Sir Walter Scott.)

"That yet he tarrow't at it; But on the day was done, I trow, The lagavie they hae clawt." Burns: A Dream.

2. Fig.: To accumulate by gripping or by extortion.

"We hae heard about this sair distress.—Here is four pound. May it do me guld to him who clawts it out o' the widow's house." M. Lyndsay, p. 65.

clatch, v. t. [CLAT, v.] (Scott.)

1. To daub with lime.

2. To cloze up with any glutinous or adhesive substance; as "to clatch up a hole," with slime, clay, &c.

boil, boy; pouit, jowit; cat, cell, orhus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -Ing. -cian, -tian = shān. -tion, -sion = shūn. -tion, -sion = shūn. -tions, sions, -cions = shūs. -ble, -dle, &c. = bēl. dēl.

3. To finish any piece of workmanship in a careless and hurried way, without regard to the rules of art. In this sense a house or wall is said to be *clatched up*, when the workmen do it in such haste, and so carelessly, that there is little prospect of its standing long.

**clätch, s.** [CLATCH, v.]

- 1. Anything thrown for the purpose of daubing; as "a clatch of lime," as much as is thrown from the trowel on a wall. (Scotch.)
- 2. Any piece of mechanical work done in a careless way. Thus an ill-built house is said to be "a mere clatch."
- 3. Mire raked together into heaps.
- 4. A dirty woman; a drab. (Scotch.)

**cläth-rär'-ä-s, s.** [Lat. *clathri* (pl.) = a trellis or grating, especially to the cages of animals; Gr. *κλήθρα* (*klēthra*), pl. of *κλήθρον* (*klēthron*) = a bolt or bar for closing a door; *κλείω* (*kleiō*) = to shut; and Lat. fem. sing. *anfr. -aria*.]

**Palaont.:** Originally proposed by Brongniart for a group of plants from the coal measures, now included in *Sigillaria*, afterwards applied by Mantell to some Cycadean stems which he found in the Wealden beds of Tilgate Forest. From the alternating large and small scars on the stem they are believed to be allied to the genus *Cycas*. Nothing is known with certainty as to their foliage and fruit, though leaves and single nuts have been found in rocks of the same age which may belong to them. Eight species are known from beds of secondary age.

**cläth'-räte, a.** [Lat. *clathri*, *clatra* = bars, lattices; Gr. *κλήθρα* (*klēthra*).]

**Bot. & Zool.:** Presenting the appearance of lattice-work.

**cläth-rö öys'-tis, s.** [Gr. *κλήθρα* (*klēthra*) pl. = lattice-work, and *κύστις* (*kustis*) = a bladder.]

**Bot.:** A genus of Palmellaceans Alga. The plants occur in immense abundance in freshwater ponds, which they make appear grass-green.

**cläth'-röid, a.** [Lat. *clathri* = lattice-work; suff. *-oid*.] Clathrate (q.v.).

**cläth-röp-ö-ra, s.** [Gr. *κλήθρα* (*klēthra*) = lattice-work; and *πόρος* (*poros*) = . . . a passage, a pore.]

**Palaont.:** A polyzoan from the Upper Silurian and Devonian rocks.

**cläth-röp-tër-is, s.** [Gr. *κλήθρα* (*klēthra*) pl. = lattice-work, and *πτερίς* (*ptēris*) = a fern.]

**Palaont.:** A genus of fossil ferns. *Clathropteris menticoides* is found in Mesozoic rocks in Scania.

**cläth'-röse, a.** [As if from a Lat. *clathrosus*.]

**Entom.:** Having deep striae crossing each other at right angles. A good example of this occurs in the abdomen of some of the *Staphylinidae*.

**cläth'-ru-läte, a.** [Mod. Lat. *clathruli* = fine lattice-work; *-äte*.] Marked with very fine lines crossing each other at right angles.

**cläth'-ru-li'-nä, s.** [CLATHRULATE.]

\*cläut, \*oläwt, v.t. [CLAT.] To clean, to scrape. (Scott.) (Burns.)

oläuts, olätts, s. pl. [CLAT, v.]

1. Two short wooden handles, in which iron teeth were fixed at right angles with the handles; used, before the introduction of machinery, by the country people, in tearing the wool asunder, so as to fit it for being spun on the little wheel.

2. An instrument for raking up weeds, rubbish, &c.

3. A heap or hoard; anything raked together.

olä-va, s. [Lat. = a club, from the shape of the zooids.]

Zool.: A genus of Hydroid Polypes, the typical one of the family Clavidae (q.v.).

olä-va-göl-la, s. [From Lat. clava = a club; second element doubtful.]

Zool.: A genus of Molluscs, family Gastrocnemidae. The shell is oblong, the two valves flat, the left one cemented to the side of the long tubular burrow in which the animal is found. Six recent species are known, from the Mediterranean, the Pacific, and the Australian seas, and fourteen fossils, the latter from the Upper Greensand strata.

olä-vär'-i-a, s. [From Lat. clava = . . . a club, in allusion to the form of the plant, and fem. adj. suff. -aria.]

Bot.: A genus of Hymenomycetous Fungi. Clavaria coralloides contains a sweet sugary matter believed to be mannita.

olä-va-ri'-ö-i, s. pl. [From Mod. Lat. clavarium (q.v.), and masc. pl. adj. suff. -iäi.]

Bot.: A division of Hymenomycetous Fungi, growing vertically, having a superior hymenium which extends to the very apex, and is distributed equally on all sides. They grow on the ground among leaves, or on rotten wood or herbaceous stems. (Berkeley.)

olä-väte, olä-vä-téd, a. [Lat. clavatus = . . . furnished with points or prickles, but by naturalists used to mean club-shaped.]

1. Knobbed; set with knobs.

"These appear plainly to have been clavated spikes of some kind of echinus ovarius."—Woodward: On Fossils.

2. Club-shaped; linear at the base, but growing gradually thicker towards the end. (Owen.)

"In Thalletrum the filament . . . is thickest at the upper end, or clavate."—Lindley: Introduct. to Bot., bk. 1, ch. 11, sect. 4, § 8.

"Various names have been given to the different forms of hairs: they are clavate or club-shaped, gradually expanding from the base to their apex. . . ."—Dalman: Botany, § 58.

olä-va-täl-la, s. [Lat. fem. dimin. of clavatus.] [CLAVATE.]

Zool.: A genus of Hydroid Polypes, the typical one of the family Clavastellidae (q.v.).

olä-va-täl-li-dä, s. pl. [From Mod. Lat. clavatella (q.v.), and fem. pl. adj. suff. -idäi.]

Zool.: A family of Hydroid Polypes, having capitate tentacles in whorls.

olä-vä'-ti, s. pl. [Lat. clavati, masc. pl. of clavatus.] [CLAVATE.]

Bot.: A family of Hymenomycetous Fungi, having the receptacles generally club-shaped.

\*clave (1), pret. of v. [CLEAVE (1), v.]

clave (2), pret. of v. [CLEAVE (2), v.]

cläve, s. [CLEAVE (1), v.] The handle or that part of a pair of scales by which they are held up during the process of weighing anything.

\*cläv'-ö-cin, s. [Fr.; Ital. clavicembalo, from Lat. clavis = a key, and cymbalum = a cymbal.]

Music:

1. A harpsichord.

2. The keys by means of which the carillon-leoneur plays upon the bells.

† cläv'-ö-cin-ist, s. [Eng. clavicin; -ist.] A performer or player on the clavicin. (Browning: Ring and Book, pt. 1, l. 1,209.)

clavel, s. [CLEVY.]

cläv-öl-li'-na, s. [Mod. Lat. clavella = a little club; Lat. fem. sing. adj. suff. -ina.]

Zool.: The typical genus of the family Clavellinidae.

oläv-öl-li'-ni-dä, s. pl. [From Mod. Lat. clavellina (q.v.), and fem. pl. adj. suff. -idäi.]

Zool.: A family of Social Ascidians, reproducing both by ova and gemmation. Each individual is supported on a footstalk springing from a creeping stolon, and has the heart and respiratory and digestive organs distinct.

oläv-öl-lä-téd, a. [Low Lat. clavellatus, from clavella, dim. of clava = a billet or log of wood.] Made with burnt tartar; a chemical term. (Chambers.)

clavellated ashes, s. pl. Potash and pearl-ash, so termed from the billets or little clubs from which they are obtained by burning. (Ogilvie.)

\*clav-er (1), s. [CLOVER.]

"With claver and clereworte cleds evrene over."—Morris Arthur, 3,241.

oläv'-vör (2), s. [CLAVER (1), v.]

1. Noisy, idle talk; chatter.

"Delighted with their various claver, While wealth made all his wits to waver."—Farney: Poems; The Parrot, ll. 517.

2. A tale-bearer, a tattler.

¶ Often in the pl. (clavers).

oläv'-vör (1), v.t. [A variant of clatter (q.v.).] To chatter, to talk foolishly.

"There's sarpence 't ye to buy half a matchkin instead of clavering about these auld-world stories."—Scott: Guy Mannering, ch. xxii.

\*oläv'-vör (2), v.i. [Dut. klaveren; Dan. klavre. Cf. O. Icel. klifra = to climb.] To climb, to clamber.

"Two kynges ware clymbande and claverande one hoghe."—Morris Arthur, 3,325.

oläv'-vör-ër, s. [Eng. claver; -er.] One who talks idly. (Scott.)

oläv'-vör-äng, pr. par., a., & s. [CLAVER (1), v.] Chattering, gossiping, talkative.

"A long-tongued clavering wife."—Scott: Old Mortality.

\*oläv'-stöök, s. [Eng. clave = cleave, and stock (q.v.).] A chopper or instrument for cleaving wood.

"A claverstock and rabetstock carpenters craae."—Tusser, p. 38.

\*cläv'-vi-a-rý, s. [Fr. clavier, as if from a Lat. claviarium, from clavis = a key.]

Music: An index of keys or a scale of lines and spaces. (Webster.)

cläv'-i-a-tür, s. [Ger.]

Music: 1. The key-board of an organ or pianoforte. 2. Fingering. (Slatner & Barrett.)

cläv'-i-céps, s. [Lat. clava=club; caput=a head.]

Bot.: A genus of Ascomycetous Fungi, also called Cordiceps (q.v.). Claviceps purpurea is the Ergot of grasses. An ascomycetous fungus is one which has its fruit in small asci or hyaline sacs.

cläv'-i-chord, oläv'-i-cord, s. [Fr. clavocorde; Ital. clavicorda, from Lat. clavis = a key, and chorda = a chord.]

Music: A keyed and stringed instrument, not now in use, being superseded by the pianoforte; a clarichord. [CLARICHORD.]

"Its form is that of a small pianoforte: it has no quills, jacks, or hammers. The strings are all muffled . . . and the tone is produced by little brass wedges, placed at the ends of the keys, which, when pulled down, press against the middle of the strings, acting as a bridge to each. . . . We had in 1772 the extreme pleasure of hearing the incomparable Emanuel Bach touch his favourite clavichord at Hamburg."—Rees: Cyclopaedia.

oläv'-i-cle, s. [Lat. clavícula, dimin. of clavis = a key.]

Anat.: The collar-bone. It extends transversely outwards, with an inclination backwards from the summit of the sternum to the acromion process of the scapula. It connects the upper limb with the trunk. The corresponding bone in birds is the one popularly called the Merythorough.

"The scapula and clavicle are the media through which the bones of the arm are united to the trunk."—Todd and Bowman: Physiol. Anat., vol. 1, ch. vi., p. 147.

"In those animals that employ the anterior extremity only as an instrument of progressive motion there is no clavicle; hence this bone is absent from the skeletons of Pachydermata, Bunnianita, Solipeda, and the motions of the shoulder are only such as may be required for the flexion and extension of the limb."—Düb.

oläv'-i-cornä, oläv'-i-cör'-näs, s. pl. [From Lat. clava = . . . a club, and cornu = a horn.]

Entom.: The name given by Latreille to a sub-section of the section Pentamera. The antennae are thickened at the end, or club-shaped. There have been included under it the families Seydmanidae, Histeridae, Silphidae, Scaphididae, Nitidulidae, Dermestidae, and Byrrhidae (q.v.).

oläv'-vic'-u-lar, a. [From Lat. clavical(u) = the collar-bone, and Eng. suff. -ar.]

Anat.: Pertaining to the clavicle; as the clavicular artery.

"The posterior (clavicular) nerves pass downwards and outwards over the outer third of the clavicle."—N. Ward, in Todd's Cyclopaedia of Anat. and Physiol.

\*cläv'-i-cule, s. [Lat. clavícula, dimin. either from clavis = a key, or clavus = a club.]

Conchol.: The upper portion of a spiral shell.

oläv'-i-cyl'-in-dör, s. [Lat. clavis = a key; Eng. cylinder.]

Music:

1. An instrument in the form of tubes or cylinders of glass, invented by Chladni.

2. An instrument made of plates of glass of graduated lengths, the tone of which was produced by hammers set in motion by a keyboard. (Stainer & Barrett.)

oläv'-i-cým'-bal, s. [Lat. clavis = a key, and Eng. cymbal.]

Music: An instrument described by Praetorius in the sixteenth century. It resembled a prostrate harp, or a great piano without legs. Its compass was four octaves, with nineteen notes in each octave. (Knight.)

oläv'-i-cý-thör'-i-üm, oläv'-i-çi-thör, s. [Lat. clavis = a key, and cithara = a lute.]

Music: An upright musical instrument of the sixteenth century, probably akin to the harpsichord. The second form occurs in Browning's "Heretic's Tragedy."

oläv'-vi-dä, s. pl. [Lat. clava (q.v.), and fem. pl. adj. suff. -idäi.]

Zool.: A family of Hydroid Polypes, containing species which have the polypes claviform or fusiform with scattered tentacula. (Griffith & Henfrey.) [CLAVA.]

olä-viör, s. [Fr. clavier.] [CLAVIARV.]

Music: The key-board of an organ, harmonium, or pianoforte.

oläv'-i-örm, s. [Lat. clava = a club; forma = form.] Club-shaped, clavate.

**I. Literally:**

1. The sharp-hooked nail of a bird or beast.

"Claw or cle of a beata. *Ungula*."—*Prompt. Parv.*

" . . . his hairs were grown like eagles' feathers, and his nails like birds' claws."—*Dan.* iv. 33.

2. The whole foot of any animal furnished with sharp nails; the pincers or holders of a crab, lobster, &c.

"All these beasts that have the *cleo dyuydid*."—*Nyctifer*: *Levit.* xi. 3.

"He over him did hold his cruel *clawes*, Threatning with greedy gripe to doe him dye."—*Spenser*: *F. Q.*, II. vii. 27.

**II. Figuratively:**

1. Anything resembling the claw of a bird or beast. [CLAW-HAMMER.]

2. The hand (used in contempt).

3. A grasp or clutch.

"What's justice to a man, or law, That never comes within their *claws*?"—*Baker's Hudibras*, pt. II, c. iv.

**B. Bot.**: The narrow part of a petal which takes the place of the foot-stalk of a leaf, of which it is a modification.

**claw-bar**, *s.* A lever or crowbar with a bent bifurcated claw for drawing spikes. (*Knight*.)

**claw-hammer**, *s.*

1. *Carpentry*:

(1) A hammer with a bent and split peen to draw nails.

(2) A little split tool for drawing tacks.

2. *Nautical*, &c.:

(1) The bent and bifurcated end of a crowbar.

(2) A bent hook on the end of a hoisting chain; a grapple for suspending tackle.

3. *Locksmithing*: A spur or talon projecting from a bolt or tumbler.

4. A dress coat, from the shape of the tails. (*Slang*.)

**claw-wrench**, *s.* A wrench having a loose pivoted jaw which binds of itself. (*Knight*.)

**clāv**, \***clawen**, \***clawe** (pa. tense \**claw*, \**clawe*, *clawed*), *v. t. & i.* [A.S. *clawian*; O. H. Ger. *klawjan*; Dut. *klawen*; Dan. *kløe*.]

**A. Transitive:**

**I. Literally:**

1. To tear or scratch with the claws or nails.

"He [the cat] wol greven us alle, Cracchen us or *clawen* us."—*Langland*: *P. Plowman*, 300.

"2. To scratch, to tickle.

"Right as a man is used for to feele For sch of hed to *clawen* hym on his heele."—*Langland*: *Trilogia*, iv. 690.

"3. To inflict corporal punishment on.

**II. Figuratively:**

"1. To pull away or off, to get rid of, to tear away.

"I am afraid we shall not easily *claw* off that name."—*South*.

"2. To flatter, to curry favour with. [CLAW-SACK.]

"I will *claw* him, and saye, well might he fare!"—*Wilson*: *On Usury* (1571), p. 141.

"3. To canvass strictly, to examine thoroughly, to pull to pieces.

"They for their own opinions stand fast, Only to have them *clawed* and canvast."—*Bailey*: *Hudibras*, pt. II, e. ii.

† 4. To grasp, to seize.

"But Age with his stealing steps Hath *claw'd* me in his clutch."—*Shaksp.*: *Hamlet*, v. 1.

**B. Intransitive:**

"1. *Lit.*: To grasp at, as though trying to seize with the claws; to clutch at.

**II. Fig.**: To clutch at, to grasp after.

"Claw me and I'll claw thee: Help or stand by me and I will stand by thee.

"To *claw* away: To rail at, to abuse, to blame.

"You thank the place where you found money; but the jade Fortune is to be *clawed* away for't, if you should lose it."—*L'Estrange*.

"To *claw* favour: To curry favour. (*Scott*.)

"To *claw* off:

"1. *Ord. Lang.*: To revile, to blame, to rail at.

"Mr. Baxter takes great pains to unite the classical and congregational brethren, but *claws* off the episcopal party as a set of Cassandrian priests."—*Dr. Nicolson*: *To Mr. Yates*.

2. *Naut.*: To turn sid beat to windward to avoid drifting on a lee shore.

† To *claw* one's back:

1. To flatter or court one; to curry favour with any one.

2. To promote one's interests. (*Ross*.)

"To *claw* upon: To flatter, to court.

"To *claw* up one's mittens: To give one the finishing stroke. (*Scott*.)

\***clāv-bāck**, \***claw-backe**, *s. & a.* [Eng. *claw*; *back*.]

**A. As subst.**: One who claws the back; a flatterer, a sycophant; a wheedler.

"And I had *clawbackes* even at court full rife, Which sought by outrage golden gaines to winne."—*Mirror for Magistrates*, p. 73.

**B. As adj.**: Flattering, wheedling, sycophantic.

"Like a *clawback* parasite, Pick'd moths from his master's cloke in sight."—*Sp. Hall*: *Sat.* vi. 1.

**A. As substantive:**

**I. Ordinary Language:**

1. *Lit.*: Any earth which possesses sufficient ductility, when kneaded up with water, to be fashioned like paste by the hand or by the potter's lathe. (*Lyell*.) Clays when burnt acquire a siliceous hardness, as in the manufacture of bricks, tiles, and earthenware. Clays which form infusible bricks are called Fire-clays.

"Clays are earths firmly coherent, weighty and compact, stiff, viscid, and ductile to a great degree while moist; smooth to the touch, not easily breaking between the fingers, not readily diffusible in water; and when mixed, not readily separating from it."—*Bull*: *On Fossils*.

**2. Figuratively:**

*Poetry*:

(1) Earth in general; the terrestrial element.

"Why should our *clay*?"—*Donna*.

(2) The human body dead; a corpse.

"And, without sorrow, will this ground receive That venerable *clay*."—*Wordsworth*: *Excursion*, bk. vii.

(3) The human body alive; human nature.

"So man and man should differ in dignity."—*Shaksp.*: *Cymbeline*, iv. 2.

**II. Technically:**

1. *Min.*: Clay is composed of hydrous silicate of aluminium, usually with a mechanical admixture of sand, iron oxides, and other substances. In the earlier mineralogies clay figured under that simple name as a mineral genus with many species under it, or as a species with many varieties. Thus in the second edition of Phillips's "Mineralogy" eighteen minerals figure as kinds of clay. In the fourth edition (1837)—that by Robert Allan, F.R.S.E., &c.—these are reduced to thirteen, viz.: (1) Slate-clay or shale, (2) Adhesive Slate, (3) Polishing Slate, (4) Lithomarge, (5) Fuller's Earth, (6) Tripoli, (7) Boile, (8) Lennian Earth, (9) Cimolite, (10) Mountain Meal, (11) Black Chalk, (12) Pipe-clay, and (13) Potter's Clay. In Dana, clay of different kinds figures simply as a synonym of various minerals. In the "British Museum Catalogue" there is a category of clays. A great many minerals have more or less of alumina in their composition; its presence may often be detected by the peculiar smell which this mineral emits when breathed upon. The colour of clay chiefly depends upon its containing the iron in a ferrous or a ferric state. Some of the dark-coloured oolitic clays contain large quantities of a bituminous matter; these clays give off a most offensive odour when burnt into bricks.

2. *Chem.*: Clay is principally hydrous silicate of aluminium,  $Al_2O_3 \cdot 2SiO_2 \cdot 2H_2O$ . The purest clay is called kaolin (q.v.). Clays generally contain much free silica, also calcium carbonate, calcium sulphate, oxide of iron, magnesium carbonate, and small quantities of alkaline salts, phosphates, and iron pyrites. Fire-clay is more refractory the greater the percentage of alumina which it contains in proportion to the fluxes (alkalies,

**fāte**, **fāt**, **fāre**, amidst, whāt, **fāll**, father; **wē**, wēt, hēre, camp, hēr, thēre; **pīne**, **pīt**, **sīre**, **sir**, marine; **gō**, **pōt**, or; **wōre**, **wēll**, **wōrk**, **whō**, **sōn**; **mūte**, **ōūb**, **cūre**, unite, **cūr**, **rūle**, **fāll**; **trŷ**, **Sŷrian**. **so**, **co** = **ō**; **ey** = **ā**. **qu** = **kw**.

alkaline earths, and ferrous oxide), and the smaller the quantity of the silica in proportion to the silicate of aluminium. Clay possesses the property of absorbing ammonia and organic matter, &c., from liquid sewage applied to its surface, and thus not only promotes the growth of agricultural crops, but also purifies water percolating slowly through it. For analysis of Fire-clay, see *Watts's Dict. of Chem.*, 2nd Suppl., p. 335.

3. *Geol. & Paleont.*: Clay is simply mud produced by the wearing down of rocks. If a stream bring down sediment into still water, the heavier boulders fall first, the pebbles next, then gravel, after which little remains but fine silt, which makes the water look turbid for a time, but gradually settles down at the bottom, and becomes mud or clay. Clay suspended in water is precipitated by the addition of sea-water. *Sterry Hunt* made experiments on the water of the Mississippi. (*Chem. News*, xxx., p. 97.) Hence the deposits of mud formed at the entrance of the river into the Gulf of Mexico. When hardened into a thinly laminated rock, and perhaps coloured black by carbonaceous matter, it becomes shale. A form of it called Fire-clay exists in the coal measures just beneath each seam of coal; it constituted the vegetable soil in which the ancient forest, the remains of which have been transformed into coal, grew. Whilst sandstone is, as a rule, too porous to retain fossils uninjured, clay, shale, or anything equivalent does so admirably, and a paleontologist should give particular attention to every finely laminated stratum which he may see in any series of rocks which he proposes to examine.

¶ For *Barton clay*, *Kimberidge clay*, *Oxford clay*, *Plastic clay*, &c., see these words.

**B.** As *adj.*: Composed of or pertaining to clay.

\* **clay-brained**, \* **clay-brayned**, *a.* Stupid, idiot.  
"Why, thou clay-brayned guts."  
*Shaksp.*: 1 *Hen. IV.*, II. 4.

**clay-built**, *a.* Constructed of or with clay. (*Darwin.*)

**clay-clot**, \* **clei-clot**, *s.* A clot or lump of clay.

\* **clay-cold**, *a.* Cold and lifeless as a lump of clay.

\* **clay-daubed**, \* **clai-daubed**, *a.* Daubed or smeared over with tempered clay.

**clay-eater**, *s.* One who habitually chews or eats a fatty clay. This practice prevails in many places throughout the world, and to some extent among the lower classes in Georgia and the Carolinas.

**clay-estate**, *s.* Ground or land of a clayey nature, clay-land.

\* **clay-iron ore**, *s.* The same as CLAY-IRONSTONE (q.v.).

**clay-ironstone**, *s.*

1. *Min. & Geol.*: A mineral or rock occurring generally in the form of bands or nodules in the carboniferous series of beds. It consists of carbonate of iron mechanically mingled with earthy matter, the metallic carbonate having been produced by the action of decaying vegetable matter on any protoxide of iron in solution with which it may have been brought in contact. (*Lyeil.*) Occurs principally in the coal measures.

2. *Paleont.*: Nodules of clay-ironstone often enclose shells, encrinurites, ferns, and other organisms.

**clay-kiln**, *s.* A kiln or stove for burning clay.

**clay-land**, **clay-soil**, *s.* Ground or land composed to a great extent of clay.

**clay-loam**, *s.* Clay mixed with sand, chalk, and organic matter. It is generally very fertile.

**clay-marl**, *s.* Marl with the argillaceous element abnormally abundant in it. It is generally white and chalky; marl is a mixture of clay and chalk.

**clay-mill**, *s.*  
*Brick-making*: A png-mill; a mill for mixing and tempering clay.

**clay-pipe**, *s.* The same as a TOBACCO-PIPE.

**clay-pit**, *s.* A pit whence clay is dug.  
"Twas found in a clay-pit."—*Woodward: On Fossils.*

**clay-process**, *s.* A process by which clay is substituted for plaster in making stereotyped moulds. The face of the type is forced into the clay by pressure. (*Knight.*)

\* **clay-pulveriser**, *s.* A machine for grinding dry clay to render it more homogeneous previous to pugging. (*Knight.*)

**clay-screening**, *a.* Screening or designed to screen clay.

*Clay-screening machine*: A machine for sifting pulverised clay, so as to prepare it for some of the finer ceramic manufactures. (*Knight.*)

**clay-slate**, *s.*

1. *Geol.*: A rock, called also Argillaceous Schist. It is often exceedingly fissile, cleaving in directions across the planes of stratification. Its colours vary from greenish or bluish-grey to a leaden hue. It is composed of indurated clay which has been subjected to great pressure. Sometimes particles of mica impart to it a shining and silky lustre. The yellow cubical mineral of metallic lustre often scattered through it is iron pyrites. A great part of it is metamorphic, but some is fossiliferous. The clay-states of Great Britain belong to the Paleozoic age.

2. *Comm.*: It is the common roofing slate, for which its fissile character renders it well adapted. It is used also for school-boys' slates. Good slates should not imbibe water, if they do so, they will soon be decomposed by the weather.

**clay-stone**, *s. & a.*

**A.** As *substantive*:  
*Geol.*: A felstone of granular texture, and not containing any imbedded crystals. It is of igneous origin. It varies much in colour, being flesh-tinted, brown, brownish-yellow, green, &c. Formerly specimens of it were often designated, compact felspar. It constitutes the paste, matrix, or basis of the subjoined porphyry.

**B.** As *adj.*: Having clay-stone, &c., as its basis.

*Clay-stone porphyry*:  
*Geol.*: An igneous rock consisting of clay-stone with imbedded crystals.

**C.** As *substantive*:

**I.** *Ord. Lang.*: The act of covering or dressing land with clay.

**II.** *Technically*:

**I.** *Sugar-making*: An operation by which sugar is purified.

"The *claying* now begins; which consists in applying to the smoothed surface of the sugar at the base of the cone a plaster of argillaceous earth, or tolerably tenacious loam, in a pasty state. The water diffused among the clay escapes from it by slow infiltration, and descending with like slowness through the body of the sugar, carries along with it the residuary viscid syrup, which is more soluble than the granulated particles. Whenever the first magma of clay has become dry it is replaced by a second, and this, occasionally, in its turn by a third, whereby the sugar cone gets tolerably white and clean."—*Ure: Dict. of Arts, Manufactures, and Mines: Sugar.*

**2.** *Mining*: The act of lining the blast-hole with clay to prevent the explosive becoming damp.

**claying-bar**, *s.*

*Mining*: A cylindrical bar for driving tenacious clay into the crevices of a blast-hole to prevent percolation of water on the charge.

3. Carp., &c.: Clear space between two bodies. (Only to the phrase, in the clear.)

¶ Crabb thus distinguishes between clear, lucid, bright, and vivid: "These epithets mark a gradation in their sense; the idea of light is common to them, but clear expresses less than lucid, lucid than bright, and bright than vivid. A mere freedom from stain or dullness constitutes clearness, the return of light and consequent removal of darkness constitutes lucidity; brightness supposes a certain strength of light; vividness a freshness combined with the strength, and even a degree of brilliancy. . . . These epithets may with equal propriety be applied to colour as well as to light; a clear colour is unmix'd with any other; a bright colour has something striking and strong in it; a vivid colour something lively and fresh in it. . . . In their moral application they preserve a similar distinction: a conscience is said to be clear when it is free from every spot or stain; a deranged understanding may have lucid intervals; a bright intellect throws light on everything around it; a vivid imagination glows with every image that nature presents." (Cobb: Eng. Symon.)

clear-starcher, s. One whose occupation it is to clear-starch articles of dress.

"A clear starcher and sempstress."—Tattler, No. 11.

clear-starching, pr. par., a., & s.

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act or process of stiffening with starch.

clear-stemmed, a. Having bright stems or trunks.

"Often, where clear-stemm'd platans guard The outlet."—Tennyson: Recol. of the Arabian Nights.

clear-story, clere-story, clear-store, s.

Architecture:

1. The upper part of the nave, choir, and transepts of a cathedral or large church. It is above the triforium, or if there be none, immediately over the arches of the aisles, and clear of their roof. The clear-story is fitted

with windows to admit light to the centre of the building, and to this fact the name is due, as is shown by the term blind-story applied to the triforium (q.v.).

2. A similar structure in any secular building.

"And the clear-stories towards the south north are as lustrous as ebony."—Shakep.: Twelfth Night, iv. 2

clear-stuff, s.

\* 5. Without deduction or abatement.  
 \* 6. Honestly, unreservedly, openly, without evasion or reservation.  
 "Ha sel sigge hie zennes *eyerliche* and *nakedliche*," *Agonibis*, p. 174.  
 Crabb thus distinguishes between *clearly* and *distinctly*: "That is seen *clearly* of which one has a *clear* view independent of anything else; that is seen *distinctly* which is seen so as to distinguish it from other objects." (Crabb: *Eng. Synon.*)

**clĕar-nĕas, \*clĕar-ness, \*clĕre-ness, \*clĕr-nes, \*clĕer-ness, s.** [Eng. *clear*; -ness.]

**I. Literally:**  
 1. The quality of being clear or bright; brightness.  
 "Thet upon the walles of the town saugh the *clĕrness* of the light half a myle longe."—*Martin*, I. 11. 210.  
 "It may be, percolation doth not only cause *clĕar-ness* and splendour, but sweetness of savour,"—*Bacon's Nat. Hist.*  
 2. A lustre or splendour.  
 "Love, more *clĕar* than yourself, with the *clĕarness*, lays a night of sorrow upon me."—*Sidney*.

**II. Figuratively:**

1. Distinctness, plainness, freedom from obscurity or doubt.  
 "... It is of the utmost importance in science to aim at perfect *clĕarness* in the description of all that comes, or seems to come, within the range of the intellect."—*Tyndall's Frag. of Science* (3rd ed.) x. 255.  
 2. Uprightness, straightforwardness, plain dealing, clearness.  
 "... *clĕarness* of dealing. ..."—*Bacon*.

\* 3. A freedom from blame or imputation.  
 4. Distinctness of tone, and ambidity.

5. Of the weather: Brightness, serenity, freedom from clouds.  
 "*Clĕarness* of weydr. *Serenitas*."—*Prompt. Parv.*  
 \* 6. Glory, honour.  
 "I take not *clĕarness* of men."—*Wycliffe's John* v. 41.  
 \* 7. Beauty, handsomeness.  
 "In the *clĕarness* of his comelines and curions wedes."—*Eng. Allit. Poems; Clĕarness*, 1, 258.

Crabb thus distinguishes between *clearness* and *perspicuity*: "*Clearness* respects our ideas, and springs from the distinction of the things themselves that are discussed; *perspicuity* respects the mode of expressing the ideas, and springs from the good qualities of style. ... *Clearness* of intellect is a natural gift; *perspicuity* is an acquired art; although intimately connected with each other, yet it is possible to have *clearness* without *perspicuity*, and *perspicuity* without *clearness*." (Crabb: *Eng. Synon.*)

**clĕar-stĕr'-y-al, clĕre-stĕr'-y-al, a.** [Eng. *clear*, and suff. -al.] Of, or pertaining to, or of the nature of, a clear-story.

**clĕar-weed, s.** [Eng. *clear*, and *weed*.] An American name for *Pilea pumila*, an urticaceous plant.

**clĕat, s.** [From Provenc. *Eng. cleat* = a piece of iron work on the shoes by country people (*Maah*).] [CLAMP.] Cf. also Dut. *kloet* = a boat-hook, a pole; A.S. *clate* = a bar, a cloth-bur; Dut. *kliis* and Ger. *klette* = a bur.]

1. *Carp.*: A strip of wood secured to another one to strengthen it, as a batten placed transversely on the back of several boards which are jointed or matched together.

2. *Naut.*: A belaying-piece consisting of a bar with two arms fastened to a post or stanchion by a bolt passing through its stem.

**clĕat, v.t.** [CLEAT, s.] To fasten or strengthen with a cleat.

**clĕav-a-ble, a.** [Eng. *cleave*(e); -able.] Capable of being cleft or divided.  
 "In the one case it is the molecules arranging themselves according to organic laws which produce a *cleavable* structure. ..."—*Tyndall's Frag. of Science* (3rd ed.), xiv. 403.

**clĕav-age, s.** [Eng. *cleave*, and suff. -age.]

1. *Biol.*: Segmentation of the vitellus; often called egg- or yolk-cleavage.

2. *Crystallography*:  
 (1) The act of cleaving or splitting a crystal in a certain direction in which it is easy to do so; the state of being so cleft. This line of easy fissure, as a rule, is parallel to one or more of the faces of the crystal. Cleavage tends to reduce a mineral to the form of its primary or primitive crystal.

(2) The line along which such splitting takes place.  
 "In building up crystals these little atomic bricks often arrange themselves into layers which are perfectly parallel to each other, and which can be separated by mechanical means; this is called the *cleavage* of the crystal."—*Tyndall's Frag. of Science* (3rd ed.), xiv. 407.

3. *Geology*:  
 (1) The act or capability of cleaving certain slaty rocks into an indefinite number of thin laminae, parallel to each other but not parallel to the planes of stratification (*Lyell*); the state of being so cleft.  
 (2) The cleft or fissure which is thus produced. Cleavage is divided into laminar fission, or Flaggy Cleavage, coincident with bedding planes, and Slaty Cleavage, deviating from the direction of the bedding planes. Slaty Cleavage is a fissile structure in certain slaty or other rocks distinct from both stratification and joints, though in some cases liable to be mistaken for one or other of these. It most frequently occurs in clay-slate, or other argillaceous rock, next in frequency to which it is found in gneiss, mica-schist, hypogene-limestone, &c. Murchison, in his "Silurians," shows that slaty cleavage exists in the Silurian and other older rocks, and in those of Devonian age. It is not uncommon in the carboniferous rocks of Ireland, but less so in that formation generally. Slaty cleavage, or aralaty texture, has been superinduced by the rock having been subjected to great pressure, which also affects any fossils which the rock may contain, squeezing and distorting them to a considerable extent. Flaggy cleavage has been produced by the regular deposition of thin layers of sediment one upon another. Slaty cleavage is seldom met with in rocks of eruptive origin, except in beds of volcanic ash, and occasionally in some of the older lavas. A structure, called Foliation, resembling laminar fission, is found in altered sedimentary rocks. It is due to the segregation of any one mineral component of the rock along a more or less regular plane, and thus differentiating the rock into a series of alternating layers of different composition.

**cleavage-cavity, s.**  
*Biol.*: The cavity of a blastosphere (q.v.).

**cleavage-cell, s.**  
*Biol.*: A blastomere (q.v.). Called also a cleavage-globule.

**cleavage-globule, s.** [CLEAVAGE-CELL.]

**cleavage-mass, s.**  
*Biol.*: Any cell of a morula (q.v.).

**cleavage planes, s. pl.**  
*Crystallog.*: Planes along which a mineral may be most easily cleft.

**clĕave (1), \*clĕve (1), \*clive, \*clivyn, \*clyve** (pa. t. *cleaved*, *claved*, *clave*, *clive*; pa. par. *cleaved*, *claved*, *cliven*.) [A.S. *clifian*, *cleofian*; O.S. *klifōn*; Dut. *Kleven*; Sw. *klifva sig* = to stick to; Dan. *klæbe*; O. H. Ger. *chleiben*; Ger. *kleben*. Cf. Icel. *klifa* = to climb. (*Skeat.*)]

**I. Lit.**: To stick, to adhere, to hold fast.  
 "Y shal make thi tange for to *clĕve* to the roof of thi month."—*Wycliffe's Ezech.* 10. 26.

Traveller's Joy or Virgin's Bower, is a climbing plant with pinnate leaflets, twining petioles and greenish-white flowers. It occurs wild in the middle and south of England. C. Gouriana and C. Wrightiana are not uncommon in India, on the Western Ghats, in the Deccan, &c., and there are other Indian species. On the continent of Europe, C. erecta and C. flammula are used by beggars to produce artificial ulcers on their limbs, whilst in America, according to Geyer, the root of a clematis is employed by the North American Indians as a stimulant to horses which fall down at their races. The scraped end of the root is held to the nostrils of the fallen animal, which begins to tramble, and then rising is conducted to water to refresh itself. Various species of clematis are found in English gardens and greenhouses.

clematis-camphor, s.

Chem.: When the young branches of Clematis flammula, &c., are distilled with water, an acid pungent liquid is obtained, which reddens the skin; when kept in closed vessels it deposits white scales and flocks of clematis-camphor.

Chem.: C<sub>9</sub>H<sub>10</sub>O<sub>6</sub>. A bitter substance obtained from the root of Aristolochia Clematitís.

clém-a-tí-tís, s. [Lat. clematis (q.v.), and suff. -ítis.] A plant, Aristolochia Clematitís.

\* clembe, v.t. & i. [CLIMB.]

\* cleme (1), v.t. & i. [CLAIM.]

\* cleme (2), v.t. [CLAM.]

1. To daub over, to besmear, to cover with any sticky substance.

"Cleme hit with clay comly withina."—Early Eng. All. Poems; Cleanness, 312.

2. To spread, to besmear.

"Cleme upon the wounds axe doume aboute."—Palladius III., st. 125.

clém-en-gý, \* clém-ençe, s. [Fr. clémence; Sp. clemencia; Ital. clemenza, from Lat. clementia = mildness, gentleness; clemens = mild, gentle.]

1. Of persons:

(1) Mildness of temper and disposition; gentleness, kindness, compassion, humanity.

"It was not the clemency of an ostentatious man, or of a sentimental man, or of an easy-tempered man."—Macaulay; Hist. Eng., ch. xv.

(2) Mercy, a willingness to forgive, a pardon.

"It was even suspected that he sent some persons to the gibbet solely because they had applied for the royal clemency through channels independent of him."—Macaulay; Hist. Eng., ch. v.

† 2. Of the elements: Mildness, softness.

"Then in the clemency of upward air."—Dryden.

Crabb thus distinguishes between clemency, lenity, and mercy: "Clemency and lenity are employed only towards offenders; mercy towards all who are in trouble, whether from their own fault or any other cause. Clemency lies in the disposition; lenity and mercy in the act; the former as respects superiors in general, the latter in regard to those who are invested with civil power; a monarch displays his clemency by showing mercy; a master lenity by not inflicting punishment where it is deserving. Clemency is arbitrary on the part of the dispenser, flowing from his will independent of the object on whom it is bestowed; lenity and mercy are discretionary, they always have regard to the object and the nature of the offence, or misfortunes; lenity therefore often serves the purposes of discipline, and mercy those of justice by forgiveness, instead of punishment; but clemency (sometimes) defeats its end by forbearing to punish where it is needful." (Crabb; Eng. Synon.)

clém-ent, a. [Lat. clemens = mild, gentle.]

1. Of persons: Mild, gentle, forgiving, compassionate.

† 2. Of the elements: Mild, soft.

Clém-en-tine, a. & s. [From the proper name Clement, which is derived from Lat. clemens (genit. clementis) = mild, calm, soft, gentle. See def.]

A. As adj.: Pertaining to Clement of Rome (Clemens Romanus), one of the five apostolic fathers; to Clement of Alexandria (Clemens Alexandrina); to one of the fourteen Clements who filled the Papedom; or to any other person of the same name.

"The Clementines Constitutions, or decrees of Clement V., were in like manner anthenticated in 1317 by his successor, John XX."—Blackstone's Comment., introd., § 3.

B. As substantive:

I. Bibliography:

1. Pl. (The Clementines): Certain Christian compositions long attributed to the apostolic father, Clement of Rome, but now held to have been composed after his death, probably by one of the Ebonites sect.

2. A collection of decretals and constitutions of Pope Clement V., published in A.D. 1308. They were regarded as the seventh book of Decretals (q.v.). (See also CANON LAW.)

II. Ch. Hist.: The followers of Clement VII., who was held by most of the French, the Scotch, &c., to have been legitimately elected to succeed Pope Gregory XI., whilst the Italians, the English, &c., deemed him an antipope, and held that the holy father legitimately elected was Urban VI. This schism began in A.D. 1378, and ended in 1409. The scandal which it caused weakened the prestige of the Papacy, and helped the church a certain distance forward towards the Reformation. \*. . . we lo like sort term the order of God's clergie and the spiritual power which he hath given them.—Hooker: Eccl. Pol., bk. v. § 77.

\*The progress of the ecclesiastical authority gave birth to the memorable distinction of the laity and of the clergy, which had been unknown to the Greeks and Romans. The former of these appellations comprehended the body of the Christian people; the latter according to the signification of the word, was appropriated to the chosen portion that had been set apart for the service of religion.—Gibbon: Dec. & Fall, ch. xv.

II. Technically:

1. Theology:

(1) The chief New Testament passages to which the word clergy is ultimately traceable back are two. One is I Pet. v. 3, where the elders are exhorted not to lord over God's "heritage" (Anth. Vers.), or lording it over the "charge allotted to you" (Revised Vers.).

The words in the Greek are τὸν κληρὸν (τὸν κλήρον), the genit. pl. of κληρὸς (κλήρος), the same word which is used by the Greek ecclesiastical writers for clergy. In the passage in St. Peter it obviously means the whole body of believers in any particular congregation, or in the church collectively viewed as "God's heritage," or as a pastor's charge. The word "God" in the Authorized Version was, as its being spelled in italics shows, inserted by King James's translators; it is not in the original. In the second passage, Acts i. 15—26, the word κληρὸς (klēros) is used of the apostolate from which Judas fell, and to which Matthias was elected (verses 17, 26), and the plural κληρὸς (klēros), of the lots cast to decide his election (v. 26).

(2) The verse in St. Peter [No. (1)] doubtless alludes to a multitude of Old Testament passages in which the Israelites are described as the inheritance or heritage of God (Dent. xxxii. 9, Psalms xxviii. 9, lxxviii. 7, Jer. x. 16, Joel ii. 17, &c., &c.); or also in the country of Canaan (1 Sam. xxvi. 19, 2 Sam. xxi. 3, Psalm lxxviii. 9, &c., &c.). The word in these and various other passages is κληρονομία (klēronomia), a derivative of κληρὸς (klēros). Its primary etymological meaning is lot (see etym.), and it is used with tacit reference to the distribution to the several tribes of their respective possessions by lots (Num. xxvi. 52—56, Joshua xiv. 1—3, xv. i, xvi. i, &c., &c.). When the distribution took place, the Levites received no territory as a heritage, God being their inheritance (Num. xviii. 20, Dent. x. 9, xviii. 1, 2), as was also the priesthood of some of them (Joshua xviii. 7); the sacrifices of Jehovah made by him (Joshua xii. 14), and tithes (Num. xviii. 21—24, Dent. xiv. 28, 29). Reciprocally God claimed them as his special servants, taking them in lieu of the first-born devoted to him when the Egyptian first-born were slain (Exod. xiii. 11, 12, 13, Num. iii. 12, 45, vi. 11—4). He said of them "The Levites shall be mine." An analogy being drawn between the special position of the Levites and that of the Christian ministry as

alike ordained to spiritual functions, the word κληρὸς (klēros), used originally by St. Peter of all church members, became limited to their spiritual chiefs.

2. Church History:

(1) In the Early Church: St. Paul accepted scarcely anything from those to whom he ministered (Acts xx. 33, 34, and 2 Cor. xi. 1), his general practice being to support himself by tent-making (Acts xviii. 3), but he let it be understood that as a rule those who preached the gospel should live of the gospel (1 Cor. ix. 13, 14). This support enabled the pastors of the several churches at a very early period of Christianity to withdraw from secular occupations and give their whole time to their sacred calling.

(2) In medieval times: Century by century almost to the time of the Reformation, or at least till about 1800 A. D., the power and influence of the clergy went on to increase. As every instance of notorious vice on the part of one discharging sacred functions weakens the order to which he belongs, whilst every case of conspicuous virtue increases it, the clergy never could have obtained the influence which they did unless at least a vast section of their number had been really spiritual men. They had other advantages of no mean kind. The only educated class [BENEFIT OF CLERGY]; members of an international society existing wherever Christianity had rooted itself; the sole administrators of the sacraments, and in confraternity with a chief believed to have the keys of the kingdom of heaven, the clergy had every opportunity of rising to transcendent power over the imagination, the consciences, and ultimately the earthly possessions of men. Availing themselves of these advantages they actually rose to a pitch of authority which perhaps no other priesthood except that of the Indian Brahmins ever rivalled. Their rule was for a time an advantage to Europe. It was knowledge ruling over ignorance, at least partial refinement holding in control lawless violence, a ladder by which the humblest could climb to great heights of society, whilst outside the church genius of humble birth was prevented from rising, being held down by the weight of feudal chains. But not even a sacred order of men are to be trusted with nearly absolute power, and at length the pretensions of the clergy converted most civil governments into their thinly disguised foes. [GUELPHS, GIBELLINES, &c.] Means were taken to abridge their power, each new scheme being, as Blackstone shows, ingeniously evaded, and finally their tyranny and rapacity, rather than their doctrinal views, excited a great part of Europe against them, and brought on the great revolt against their domination known as the Reformation. During the medieval period the monastic orders were looked upon as belonging to the clergy. Abbots, priors, monks, &c., were known as the regular clergy, and bishops, deans, priests, &c., as the secular clergy.

(3) Post-reformation times: The civil governments on one hand, and the lay members of the several churches on the other, gained back from the clergy, in countries where the Reformation was successful, a great part of what they had lost during times of greater ignorance. For details see REFORMATION, ROYAL SUPREMACY, &c.

clêve (2), s. [A.S. *cleofa*.] A cell, a small chamber or cottage. "Hwat is that lîth in vre cleuf?"—*Havelok*, 596.

\*clêv-êr, \*clêv-ere, s. [CLEAVER (2).]

clêv-êr, a. [The etymology is doubtful. Wedgwood thinks the word was derived from the notion of seizing, as Latin *rapidus* from *rapio*; Scotch *gleg* = quick of perception, cleaver, quick in motion, expedition, from Gaelic *glac* = to seize, to catch. The Scots has also *cleik*, *clek*, *cluck*, *cluke*, *clook* (identical with English *clutch*) = a hook, a hold, claw, or talon; to *clek* or *cluck* = to catch, snatch, and hence *cleik*, *cluck* = lively, agile, clever, dexterous, light-fingered. One is said to be *cleuch* of his fingers who lifts a thing so cleverly that bystanders do not observe it. (*Jamieson*.) Now the Old English had a form *cliser* = a claw or clutch, exactly corresponding to the Scotch *cleik*, *cluck*. Hence the Old English to *clever*, Dutch *klaveren*, *klavern* = to claw oneself up, climb, scramble; and hence also he believes is formed the adjective *clever* in the sense of snatching, catching, in the same way as the Scotch *cleik*, *cluck*, above mentioned. Dut. *klieverig* = sticky; Low Ger. *klevisk*, *klefsk*; *klefske finger* = thievish fingers, to which everything sticks." Another derivation is that suggested by Rev. A. S. Palmer (*Leaves from a Word-hunter's Note-book*, ch. x.), which Prof. Skeat seems inclined to adopt, that it is a modification of Mid. Eng. *deliver* = nimble, active. Prof. Skeat adds that it is not unlikely that this modification has been aided by a Prov. Eng. *cliver*, *clever* = ready to seize.] [DELIVER, a.]

1. Dexterous, skilful, expert; possessing skill and talent (of persons). "There yet no country in Europe contained a greater number of clever and selfish politicians."—*Macaulay's Hist. Eng.*, ch. xlii. 2. Showing skill and talent, skilful, ingenious (of things). "It was the cleverer mockery of the two."—*Sir R. L'Estrange*. 3. Nestly made, well shaped, handsome, well proportioned. "... the girl was a tight clever wench as any was."—*Arbuthnot*. 4. Fit, apt, proper, suitable. 5. Good-natured; possessing an agreeable disposition. (*American*.) (*Webster*.)

† Crabb thus distinguishes between *clever*, *skilful*, *expert*, *dexterous*, and *adroit*: "*Clever* and *skilful* are qualities of the mind; *expert*, *dexterous*, and *adroit*, refer to modes of physical action. *Cleverness* regards in general the readiness to comprehend; *skill* the maturity of the judgment; *expertness* a facility in the use of things; *dexterity* a mechanical facility in the performance of any work; *adroitness* the suitable movements of the body. A person is *clever* at drawing who shows a taste for it, and executes it well without much instruction; he is *skilful* in drawing if he understands it both in theory and practice; he is *expert* in the use of the bow if he can use it with expedition and effect; he is *dexterous* at any game when he goes through the manoeuvres with celerity and an unerring hand; he is *adroit* if by a quick, sudden, and well-directed movement of his body, he effects the object he has in view. ... *Cleverness* is rather a natural gift; *skill* is *cleverness* improved by practice and extended knowledge; *expertness* is the effect of long practice; *dexterity* arises from habit combined with agility; *adroitness* is a species of *dexterity* arising from a natural agility." (*Crabb*: *Eng. Synon.*)

"Whom that love hath under cure As he is blinde him self, right so He maketh his *client* blinde also."—*Cower*, I. 284.

3. One who applies to a barrister or solicitor for advice in matters of law, or who commits his case to the care and management of a lawyer for prosecution in a court of justice.

"There is due from the judge to the advocate some commendation, where causes are well handled; for that upholds in the *client* the reputation of his counsel."—*Bacon: Essays*.

4. The term is now loosely applied to any person who entrusts the care and management of his business to any professional or business man, or for whom such business man acts in any way.

II. **Roman Antiq.**: One who, being of a lower class, placed himself under the protection of some person of distinction and authority, who in respect to the client was called the patron. The client had to contribute to the marriage portion of his patron's daughter, if the patron were poor; and to his ransom or that of his children, if taken prisoners. He paid the costs and damages of any suit which the patron lost, and bore a part in the expense incurred in discharging public duties or filling public offices. The patron was the legal adviser of the client; he was also his guardian and protector, and that of his children, and he defended his interests whenever wronged. Neither could give testimony against or accuse, or even give his vote against, the other.

"His *clients* and tribesmen offered to pay his fine, but before the day of the trial he went into voluntary exile."—*Lewis: Cræd. Early Roman Hist.* (1855), ch. xii. pt. v. § 77, vol. II. p. 208.

**cli-mãc-tër-ic**, \* **cli-mãc-ter-ick**, *a. & s.* [Eng., &c., *climacter*; -ic.]

*A. As adj.*: Critical, dangerous; pertaining to the great climacteric [B.], or to any one of lesser peril.

*B. As subst.*: One of certain periods of a man's life in which his constitution is said to undergo great changes, involving him in danger till they are over. They are multiples of 7, or of 9, as 35, 49, 81. The most perils of these, called by way of eminence the grand climacteric, is his 63rd year— $9 \times 7 = 63$ . The 7th year of life is also dangerous. The grand climacteric of life is said to have been recognized by Hippocrates.

**Climacteric disease:**

*Med.*: A disease affecting both men and women, but more obvious in the former. It may be looked for about the 63rd year of age, but varies in the time of its coming according to the constitution of the individual, the limits being in the one direction 50, and in the other 75. Its most common predisposing cause is mental anxiety or suffering. The expression of the countenance alters for the worse, the pulse becomes accelerated, the flesh wastes away without obvious cause; there are sleepless nights, and wandering pains fit through the head and chest, and sleep is either deficient or brings little refreshment. After a time recovery as a rule takes place, but the countenance never recovers its former aspect, or the constitution its vigour.

\* **cli-mãc-tër-ÿ-cal**, *a.* [Eng. *climacteric*; -al.] The same as *climacteric* (q.v.).

"One of these, an elderly man, who confessed to having passed the grand climacteric year (9 multiplied into 7) of 63, though he did not say precisely by how many years..."—*De Quincey: Works* (ed. 1863), vol. II, p. 147.

\* **cli-mãc-tër-ÿ**, *s.* [Eng. *climacter*; -ÿ.] The working up to a climax.

"He is an artist at disposition and climactery."—*North: Examen*, p. 478. [*Davies*.]

† **cli-mã-tal**, *a.* [Eng. *climat(e)*; -al.] Pertaining to or dependent on climatic changes.

"... the sixteen years selected appear to complete two climatic cycles."—*Ansted: The Channel Islands*, p. 138.

\* **cli-mã-tër-chic**, *a.* [Gr. *κλίμα* (*klima*), genit. *κλιματος* (*klimatos*) = a climate; *ἀρχή* (*archê*) = to rule, to govern.] Presiding over or regulating the climates.

**cli-mate**, \* **cli-mat**, \* **cly-mat**, \* **cly-mate**, *s.* [Gr. *κλίμα* (*klima*); *κλίμα* (*klimã*) = to cause to bend or slant. (1) The inclination or slope of ground; (2) a slope imagined by the ancients of the globe from the equator to the pole; (3) a zone or a parallel of latitude, the space between these parallels of latitude held to be synonymous with a climate.]

**I. Ordinary Language:**

- \* 1. In the Greek sense: "Climate, a portion of the earth contained between two circles parallel to the equator."—*Phillips: The New World of Words*.
- 2. In a sense intermediate between the Greek one and that presently in use: A country, a region.

"The climate of Gaul [Galliarum plagam] is enclosed on every side with fences that environ it naturally."—*Holland: Reminiscences*, p. 47.

3. Characteristic condition of a country or district with regard to weather; meteorological conditions viewed as a whole. (II.)

**II. Meteorology:**

(1) *Present climate of the several parts of the world:* The most potent causes regulating climate are latitude on the one hand, and elevation above the sea level upon the other, the former cause producing perpetual snow and ice around the North and South Poles, and the latter acting with similar effect on the summits of such mountain chains as the Himalayas or the Andes. Were these the sole causes, lines of equal temperature, or, as they are technically called, isothermal lines, would coincide with circles of latitude; instead of doing this however, they are parallel neither to the equator nor to each other. [ISOTHERMAL.] In addition to the two above-mentioned causes, must be reckoned also the position and direction of the several continents and islands, the position and depth of the sea, and the direction of currents and winds. Our own country is often tacitly assumed to be the normal climate by which all others are to be tested; in reality, being an island, whilst most of the land existing in the world is distributed in continents, its climate is one of an exceptional character. It is of the type called insular, that is, such as exists in an island in which the sea diminishes the difference in temperature between summer and winter and between night and day. The normal type of climate, that existing on continents, is called excessive; in it a great difference exists between the temperature of summer and that of winter, as well as between that of the night and that of the day. Asia and North America are the best existing examples of excessive climates. In Britain an east wind, blowing in winter over the frozen steppes of Russia, is cold and dry; a south wind in summer coming

over the continent of Europe, if not even remotely from the Saham, is hot and dry, whilst a south-west wind, bringing heat, moisture, "depressions" innumerable, and in some cases even spent cyclones from the warm surface of the Atlantic, is the parent of heat, rain, and storm.

(2) *Past climate of the several countries of the world:* There is distinct geological evidence that the climate of the world has oscillated in time past, being in Europe and North America at least, higher at one time and at another lower than now. During the carboniferous period the vegetation and the animal life too were so uniform from the Arctic zone to the equator, that the temperature must have varied little in different latitudes, and little also between summer and winter. The temperature of the Permian is doubtful; during a portion of it there may have been a glacial period. The stony corals of the oolite naturally suggest a tropical or all but tropical climate. The temperature of the eocene was high. It slowly fell, however, during the miocene and the older pliocene, till in the upper pliocene it was for a time absolutely glacial. Since that comparatively recent geological event, it has risen to what we have it now. Sir Charles Lyell considered that bygone changes were probably produced by different distributions of land and water over the globe, a glacial period cooling when a great deal of land, and that high land, was round the poles, and one of great heat when most of the land was round the equator. Mr. Croll, on the contrary, following in a direction in which Sir John Herschell led the way, believes that minute alterations on the ellipticity of the earth's orbit will produce oscillation of temperature in one direction for 10,500 years, and then in the other for the same lengthened period of time. [GLACIAL PERIOD.]

"... the inordinately great change of climate, on the prodigious lapse of time, all included within this same glacial period."—*Darwin: Origin of Species* (ed. 1859), ch. ix., p. 234.

\* **cli-mate**, *v.t.* [CLIMATE, *s.*] To inhabit, to dwell.

**A. Intransitive:**

**I. Literally:**

**1.** To ascend by means of the hands and feet, to clamber up, to mount with difficulty (generally with adv. *up*).

"Sche *clambe up* to the wall's one night."  
Percival, 1, 223.

**2.** To creep up or ascend by means of tendrils, or by twining the stalk or leaves round any support. (*Said of plants*.)

**II. Figuratively:**

**1.** To ascend or rise to a higher point in any way; to mount.

"Where entrance up from Eden *oastest climbs*,  
Cherubic watch . . ."  
Milton: *P. L.*, bk. xi.

**\*2.** To reach to, to attain.

"Bowing his head against the steery mount,  
To *climb* his happiness."—Shakesp.: *Timon*, I. 1.

**B. Trans.:** To ascend by means of the hands and feet, to mount.

"The screaming peacock chased in hot pursuit,  
And *climb'd* the garden trellises for fruit."  
Longfellow: *Tales of a Wayside Inn; The Student's Tale; The Falcon of St. Federigo*.

Crabbs thus distinguishes between to *arise* or *rise*, to *mount*, to *ascend*, to *climb*, and to *scale*: "The idea of going upwards is common to all these terms; *arise* is used only in the sense of simply getting up, but *rise* is employed [either in that sense or] to express a continued motion upward; a person *arises* [or *rises*] from his seat or bed; a bird *rises* in the air, the silver [quicksilver] of the barometer *rises*; the three first [first three] of these terms convey a gradation in their sense; to *arise* or *rise* denote a motion to a less elevated height than to *mount*, and to *mount* that which is less elevated than *ascend*; a person *rises* from his seat, *mounts* a hill, and *ascends* a mountain. *Arise* and *rise* are intransitive only; the rest are likewise transitive . . . *Climb* and *scale* express a species of rising; to *climb* is to rise step by step by clinging to a certain body; to *scale* is to rise by an escalade or species of ladder employed in mounting the walls of fortified towns; trees and mountains are *climbed*; walls are *scaled*." (*Crabb: Eng. Synon.*)

**†climb-a-ble** (*mb* as *m*), *a.* [Eng. *climb*; -*able*.] That may be climbed or ascended.

**climbed** (*ɔ* silent), *pa. par.* or *a.* [CLIMB, *v.*]

clō-ā'-ca (pl. clō-ā'-cæ), s. [Lat.] \*I. Ordinary Language: 1. A sewer, an underground drain or conduit. 2. The Roman Cloaca Maxima (the greatest or main sewer) is said to have been constructed, or at least commenced, under the auspices of king Tarquinius Priscus, about B.C. 588. It is still used in the drainage of Rome. 2. A privy, a house of office.

II. Technically: 1. Anat.: A part of the intestine in which the intestinal, ovarian, and urinary outlets terminate. This structure exists in birds, in reptiles, in the amphibia, and in the mammalian order Monotremata. In the rotifera also the perivisceral cavity terminates in a dilatation or cloaca, which forms the common outlet for the digestive, generative, and water-vascular systems. There is a cloaca also in insects, and one also in the social ascidians. The latter is the common cavity into which the atrial chambers open. To the embryonic development of man there is a period during which a cloaca, like that of the inferior animals, exists. 2. Pathol.: The opening, in cases of mortification, leading to the enclosed dead bone.

clō-ā'-cal, a. [Lat. *cloacalis* = pertaining to a cloaca.] Pertaining to or of the nature of a cloaca. "The excreta are voided through a cloacal passage."—Darwin: *Descent of Man* (1871), vol. 1, p. 16.

clōak, \*clōake, s. [O. Fr. *clouque*, *cloke*, *clocke*; from Low Lat. *cloca* = (1) a bell, (2) a horseman's cloak.] 1. Lit.: A loose wide outer garment worn over the other clothes; a mantle. "Then give him, for a soldier's meet, A soldier's cloak for windingsheet."—Scott: *Rokeby*, vi. 33. 2. Fig.: A disguise, a blind, a cover; anything used as a means of concealing one's thoughts or plans. "Not using your liberty for a cloak of maliciousness."—1 Peter ii. 16. ¶ Crabb, after showing that *cloak*, *mask*, *blind*, and *veil*, when used figuratively, are all employed in a bad sense, thus discriminates between them: "The cloak, as the external garment, is the most convenient of all coverings for entirely keeping concealed what we do not wish to be seen; a good outward deportment serves as a cloak to conceal a bad character. A mask only hides the face; a mask therefore serves to conceal only as much as words and looks can effect. A blind is intended to shut out the light and prevent observation; whatever, therefore, conceals the real truth, and prevents suspicion by a false exterior, is a blind. A veil prevents a person from seeing as well as being seen; whatever, therefore, obscures the mental sight acts as a veil to the mind's eye." (Crabb: *Eng. Synon.*)

clōak-anemone, s. Zool.: *Adamusia pallata*, commensal with crabs.

\*cloak-bag, s. A bag in which cloaks and other clothes were carried; a portmanteau, a travelling-bag.

cloak-pins, s. pl. 1. Large pins used to fasten a cloak. 2. The pegs affixed to a rail, on which to hang up cloaks, coats, &c. "A huge pair of stag's antlers, which . . . served for what we vulgarly call cloak-pins."—Scott: *Monastery*, ch. xiii.

cloak-room, s. A room or office at places of public resort, as a railway station, &c., where cloaks, small parcels, &c., can be left in charge for a time.

clōak, † clōake, v.t. [CLOAK, s.] 1. Lit.: To cover or dress with a cloak. 2. Fig.: To hide, to conceal, to cover over. "She by creation was, till she did fall: Thereafter she sought for help to cloaks her crime withal."—Spenser: *F. Q.*, II, vii., 45.

\*clōak-age, s. [Eng. *cloak*; -age.] The act of covering with, or as with, a cloak. (Worcester.)

clōaked, pa. par. or o. [CLOAK, v.]

\*clōak-ēd-ly, \*clōak-yd-ly, adv. [Eng. *clōaked*; -ly] In a concealed or underhand manner; secretly, not openly; as a blind or cover. "Clōakly without thee obey very much. And lawerdly the most mayster we no brych."—*Songe and Carols*, p. 66.

† clōak-ēr; s. [Eng. *cloak*; -er.] One who cloaks or conceals.

clōck (l), \*clōke, \*clōk, \*clōkke, s. & a. [A.S. *cluccga*; Icel. *klukka*, *klōcka*; Sw. *klōcka*; Dan. *klōkke*; Wel. *clōck*; Fr. *clōche*; Dut. *klōk*; Ger. *glōcke*; Ir. *clog*; all = a clock, a bell.

The origin of the word is doubtful, but it is probably connected with *clack* (q.v.).

A. As substantive: I. Ordinary Language:

1. Literally: (1) To the same sense as II. "When the clock stroke twelf."—*Towneley Myst.*, p. 115. "The clock has strucken twelve upon the bell."—*Shakesp.: Comedy of Errors*, 1. 2.

(2) A watch, especially one which strikes the hours. "The striking or strokes of a clock. "I told the clocks and watch'd the waning light."—*Dryden*.

(3) The clock of a stocking: Flowers or figured work about the ankle, probably because used originally of bell-shaped ornaments. "His stockings with silver clocks were ravished from him."—*Swift*.

(4) The balloon-like fruit of the Dandelion, *Leontodon Taraxacum*. Named from the practice of children, who playfully blow away the feathery globe to ascertain "what o'clock it is."

2. Fig.: A guide, a monitor. "His equal had a waked them; and his honour, Clock to itself, knew the true minute, while Exception bid him speak, and, at this time, His tongue obey'd his hand."—*Shakesp.: All's Well that Ends Well*, 1. 2.

¶ O'clock = of the clock, is used as equivalent to *by the clock*; as, *what o'clock is it?* = *what time is it by the clock?* "What is't o'clock?—Upon the stroke of four."—*Shakesp.: Richard III.*, iii. 2.

II. Technically:

1. Horol.: An instrument differing from a watch in not being adapted to be carried on the person, and having a motive weight or spring, a train of gearing, index hands, and figured dial, and a pulsative device to determine the rate at which the mechanism shall move.

(1) Hist.: The dial was an early invention for keeping time. [DIAL.] The clepsydra followed next. [CLEPSYDRA.] One of these latter instruments, that of Ptole, B.C. 372, was made to sound upon organ-pipes the hour of the night when the dial could not be seen. Wheel-work set in motion by springs and weights was known in the time of Archimedes, 287—212 B.C., and applied to mechanical engines and toys. Two other appliances were needful to make a clock, viz., to join the wheels to a pointer which traversed the dial, and to contrive a mode of regulating the speed of the going-works. When these fixtures were united to complete the mechanism of a clock is not known. About A.D. 1000 Ebu Junis, of the Saracenic University of Cordova, in Spain, had a pendulum clock to which it is thought that Gerbert, a student at that seat of learning, and afterwards Pope Sylvester II, added the escapement. In A.D. 1288, a clock was placed in the palace yard, London, and shortly after that date they began to be supplied to cathedrals, churches, palaces, town halls, &c., till at length they became numerous everywhere.

(2) Kinds of clocks now in use: (a) A church clock is called in the trade a tower clock; its external appearance is familiar to everyone. (b) A chiming clock, sometimes called a musical clock, is one in which the hours or fractions are marked by a carillon. These instruments were first made in Germany as early as A.D. 1580. (c) A regulator is a watchmaker's clock of superior quality for regulating time-pieces. (d) An astronomical clock is one which has a compensating pendulum, and is otherwise of marked quality; it is used in determining time when astronomical observations are being taken. (e) An electric clock is one whose movements are regulated by electro-magnetic devices. 2. Astron.: [1. Horol.] 3. Elect.: [1. Horol.]

B. As adjective: (See the compounds).

2. To coalesce, to form into a clod or clot; to become clotted or lumpy.

"Move it sometimes with a broom, that the seeds clóg not together."— Evelyn.

¶ Crabb thus distinguishes between to clog, to load, and to encumber: "Clog is figuratively employed for whatever impedes the motion or action of a thing, drawn from the familiar object which is used to impede the motion of animals; load is used for whatever occasions an excess of weight or materials. A wheel is clogged, or a machine is clogged; a fire may be loaded with coals, or a picture with colouring. . . . Clog and encumber have the common signification of interrupting or troubling by means of something irrelevant. Whatever is clogged has scarcely the liberty of moving at all; whatever is encumbered moves and acts but with difficulty." (Crabb: Eng. Synon.)

clóg, \*clogge, s. & a. (Scotch clay; A.S. clæg = clay; Dan. kleg, kleg = (s.) clay, loam; (a.) loamy.) [CLAV.]

clóir'-tér, s. [O. Fr. cloistre; Fr. cloître; from Lat. claustrum = (1) an enclosure; (2) a cloister; from clausus, pa. par. of claudo = to shut.]

I. Literally:

1. Eccles.: A place of religious seclusion; an establishment for monks or nuns; a place of retirement from the world.

"Gif me than of thy good to make our cloyster." Chaucer: C. T., 7, 81.

"A convent rose at Clerkenwell on the site of the ancient cloister of Saint John."—Macaulay: Hist. Eng., ch. vi.

2. Arch.: The square space attached to a regular monastery or large church, with a peristyle or ambulatory round, and usually with a range of buildings over it. The cloister is perhaps ex vi termini, the central square shut in or closed by the surrounding buildings. Cloisters are usually square on the plan, having a plain wall on one side, a series of windows between the piers or columns on the opposite side, and arched over with a vaulted or ribbed ceiling. It mostly forms part of the passage of communication from the church to the chapter-house, refectory, and other parts of the establishment. In England nearly all the cathedrals, and most of the collegiate churches and abbeys, were provided with cloisters. On the continent they are commonly appended to large monasteries, and are often decorated with paintings and contain tombs. (Gwilt.)

"Prince Henry. Here it reigns for ever! The peace of God, that passeth understanding, Reigns in these cloisters and these corridors." Longfellow: The Golden Legend, IV.

\* II. Fig.: Any place in which one is shut up, specially the womb.

\* clong-en, pa. par. or a. [CLING.]

clón'-ýc, a. [Low Lat. clonivus, from Gr. κλονος (klonos) = any violent confused motion.]

Med.: Noting tamulantly inordinate interrupted motion within the bodily frame. It is used specially of the epileptic and convulsive motions. Dr. Cullen and his followers applied the term clonic convulsions to what he deemed spasms characterised by involuntary alternate motions of contraction and relaxation such as may be seen in hysteria, and tonic convulsions to those characterised by contractions not quickly succeeded by alternate relaxations. Of this class the chief example is tetanus. This terminology is now abandoned.

"In the other form of spasm, the contractions of the affected muscles take place repeatedly, forcibly, and in quick succession; and the relaxation of course is as sudden and frequent. This has been named clonic spasm."—Watson: Lectures on the Principles and Practice of Physic, lect. xxxii.

clóif, cloove, clufe, s. [Dan. klov; Icel. klaufr.] A hoof.

clóok, cleuck, s. [CLAW. (Scotch.)

"If I can close with him, I care not for his thrust."  
*Shakspeare: 2 Hen. IV., ll. 1.*

7. **To close with the land:**

**Naut.:** To come near to the land.

¶ (1) Crabb thus distinguishes between **to close** and **to shut**: "**Close** is to shut, frequently as the means to the end. **To close** signifies simply to put together; **to shut** signifies to put together so close that no opening is left. The eyes are shut by closing the eyelids; the mouth is shut by closing the lips. The idea of bringing near or joining is prominent in the signification of **close**; that of fastening or preventing admittance in the word **shut**. By the figure of metonymy, **close** may be often substituted for **shut**; as we may speak of closing the eyes or the mouth; closing a book or a door in the sense of shutting; but they are not, notwithstanding, very distinct. Many things are closed which are not to be shut, and are shut which cannot be closed. Nothing can be closed but what consists of more than one part; nothing can be shut but what has or is supposed to have a cavity. A wound is closed, but cannot be shut; a window or a box is shut, but not closed. When both are applied to hollow bodies, **close** implies a stopping up of the whole, **shut** an occasional stoppage at the entrance. What is closed remains closed; what is shut may be opened. A hole in a road, or a passage through any place is closed; a gate, a window, or a door, is shut."

(2) He thus discriminates between **to close**, **to finish**, and **to conclude**: "**To close** is to bring to an end; **to finish** is to make an end; we close a thing by finishing to have anything more to do with it; we finish it by really having no more to do to it. We close an account with a person with whom we mean to have no farther transactions; we finish the business which we have begun. It is sometimes necessary to close without finishing, but we cannot finish without closing. The want of time will compel a person to close his letter before he has finished saying all he wishes. . . . **Close** and **finish** are employed generally, and in the ordinary transactions of life; the former in speaking of times, seasons, periods, &c., the latter with regard to occupations and pursuits; **conclusion** is used particularly on moral and intellectual operations. A reign, an entertainment, an age, a year, may have its close; a drawing, an exercise, a piece of work, may be finished; a discourse, a story, an affair, a negotiation, may be concluded." (Crabb: Eng. Synon.)

(3) For the difference between **to close** and **to end**, see **END**.

II. Technically:

1. *Her.*: Applied to a bird represented with the wings folded closely to the body.

2. *Phonetics*: Applied to a vowel pronounced with a diminished opening of the lips.

†Crabb thus distinguishes between the adjectives *close* and *compact*: "Proximity is expressed by both these terms, the former in a general and the latter in a restricted sense. Two bodies may be *close* to each other, but a body is *compact* with regard to itself. Contact is not essential to constitute *closeness*; but a perfect adhesion of all the parts of a body is essential to produce *compactness*. Lines are *close* to each other that are separated but by a small space: things are rolled together in a *compact* form that are brought within the smallest possible space." (*Crabb: Eng. Synon.*)

B. As adverb:

I. Literally:

1. Near, close to, in proximity to.  
 \*Behind her Death  
 Close following pace for pace, not mounted yet  
 On his purple horse. —Milton: *P. L.*, x. 688.

\*Secretly, closely, accurately.  
 \*Openliche nought so *close*. —Trevius, l. 241.

3. Constantly, always, by a slight transition from the use of the term in English: as, "Do you ay get a present when you gaug to see your auntie?" "Ay, *close*." (*Scotch*).

†To keep *close* to a point: Not to wander from the matter or subject in question.

†Crabb thus distinguishes between *close*, *near*, and *nigh*: "*Close* is more definite than *near*: houses stand *close* to each other which are almost joined; men stand *close* when they touch each other; persons are *near* each other when they can converse together. *Near* and *nigh*, which are but variations of each other in etymology, admit of little or no difference in their use; the former however is the most general. People live *near* each other who are

in the same street; they live *close* to each other when their houses are adjoining. *Close* is annexed as an adjective; *near* is employed only as an adverb or preposition. We speak of *close ranks* or *close lines*; but not *near ranks* or *near lines*." (*Crabb: Eng. Synon.*)

†Obvious compounds: *close-barred*, *close-clasped*, *close-folded*, *close-fent*, *close-ringed*, *close-woven*.

**close-quarters, s. pl.**  
*Naut.*: Certain strong bulkheads or barriers of wood, also called *close-fights*, formerly stretching across a merchant-ship in several places. They were used for retreat and shelter when a ship was boarded by an adversary, and were therefore fitted with loopholes. Powder-chests were also fixed upon the deck, containing missiles which might be fired from the close-quarters upon the boarders. The old slave-ships were thus fitted, in case of the negroes rising, and flat-headed nails were cast along the deck to prevent them walking with bare feet.

\*At *close quarters*: In very close proximity, hand-to-hand; with yard-arm touching yard-arm (said of ships of war engaged); in close contact with the enemy.

**close-reefed, a.**  
*Naut.*: A term noting that the last reefs of the topsails, or other sails set, have been taken in from stress of weather.

**B. Parliamentary Rules:** The power in certain circumstances of terminating a debate in the House of Commons, whilst yet there are members willing to carry it on for an indefi-

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, caml, hēr, thēre; pine, plt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, quite, cūr, rūle, fūll; try, Sýrian. æ, œ = ē. ey = ā. qu = kw.

nitely long period. The British House of Commons is the model on which all similar deliberative assemblies elsewhere have been formed; yet sooner or later every one of these has found it impossible to carry on the business brought before it unless it has assumed to itself the power of deciding when a debate has lasted long enough, and should terminate. Many years went by, and still the good sense and moderation of the successively defeated minorities in the British House of Commons rendered it unnecessary to take any steps for the curtailment of superfluous debate. Not till nearly four-fifths of the nineteenth century had run its course, was any serious desire felt on either side of the House to alter this happy state of things. Shortly before that time, however, the device of obstructing simply for obstruction's sake began to be cultivated as an art, and was brought in a brief period to high perfection. Day by day time was intentionally wasted by small minorities of the house, and oftener than once when the members wished to go home, a section of the Irish representatives forced upon them "an all-night sitting." New rules were adopted, in 1882, to overcome this difficulty. The first rule gave permission to the Speaker, or to the Chairman of a Committee of the whole house, to close debate and go on to vote on a question if, when a motion to that effect was carried by a majority, its supporters appeared to amount to 200, or, in the event of the minority being less than 40, to amount to more than 100. These rules were altered in the direction of greater stringency by the Conservatives in 1887. Whatever is under discussion, the usual form for putting the closure now is "that the question be now put," and it is voted upon without debate. The word closure has not been adopted in the Congress of the United States but similar methods of delaying business have long existed, and rules have recently been adopted in the House to overcome them. The old rules exist in the Senate, and obstruction may go on there unchecked.

**\*clot (1), \*clate, \*clotte, s.** [The earlier spelling of *clod* (q.v.). A.S. *cláte* = a burdock, a hur; Dut. *kluit*, *klout* = a clod, a lump; Icel. *klót* = a ball, a knob; Sw. *klot* = a bowl, a globe; Ger. *klöss* = a clod, a clod.]

6. A kind of light woollen shawl worn by ladies.

¶ In the clouds; Applied to one soaring in flights of fancy and imagination far above terrestrial things; building castles in the air.

Under a cloud; In temporary disgrace or misfortune.

"Gentlemen that are under a cloud." Fielding: Amelia, bk. v., ch. 4.

B. Technically:

1. Botany: Cloudberry (Rubus chamaemorus).

2. Meteorology:

(1) Composition of clouds: A cloud is a mass of vapour condensed into minute drops or vesicles, and differing from fog chiefly in this respect, that fogs occupy the lower whilst clouds float in the upper regions of the atmosphere. Both derive their origin from vapours which rise from the sea, from fresh water, or from the moist earth.

(2) Different kinds of clouds: In 1803, Mr. Luke Howard divided clouds into four principal kinds, the Cirrus, the Cumulus, the Stratus, and the Nimbus. Two of these are frequently combined: hence he added to the former list of clouds the three following—Cirro-cumulus, Cirro-stratus, and Cumulo-stratus. The Cirrus is a small fibrous or wisp-like cloud, composed of what are popularly called "Mares'-tails," so high in the heavens that they are probably frozen. Their appearance in numbers often presages change of weather. The Cumulus, resembling great mountains of wool, is not so high. Several large ones are often seen on a summer morning. If these diminish during the day, the probability is in favour of fine weather, but if they multiply, and become surmounted by Cirri, the indication is of approaching storm. Cumuli in winter are not so frequent or well marked. The Stratus is a large and continuous sheet of dark cloud, seeming to rest on the horizon at sunset, and often vanishing at sunrise. The Stratus is frequent in autumn and rare in spring. The foregoing three all melt into one to form the fourth, viz., the Nimbus, or rain-cloud. Its appearance is familiar to all. The Cirro-cumulus is, as its name imports, a combination of the Cumulus and the Cirrus. It consists of a series of small round masses. The sky covered with them is popularly known as a "Mackerel" sky. It is best seen in warm and dry summer weather. In the Cirro-stratus the Cirri have descended from their airy height and become horizontal. The aspect is like that of shoals of fish. The Cumulo-stratus is like a cumulus fastened at the top and overhanging its base. Its tendency is to spread, settle down into a nimbus, and ultimately disappear in rain.

(3) Height of clouds in the sky: The mean height of clouds in winter is from 1,300 to 1,500 yards, and in summer 3,800 to 4,400. M. D'Abbadie observed a cloud in Ethiopia only 230 yards above the ground; and when Gey Lussac ascended in a balloon to a height of 7,650 yards, there were cirri overhead apparently at a much greater elevation.

(4) Theories of the formation and suspension of clouds: According to Hutton, while the

temperature of a stratum of air saturated with moisture diminishes in an arithmetical progression the capacity of retaining the moisture in the form of invisible vapour diminishes in a geometrical one: hence, when the temperature of a saturated stratum of air falls, the formerly invisible vapour takes the aspect of a cloud. There are various opinions as to why it floats. Halley and Saussure considered that each vesicle of water in the sky was hollow, and that consequently it floated like a balloon; a more modern view is that the vesicles are carried upwards by ascending currents of air. Clouds also which appear stationary are really descending slowly; but their lower part being dissipated by more heated strata of air, and their upper parts increased by fresh condensation, their descent is disguised so that they appear stationary. (Ganot, &c.)

(5) Electricity of clouds: As a rule the clouds are all electrified, some positively and others negatively: in some there is more, in others less, of tension.

¶ Compounds of obvious signification: Cloud-break, cloud-covered, cloud-dispelling, cloud-fenced, cloud-girt.

**I. Ordinary Language** :  
**1.** A trefoil, especially if used for fodder. [TRIFOLIUM.]

**2.** The name given to various plants more or less resembling the common trefoils.

**II. Technically** :

**1. Agric.** : Many species of clover are native to the United States, and Europe has 20 or more species. Of the several kinds grown, the common red clover (*Trifolium pratense*) is a biennial, and may be sown with barley, oats, or other grain sufficiently advanced in growth not to be suffocated by it. In the second year it gives a full crop.

The white, called also Dutch clover, is a perennial, and is sown with various grasses when it is intended as permanent pasture for sheep. French clover (*Trifolium incarnatum*) is ripened early; it is only an annual. Ryegrass in small quantity is often sown along with clover. A crop of clover, if mown and carried away as hay, so impoverishes the land that it should not be repeated for some years, but if it is eaten off the land by sheep fed on oil-cake it is generally grown every four years. [ROTATION OF CROPS.]

**2. Chem.** : The addition of lime and gypsum to the soil greatly promotes the growth of clover. The ash of clover contains 24.9 potash, 3.0 soda, 12.2 magnesia, 34.9 lime, 7.35 phosphoric acid, 3.7 sulphuric acid, 1.3 silica, 1.5 peroxide of iron, 11.1 chloride of sodium. The dried plants yield 10.53 per cent of ash. Clovers contain about 80 per cent of water.

**III. In special phrases** :

 Of hise alwen sixt and on seigunns."  
*H. Cresset*, 1337.

2. One of the four suits at cards, representing a trefoil or clover-leaf.

† The name is a translation of the Spanish *bastos* = cudgels or clubs, which is the Spanish name for the suit. The figure by which the clubs are denoted on a card is a trefoil: the Fr. name being *trèfle* = (1) trefoil, (2) a club (at cards). Cf. *Dan. kløver* = (1) clover, (2) a club (at cards); *Dut. klaver* = (1) clover, trefoil, (2) a club (at cards). (*Skeat*.)

3. A round, solid mass; a knot, used of a fashion of dressing the hair.

4. An association or number of persons combined for the promotion of some common object, whether political, social, or otherwise. The use of the word in this sense probably comes from the preceding one (3), as meaning a knot or gathering of men. Another definition, interesting at all events, is suggested by Carlyle in the extract given below.

† The earliest London club of any celebrity was established about the beginning of the 17th century, at the Mermaid Tavern, Friday Street. Among its members were Shakespeare, Sir Walter Raleigh, Beaumont, Fletcher, and Selden. Ben Jonson figured at another club, which met at the Devil Tavern, near Temple Bar. Of other clubs, the literary one, established in the year 1764, had among its members Johnson, Boswell, Burke, and Goldsmith. There are numerous clubs in the cities of the United States, such as social, literary, historical, scientific, military, dramatic, mercantile, agricultural, sporting, political, &c. Some of these were of Colonial origin, and others are based on colonial institutions, but the great majority of them are of recent origin and purpose.

Towards the close of the 18th century, the French political clubs gained world-wide notoriety from the active part which they took in the first French revolution. The most celebrated was the Jacobin Club, founded at Versailles in 1789, and called originally the Breton Club. This and other political French clubs were abolished on September 4th, 1797. They were revived in 1843, but were suppressed again in 1849 and 1850.

"Bodles of Men uniting themselves by a Sacred Vow, 'Gottbde;—which word and thing have passed over to us in a singularly dwindled condition: 'Club' we now call it; and the vow, if sacred, does not aim very high."  
*Carlyle: Fred. Great*, bk. II, ch. 8.

5. An association or society of persons for the purpose of providing such of its members as may require it with a temporary residence or resort in a house maintained and reserved for the sole use of such members.

6. The house in which such an association or society of persons meet. [CLUB-HOUSE.]

†7. The seat, subscription, or share of expense paid or payable by each member of such an association or society.

"A fiddling couple sold ale; their humour was to drink drunk, upon their own liquor; they laid down their club, and this they called foring a trade."  
*L'Etrange*.

 2. *Fig.*: Rough, awkward.

**club-foot**, *s.*  
 1. A short deformed foot.  
 † In 1831, Dr. Strömeyer cured a gentleman of this defect by dividing the tendons of the contracted muscles with a very thin knife.

"There are three principal forms of distortion to which the foot is congenitally subject: 1. When the foot is turned inwards. . . . 2. When it is turned outwards. . . . 3. When the patient can only put the toes on the ground. Almost all the varieties of club-foot may be referred to one of these species."  
*A. T. S. Dodd, Abnormal Conditions of the Foot, in Todd's Cyclopaedia of Anatomy and Physiology*.

2. A person so deformed.

**club-footed**, *a.* Having a club-foot.

**club-grass**, *s.*

"Their sovereign nostrum is a clumsy joke  
On usage enforced with God's severest stroke."

*Cowper: Retirement*, 813.

Crabb thus distinguishes between *awkward* and *clumsy*: "These epithets denote what is contrary to rule and order in form or manner. Awkward respects outward department, *clumsy* the shape or make of the object; a person has an *awkward* gait, is *clumsy* in his whole person. Awkwardness is the consequence of bad education; *clumsiness* is mostly a natural defect. . . . They may be both employed figuratively in the same sense and sometimes in relation to the same objects; when speaking of *awkward* contrivances or *clumsy* contrivances, the latter expresses the idea more strongly than the former." (*Crabb: Eng. Synon.*)

\* **clūnch**, *v.t.* [CLENCH, CLINCH.]

"His fist is cluncht with the habit of disputing."—*Baile: Microcosmographie*.

*Dr. H. More: Song of the Soul; Infinity of Worlds*.

**Clū-nī-āc**, *a. & s.* [Lat. *cluniacensis*.]

**A.** *As adj.*: Of or pertaining to Cluny, a commune and town of France, in the department of the Saône-et-Loire, 200 miles S.S.E. of Paris, and seat of the monastery described under B.

**B.** *As subst.*: A monk belonging to the monastery founded at Cluny, or the order which subsequently developed from it. In 910, Guillaume (William) I, Duke of Aquitaine and Count of Auvergne, and Bern or Berno, Abbot of Gigniac, under his auspices, founded in Cluny, then a mere village, an abbey of Benedictine monks. In the 10th century, Odo, a French nobleman, being made Abbot of Cluny about 927, rendered the discipline of the monastery more strict. Many other monasteries followed the example, and the Cluniacians became celebrated through Europe, and soon acquired great wealth and power. In the 11th century they founded a community or congregation, separate from that of the ordinary Benedictines. In the 12th century they were corrupted by the wealth they had acquired, and their discipline became greatly relaxed.

About 1077 or 1078, William, Earl of Warren, son-in-law of the Conqueror, brought Cluniac monks into England, and erected for them a house at Lewes, in Sussex. In 1525, Cardinal Wolsey dissolved four houses of Cluniacs. The monastery at Cluny itself was three times plundered by the Huguenots, and during the French revolution of 1789 it was almost entirely destroyed.

**Clū-nī-ā-cēn-sī-ang**, *s. pl.* [Lat. *cluniacenses*, pl.] [CLUNIC.] The same as Cluniacs. [CLUNIC, s.]

**clūnk**, *s.* [From the sound.] A noise such as is made when a cork is extracted from a bottle.

**clūnk**, *v.t.* [From *clunk*, *s.* (q.v.).] To emit a hollow and intermitted sound, like that made by a cork suddenly extracted from the neck of a bottle.

\* **clūnk'-ēr**, *s.* [Perhaps the same as *clinker* (q.v.).]

**1.** A tumour, a bump.

"He has a clunker on his crown,  
Like half an errack's egg—and you  
Undoubtedly is Dunce's Drone."

*Piper of Peebles*, p. 18.

**2. Pl. (Clunkers)**: Dirt hardened in clods so as to make a pavement unequal. (*Scott*.)

\* **clūnt'-ēr**, *v.t.* [? CLUNCH.] To clod or coagulate; to become lumpy.

\* **clupe** (1), *v.t.* [CLEPPE.]

\* **clupe** (2), *v.t.* [CLIP.]

**clū-pē-ā**, *s.* [Lat. = a small river fish supposed by some to be the lamprey (*Petromyzon fluviatilis*).]

*Ichthy.*: A genus of fishes, the typical one of the family Clupeidæ (q.v.). The maxillaries

are arched in front, and divided into three pieces; the intermaxillaries narrow and short; the upper jaw entire; the teeth minute or wanting; the body compressed and covered with large scales. Yarell enumerated five species as British, viz., *Clupea pilchardus* (the Pilchard, or Gipsy Herring); *C. harengus* (the Herring); *C. Leachii* (Leach's Herring); *C. sprattus* (the Sprat, Garvie Herring, or Garvie), and *C. alba* (the Whitebait), but there is reason to believe that the last so-called species is only the young of the herring.

**clū-pē-īd**, *s.* [CLUPEIDÆ.] Any fish of the family Clupeidæ (q.v.).

**clū-pē-ī-dæ**, *s. pl.* [Lat. *clupea* (q.v.), and fem. pl. adj. suff. *-idæ*.]

**1. Ichthy.**: The herring tribe, a family of fishes belonging to Cuvier's order Malacopterygii Abdominales. Now they are placed under the order Teleostei, and the sub-order Malacopteri. The dorsal fin is single; there is no adipose fin; the upper jaw is composed of the intermaxillary bones in the middle and the maxillaries at the sides, and the body is covered with scales. The following genera are represented in the British fauna—*Clupea*, *Alosa*, and *Engraulis* (q.v.).

**2. Paleont.**: The family had representatives as early as the chalk. [CLUPEOIN.]

**clū-pē-ī-form**, *a.* [Mod. Lat. *clupea* (q.v.); *ī* connect., and *-form*.] Having the form or characteristics of a herring, or of the herring family. [CLUPEIDÆ.]

**clū-pē-ōid**, *s. & a.* [Lat. *clupea* (q.v.), and Gr. *εἶδος* (*eidos*) = . . . form, appearance.]

**A.** *As subst.*: A Clupeid.

"The Clupeoids seem also to be represented by allied forms at this comparatively early period."—*Nicholson: Paleont.* (ed. 1879), ii. 125.

**B.** *As adj.*: Pertaining to, or characteristic of, the family Clupeidæ.

\* **cluppe**, \* **cluppen**, *v.t.* [CLIP.]

\* **clup-ping**, \* **clup-punge**, *pr. par., a., & s.* [CLIPPING.]

\* **clupte**, *pret. of v.* [CLIP.]

\* **cluse**, *v.t.* [CLOSE.]

"Heo clused in ther wintinnen alle heore wintunnen."  
*Layamon*, iii. 938.

\* **cluse**, *s.* [CLOSE, CLOW.] A sluice, a weir.

"As me deoth water et ter manus cluse."—*Ancient Rime*, p. 72.

**clū-gī-ā**, *s.* [Named after Carolus Clusius (Charles de Lécluse), who was born at Antwerp on February 18th, 1526, became one of the greatest botanists of the 16th century, and died, professor of botany at Leyden, on April 4th, 1609.]

**Bot.**: Balsam-tree, a genus of plants, the typical one of the order Clusiaceæ (Guttiferae), and the tribe Clusiæ. The flowers are usually polygamous, calyx consisting of four imbricate permanent sepals, coloured, the outer pair smallest, often bracteate at the base. Petals 4—6, deciduous; stamena in the male flowers many and free, in the female ones few, sterile, and connected, all glutinous; stigmas 5—12, radiately peltate, glutinous; ovary surrounded by a stamiferous ring; capsule fleshy, 5—12 celled. The species are trees or shrubs, often parasitic. *Clusia rosea* is a beautiful tree growing on rocks; its fruit divides into eight portions, with scarlet seeds like those of the pomegranate. *C. alba* is an elegant tree of great thickness of trunk, yellow, strange to say parasitic upon other trees. *C. nava* resembles the former one. All these, with *C. venosa*, are found in British greenhouses. They were introduced from the warmer parts of America.

**clū-gī-ā-pē-æ**, *s. pl.* [Mod. Lat. *clusia*, and fem. pl. adj. suff. *-æcæ*.]

**Bot.**: An order of plants, the type of the alliance Guttiferales, that term implying that they secrete "gutte," i.e., drops of resin. Lindley calls the Clusiaceæ themselves Guttiferae. They have coriaceous leaves, which are simple, opposite, and without stipules, the midrib being generally prominent, and parallel veins at times running companionably to the margin. The flowers are symmetrical, with equilateral petals, adaxial, beakless anthers, solitary, or few seeds and sessile radiating stigmas. The order consists of trees often parasitical. They are found in the tropics, their metropolis being South America; a few are from Madagascar or

2. **Palaeont.**: The family are known from the Cretaceous period till now.

**clýp-ê-stê, a.** [Mod. Lat. *clypeatus*, from Class. Lat. *clypeus*, properly *clýpeus*.] [CLYPEUS.]

**Bot.**: Shield-shaped, of the form of an ancient buckler, scutate.

**clýp-ê-i-form, a.** [Lat. *clypeus* (properly *clýpeus*) = a shield, and *forma* = form.]

**Entom. & Zool.**: Shield-shaped. Used of the large prothorax in beetles (Owen), or the carapace of the King-crab.

"The genus *Receptaculites* includes a *clypeiform* species."—*Dana*: *Zoophytes*, p. 700.

**clýp-ê-ô-lâ, clýp-ê-ô-le, s.** [Mod. Lat., duu. of Lat. *clypeus* (q.v.).]

**Bot.**: Any one of the shield-shaped bodies that make up the fruiting spike in *Equisetum* (q.v.).

**clýp-ê-ô-lâte, a.** [CLYPEOLA.] Pertaining to, or provided with clypeoles.

**clýp-ê-ô-lê, s.** [CLYPEOLA.]

**clýp-ê-ûs, s.** [Lat. = a round brazen shield.]

(2) *Fig.*: A person of a noble family. (Wharton.)

2. **Entom.**: The part of the upper surface of an insect's head which joins the labrum. Kirby called it the nasus (nose).

"In the Scorpion-flies there is . . . a proboscis formed in front by the elongated clypeus and labrum."—*Huxley*: *Nat. In. Animals*, ch. vii, p. 424.

3. **Palaeont.**: A genus of Echinodermata, family Echinobrissidae, common in the Oolite. Example, *Clypeus sinuatus*.

† *Clypeus Sobieski* (the shield of Sobieski, the individual thus honoured being John Sobieski III., King of Poland):

**Astron.**: The name given by Hevelius to a small constellation beside Aquila.

\* **clýs-mi-ân, a.** [CLYSMIC.] Pertaining to, or of the nature of a cataclysm; or cataclysmic.

**clýs-mic, a.** [From Gr. κλύσμα (*klusma*) = a liquid used for washing out a clyster.] Used in or used for washing or cleansing.

**clýs-têr, s. & a.** [Lat. *clyster*; Gr. κλύστήρ (*klústêr*).]

**A. As substantive:**

**Med.**: An enema, such as tepid water or gual, introduced into the rectum to produce evacuation of its contents during obstinate constipation, or other injections designed to make the bowels retain their contents in diarrhoea, for supplying nourishment when the teeth are closed in tetanus, or for various other purposes. Too frequently employed clysters weaken the system in place of giving it aid.

**B. As adj.**: Pertaining to a clyster; used in administering a clyster.

**clyster-pipe, clyster-pipe, s.**

1. *Lit.*: A tube or pipe used for injections; the nozzle of an enema syringe.

2. *Fig.*: A contemptuous name for an apothecary.

"A proud, starch'd, . . . sycophantizing clyster-pipe."—*Life of A. Wood*, May 3, 1661. [Davies.]

**clyster-syringe, s.** A syringe for administering medicine upwards.

\* **clýs-têr-îze, v. t. & i.** [Fr. *clystêrizer*; Lat. *clysterizo*, from Gr. κλύστηριζω (*klústêrizo*), = *clyster* (*klústêr*), κλύστηριον (*klústêrion*) = a clyster.] To apply a clyster (to).

**clýs-têr-wîse, adv.** [Eng. *clyster*, and *wîse*.] In manner of or by way of a clyster.

"*Clysterwise* Immitted into the Intestines."—*Green-Mill*: *Art of Embalming*, p. 273.

**clýth-ra, clít-ra, a.** [A word of no etymology.]

**Entom.**: A genus of Coleoptera (Beetles), family Chrysomelidæ. The body is cylindrical; the antennæ are six-jointed; with some joints serrated; the head almost hidden by the thorax;

the first pair of legs in the male often larger than the two pairs behind them. The larvae drag about a coriaceous tube in which they live. The Clythra are found on trees and shrubs. Sharpe enumerates three British species. *Clythra quadripunctata* is the most common. It has ochre-coloured elytra, with four black spots, and is nearly half an inch in length. *C. tridentata* is blue-green, with pale-yellow elytra, and is slightly smaller than the last. The foreign Clythra are numerous. Swainson and Shuckard made Clythra the type of a family, Clythridæ (q.v.).

\* **clýth-rí-dæ, s. pl.** [Mod. Lat. *clythra*, and fem. pl. adj. suff. -idæ.]

**Entom.**: A family of Tetramerous Beetles, akin to Chrysomelidæ, in which it is now merged. [CLYTHRA.]

**Clý-tie, s.** [Lat. *Clytie*.]

1. **Class. Mythol.**: A daughter of Oceanus who was changed into a sunflower.

2. **Astron.**: An asteroid, the seventy-third found. It was discovered by Tuttle, on the 7th April, 1862.

**clý-tús, s.** [From Gr. κλύτός (*klutos*) = heard, heard of, glorious.]

**Entom.**: A genus of Coleoptera (Beetles), family Cerambycidae. The body is elongate and cylindrical, the thorax globular or cylindrical, the antennæ shorter than the body and filiform. *Clytus myneticus* and *C. Aridis* are common in gardens and woods near London. The former has the elytra reddish-brown at the base with three bent fascia about the middle, and a white patch at the apex; the latter has the thorax yellow before and behind, the scutellum yellow, and four bands of the same colour on the elytra.

coach, s. & a. [O. Fr. coche; Ital. cocchio; Ger. kutsche; from Hung. kocsí (pron. kō-chē) = a coach; prob. an adj. = belonging to the village of Kocs, a place south of Komorn, between Raab and Buda. (N.E.D.)]

A. As substantives:

1. Ordinary Language:
1. Literally:
(1) In the same sense as II. 1.
(2) A railway carriage or truck. (English.)
(3) A spacious, enclosed vehicle, carrying four persons inside, with elevated driver's seat in front, and drawn by two horses.

2. Fig.: A special tutor engaged to assist in preparing students for examinations.
Warham was studying for India with a Wancoster coach.—G. Elliot: Deronda, ch. vi. (Davies.)

II. Technically:

1. Vehicles: A large, close, four-wheeled vehicle, generally constructed to carry four passengers only in the inside, and about twelve outside; used for purposes of state, for pleasure, or for traveling; in this country generally termed a "Tally-ho."

Italy, France, Spain, and Germany all claim the honour of having invented coaches. About 1282, the Queen of Charles of Anjou entered Naples in a caretta, which seems, in some respects, to have resembled a modern coach. It is generally believed that the first one used in England was introduced by the Earl of Arundel in 1580. They did not become common till about 1605. In the first half of this century, the greater part of the passenger traffic of this country was conveyed by coaches, and the coaching system had been carried to the very highest state of perfection when it was superseded by railways.

2. Naut. (also written coach): A sort of chamber or apartment in a large ship of war, just before the great cabin. The floor of it is formed by the aft-most part of the quarter-deck, and the roof of it by the poop; it is generally the habitation of the flag-captain. (Smyth: Sailor's Word-book.)

The commanders came on board and the council sat in the coach.—Popey.

3. Rowing: A person who instructs a crew during training.

For hackney, mail, and stage coaches see these words.

B. As adj.: (See the compounds.)

. . . forbidding all men firmly to make any law of coaction or of separation. . . —Bala: Actus of English Voyages, I. 18 (1550).

co-act'-tive (1), a. [Lat. coactus, pa. par. of cogo = (1) to drive together, (2) to compel.] Having a restraining or impelling power; compulsory, restrictive.

The Levitical priests, in the old law, never arrogated unto themselves any temporal or coactive power.—Keble.

co-act'-tive (2), a. [Pref. co = con = with, together, and Eng. active (q.v.)] Acting together or in union.

With what's unreal though coactive art, And fellow'st nothing.—Shakespeare: Winter's Tale, I. 2.

co-act'-tive-ly, adv. [Eng. coactive (1); -ly.] In a coactive manner, by compulsion or restriction. (Bp. Bramhall.)

co-act'-tiv-ly-ty, s. [Eng. coactiv(e) (2); -ty.] A working or acting together; unity of action.

. . . that vital sympathy and coactivity, that transmits objects in their exact circumstances to the common perceptant.—Jesse: Philosophical Writings Preface.

co-ad-āp-tā-tion, s. [Pref. co = con = with, together, and Eng. adaptation (q.v.)] Mutual adaptation or suitability.

. . . to acquire that perfection of structure and adaptation which most justly excites our admiration.—Darwin: Origin of Species (ed. 1859), Intro., p. 2.

co-a-dāp-tēd, a. [Pref. co = con, and Eng. adapted (q.v.)] Adapted to one another; mutually adapted or suited. (Owen.)

co-ad-hēr-ent, a. & s. [Pref. co = con, and Eng. adherent (q.v.)]

A. As adj.: Clinging together, adhering, adherent.

B. As substantive:

1. Ord. Lang.: An adherent, a supporter.

2. Ship-building: The fayed piece called bilge-keel. (Smyth.)

co-ad-jā-gēnce, s. [Pref. co, and Eng. adjacency (q.v.)] The quality or state of being coadjacent; nearness, closeness of things to each other.

By similarity, by contrast, by coadjacencies in space.—Pop. Encycl. (Ogilvie.)

co-ad-jā-gēnt, a. [Pref. co, and Eng. adjacent (q.v.)] Mutually adjacent, close to each other.

co-ād'-jū-mēnt, s. [Pref. co = con; Lat. adiumentum, for adiumentum = help; ad-jūo = to help, to aid.] Mutual help or assistance.

co-ad-jūst', v. t. [Pref. co = con, and Eng. adjust (q.v.)] To adjust by mutual adaptation.

co-ad-jūs-tēd, pa. par. or a. [COADJUST.]

co-ad-jūst'-mēnt, s. [Eng. coadjust; -ment.] The act or process of coadjusting; the state of being mutually adjusted or adapted.

co-ad-jū-tant, a. & s. [Pref. co = con, and Lat. adiutans = helping, assisting.]

A. As adj.: Co-operating, assisting.

Thracius coadjutor, and the rear of fierce Eurylydon.—Philostr.

B. As subst.: An assistant, a co-operator.

Ones or some of his coadjutors.—North: Essay, p. 192.

co-ād'-jū-tā-tōr, s. [Pref. co = con, and Lat. adiutor = a helper.] An assistant, a coadjutor.

I do purpose to act as a coadjutor to the law.—Emmett: Lancelot Greaves, ch. II. (Davies.)

bel, boy; pout, lowl; eat, yell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -ing. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -sious, -cious = shūs. -ble, -dle, &c. = bpl, dpl.

•cō-ad-jū-tīng, a. [Pref. cō = con, and Lat. adjūto = to help.] Mutually assisting or aiding; co-operating.

"Those higher hills to view, fair Love that stand, Her coadjuting springs with much content behold." Dryden: Polyolbion, III.

•cō-ad-jū-tīve, a. [Pref. cō = con; Lat. adjūto = to help; Eng. suff. -ive.] Co-operating; rendering mutual aid.

"There is no mischief we fall into but that we ourselves are at least a coadjutive cause." Feltham: Resolves.

•cō-ad-jū-tōr, s. [Lat., from cō = con, and adjūto = to help, to aid.]

I. Ordinary Language:

1. An assistant or helper; a co-operator. " . . . my predecessors the poets, or their seconds or coadjutors the artificers." Dryden.

2. One authorised, empowered, or appointed to perform the duties of another.

II. Eccles. (Roman Catholic Ch.): The assistant of a bishop or other prelate, who from age or infirmity is not able fully to do his own duty.

"A bishop that is unprofitable to his diocese ought to be deposed, and no coadjutor assigned him." Archbishop.

Crabb thus distinguishes between a coadjutor and an assistant: "A coadjutor is more noble than an assistant; the latter is mostly in a subordinate station, but the former is an equal; the latter performs menial offices in the minor concerns of life, and a subordinate part at all times; the former labours conjointly in some concern of common interest and great importance." (Crabb: Eng. Synon.)

•cō-ad-jū-tōr-ship, s. [Eng. coadjutor; -ship.]

1. Ord. Lang.: Co-operation; joint assistance.

"I would have tried to fix a day, to meet you at Sir R. W. . . . with his permission and your coadjutor-ship." Pope: To Fortescue, letter 24.

2. Eccles. (Roman Catholic Ch.): The position, state, or rank of an assistant to a bishop or other prelate.

•cō-ad-jū-trix, cō-ad-jū-trēss, s. [Lat. cō = con; adjutrix = a female helper.] A female assistant.

"Oh! If I am ever blest with a co-adjutress, a directress let me rather say." Cauteb, vol. II., p. 24.

Bolingbroke and his coadjutrix insinuated that the treasure was hoarded in favour of the dissenters." Smollett: Hist. Eng., bk. I., ch. II., § 40. (Latham.)

•cō-ad-jū-van-cy, s. [COADJUVANT.] Mutual or concurrent help; co-operation; contribution of help. (Browne.)

•cō-ad-jū-vant, s. & a. [Pref. cō = con, and Lat. adjūvans, pr. par. of adjūvo = to help.]

A. As substantive: Med.: An ingredient in a prescription designed to aid or co-operate with another.

B. As adj.: Assisting, helping, co-operating.

•cō-ad-nāte, cō-ad-nāte, a. [Lat. coadunatus (pa. par. of coaduno): from cō = con, and aduno = to unite.] [ADUNATION.]

Bot.: United at the base, soldered together. (Craig.) The same as CONNATE (q.v.).

Linnaeus, in his attempt at a natural system of botanical classification, had an order Coadunatae, which he made to include the Anona, the Magnolia, Thea, &c.

•cō-ad-nā-tion, \* cō-ad-nā-tion, s. [Pref. cō = con, and Eng. adunation (q.v.).] A bringing together of different things so as to form one body; union, consistency.

"They are sonnes of a Church where there is no co-advnation, no authority, no government." Jeremy Taylor: Episcopacy Asserted, § 1.

"Bodies seem to have an intrinsic principle of, or corruption from, the coadunation of particles united with contrary qualities." Hales: Origin of Mankind.

•cō-ad-nā-tīve, a. [Eng. coadunate, v.; -ive.] Having the property of combining into one.

•cō-ad-ven-ture, s. [COADVENTURE, v.] An adventure in which two or more take a share; a joint risk or venture.

•cō-ad-ven-ture, v. & a. [COADVENTURE, s.] To share in a venture or speculation.

"The prince holdeth it no disparagement to coadventure and put in his stake with the merchant." Howell: Foreign Travel, vii.

•cō-ad-ven-tū-rer, s. [Eng. coadventur(e); -er.] A fellow-adventurer; one who partakes in the same risk or venture.

"There is a worthy captain in this town, who was coadventurer in that expedition." Howell: Lett., II. 51.

•cō-af-val, a. [COEVAL.]

•cō-af-fōr-ēt, v. i. [Pref. cō = con, and Eng. affore (q.v.).] To convert ground into forest, and add it to ground already afforested.

"Henry Fitz-Emprasse (viz. the second) did co-afforest much land. . . ." Howell: Lett., IV. 16.

•cō-ā-gēn-cy, s. [Pref. cō = con, and Eng. agency (q.v.).] Joint agency; an acting in common or in partnership.

"Acting as a co-agency with unresisted grief." De Quincey: Autobiog. Sketches, I. 22. (Davies.)

•cō-ā-gēt, s. [Pref. cō = con, and Eng. agent (q.v.).] An associate; one co-operating with another in any act or work.

" . . . this coagent of your mischiefs." Beaumont & Fletcher: Knight of Malta.

•cō-ā-g-ē-tāte, v. t. [Pref. cō = con = with, together, and Eng. agitate (q.v.).] To shake, move, or agitate together. (Blount.)

•cō-ā-g-mēt, v. t. [Lat. coagmento = to join or cement together; from cō = con, and agmen = a collected multitude moving forward, ago = to drive.] To collect or heap together.

•cō-ā-g-mēn-tā-tion, s. [Lat. coagmentatio, from coagmento = to join or cement together.] The act of collecting or heaping together; combination, conjunction. (B. Jones.)

•cō-ā-g-mēnt-ēd, pa. par. & a. [COAGMENT.]

•cō-ā-g-ul-a-bil-i-ty, s. [Eng. coagulable; -ity.] The quality of being coagulable, or capable of being coagulated.

† cō-ā-g-u-lā-ble, a. [Eng. coagul(ate); -able.] Capable of being coagulated or concreted.

"An effusion of coagulable material." Todd & Bowman: Physiol. Anat., vol. I., ch. III., p. 74.

•cō-ā-g-u-lant, s. [Lat. coagulans, pr. par. of coagulo = to coagulate, to concretize.] A substance which coagulates or produces coagulation. (Dunghlton.)

•cō-ā-g-u-lāte, v. t. & i. [Lat. coagulo, from coagulum = a means of coagulation, from cogo (sup. coactum) = to drive together; It. coagulare, coagliare; Sp. coagular; Fr. coaguler and caillier.]

A. Transitive:

1. To curd, to clot; to change into a curd-like state.

"The mineral acids have the power of coagulating albumen." Todd & Bowman: Physiol. Anat., vol. I., introd., p. 36.

2. To crystallize (Optic).

B. Intransitive:

1. To congeal, to thicken, to become clotted or curded.

"If the dark rays were absorbed in a high degree by the humours of the eye, the albumen of the humours might coagulate along the line of the rays." Tyndall: Frag. of Science, 3rd ed., VIII., s. p. 194.

2. To become crystallized.

"Spirit of wine combined with milk, a third part spirit of wine, and two parts milk, coagulates little, hot mingled; and the spirit swims not above." Bacon.

\* cō-ā-g-u-lāte, a. [Lat. coagulatus, pa. par. of coagulo.] The same as COAGULATED (q.v.).

•cō-ā-g-u-lā-ted, pa. par. & a. [COAGULATE.] Congealed, concreted, curded.

•cō-ā-g-u-lā-tīng, pr. par., a, & s. [COAGULATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb).

"So perfect is the coagulating power of rennet, that not a particle of casein in milk submitted to its action will remain uncoagulated." Todd & Bowman: Physiol. Anat., vol. I., ch. I., p. 33.

C. As subst.: The act or process of coagulating, clotting, or curdling; the state of becoming coagulated.

•cō-ā-g-u-lā-tion, s. [Lat. coagulatio, from coagulo = to coagulate.]

1. The act or process of being coagulated, or of changing from a liquid to a curd-like semi-solid state, produced without evaporation and without crystallization. It differs from congeal in not being attended by a fall of temperature in the substance coagulated.

† Coagulation of the blood:

Anat. & Physiol.: When blood is drawn and allowed to stand it emits a "halitus" or exhalation, which has a faint smell. In three or four minutes a film overspreads the liquid, commencing at the circumference and gradually spreading to the centre. Two or three minutes later the lower part of the blood, in contact with the vessel, becomes solidified, and then the whole mass, only about eight or nine minutes being needful for the whole process from first to last. In about fifteen or twenty minutes a thin serum begins to exude from it, and goes on to do so for two or three days. (Quain.)

"Acetic acid, which will not precipitate albumen, causes the coagulation of casein." Todd & Bowman: Physiol. Anat., vol. I., ch. I., p. 30.

"Fibrine is distinguished from the other proximate principles by its remarkable property of spontaneous coagulation." Ibid., p. 37.

\* 2. The process of becoming crystallized; crystallization.

3. A concretion; a body or substance formed by coagulating.

"As the substance of coagulations is not merely saline, nothing dissolves them but what penetrates and sublates at the same time." Arbuthnot: On Aitments.

† cō-ā-g-u-lā-tive, a. [Lat. coagulat(us), pa. par. of coagulo = to coagulate; Eng. suff. -ive.] Having the power or quality of coagulating; causing coagulation or concretion; coagulating.

"To manifest the coagulatis power, we have sometimes in a minute arrested the fluidity of raw milk, and turned it into a curdled substance. . . ." Boyle.

•cō-ā-g-u-lā-tōr, a. [Eng. coagulat(e); -or.] That which coagulates or has the power or quality of coagulating.

"Coagulators of the humours, are those things which expel the most fluid parts. . . ." Arbuthnot.

•cō-ā-g-u-lā-tōr-y, a. [Eng. coagulat(e); -ory.] Causing coagulation; coagulative.

"Coagulatory effects." Boyle.

•cō-ā-g-u-lūm, s. [Lat.]

I. Ordinary Language:

1. A coagulated or concreted mass, as curd, &c.

"From the clarified juices of cauliflower, asparagus, mangel-wurzel or turnip, a coagulum is formed, which cannot be distinguished from the coagulated albumen of serum or the egg." Todd & Bowman: Physiol. Anat., vol. I., ch. I., p. 40.

2. Any substances or preparation which coagulates or causes coagulation; a coagulant.

II. Med. & Chem.: A blood-clot. Substances containing albumen, as the white of egg, are coagulated by heating.

•cō-aid, s. [Pref. cō = con, and Eng. aid (q.v.).] An assistant, one who joins in any act, a co-operator.

"Paris, Delphobus, Agenor, joint Co-aid and captains of the Trojan fleet." Pope: Homer's Iliad, bk. XIII.

•cō-ai-tā, s. [QUATA.] The French name for the Quata, a South American monkey, Ateles paniscus, very common in the woods of Surinam and Brazil.

•cō-ai-tī, s. [COATI.]

\* coak (1), s. [COEK.]

•cōak (2), s. [Etym. doubtful.]

1. Carpentry:

(1) A projection of the nature of a tenon from the general face of a scarfed timber. It occupies a recess or mortise in the counter-part face of the other timber. It is called also a tabling, and the mortise a sunk-coak. (Knight.)

(2) A joggle or dowel by which pieces are united to prevent them slipping past each other, or to fasten them together. (Knight.)

2. Mach.: The hole guarded by metal in a sheave through which the pin goes.

3. Naut.: A small perforated triangular bit of brass inserted into the middle of the shiver (now called sheave) of a block, to keep it from splitting and galling by the pin whereon it turns. Called also bush, cock, or cogg, and dowel. (Smyth.)

"Coaks, or dowels, are fitted into the beams and knees of vessels to prevent their slipping." Smyth.

•cōak, v. t. & i. [COAK (2).] Ship carp.: To perform the process of coaking (q.v.).

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sire, sir, marine; gō, pōt, er, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rūle, fūll; trī, Sýrian. se, ce = ā. ey = ā. qu = kw.

coak-ing, s. [COAK, v.] Uniting pieces of spar by means of tabular projections, formed by cutting away the solid of one piece into a hollow, so as to make a projection in the other fit in correctly; the butts, the pieces from drawing asunder.

coal, \* coale, \* col, \* cole, \* coole, \* coyle, \* ooil, \* coyle, \* coll (sing.), \* colis, \* colys (pl.), & a. [A.S. col; O. H. Ger. chol, cholo; M. H. Ger. kol; Ger. kohle; Dut. kool; Sw. kol; Dan. kul; L. Oer. kaal.]

A. As substantive:

I. Ordinary Language:

1. Charcoal; a piece of wood or any other combustible, ignited and burning, or charred or extinguished. (Generally qualified by an adjective, as a live coal, a burning coal, a dead coal.)

"Sharpshooters of the mighty, with coals of juniper." —Ps. cxx. 4.

2. In the same sense as II. 1.

¶ Pit-coal (Germ. Steinkohl = stone-coal) (Spee, Wallis, &c.); Sea-coal (Shaksp.); Ship-coal (old charters); Carbo maris, Carbo fossilis, &c., used as distinctive terms. [H. 1.]

¶ To blow a coal: To fan a quarrel.

"I do believe

You are mine enemy, and make my challenge  
You shall not be my judge: for it is you  
Have blown this coal betwixt my lord and me;  
Which God's dew quench!"

Shaksp.: Hen. VIII. II. 1.

(1) A coal could blow at: A proverbial phrase still commonly used to denote any work that eventually is quite unprofitable. (Scotch.)

"If I had no more to look to but your reports, I would have a cold coal to blow at." —M. Bruce: Lectures, p. 33.

(2) Precious coals! An exclamation of surprise. (Nares.)

"Let me see how the day goes [hee pulls his watch out]; precious coales, the time is at hand. . . ." —Returns from Parmassus (1608).

(3) To bring over the coals. [To haul over the coals.] (Scotch.)

"But time that tries such preticks past,  
Brought me out o'er the coals to fast."

Forbes: Dominie Depot, p. 35.

(4) To carry coals: To put up with insults, to submit to any degradation. The origin of the phrase is this: that in every family the scullions, the turnspits, the carriers of wood and coals were esteemed the very lowest of menials. The latter in particular were the drudges of all the rest. (Nares.)

"Gregory, o' my word, we'll not carry coals!" —Shaksp.: Rom. & Jul., I. 1.

(5) To carry coals to Newcastle: To do anything superfluous or unnecessary.

(6) To haul (or bring) over the coals: To scold, to call to account.

II. Technically:

1. Min.: A carbonaceous mineral substance, black, shiny or dull, easily broken, often splintery, inflammable, and used for fuel. It is composed of carbon (75 per cent.), hydrogen, oxygen, and some nitrogen, with siliceous and other earthy impurities (ash). It consists of compressed and chemically altered vegetable matter, chiefly extinct kinds of lycopodiaceous trees. As the successive jungle-growths [COAL-MEASURES] accumulated their stems, leaves, and spores, hydrogen and oxygen were evolved with some of the carbon. The relative proportion of carbon in the mass was increased, the woody fibre reduced in volume to one-ninth, or even one-fifteenth, of its original bulk, and the mass became black, shiny hydrocarbons, with imbedded charcoal ("mother-coal"), due to decomposition of trees lying exposed to the air, or dull black hydrocarbons, resulting from the consolidation of decomposed vegetable pulp, like soft peat.

¶ Dana divides what may be called the species, termed by him Mineral Coal, into the following varieties: (1) Anthracite, (2) Native Coke, (3) Caking Coal, (4) Non-caking Coal, (5) Cannel Coal (Parrot Coal), (6) Torbanite, (7) Brown Coal (Lignite), (8) Earthy Brown Coal, (9) Mineral Charcoal. The first variety has only 3-46 per cent. of bituminous matter, the second has none, and the rest vary in this respect.

2. Geol.: Geologically coal occurs as a stratified rock, interbedded with clays, ironstones, sandstones, and limestones, in what are termed coal-measures. The best coals belong to the Carboniferous series of the Palæozoic system; but much coal of later

(Neozoic) ages is found in various parts of the world, though, in that case, either mixed with or passing into lignite, a far less valuable fossil fuel, because little of the hydrogen, oxygen, and nitrogen has been eliminated by chemical changes, and thus as much as 30 per cent. of water remains in lignite, whilst good coal has seldom more than 5 per cent. When lateral pressure has come into operation on the coal-measure, more hydrogen (with some carbon) has been driven off, and the coal metamorphosed into anthracite, which has 90 per cent. of carbon. Some coals have become merely anthracitic. Other coals have had very much carbon ("mother-coal") in them originally. Hence the conditions producing "Steam-coal," that is, either (1) coal good for raising steam quickly, or (2) smokeless coal, suited for steam-ships. According to the decomposition of the vegetable matter, and the resulting combination of carbon and hydrogen, fossil fuel is more or less bituminous when burnt.

3. Comm.: The following are the chief kinds of coal and associated carbonaceous substances used in trade and manufactures:—

(1) Highly bituminous (Gas-coals): Albertite, produced (like rock-oil, &c.) from coal by natural causes; Dysodil or Tasmanite, and "Better-bed" coal, made up of spores; Cannel, Parrot coal, Boghead coal, Torbanite—vegetable matter much altered.

(2) Common bituminous (Household coals): Caking, Coking, Cherry, Splint, and other coals—layers of charcoal ("mother-coal") and hydrocarbon.

(3) Semi-bituminous (Free-burning Steam-coals): (a) Charcoal, abundant in original formation; (b) Hydrogen and carbon partially lost by chemical changes.

(4) Anthracite (Steam-coal, &c.): Hydrocarbon nearly all lost by change.

(5) Anthracite: All the hydrocarbon lost by pressure, &c.

(6) Coals: (a) Natural, and (b) Artificial—hydrocarbon lost by direct heat.

¶ Enormous beds of coal exist in the United States, principally of the bituminous variety, though this country possesses what are probably the largest deposits of anthracite in the world. The entire area of these coal beds is about 200,000 square miles, being 83 times as great as those of the British Islands. The quantity of coal mined in the United States is small in proportion to the size of the beds, but is annually increasing.

A mass of coal when broken splits in three directions: (1) Along the planes of bedding, commonly presenting dull black surfaces which soil the fingers; (2) Vertically across the stratification; the broken surfaces are bright and smooth, and do not soil the fingers; the direction along which these joints run is known as the "face" of the coal. (3) A third set of planes at right angles to both of the other sets, and less perfect, so that the fracture here is more irregular; this direction is called the "end" of the coal. Thus it yields blocks more or less regular in shape, and roughly resembling cubes or dice. (Huxley: Physiography, ch. xiv., p. 238, 3rd. ed.)

B. As adj.: Consisting of, or in any way pertaining or relating to coal. (See the compounds.)

¶ Compounds of obvious signification: Coal-barge, coal-fire, coal-mine, coal-sack, coal-shed.

coal-backer, s. A man employed to carry coals from a ship to the wagons. (Mayhew.)

coal-basket, s. A basket or scuttle for carrying coals.

coal-basin, s.

Geol.: A basin-shaped depression with coal-beds deposited in it. It has been almost always produced by subsidences of the strata previous to the deposition of the coal.

coal-bed, s.

Geol.: A bed of coal.

coal-black, \* cole-blacke, \* cole-blak, a.

1. Ord. Lang.: As black as coal; jet-black. "He hadde a bere's skin cole-black for old."

Chaucer: C. T., 2, 144.

2. Bot.: Black a little verging upon blue.

coal-boring bit, s. A bit with an entering point and a series of cutting edges of steps of increasing radius. (Knight.)

coal-box, s. A box for carrying coals to the fire; a coal-scuttle.

coal-brand, s. A name for smut in wheat.

coal-brass, s.

Mining: A popular name given to the iron pyrites found in the coal-measures. It contains no brass, but only sulphur and iron. [IRON PYRITES.]

coal-breaker, s. A machine for crushing lump-coal as taken from the mine. Also a building in which coal is broken, sorted and cleaned, usually situated at the mouth of a mine.

coal-breaking, s. & a. (See the compound term.)

¶ Coal-breaking jack:

Mining: A jack or wooden wedge used for breaking down coal. Jacks are inserted in a small recess in the seam, a few feet of tubing are used to connect this with an adjacent pump, and great pressure being obtained by means of a lever, the coal is brought down in quantities. (Knight.)

coal-bunker, s.

Naut.: The closed room around the boiler and engine-room of a steam vessel for keeping the fuel. (Knight.)

coal-car, s. A freight-car designed specially for coal; a coal-truck or coal-wagon.

coal-cart, s. A cart used in conveying coals.

coal-chute, s. A spout by which coal in bunkers or elevated boxes is loaded into carts or cars. (Knight.)

coal-crimp, s. A factor or middleman who sells ship-loads of coals on commission to wholesale dealers.

coal-cutting, s. & a. (See the compound term.)

Coal-cutting machine: A machine for undercutting coal seams in the mine or at the bank.

coal-drop, s. A broad, shallow inclined trough, down which coals are discharged into the hold of a vessel. (Ogilvie.)

coal-dumping, s. The act of loading coal or other vessels from a cart. The cart is made to descend by a rail so as to enter the vessel, when it is of course easy to discharge its contents into the hold. (Knight.)

coal-dust, s. Small fine coal, the siftings of coal.

"It has been attempted . . . to make the coal-dust into bricks which can bear carriage." —Ansted: Short Trip in Hungary and Transylvania, p. 124.

coal-eyed, a. Black-eyed.

coal-field, s.

1. Ord. Lang.: A bed of coal.

2. Ord. Lang. & Geol.: A district where coal abounds, or which is worked for coal: a number of coal mines worked.

coal-fish, s.

Ichthy.: Gadus carbonarius, a native of the Baltic, Northern, and Mediterranean Seas. It is a coarse fish, deriving its name from the dusky pigment which tinges the skin, and which soils the fingers like moist coals. (Baird.)

"The coal-fish is most decidedly a northern fish, but being a hardy species is not without a considerable range to the southward. It was the only fish found by Lord Muirgrave on the shores of Spitzbergen. . . . This fish has more provincial names than any other species, some of which only refer to it when of a peculiar size. Among the Scotch islands the coal-fish is called sillock, piltock, cooth or kuth, harbin, cudden, sethe, sey, and grey-lord. In Edinburgh and about the Forth, the young are called polleya; at Newcastle the fry are called coaites (foetids), and when twelve inches long podlers." —Farrall: British Fishes.

coal-fitter, s. A middleman who acts as agent in the sale of coal between the owner of a pit and the shipper.

coal-formation, s.

1. Geol.: The same as the CARBONIFEROUS FORMATION (q.v.).

bel, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tions, sions, -cions = shüs. -ble, -dle, &c. = bel, del.

2. The same as the COAL-MEASURES.

**coal-gas, s.** A mixture of gases produced by the destructive distillation of coal at regulated temperatures. It is used in lighting streets, houses, &c., and for cooking and heating purposes. Coal-gas is colourless, and has a disagreeable smell. It is purified from H<sub>2</sub>S by ferric hydrate, which is moistened with FeSO<sub>4</sub> and H<sub>2</sub>SO<sub>4</sub> to remove ammonia. The carbon disulphide can be removed by passing it through an iron tube filled with iron turnings and heated to redness. Coal-gas consists of a mixture of hydrogen, 40 to 50 per cent., carbon-monoxide about 5 per cent., marsh gas (CH<sub>4</sub>) about 40 per cent., which contribute nothing to the illuminating power of the gas; it depends upon the presence of heavy hydro-carbons, principally C<sub>2</sub>H<sub>4</sub> ethene, ordinary gas containing about 4 per cent., and candle gas about 8 per cent. Coal-gas also contains small quantities of acetylene, butylene, &c., and aromatic hydro-carbons, as benzene, &c. The percentage of nitrogen is very variable, and the CO<sub>2</sub> is nearly all removed from gas made in England. When gas is burnt a large quantity of water is formed, hence, if a gas stove is used to dry a room, there must be sufficient ventilation to carry off the aqueous vapour. The sulphur in coal-gas is converted into sulphuric acid when burnt, which greatly damages books, furniture, &c. The escape of coal-gas from pipes into the soil is very injurious to the roots of trees and shrubs. The admixture of a very small quantity of air greatly impairs the illuminating power of coal-gas. Three causes are capable of decreasing the luminosity of flames, viz.: (1) withdrawal of heat; (2) dilution; and (3) oxidation of luminous material. (See FLAME, *Watts: Dict. Chem.*, 3rd Suppt., p. 737.)

**coal-gum, s.** The dust of coal. (*Scotch.*)

**coal-head, s.**

*Ornith.*: The Cole-tit, or Cole-titmouse, *Parus ater*; also called Coal-mouse (q.v.).

**coal-heaver, s.** A porter employed to carry coal, and especially to discharge it from ships.

"I went to the Jerusalem Coffee House . . . I there saw my captain, who looked as much like a captain as he did like a coal-heaver."—*Theodore Hook: Gilbert Gurney.*

**coal-heugh, s.** A coal-pit. (*Scotch.*)

† **coal-hod, s.** A scuttie to hold coals. (*Nuttall.*)

**coal-hole, s.** A hole or cellar where coals and cinders are placed.

" . . . the types were hung into the coal-hole, and covered with cinders."—*Macanulty: Hist. Eng.*, ch. xvi.

**coal-hood, coally-hood, coal-hoodle, s.**

*Ornithology*:

1. A name given to the Bullfinch, *Pyrrhula vulgaris*, from his coal-black hood or cap.

2. The Black-headed Bunting, *Emberiza schenidius*.

**coal-house, s.** A house in which coals are stored.

"Bonner's conscience made his palace a coal-house, and a dungeon."—*Junius: Sin Stigmatized*, p. 512.

**coal-master, s.** A collier.

**coal-man, s.** The proprietor of a colliery; a coal-owner.

**coal-measure, s.**

1. *Ord. Lang. (Sing.)*: The measure used in ascertaining the quantity of coal.

2. *Geol. (Pl.)*: Strata of coal with the attendant rocks. If the great Carboniferous formation be separated into three divisions, these, in the descending order, are (1) the Coal-measures, (2) the Millstone-grit, and (3) the Mountain or Carboniferous Limestone. If by the omission of the Millstone-grit they be reduced to two, then the Coal-measures constitute, with the Mountain Limestone already mentioned, the whole Carboniferous formation. In the United States the Coal Measures attain an unusual development, equalled nowhere else in the world. The strata here are divided into two groups. One of these, the Lower or Sub-Carboniferous, corresponds to the Carboniferous limestone of England. The upper groups, comprising the Carboniferous proper, includes the Millstone-grit and the Coal Measures. According to Professor Dana, the coal-bearing area of North America is approximately as follows:

	Sq. miles.
Rhode Island area . . . . .	500
Alleghany area . . . . .	59,000
Michigan area . . . . .	8,700
Illinois, Indiana, West Kentucky . . . . .	47,000
Missouri, Iowa, Kansas, Arkansas, Texas, . . . . .	78,000
Nova Scotia and New Brunswick' . . . . .	16,000
Total . . . . .	209,200

This table does not include the coal fields of the Rocky Mountains and Pacific States, nor those of Vancouver Island, which would add considerably to the sum total. It is worthy of note that Coal Measures have been detected in the Arctic regions, in several localities. The Coal Measures are largely developed in several parts of Europe, in China, and elsewhere. They are large and rich in England, in comparison with the area of the island, and to the coal produced from them is due much of the prosperity of that kingdom. The measures there comprise fresh water beds, including the Upper and the Middle Coal Measures, and Marine Beds, the Gannister Beds or Lower Coal Measures.

"The black shales of the coal-measures are here distilled for various mineral oils and paraffin."—*Auster Short Trip in Hungary and Transylvania*, p. 158.

**coal-merchant, s.** One who trades in coal.

**coal-meter, s.** An official appointed to measure coal.

**coal-miner, s.** One who works in a coal-mine; a collier.

**coal-mining, a. & s.**

**A. As adj.:** Adapted for or occupied in mining.

**B. As subst.:** The act or process of mining for coals.

*Mining:* Coal-beds usually lie at a slight slope, and, when reached from the surface by shafts, are dug out together with sufficient of the upper and under strata to allow of vertical room for the miner. At the foot of the pit long galleries (boards) are cut to the extent of the property, then cross galleries (narrowes), marking out square spaces or districts (panels). These are dug away, and the coal picked out and removed; the solid intervals, gradually reduced to walls and pillars, are ultimately removed, wooden props supporting the roof until it is allowed to fall in. This is called the "pillar and stall," or "board and pillar" working, and was invented by Mr. Buddle in the beginning of this century. Formerly the coal was removed from the sides of intersecting galleries at the beginning of the mine, or the "rise end" of the seam; and great pillars were left behind comprising nearly sixty per cent. of the coal. Sometimes the hewing is begun at the "rise end" of the "winning," in a gallery all along the edge or face of the coal-seam, which is then cut gradually away, and the roof of the hollow behind is partly supported by stones and timber for roadways, and partly allowed to fall in. This is the "long-way," or "long-wall" plan. The methods and terms vary in different coal-fields. Ventilation is secured by a second shaft (engine-pit or upcast-pit), and by longitudinal divisions (brattices), making double currents, in shafts and galleries; by stoppings and trapdoors regulating the direction of the draught, and by other appliances. Mines are termed "fiery" when carburated-hydrogen gas issues from the coal. This is frequently continuous; sometimes, when reservoirs are opened, sudden, and then, if the miner has a naked light instead of a Davy or safety lamp, the usual accidents take place.

**coal-mouse, colemouse, s.**

*Ornith.*: A small species of titmouse, with a black head: the Cole-tit (*Parus ater*).

**coal-naphtha, s.** An oily liquid obtained by the distillation of coal-tar. It is sold as benzole (q.v.). It is purified by agitating with caustic soda to extract the phenol and cresols; then rectified, by which it is separated into a heavy oil containing much naphthalene, and a liquid which is purified by agitation with sulphuric acid and redistilled. By fractional distillation it yields first a mixture of benzene and carbon disulphide, and olefines, &c., at 80° chiefly bensene

C<sub>6</sub>H<sub>6</sub>, about 113° toluene, at 142° xylene, and at 170° impure cumene.

**coal-oil, s.** The usual name in this country for PETROLEUM.

\* **coal-pan, \*cole-panne, s.** A brazier or pan for charcoal.

**coal-passer, s.** One who passes on or supplies coal to the furnace of a steam-engine.

**coal-pipe, s.**

1. The carbonized bark of a fossil plant.

2. *Mining*:

(1) The cylindrical cast of a tree formed of solid sandstone, its mass increasing gradually towards the base, and with no branches left to support it in its position. When cohesion of the external layer, which alone holds it up, is overcome by the force of gravity, the "coal-pipe" falls perpendicularly or obliquely, often crushing unhappy miners at work below. (*Lyell.*)

"These fossil stumps are not uncommon in the roofs of the coal-seams. In some places they are known to the miners as 'coal-pipes.'"—*Dawson: Earth and Man*, 1873, ch. vi., p. 141.

(2) A very thin seam of coal.

**coal-pit, s.**

1. A coal-mine; a pit sunk in the earth for the purpose of digging out coals. (COAL-MINING.)

"A least of the polypody kind, found in the sinking of a coal-pit."—*Woodward.*

2. A place where charcoal is made. (*American.*) (*Webster.*)

**coal-plants, s.pl.**

*Geol.*: Plants, the remains of which are found in the strata of the coal-formation, and from the stems, leaves, roots, &c., of which coal itself has been produced. Brongniart has figured upwards of 300 species. They are often in a state of high preservation, exhibiting the most delicate nervures of the leaves, and cortical markings of the stems. (*Crutzg. &c.*)

† Of the most common coal plant-remains, *Stigmaria* was conjectured by Prof. Brongniart and Sir William Logan to have a relation to *Sigillaria*, and Mr. Binney proved it to be the roots of that plant by finding the two in actual continuity. (*Q. J. Geol. Soc. II.* (1846), pt. ii., p. 370—373.) Mr. Richard Brown, of Nova

COAL-PLANTS.

Scotia, also saw a probable *Sigillaria* with *Stigmaria* roots. (*Ibid.*, 393—6.) What *Sigillaria* itself is has been a matter of dispute. Brongniart, Göppert, and Unger consider it as probably a cycad. Sir J. Dawson, of Montreal, thinks that this may be its affinity, or that it may be a connecting link between the *Gymnosperms* and the higher *Acrogens*. (*Q. J. Geol. Soc.*, XV. (1859), pt. i., p. 76.) Mr. Carruthers, F.R.S., &c., of the British Museum (Natural History), considers it one of the *Lycopodiaceae*, and consequently an *Acrogen*. He places *Calamites* under the *Equisetaceae*, and thinks that *Asterophyllites*, *Annularis*, and *Sphenophyllum* are the leaves of three species. Akin to it is the genus *Volkmania*. It is generally agreed that *Lepidodendron* should be placed under the *Lycopodiaceae*. Among the plants of undisputed affinity are ferns of various genera: *Sphenopteris*, *Pecopteris*, *Neuropteris*, *Cyclopteris*, &c., but with the fructification as a rule destroyed. There are also genuine Conifers in the Coal-measures which probably grew upon the hills whilst the plants previously described had their habitat on the plains. (*Carruthers: Lect. before the*

Royal Institution, on April 16, 1869. Q. J. Geol. Soc. XXV. (1869), pt. 1, pp. 248-253.)

coal-rake, \*cole-rake, \*colrake, s. An instrument used for raking out the ashes of a furnace.

Coal-screw, s. A sifter for coal. (Knight.)

coal-scuttle, s. A box or utensil for holding coals for present use.

Coal-scuttle bonnet: A bonnet so called from its resembling a coal-scuttle in shape.

Coal-shaft, s. The shaft forming the entrance to a coal-mine. [SHAFT.]

coal-ship, s. A ship employed in carrying coal; a collier.

Coal-slack, s. Dust or grims of coal; fine coal.

coal-smut, s. The same as COAL-SLACK (q.v.).

coal-stalk, s.

1. A name given to the vegetable impressions found on stones in coal-mines. (Scott.)

2. Extended, in its application, to the effects of recent vegetation.

coal-stone, s. Anthracite (q.v.).

Coal-tar, s. Tar produced in the destructive distillation of bituminous coal. It is a thick, sticky, dark-coloured substance, and is used in the manufacture of printer's ink, for asphalt pavements, coating ships, &c.

Coal-tar naphtalene, s. Dyes prepared from aniline (q.v.), naphthalene, phenol (q.v.), and other compounds contained in coal-tar.

Coal-tit, s.

Ornith.: A species of titmouse (Parus ater), also called coal-head and coal-mouse (q.v.).

coal-tongs, s.pl. A pair of tongs for grasping coal in lumps.

coal-trimmer, s. One who is employed to trim and stow the coal for the fires of marine steam-engines.

coal-under-candlestick, s. A Christmas game mentioned in the "Declaration of Popish Impostures," 1603. (Nares.)

coal-viewer, s. An overseer or superintendent of a coal-mine.

coal-washer, s. A machine in which coal which has been broken and assorted is finally washed. (Knight.)

coal-hipper, s. One who raises coal out of the hold of a ship.

Coal-working, s. A place where coal is worked; a coal-mine, a colliery.

\* At last we reached the coal-workings. -Ansted: Short Trip in Holland and Transylvania, p. 134.

coal-works, s. A colliery, with the necessary machinery appertaining to it.

Coal-yard, s. An enclosure set apart for the deposit of coal.

coal, v.t. & t. [COAL, s.]

A. Transitive:

\* 1. To burn, char, or reduce to charcoal.

\* 2. To supply with coal.

\* 3. To write, mark, or delineate with charcoal.

B. Intransitive:

\* 1. To burn, char, or reduce to charcoal.

\* 2. To supply with coal.

\* 3. To write, mark, or delineate with charcoal.

co-a-lés'ce, v.t. & t. [Lat. coalesco = to grow together, to coalesce, to unite: co = con; alesco (incept. of alo) = to nourish.]

A. Intransitive:

I. Lit.: To grow together; to unite in masses or groups spontaneously.

II. Figuratively:

1. To combine, to join, to agree.

2. To join a party, to become one of a party.

3. To unite in society in a more general sense; to become incorporated with.

B. Trans.: To cause to unite or join.

\* 1. To combine, to join, to agree.

\* 2. To join a party, to become one of a party.

\* 3. To unite in society in a more general sense; to become incorporated with.

\* 4. To cause to unite or join.

co-a-lés'ced, pa. par. or a. [COALESCE, v.]

co-a-lés'cence, s. [Lat. coalescens, pr. par. of coalesco = to coalesce, to unite.] The act or process of coalescing or combining; union, concretion, combination.

co-a-lés'cent, a. & s. [Lat. coalescens, pr. par. of coalesco = to coalesce, to unite.]

A. As adj.: Growing together, uniting, combining, coalescing.

B. As subst.: One who or that which coalesces.

co-a-lés'cing, pr. par., a., & s. [COALESCE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of combining or growing together; coalescence.

co-al-í-er, \* coáll'í-er, s. [COLLIER.]

co-al-íng, pr. par., a., & s. [COAL, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. The act of supplying or providing with coals.

2. The act of taking in a supply of coals.

coalse, v.t. [COALESCE.]

\* 1. To unite, to coalesce.

\* 2. To unite, to coalesce.

co-al-í-ite, v.t. & t. [Lat. coalitum, sup. of coalesco = to coalesce, to unite.]

A. Intrans.: To unite, to coalesce.

B. Trans.: To unite, to coalesce.

co-al-í-tion, s. [Fr. coalition; Low Lat. coalitio, from coalitum, sup. of coalesco = to coalesce, to unite.]

1. Ord. Lang.: A union or coalescing of separate bodies into one body or mass.

2. Polit.: A combination for temporary purposes of persons, parties, or states having different interests.

3. The administration of the Duke of Portland, which commenced on April 2, 1783, and that of the Earl of Aberdeen, which began in December, 1852, were coalition Ministries.

4. The only effect of a coalition between them must have been that of one of them would have become the tool of the other. -Macaulay: Hist. Eng., ch. xiii.

co-al-í-tion-ér, s. [Eng. coalition; -er.] The same as coalitionist (q.v.). (Byron.)

co-al-í-tion-íst, s. [Eng. coalition; -ist.] One who promotes or joins a coalition.

co-al-í-ess, a. [Eng. coal; -less.] Wanting or destitute of coal.

co-al-í-éd, pa. par. or a. [COALLY, v.]

co-al-í-ly, v.t. [Pref. co = con, and Eng. ally, v. (q.v.).] To join or associate together.

\* 1. To join or associate together.

\* 2. To join or associate together.

\* 3. To join or associate together.

\* 4. To join or associate together.

co-al-í-ly, s. [Pref. co = con; ally, a. (q.v.).] An ally, a co-operator, an assistant.

co-al-séy, s. [Eng. coal, and Sc. sey = coal-fish. (Jamieson.)] The coal-fish (q.v.). In some places the name is restricted to the fry.

co-al-ý, a. [Eng. coal; -y.]

1. Of or pertaining to coal, of the nature of or resembling coal.

2. Fall of or discoloured by coal; black.

co-am-í-ng, s. pl. [COMINGS.]

Naut.: Certain raised work, rather higher than the decks, about the edges of the hatch- openings of a ship, to prevent the water on deck from running down. (Smyth.)

\* 1. To appear at the same time with.

\* 2. To appear at the same time with.

\* 3. To appear at the same time with.

\* 4. To appear at the same time with.

co-áp-pré-hénd, v.t. [Pref. co = con, and Eng. apprehend (q.v.).] To apprehend with another, to comprehend.

co-áp-t, v.t. [Lat. coapt = to fit.] To adapt, to make fit or suitable.

boil, boy, pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. -íng -cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -sious, -cious = shüs. -ble, -die, &c. = bel, del

• **cō-āp-tā-tion**, s. [Lat. *coaptatio*, from *coapto* = to fit or join together; from *co* = *con*, and *apto* = to adapt, to fit; *apto* = fit.]

1. *Ord. Lang.*: The adaptation or adjustment of parts to each other.

"The same method makes both prose and verse beautiful which consists in the judicious coaptation and ranging of the words."—*Broomer*.

2. *Anat.*: A form of angular movement, in which, as in the movement of the patella on the femur, the articular surface of one bone travels over that of another so as to bring different parts of the surface successively into contact in the manner of a wheel rolling on the ground, this movement being usually accompanied by a certain amount of gliding. (*Quain*.)

• **cō-āp-tā-tōr**, s. [Lat.]

*Surgery*: An apparatus for fitting together the ends of a fractured bone, and holding them in position while the bony junction is proceeding. (*Knight*.)

• **cō-arc-tō**, v.t. [Lat. *coarcto*; from *co* = *con*, and *arcto* = to draw or press close together; from *arctus* = narrow, strait; *arcto* = to shut up, to enclose.]

1. To confine, to enclose in a narrow compass; to contract, to restrain.

2. To constrain, to restrain, to confine.

"If a man coarcted himself to the extremity of an act, he must blame and impute it to himself, that he has thus coarcted or straitened himself so far."—*Aylife*.

• **cō-arc-tā-tō**, v.t. [COARCTATE, a.] The same as COARCT (q.v.).

"They coarctate the breast, and astringe the belly."—*Fenner: Via Recta ad Vitam Longam*, p. 132.

• **cō-arc-tā-tē**, • **cō-arc-tā-tēd**, a. [Lat. *coarctatus*, pa. pr. of *coarcto*.] [COARCT.]

I. *Ord. Lang.*: Pressed together; straitened, confined, shut in.

II. *Technically*:

1. *Bot.*: Contracted, drawn closely together.

2. *Entom.*: Compressed; greatly attenuated, especially at or towards the base.

*Coarctate Metamorphosis*:

*Entom.*: Such metamorphosis as occurs in the Diptera, in which the larva sheds its last skin before the growing legs and wings have impressed their forma upon it, and the exuvium constitutes an egg-shaped horny case, upon which there is not the least indication of the parts of the perfect insect. (*Owen*.)

• **cō-arc-tā-tion**, s. [Lat. *coarctatio*, from *coarcto* = to restrain, to confine: *co* = *con*, and *arcto* = narrow, strait; *arcto* = to restrain.]

I. *Literally*:

1. The act of confining, contracting, or restraining within a narrow space.

2. The state or condition of being confined or restrained.

3. The act of contracting, straitening, or narrowing; that which contracts, straitens, or narrows.

II. *Fig.*: A restraint or restriction of liberty.

"Election is opposed not only to coaction, but also to coarctation, or determination to one."—*Bramhall*.

• **cō-arc-tēd**, pa. par. or a. [COARCT.]

• **cō-arc-tūre**, s. [From Lat. *coarcto* = to press together.] The neck of a plant. (*Treas. of Bot.*)

• **cōarse**, • **course**, • **cōurse**, a. [Etymology doubtful. Probably it is a contraction for *in course* = in an ordinary manner; hence—ordinary, common.] [COURSE.]

I. *Literally*:

1. Unrefined, impure, containing impurities or baser parts.

"I feel Of what coarse metal ye are moulded."—*Shakesp.: Henry VIII*, III. 1.

2. Large in size or texture; composed of large or rough particles; not fine or soft.

"The cloth is to be considered wool, the matter of it, whether it be coarse or fine."—*Scott: Essay on Drapery*, p. 5. (1854.)

II. *Figuratively*:

I. *Of persons*:

(1) Rude, rough, uncivil, unpolished in manners.

"Oh why were farmers made so coarse, Or clergy made so fine?"—*Cooper: The Yearly Distress*.

(2) Inexpert, inexperienced; uninstructed in art or learning.

"Practical rules may be useful to such as are remote from advice, and to coarse practitioners, which they are obliged to make use of."—*Arbutnot*.

2. *Of language, manners, &c.*: Gross, inelegant, rude, unpolished, unfinished.

"... the libels on William's person and government were decidedly less coarse and raucous during the latter half of his reign than during the earlier half."—*Macaulay: Hist. Eng.*, ch. XXI.

3. *Of things generally*:

(1) Gross, rough, unrefined.

"'Tis not the coarser eye of human law That blinds their peace."—*Thomson: Spring*.

(2) Mean, disagreeable; not delicate.

"From this coarse mixture of terrestrial parts, Desire and fear by turns possess their hearts."—*Dryden: Virgil's Æneid*.

¶ (1) Crabb thus distinguishes between *coarse*, *rough*, and *rude*: "These epithets are equally applied to what is not polished by art. In the proper sense *coarse* refers to the composition and materials of bodies, as *coarse* bread, *coarse* meat, *coarse* cloth; *rough* respects the surface of bodies, as *rough* wood and *rough* skin; *rude* respects the make or fashion of things, as a *rude* bark, a *rude* utensil. *Coarse* is opposed to fine, *rough* to smooth, *rude* to polished. In the figurative application they are distinguished in a similar manner: *coarse* language is used by persons of naturally *coarse* feeling; *rough* language by those whose tempers are naturally or occasionally *rough*; *rude* language by those who are ignorant of any better." (*Crabb: Eng. Synon.*)

(2) For the difference between *coarse* and *gross*, see GROSS.

**coarse-grained**, a.

1. *Lit.*: Having a coarse grain, as wood.

2. *Fig.*: Wanting in refinement, rude; coarse in disposition.

**coarse-haired**, a. Having coarse hair.

"... long-haired and coarse-haired animals are apt to have, as is asserted, long or many horns."—*Darwin: Origin of Species* (ed. 1859), ch. I, p. 12.

**coarse-metal**, s.

*Metal*: A brittle non-crystalline, more or less granular vesicular bronze-colored regulus, which contains about 33 per cent. of metallic copper. It is obtained by fusing the calcined copper pyrites with slag. Compos.: Copper, 33.7; iron, 33.6; nickel, cobalt, and manganese, 1.0; tin, 0.7; arsenic, 0.3; sulphur, 29.2; and slag mechanically mixed, 1.1.

**coarse-stuff**, s.

*Plastering*: The first coat of inside plaster-work. (*Knight*.)

**coarse-ly**, adv. [Eng. *coarse*; -ly.]

1. *Lit.*: In a coarse manner; not finely or delicately.

2. *Fig.*: Roughly, rudely, inelegantly, without refinement or delicacy, grossly.

"There is a gentleman, that serves the count, Reports but coarsely of her."—*Shakesp.: All's Well*, III. 4.

**coarse-mind-ēd**, a. [Eng. *coarse*, and *mind-ēd*.] Having a coarse, low, unrefined mind.

"... coarseminded and ignorant men..."—*Macaulay: Hist. Eng.*, ch. XVI.

† **cōars-en**, v.t. [Eng. *coarse*, and verbal suff. -en (q.v.).] To make coarse or wanting in delicacy or refinement. (*Graham*.)

† **cōars-ened**, pa. par. or a. [COARSEN, v.]

**cōarse-nēss**, s. [Eng. *coarse*; -ness.]

I. *Lit.*: The state or quality of being coarse or unrefined; impurity, baseness.

"First know the materials whereof the glass is made; then consider what the reason is of the coarseness or clearness."—*Bacon: Essays*.

II. *Figuratively*:

1. Roughness, rudeness, indelicacy of manners.

"Already there appears a poverty of conception, a coarseness and vulgarity to all the proceedings of the assembly, and of all their instructors."—*Sarke: French Revolution*.

2. Grossness, indelicacy of language; want of refinement or polish.

"Friends, pardon the coarseness of the illustration as dogs to couples, should be of the same size."—*L'Estrange*.

3. Roughness, meanness of dress or food.

• **cō-ar-tic-u-lā-tion**, s. [Pref. *co* = *con*, and articulation (q.v.).]

*Anat.*: The uniting or articulation of bones to form a joint.

• **cō-ās-sēs-sōr**, s. [Pref. *co* = *con*, and Eng. *assessor* (q.v.).] A joint assessor.

† **cō-as-sūme**, v.t. [Pref. *co* = *con*, and Eng. *assume* (q.v.).] To assume at the same time, jointly or together with others.

"Was it not enough to assume our nature, and the properties belonging to that nature, and the actions arising from those properties, but thou must coassume the weakness of nature, of properties, of actions?"—*Walsall: Life and Death of Christ* (1616), B. 2. h.

**coast** (1), • **coist**, • **coast**, • **coste**, • **coost**, s. [O. Fr. *coaste*; Fr. *côte* = a rib, a shore; Lat. *costa* = s rib, a side.]

\* I. A side.

(a) *Of a person*: "Alle the cost of the knyghte he kerys doune eene."—*Ansur of Arthur*, ed. 47.

(b) *Of a thing or place*: "At the coast frothe of the tabernacle that holdeth to the north."—*Wycliffe: Ecod.* xxxv. 25.

\* 2. Applied more loosely to the trunk of the body.

† 3. A rib of meat.

"Take coast of lamb and parboil it."—*True Gentlewomen's Delight* (1674). (*Agnes*.)

\* 4. The frontier, limit, or border of a country.

"... the goings out of that coast were at the sea; this shall be your south coast."—*Josh.* xv. 4.

"Til that the see the londe coste."—*Gower*, III. 294.

5. That part of the border or limit of a country which is washed by the sea; the shore.

"v] dayes rydythe he by the cost of the feyer see."—*Torrens of Port*, 121.

\* 6. A district, a country, a region.

"Faste they passede ower all the weys, they knew ful wel the cost."—*Sir Ferumbas*, 1652.

"The Jews... raised persecution against Paul and Barnabas, and expelled them out of their coasts."—*Acts* xiii. 50.

¶ *The coast is clear*: The road is free, the danger is over.

¶ Compounds of obvious signification: *Coast-fishing*, *coast-line*, *coast-man*, *coast-navigation*.

**coast-action**, s. The action or influence of the sea on the coasts.

"... the beds which were then accumulated will have been destroyed by being upraised and brought within the limits of the coast-action."—*Darwin: Origin of Species* (ed. 1859), ch. IX, p. 292.

C. *As substantive:*

- I. *Ordinary Language:*

**1. Literally:**  
 (1) The act of covering or dressing with a coat.  
 (2) Material or cloth of which coats are made.  
**2. Figuratively:**  
 (1) The act or process of covering with a coat or layer, as of paint, plaster, &c.  
 (2) A coat or layer of any substance covering another; an integument or covering.  
 "Here the coating is of a rich brown instead of a black colour, and seems to be composed of ferruginous matter alone."—*Darwin: Voyage Round the World* (ed. 1870), ch. 1, p. 13.  
**II. Chem.:** The operation of covering retorts and similar vessels with a clayey substance, so as to make them better able to bear an intense heat.

**coat-less, a.** [Eng. coat; -less.] Without or destitute of a coat.

"Coatless, shoeless and ragged."—*Kingsley: Alton Locke*, ch. xxi.

**co-at-test, v. t.** [Pref. co = con, and attest (q.v.).] To attest in conjunction with another.

**co-at-tés-tá-tion, s.** [Pref. co = con, and attestation (q.v.).] A joint attestation or bearing witness.

**co-ang-mén-tá-tion, s.** [Pref. co = con, and augmentation (q.v.).] An augmentation, an increase, an addition.

**co-ang-mén-téd, a.** [Pref. co = con, and augmented (q.v.).] Increased, augmented.  
 "Virtns occupantem thives."  
*Chapman: Homer's Iliad*, xiii.

**coax, °cokes, v. t. & t.** [Etym. doubtful. Wedgwood says the old English *cokes* was a simpleton, a gull, probably from the French *coasse*, one who says or does laughable or ridiculous things. To *cokes* or *coax* one then is to make a *cokes* or fool of him, to wheedle or gull him into doing something.]

**A. Trans.:** To wheedle or cajole; to persuade to any action by means of wheedling or flattery.

"The nurse had changed her note; she was muzzling and coaxing the child; that's a good dear, says she."—*L'Estrange*

**B. Intrans.:** To wheedle or cajole.

"I coax / I wheedle / I'm above it."  
*Farruker: Recruiting Officer.*

Crabb thus distinguishes between to *coax*, to *wheedle*, to *cajole* and to *favour*: "The idea of using mean arts to turn people to one's selfish purposes is common to all these terms: *coax* has something childish in it; *wheedle* and *cajole* that which is knavish; *favour* that which is servile. The act of *coaxing* consists of urgent entreaty and whining supplication; the act of *wheedling* consists of smooth and winning entreaty; *cajoling* consists mostly of tricky and stratagem, disguised under a soft address and insinuating manners; the act of *favouring* consists of suppliant grimace and antics, such as characterise the little animal from which it derives its name; children *coax* their parents in order to obtain their wishes; the greedy and covetous *wheedle* those of an easy temper; knaves *cajole* the simple and unsuspecting; parasites *favour* upon those who have the power to contribute to their gratifications." (*Crabb: Eng. Synon.*)

**coax, °cokes, s.** [COAX, v.]

**1. A dupe, a person wheedled or cajoled.**  
 "Oo! you're a brainless coax, a toy, a fop."  
*Beaum. & Flie.: Wit at Sen. Weapons.*

**2. One who coaxes, wheedles, or cajoles; a coaxer.**

† **3. An enticement.**  
 "He held out by turns coaxes and threats."—*Mary: Frank Midway*, ch. ii.

**co-ax-á-tion, s.** [Lat. *coaxatio*, from *coaxo* = to croak as a frog; Gr. *κοῦξ* (*koax*); used by Aristophanes in the "Frogs," to represent the noise or croaking of frogs.] The croaking or noise of frogs.

"The impertinent harsh, and disharmonious coaxations of frogs."—*H. More: Musk of Iniquity*, bk. 1, ch. vi., § 3. (French: *On some Def. in our Eng. Dick.*, pp. 4, 7.)

**coaxed, pa. par. of a.** [COAX, v.]

**coax-ér, s.** [Eng. coax; -er.] One who coaxes, wheedles, or cajoles; a coax, a flatterer, a wheedler.

"Coaxing will do it if the right coaxer can be found."  
 —*Mrs. Cantlere: The Bassett Table.*

**co-ax-í-al, † co-ax-á-l, a.** [Pref. co = con, and axial.] Having a common axis.

**co-ax-í-al-ly, adv.** [Eng. *coaxial*; -ly.] So as to have a common axis.

**coax-ing, pr. par., a., & s.** [COAX, v.]

**A. & B. As pr. par. & particip. adj.:** (See the verb).

**C. As subst.:** The act of wheedling or cajoling.

**coax-ing-ly, adv.** [Eng. *coaxing*; -ly.] In a coaxing, wheedling, or cajoling manner; by means of coaxing or flattery.

"There was a rough earnest in the request, though it was put coaxingly."—*Lamb: Letter to Barton.*

"B. Intrans.: To strike, to cut.

"Three thousand full thro thrang into batell . . .  
 And cobb'd full kantly, kaghten the fild."  
*Destruct. of Troy*, 8.282.

**cobb-se-a, s.** [Named after B. Cobo, a Spanist botanist.]

**Bot.:** A genus of plants, order Polemoniacae (Phloxworis). The species are fast-growing climbers, with tendrils. *Cobaea scandens*, the best known species, is from Mexico. It grows here in conservatories, or may be made to run up the front of a house with rough walls.

**cobb-se-á-cé-se, s. pl.** [Mod. Lat. *cobææ* (q.v.), and fem. pl. adj. suff. -*acææ*.]

**Bot.:** An order of plants founded by Don, but now merged in Polemoniacæ.

**cob-bált, s.** [Fr. *cobalt*; Ger. *kobalt*, *kobolt*, from Kobold, the demon of the German mines; M. H. Ger. *kobolt* = a demon; Low Lat. *cobalus* = a mountain sprite; Gr. *κόβαλος* (*kobalos*) = a mischievous goblin. A name given to the ore by the miners from its being so poisonous and troublesome to them. It is found in a marasite frequent in Saxony.]

**1. Chem.:** A metallic element, atomic weight 59, symbol Co. The metal was first obtained in an impure state by Brandt, in 1738. It occurs as speiss cobalt, or tin-white cobalt CoAs<sub>2</sub>, and cobalt-glance CoAs. Cobalt occurs in meteoric iron. The ore is first roasted to expel the arsenic, then dissolved in aqua regia, the excess of acid evaporated off; H<sub>2</sub>S is then passed through the solution to precipitate copper, bismuth, and the remainder of the arsenic; the filtered liquid is boiled to expel the excess of H<sub>2</sub>S, boiled with HNO<sub>3</sub> to convert the iron into a ferric salt; it is then supersaturated with ammonia, which precipitates the iron as Fe<sub>2</sub>(OH)<sub>6</sub>, and the cobalt and nickel remain in solution. Cobalt can be separated from nickel by Rose's process. The solution of the mixed oxides is dissolved in HCl; the solution is diluted with much water, and supersaturated with chlorine gas, which converts the cobaltous chloride CoCl<sub>2</sub> into cobaltic chloride CoCl<sub>3</sub>, while the nickel is unaltered; excess of barium carbonate BaCO<sub>3</sub> is then added, and left to stand for eighteen hours, when the cobaltic oxide is precipitated; the nickel remains in solution. The precipitate is dissolved in boiling HCl, and Na<sub>2</sub>CO<sub>3</sub> is added to precipitate the barium as BaSO<sub>4</sub>, and the cobalt is then precipitated as Co(OH)<sub>2</sub> by caustic soda. The metal is obtained by heating cobaltous oxalate in a covered crucible. Metallic cobalt is a hard, magnetic, ductile, reddish-grey metal, with a high melting point. Its sp. gr. is 8.9. It is not easily oxidised by the air, when pure. It is dissolved by dilute HCl or H<sub>2</sub>SO<sub>4</sub> with evolution of hydrogen. Cobalt forms two oxides: Cobaltous oxide CoO and Cobaltic oxide Co<sub>2</sub>O<sub>3</sub> (q.v.). The alloys of cobalt are unimportant. Zaffre is an impure oxide of cobalt prepared by roasting cobalt ores with twice their weight of sand. Small is prepared by fusing partially roasted cobalt ores with a mixture of powdered quartz and potassium carbonate; while hot it is poured into water and then ground to a fine powder; it is used as a pigment; this colour was known to the ancients. The cobaltous salts are the most stable in which cobalt acts as a dyad element. Cobalt compounds give a blue colour to a borax bead.

**2. Min.:** There is no native cobalt known, but many ores of the metal. *Arsenite* or *Arseniate* of Cobalt = Erythrite; *Arsenical* Cobalt = Smailite; *Black* Cobalt = Asbolite; *Bright-white* cobalt = Cobalt-glance; *Carbonate* of Cobalt = Remingtonite; *Earthy* Cobalt = Asbolite; *Grey* Cobalt = Smailite; *Red* Cobalt = Erythrite; *Sulphate* of Cobalt = Dierbrite; *Sulphuret* of Cobalt = Sypoorite, Linneite; *White* Cobalt = Smailite; *Cobalt and Lead* = Tilkeredite.

¶ **Cobalt-Ammonia compounds; Cobalt Bases:**  
*Chemistry:*

(1) Ammonia cobaltous salts are formed by the union of cobaltous salts with ammonia in excess, the air being excluded, as,  $\text{CoCl}_2 \cdot 6\text{NH}_3$ , rose-coloured crystals.

(2) Ammonia cobaltic salts are formed when an ammoniacal solution of cobalt is exposed to the air, as—Tetrammonio-cobaltic salts, as  $\text{Co}_2\text{Cl}_6 \cdot 4\text{NH}_3$ . Hexammonio-cobaltic salts, as  $\text{Co}_2\text{Cl}_6 \cdot 6\text{NH}_3$ . Oxy-octammonio-cobaltic (fusco-cobaltic) salts, as  $\text{Co}_2\text{OCl}_4 \cdot 8\text{NH}_3$ . Decammonio-cobaltic (roseo- and purpureo-cobaltic) salts, as  $\text{Co}_2\text{Cl}_6 \cdot 10\text{NH}_3$ . Dinitrodecammonio-cobaltic (xantho-cobaltic) salts,  $\text{Co}_2(\text{NO}_2)_2\text{Cl}_4 \cdot 10\text{NH}_3$ . Dodecammonio-cobaltic (inteo-cobaltic) salts,  $\text{Co}_2\text{Cl}_6 \cdot 12\text{NH}_3$ . (For preparation and properties of these compounds see *Watts's Dict. Chem., and Suppls.*)

**cobalt arsenate, s.**

*Min.*: The same as ERYTHRAINE.

**cobalt arsenide, s.**

*Min.*: The same as SMALTITE. (*Brit. Mus. Cat.*)

**cobalt-bloom, s.**

*Min.*: Acicular arsenate of copper. The same as ERYTHRAINE (*Brit. Mus. Cat.*), or ERYTHRITE (*Dana*).

**cobalt-blue, s.** Also called COBALTO-ULTRAMARINE. A fine blue pigment prepared by adding an alkaline carbonate to a solution of pure alum mixed with pure cobalt salt. The precipitate is washed and ignited. It is a compound of oxides of aluminium and cobalt. *Thénard's blue* is prepared by heating in a closed vessel freshly precipitated phosphate of cobalt, with five times its bulk of gelatinous aluminium hydrate  $\text{Al}_2(\text{HO})_6$ , and heating the mixed precipitates in a closed vessel. The presence of iron or nickel gives these pigments a greenish tint.

**cobalt-crust, s.** Earthy arsenate of copper.

**cobalt-glance, s.**

*Min.*: An isometric brittle mineral, with cubic cleavage, occurring also massive. The hardness is 5.5, the sp. gr. 6–6.3; the lustre is metallic; the colour silver-white, inclining to red, steel-grey with a violet tinge, or greyish-black, the streak being of the last-named hue. *Compos.*: Sulphur, 19.08 to 20.86; arsenic, 42.53–44.75; cobalt, 8.67–83.10; and iron, 1.63–24.99. *Dana* makes two varieties, (1) the ordinary, and (2) ferriferous. [FERROCALCITE.] It is found in Cornwall, in Sweden, Norway, &c. In the British Museum Catalogue cobalt-glance figures as the accepted name of the mineral described by *Dana* as *Cobaltite*. (*Brit. Mus. Cat. of Min.*; also *Dana: Min.*)

**cobalt-green, s.** A permanent green pigment prepared by precipitating a mixture of sulphates of cobalt and zinc, by carbonate of sodium, washing and igniting the precipitate. Also called *Rimman's green*.

**cobalt-hygrometer, s.** A hygrometer, made by dipping unsized paper into a solution of cobaltous chloride, sodium chloride, and a little gum-arabic. It is slightly hygroscopic, and will absorb the moisture from the atmosphere. It changes colour as follows:—Rose-red indicates rain; pink, very damp; bluish pink, moist; lavender, slightly damp; violet, dry; blue, very dry. It may also be used to test whether a room, &c., is damp. Artificial flowers are often dipped in the solution.

**cobalt-manganese, s.**

¶ **Cobalt-manganese spar:**

*Min.*: The same as RHODROSITE (q.v.).

**cobalt-nickel, s.**

¶ **Cobalt-nickel pyrites:**

*Min.*: The same as LINNÆITE.

**cobalt-ochre, s.**

*Min.*: The red variety is the same as ERYTHRITE; the black one as asbolite, the latter a variety of wad. (*Dana*.) The same as WAD. (*Brit. Mus. Cat.*)

**cobalt-pyrites, s.**

*Min.*: The same as LINNÆITE.

**cobalt sulphate, s.**

*Min.*: The same as BIEBERITE.

**cobalt sulphide, s.**

*Min.*: The same as COBALTO-GLANCE (q.v.).

**cobalt-ultramarine, s.** [See COBALTO-BLUE.]

**cobalt-vitriol, s.**

*Min.*: The same as BIEBERITE.

**cobalt-yellow, s.** A beautiful permanent yellow pigment prepared by gradually adding a concentrated solution of potassium nitrate  $\text{KNO}_3$  to an acid solution of cobalt nitrate. Its composition varies.

**cō-bālt-īc, a.** [From Eng., &c. *cobalt*; -īc.] Having more or less of cobalt in its composition; pertaining to cobalt.

**cobaltic oxide, s.**

*Chem.*: Cobaltic oxide, or sesquioxide of cobalt,  $\text{Co}_2\text{O}_3$ , is obtained as a black hydrate  $\text{Co}_2(\text{OH})_6$  by suspending cobaltous oxide in a solution of potassium hydrate and passing a stream of chlorine gas through the liquid. It is rendered anhydrous by a gentle heat. At higher temperatures it is converted into a black oxide  $\text{Co}_3\text{O}_4$ , which is insoluble in aqua regia. It is used as a pigment in enamel painting.

**cobaltic salts, s. pl.**

*Chem.*: Cobaltic salts are prepared by dissolving cobaltic oxide in acids. They are not important, and easily decompose. Cobalt acts as a tetrad in these compounds, the two atoms of Co being united to each other by one pair of bonds.

**cō-bālt-ī-cy-an-īde, s.** [Eng., &c. *cobalt*; -ī connective; and *cyanide*.] [COBALTOCYANOGEN.]

*Chem.*: Cobalticyanide of potassium  $\text{K}_6\text{Co}(\text{CN})_{12}$  is obtained by dissolving cobaltous cyanide  $\text{Co}(\text{CN})_2$ , in excess of potassium cyanide KCN and boiling it for some time. Cobalticyanide of potassium crystallises in anhydrous flattened yellow prisms, which are soluble in water; it is not decomposed by dilute acids. It gives precipitates with most metallic salts. Cobalticyanide of cobalt is light red; of nickel a light green-blue; of copper sky-blue; of ferrous, mercurous, manganous, silver, zinc, and stannous, white. Cobalticyanides of lead, ferric and mercuric, are soluble in water. Cobalticyanide of hydrogen, or hydrocobaltic acid  $\text{H}_2\text{Co}(\text{CN})_{12}$ , is obtained by decomposing the copper salt by  $\text{H}_2\text{S}$ . It crystallises in colourless deliquescent needles; its aqueous solution is not decomposed by boiling. No corresponding nickel compound has been formed, the double cyanide of nickel and potassium being decomposed by HCl.

**cō-bālt-ī-cy-ān-ō-gēn, s.** [Eng., &c. *cobalt*; -ī connective; and *cyanogen*.] A radical contained in cobalticyanides.

**cō-bālt-īne, s.** [Eng. *cobalt*; -īne (*Min.*).] The same as COBALTO-GLANCE (q.v.).

**cō-bālt-tite, s.** [Eng. &c. *cobalt*, and suff. -īte (*Min.*) (q.v.).]

*Min.*: *Dana's* name for a mineral, the same as COBALTO-GLANCE (q.v.); see also COBALTINE.

**cō-bālt-tō, in compos.** [Eng. &c. *cobalt*, and o connective.]

**cobalto-cyanide, s.** [COBALTO-CYANIDE OF POTASSIUM.]

*Cobalto-cyanide of potassium:*

*Chem.*:  $\text{K}_6\text{Co}(\text{CN})_{12}$ , a red, deliquescent, easily decomposed substance. It can be formed by the reduction of cobaltic cyanide of potassium. (See *Watts: Dict. Chem.*)

**cobalto-cyanogen, s.** A radical contained in cobalto-cyanides.

**cō-bālt-tōūs, s.** [Eng. *cobalt*, and suff. -ōūs.] [COBALT.]

*Chem.*: Belonging to cobalt.

**cobaltous chloride, s.**

*Chem.*:  $\text{CoCl}_2$ . Obtained as a blue anhydrous volatile substance by passing chlorine over metallic cobalt, also in solution by dissolving cobaltous oxide  $\text{CoO}$  in HCl; its solution is pink, but when concentrated it turns blue. It is used as a sympathetic ink, the writing becoming blue on the paper being

exposed to heat, and fading away on absorbing moisture from the air.

**cobaltous nitrate, s.**

*Chem.*:  $\text{Co}(\text{NO}_3)_2 \cdot 3\text{H}_2\text{O}$ . Prepared by dissolving  $\text{CoO}$  in nitric acid; a red crystalline deliquescent salt, used in blowpipe reactions.

**cobaltous oxide, s.**

*Chem.*:  $\text{CoO}$ , obtained by igniting the hydrate  $\text{Co}(\text{OH})_2$ , or the carbonate  $\text{CoCO}_3$ , out of contact with the air. It is a greenish-grey powder which, when heated in the air, takes up oxygen and is converted into a black mixed oxide  $\text{Co}_3\text{O}_4$ , which at a stronger heat gives off oxygen. It is used in preparing blue pigments for china painting.

**cobaltous salts, s. pl.**

*Chem.*: Cobaltous salts are precipitated by sulphide of ammonium as  $\text{CoS}$  (see analysis), and can be separated from other sulphides of this group, except nickel sulphide, by the insolubility of  $\text{CoS}$  in dilute HCl. Potash precipitates a blue basic salt, which turns green on exposure to the air; on heating the precipitate it is converted into the red hydrate  $\text{Co}(\text{HO})_2$ , which is insoluble in excess of RHO, but soluble in ammonia, forming a red brown solution. Small quantities of cobalt salts can be detected by adding cyanide of potassium in excess, then nitrite of potassium, and afterwards acidifying with acetic acid, an intense red cherry juice coloured liquid is formed. Cobalt salts give a blue colour to a borax bead.

**cobaltous sulphate, s.**

*Chem.*:  $\text{CoSO}_4 \cdot 7\text{H}_2\text{O}$ . Cobalt vitriol, obtained by dissolving  $\text{CoO}$  in  $\text{H}_2\text{SO}_4$ . It crystallises in red rhombic prisms isomorphous with magnesium sulphate. It forms double salts.

**cō-brā**, **cōb-ŷā cap-ēl-la**, **cōb-ŷā cap-ēl-lō**, **cō-bŷā de cap-ēl-lō**, *s.* [Port. *cobra di capello* = the Snake of the Hood, i.e., the Hooded Snake. *Capella* is wrong, that word in Portuguese meaning a chapel and not a hood.]

*Zool.* : A species of snake, the *Coluber Naja* of Linnæus, now called *Naja* or *Naja tripudians*. It belongs to the family *Viperidae*. The head has nine plates behind and is broad, the neck is very expansile, covering the head like a hood, the tail round. The colour is brown above and bluish-white beneath. When the diac is dilated the hinder part of it exhibits dark markings like a pair of spectacles reversed, or rather a pair of barnacles,

COBRA.

whence it is sometimes called the Spectacle Snake. The common name is, however, the Portuguese one, *Cobra*, *Cobra capella*, *Cobra de or di capello*, borrowed from our predecessors in India. The Hindoos call it Nag, a word which occurs in Nagpore, a city formerly the capital of the Bhoonsia dynasty of Mahrattas in Central India. It is from two to four or even six feet long, is common in India, and is so venomous that it causes the death of more people than does the tiger. Notwithstanding this, it is kept in various temples, fed with milk and sugar, and worshipped. Many cobras are killed and eaten by a small mammal, one of the *Viverridae*. *Herpestis griseus*, called in India the Mungoos

**cobra-monil**, *s.*

*Zool.* : *Dabira russellii*, from the East Indies. Called also Russell's Viper. [TICOLONOGA.]

**cobra poison**, *s.*

*Chem.* : The poison of the *Cobra de Capello* (*Naja tripudians*) may be obtained by pressing the parotid glands of the snake while its fangs are erected. It has been examined by A. Fedler and by A. W. Blyth. It is an amber-coloured, syrupy frothy liquid. Sp. gr. 1.046. It has a feeble acid reaction. The cobra poison contains albumen, a minute trace of fat, and a crystalline body called *Cobric acid* (q.v.). It dries up, on exposure to the air, to a yellow acrid pungent powder.

**cō-brēs**, *s.* [Sp.]

*Comm.* : A superior kind of indigo, prepared in South America.

**cō-bric**, *a.* [Eng. *cobr* (a); -*ic*.] Pertaining to, or derived from, the cobra.

**cobric acid**, *s.*

*Chem.* : An acid obtained by dissolving the yellow powder [COBRA POISON] in water and coagulating the albumen by alcohol, filtering, the alcohol evaporated off at a gentle heat, the liquid concentrated to a small bulk and precipitated by basic acetate of lead; the precipitate is washed, and decomposed by H<sub>2</sub>S, filtering off the lead sulphide, and evaporating. Cobric acid crystallises in needles, which are deadly poisonous; it forms about 10 per cent. of the snake poison. It forms a platinum salt, having the composition (C<sub>17</sub>H<sub>25</sub>N<sub>4</sub>O<sub>7</sub>HCl) PtCl<sub>4</sub>. The platinum salt is much less poisonous. The addition of potassium permanganate is said to destroy the physiological activity of the poison.

**cō-bri-form**, *a.* [Eng. *cobra*, and *form*.]

Resembling or connected with the cobra, having the poison-fangs grooved.

**cōb'-stōne**, *s.* [Eng. *cob*, and *stone*.] A rounded stone, a cobble or cobble-stone.

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, there; pine, pit, sīre, sir, marine; gō, pēt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unīte, cūr, rāle, fūll; try, Sŷrian. ŷe, œ = ē. cy = ā. qu = kw.

\***cōb'-swān**, s. [Eng. *cob*, and *swan*.] The head or leading swan; a male swan.

"I am not taken With a *cobswan*, or a high-mounting bull, As foolish Leda and Europa were." Ben Jonson; *Castine*, ll. l.

**cō-būrg**, **cō-bōurg**, s. [From Coburg, in Germany.]

*Fabric*: A thin material of worsted and cotton, or worsted and silk, twilled on one side, for ladies' dresses; intended as a substitute for merino. (*Ogilvie*.)

**cō-būr'-ghī'-a**, s. [Named after the Prince of Saxe-Coburg, afterwards King of the Belgians.]

*Bot.*: A genus of Amaryllidaceæ. It consists of handsome plants from South America, with scarlet, vermilion, or orange-red flowers.

**cōb'-wēb**, \***cōp'-webbe**, s. & a. [Either from *Wel. cob* = a spider, and *Eng. web*; or a shortened form of *atereop-web*, from *Mid. Eng. atereop* = a spider. (*Skeat*.)] [ATTECOFFE.]

*A. As substantive*:

*I. Lit.*: The web or net of a spider.

*II. Figuratively*:

1. Any trap or snare; especially such as may be calculated or likely to catch the inexperienced or unwary.

"I cannot but lament thy splendid wit Entangled in the cobwebs of the schools." Cooper; *The Task*, bk. iv.

2. Anything light and worthless.

3. Anything that tends to overcloud or confuse the mind, as cobwebs do the outline of a room.

\**B. As adj.*: Light, thin, flimsy, or worthless, with the implied idea of ensnaring or entrapping; deceitful.

"Break through such tender cobweb's niceties, That oft entangle these blind basking flies." More; *Philos. Poems*, p. 518

\***cobweb-lawn**, s. A kind of very fine transparent lawn.

"Item, a charm surrounding fearfully Your partie-per-pale picture one half drawn In solemn cyprus, th' other cobweb lawn." B. Jonson; *Epig.*

\***cobweb-learning**, a Light, worthless learning.

"... all other knowledge is but *cobweb-learning*." Howell; *Letters*.

**cobweb micrometer**, s. A micrometer (q.v.) in which cobweb threads are used.

**cōb'-wēbbed**, a. [Eng. *cobweb*; -*ed*.]

1. *Ord. Lang.*: Covered with or full of cobwebs.

"The *cobwebbed* cottage, with its ragged wall Of mouldering mud, is royalty to me." Young; *Night Thoughts*, l.

2. *Bot.* (applied to leaves, peduncles, &c.): Covered with a thick interwoven pubescence, consisting of thin hairs like the web of a spider; arachnoid.

†**cōb'-wēb'-bēr'-y**, s. [Eng. *cobweb*; -*ery*.] Flimsy, cobwebby argument.

"Logical *cobwebber* shrinks itself together." *Quincy*; *French Rev.*, pt. II, bk. 1, ch. 2.

†**cōb'-wēb'-bŷ**, a. [Eng. *cobweb*; -*y*.]

*I. Literally*:

1. Of the nature of or resembling a cobweb.

2. Covered with cobwebs; cobwebbed.

*II. Fig.*: Flimsy, light, or worthless.

**cōb'-wōrm**, s. [Eng. *cob*, and *worm*.] The name given by farmers to the larva of the Cockchafer (*Melolontha vulgaris*).

\***coc** (1), s. [COCK.]

\***coc** (2), s. [COCK.]

**cō'-cō**, s. [SP.]

*Bot. & Pharm.*: The dried leaf of *Erythroxylon Coca*, a shrub, 4-8 feet high, growing wild in Peru, and cultivated there on the Andes, between 2,000 and 5,000 feet high. It constitutes a stimulant which tends to enslave those who use it to a greater extent, it is said, than opium in China or strong liquor here. It is used chiefly by the Peruvian miners, who chew its leaves mixed with the ashes of *Chenopodium quinoa*. It is said to give them great power of enduring fatigue on a scanty supply of food; thirty million pounds of the dried leaves are consumed annually. The leaves contain an alkaloid Cocaine (q.v.), a variety of tannic acid, and a waxy substance called *Cocawax* C<sub>33</sub>H<sub>66</sub>O<sub>2</sub>, which melts at 79°.

**Cōc'-āgnō'** (g silent), s. [COCKAYNE.]

**cō'-cō'-īne**, s. [Sp. *coca*; and suff. -*ine*.]

*Chem.*: An alkaloid, C<sub>17</sub>H<sub>21</sub>NO<sub>4</sub>, extracted from the leaves of the coca plant by alcohol acidified with a small quantity of sulphuric acid. Cocaine, which is odourless, and has a bitter taste, crystallises in white monoclinic prisms, which melt at 92°, and are very soluble in ether, but only sparingly so in water. It is extensively used as a local anæsthetic in minor operations, especially, of the eye.

**cō'-cō'-īn-īsm**, s. [Eng. *cocaine*(s); -*ism*.]

1. The habit of using cocaine as a stimulant.

2. The morbid condition induced by such habit.

**cō'-cō'-īn-ī-sā'-tion**, s. [Eng. *cocaine*(s); -*ation*.] The act or process of subjecting to the influence of cocaine.

**cō'-cō'-īn-ī-se**, v.t. [Eng. *cocaine*(s); -*ise*.]

1. To anæsthetize by means of cocaine.

2. To subject to the influence of cocaine; to impregnate with cocaine.

**cō'-cōl-lōr'-a**, s. [Brazilian.]

*Pharm.*: One of the names for a decoction of *Croton perdicipes*, used in Brazil as a cure for syphilis, and as a diuretic.

†**cōc'-a-lōn**, s. [Gr. *κόκκαλος* (*kokkalos*) = a kernel.]

*Entom.*: A large cocoon of a weak character. (*Ogilvie*.)

\***cōc'-a-trīge**, \***cōc'-a-trŷse**, s. [COCKATRICE.]

**cōc'-cōl'-ang**, s. pl. [Named from John Cocceus, or Coeken, who was born at Bremen, on August 9, 1603, and died, Professor of Divinity at Leyden, in 1665.]

*Ch. Hist.*: The followers of John Cocceus [etym.] He believed that the whole Old Testament history mirrored forth the history of our Saviour and of His Church. It was said that Cocceus finds Christ everywhere and Grotius nowhere in the Old Testament. The statement about Cocceus was correct: that regarding Grotius was not so. The followers of Cocceus were for a considerable time numerous and influential. (*Mosheim*: *Ch. Hist.*, Cent. XVII, &c.)

**cōc'-cōl'-dæ**, s. pl. [From *Lat. coccum*; Gr. *κόκκος* (*kokkos*) = a kernel, the cochineal berry, &c. insect, and fem. pl. adj. suff. -*dæ*.]

*Entom.*: A family of Homoptera insects, called by Latreille Gallinsecta, &c., Gall insects. They have apparently but one joint to the tarsi, and it furnished with only a single claw. The males have no rostrum but two wings, which when at rest lie horizontally on the body; the females are provided with a rostrum and are wingless. The species live on trees or plants, a different species on each. Their larvæ are like oval or round scales, on which account they are sometimes called Scale insects. Many are British. [*Coccus*.]

**cōc'-cōl'-ī-ūm** (pl. **cōc'-cōl'-ī-ā**), s. [Gr. *κόκκισ* (*kokkhis*), genit. *κόκκιδος* (*kokkidos*), dimin. of *κόκκος* (*kokkos*).] [*Coccus*.]

*Bot.*: A form of conceptacle consisting of a globular tubercles with a free or confluent cellular wall, and not as a rule opening by a terminal pore. It occurs in the rose-spored Alga.

**cōc'-cōl'-ēr'-ōūs**, a. [Lat. *coccum*; Gr. *κόκκος* (*kokkos*) = a berry, and *Lat. ferō* = to bear.] Bearing or producing berries; bacciferous.

**cōc'-cōl'-na**, s. pl. [Mod. Lat. *coccus* (q.v.), and neut. pl. adj. suff. -*ina*.]

*Entom.*: A tribe of the sub-order Homoptera, type Coccidae.

\***cōc'-cōl'-ē-ān**, a. [Lat. *coccineus*.] Dyed scarlet or crimson colour. (*Blount*.)

**cōc'-cōl'-ēl'-lā**, s. [Dimin. of *Lat. coccinum*, s. = scarlet.]

*Entom.*: A genus of Beetles, the typical one of the family Coccinellidæ. They are generally beautifully coloured, having as a rule the elytra red with white spots. Sharpe enumerates eighteen species as British, *Coccinella septempunctata* is the Common Lady-bird.

**cōc'-cōl'-ēl'-lŷ-dæ**, s. pl. [Mod. Lat. *coccinella* (q.v.), and fem. pl. adj. suff. -*dæ*.]

*Entom.*: A family of Beetles, tribe Trimeræ, &c., having apparently only three joints to the tarsi. They are so convex above, while flat below, as to resemble little hemispheres. The antennæ are clavate. The animals when taken feign death. They are known as Lady-birds, and sometimes appear in large numbers. They are not merely harmless but useful to man, feeding on the Aphides, or Plant-lice, which destroy the plants. Sharpe enumerates twelve genera and forty-one species as British.

**cōc'-cōl'-ēl'-līne**, a. [Mod. Lat. *coccinella*, and Eng. suff. -*ine*.] Pertaining to, or characteristic of the Coccinellidæ (q.v.).

**cōc'-cōl'-ī-ā**, s. [Lat. *coccineus*, *coccinus* = scarlet.]

*Bot.*: A genus of Cucurbitaceæ, with diœcious flowers, having five stamens united into a column; the anthers in three parcels. The fruit is oblong, and has on it ten white lines. The fruit of *Coccinia indica*, a common wild Indian species, is eaten by the natives in their curries.

**cōc'-cōl'-īn**, s. [From *Mod. Lat. coccus*, and suff. -*ine* (*Chem.*).]

*Chem.*: C<sub>14</sub>H<sub>12</sub>O<sub>6</sub>. A substance obtained by fusing carmine-red with potash, and dissolving the mass in water, acidifying with sulphuric acid, agitating the filtrate with ether and evaporating. Water extracts from the residue oxalic and succinic acids, and leaves Coccinin undissolved; it crystallizes from hot alcohol in microscopic rectangular tablets, which are very soluble in dilute alkalis, forming a yellow solution which on exposure to the air turns green, violet, and purple-red.

**cōc'-cōl'-īte**, s. [In Ger. *coccinil*, from *Lat. coccinus*, *coccineus*; Gr. *κόκκινος* (*kokkinos*) = scarlet, and suff. -*ite* (*Min.*) (q.v.).]

*Min.*: A mineral of adamantine lustre and doubtful composition, occurring in reddish brown particles on selenite of mercury. (*Dana*.)

**cōc'-cōl'-rŷ-ōn**, s. [Gr. *κόκκος* (*kokkos*) = a kernel, . . . the cochineal insect, and *βρύον* (*bruyon*) = a mossy sea-weed, a lichen, a catkin.]

*Bot.*: A genus of plants, order Piperaceæ. *Coccolobryon capense* is used at the Cape as a stomachic.

**cōc'-cō-car'-pī-dæ**, s. pl. [Gr. *κόκκος* (*kokkos*) = . . . the cochineal insect; *καρπός* (*karpos*) = fruit, and *Lat. pl. adj. suff. -dæ*.]

*Bot.*: A family of Algae, order Ceramiales (Rose-tangles), sub-order Cryptocemææ.

**cōc'-cō-chlōr'-ī-dæ**, s. pl. [Mod. Lat. *coccolobryon*, and fem. pl. adj. suff. -*dæ*.]

*Bot.*: A family of Convolvaceæ, sub-order Palmellææ. They have the almy substratum evident.

**cōc'-cō-chlōr'-ī-a**, s. [Gr. *κόκκος* (*kokkos*) = . . . the cochineal insect, and *χλωρός* (*chlōros*) = pale green.]

*Bot.*: A genus of Algae, the typical one of the family *Coccolobryon* (q.v.). There are several species spreading on the ground, in moist situations or aquatic.

**cōc'-cō-cŷp'-sōl-ūm**, s. [Gr. *κόκκος* (*kokkos*) = a kernel, and *κυπέλη* (*kypēlē*) = a hollow vessel.]

*Bot.*: A genus of Cinchonada, with a vase-like fruit. *Coccolobryon repens* is a creeper with bluish-purple berries, a native of the West Indies, but cultivated here.

**cōc'-cōg'-nīc**, a. [From *Gr. κόκκος* (*kokkos*) = a kernel, and *Lat. gnidium*, with *gramm* understood = the seed of the Mezereon, from *Gnidium* = pertaining to *Gnidium* or *Coldus*, a town of Caris, now in ruins.]

**coccolitic acid**, s. [*Chem.*: An acid contained in the seeds of *Daphne gnidium*. It crystallizes in colourless prisms.]

**cōc'-cōg'-nīn**, s. [From *Gr. κόκκος* (*kokkos*) = a kernel, and *Lat. gnidium*.]

*Chem.*: A crystalline colourless substance C<sub>20</sub>H<sub>22</sub>O<sub>8</sub>, contained in the seeds of *Daphne Mezereum*. It is sparingly soluble in water, and sublimes when heated.

**cōc'-cōl'-īte**, s. [Fr. *coccolite*; from *Gr. κόκκος* (*kokkos*) = a berry; *λίθος* (*lithos*) = a stone.]

**bēl**, **bōy**; **pōut**, **jōwī**; **cat**, **çell**, **chorus**, **çhin**, **bençh**; **go**, **çem**; **thin**, **çhis**; **sin**, **aç**; **expect**, **Xenophon**, **exist**. **ph** = **f** -**clan**, -**tian** = **shan**. -**tion**, -**sion** = **shün**; -**tion**, -**çion** = **zhün**. -**tious**, **sious**, -**clous** = **shūs**. -**ble**, -**dle**, &c. = **bēl**, **dēl**.

**Mn.**: A white or green granular variety of pyroxene arranged by Dana under his variety *Lime Magnesia Pyroxene* or *Malacolite* (q.v.). The British Museum Catalogue makes it a variety of Diopsids (q.v.).

**cōc'-ōl'-lith**, s. [Gr. *κόκκος* (*kōkκος*) = a kernel . . . the cochineal insect, and *λίθος* (*lithos*) = a stone.]

**Biol.** (pl.). The name given in 1858, by Prof. Huxley, to one of certain minute oval or globular calcareous bodies found in countless numbers in the ooze of the Atlantic, either detached or adherent to small pieces of protoplasm. They have since been dredged up from other places, and found in chalk, and, according to Guembel, in limestones of all ages. It is now generally considered that they are Unicellular Algae.

**cōc'-ōl'-ba**, s. [Gr. *κόκκος* (*kōkκος*) = a kernel . . . the cochineal berry, now known to be an insect and not a berry, and *λόβος* (*lobos*) = a lobe, with reference to the character of the fruit.]

**Bot.**: A genus of plants, order Polygonaceæ. The calyx is 5-parted and ultimately becomes succulent; the corolla is wanting; the stamens are five, united by thin filaments into a ring; the styles 3; the stigma simple; the one-seeded nut being enclosed in the accumbent enlarged calyx. *Coccoloba verticillata* is the Sea-side Grape, which grows on the shores of the West Indian Islands, Bermuda, and the continent of America. It has large glossy green leaves with red veins. The berries are edible. It is an evergreen. It helps to bind together the sandy sea-coast, and protect it against the destructive effects of wind and sea. The wood is used for cabinet work. A red colouring matter in it is employed as a dye. The wood, leaves, and bark are astringent, and a decoction of them evaporated forms *Jamatoca Kino*.

**cōc'-ōl'-mīl'-ī-a**, **cōc'-ōl'-mīg'-ī-a** (g silent), s. [Ital.] A kind of plum growing in Calabria, the bark of which—especially of the root—is highly esteemed by the Neapolitan faculty for its virtues in intermittent fever. (*Ogilvie*.)

**cōc'-ōl'-neis**, s. [From Gr. *κόκκος* (*kōkκος*) = a kernel . . . a berry, and *νήσις* (*nēsis*) = unpractised in a thing . . . powerless, feeble (?)]

**Bot.**: A genus of Diatomaceæ. Various species are British, some fresh-water, others marine.

**cōc'-ōl'-nē-ma**, s. [From Gr. *κόκκος* (*kōkκος*) = a kernel . . . a berry, and *νήμα* (*nēma*) = that which is spun, yarn.]

**Bot.**: A genus of Diatomaceæ. *Cocconeis lanceolata* and *C. etatula* are common in fresh water.

**cōc'-ōl'-phère**, s. [Gr. *κόκκος* (*kōkκος*) = a berry; Eng. *sphere* (q.v.).] The name given by Wallich and Huxley to a spherical mass of sarcode, or protoplasm, enclosed in a delicate calcareous envelope, and bearing coccoliths on its external surface. They are found in profusion in deep-sea ooze, or floating in tropical countries.

**cōc'-ōl'-tē-ūs**, s. [From Gr. *κόκκος* (*kōkκος*) = a kernel . . . the berry like the cochineal insect, and *όστρέον* (*ostreon*) = a bone.]

**Palæont.**: A genus of gonoid fishes, section Placodermata, sub-order Ostracostei. They have, however, affinities, as Prof. Huxley has pointed out, to the Teleostean Siluroidea, with which, perhaps, they should be placed. There is a cephalic buckler covered with small hemispherical tubercles, the notochord was persistent, but the rays of the dorsal and ventral fins, as well as the neural and hemal spines, are ossified. The tail was heterocercal. *Cocosteus* is a very characteristic organism of the Old Red Sandstone, occurring at Gamrie, in Grinye, Ceshire, &c. It is found also in the Elfen country and in the Hartz. The genus seems to have come into existence, however, in the Upper Silurian; species of that age having been found by M. Barrande in Bohemia.

**cōc'-ōl'-thraus-tēs**, s. [From Gr. *κόκκος* a kernel . . . a berry, and *θραύω* (*thrauw*), fut. *θραύσω* (*thrausō*) = to crush.]

**Ornith.**: Grosbeak. A genus of birds, the typical one of the sub-family Coccythraustine. There are two British species: *Coccythraustes vulgaris* (the Hawfinch) and *C. chloris* (the

Greenfinch or Green Grosbeak). (See these English words.)

**cōc'-ōl'-thraus-tī-nēs**, s. pl. [From Mod. Lat. *coccythraustes* (q.v.), and fem. pl. adj. suff. *-nēs* (q.v.).]

**Ornith.**: A sub-family of Conirostral Birds, family Fringillidae. It contains the Grosbeaks. As their names import, they have thick bills fitted to crush berries. They have large wings, short tails, and stout feet. [COCOTHTRAUSTES.]

**cōc'-cōw**, s. [CUCKOO.]

**cōc'-cūle**, s. [Dimin. of Gr. *κόκκος* = . . . a berry.] (For def. see extract.)

"Coccus, a pericarp of dry elastic pieces, or coccolites, as in *Diosma*, *Dictamnus*, *Euphorbia*. — *Lindley*: *Introd. to Botany*, bk. I., ch. II.

**cōc'-cū-lūs**, s. [COCCELL.]

**Bot.**: A genus of plants, order Menispermaceæ. Sepals 6 in 2 whorls, petals 6, stamens 3 or 6, ovaries 8, 6, or more; drupes one-celled, one-seeded. The genus consists of climbing plants with small, generally white or green, dioecious flowers and heart-shaped leaves. In general the species are bitter febrifuges. *Cocculus crispus*, a twining species with tubercles or warts on the stem, found in Sumatra and the Molucca Islands, is used by the Malays in intermittent fevers. The root of what was formerly called *Cocculus palmatus* but is now designated *Jateorhiza palmata*, found in Mozambique and Obo, is the Calumba-root of commerce, from which a bitter is obtained. [CALUMBA.] A decoction of the fresh roots of *C. villosus*, with a few heads of long pepper in goat's milk, is administered by the Hindoos in rheumatism and old venereal complaints, as is a green jelly for heat of urine. An ink is made from its fruit. In Arabia a spirit is distilled from the scrid berries of *C. Cebatha*.

**cocculus indicus**, s.

**Comm. &c.**: A popular name given to a species of Menispermaceæ, which furnishes certain dried berries constituting an article of commerce. They are imported into this country from the East Indies. There is no botanical species with this exact name. The plant which furnishes the berries, the *Menispermum Cocculus* of Linnaeus, was called by De Candolle *Cocculus suberosus*, but Wight and Arnott have since removed it from the cocculus genus, and term it *Anamirta Cocculus*. The drupe resembles a round berry, the size of a pea or larger, wrinkled externally, and with a brittle husk. The kernel is intensely bitter. It contains about one-fiftieth of its weight of a powerful bitter narcotic poison called Picrotoxin (q.v.), also bases called Menispermine C<sub>12</sub>H<sub>24</sub>N<sub>2</sub>O<sub>2</sub>, a crystalline base, Paramenispermine, and several organic acids, &c. *C. indicus* is a deadly poison, is used to give a bitter taste to beer, and is thrown into rivers to kill the fish. It has been used in form of ointment in certain skin diseases. The popular notion that these berries were used to increase the intoxicating properties of porter is said, on the authority of an eminent analyst, to be erroneous.

**cōc'-cūm**, s. [Lat. *coccum* = a berry; Gr. *κόκκος* (*kōkκος*)] [COCBUS.]

**Bot.**: Gærtner's name for a kind of fruit, the same as *Coccus*, 2 (q.v.).

**cōc'-cūs**, s. [Gr. *κόκκος* (*kōkκος*) = a kernel, . . . the cochineal insect, the female of which is so like a berry that it was long mistaken for one.]

1. **Entom.**: The typical genus of the family Coccide (q.v.). Many species are hurtful to plants in greenhouses and elsewhere. Gardeners call them bugs. *Coccus adontidum* (the Mealy Bug) does damage in hothouses, as does *C. Testudo*. *C. Vitis* (the Vine-scale) injures vines, and *C. Hesperidum* oranges. They may be destroyed by painting the branch on which they congregate with spirits of turpentine, or fumigating them with turpentine, lobacco, or sulphur. Others, however, are of value as dyes. *C. Cacti*, found on the Cactuses, is the Cochineal Insect. [COCHINEAL.] *C. Nictæ*, found on *Quercus coccifera*, an evergreen oak in the south of France, furnishes a crimson dye which has long been known to mankind. *C. Polonicus* is used by the Turks as a red dye. *C. Lacca* yields lac. [LAC.]

2. **Bot.**: A shell; a carpel separating elas-

tically from an axis common to it and other carpels. (*Trevis*, of *Bot.*)

**cōc'-cūg'-ē-āl**, a. [Lat. *coccyx* (genit. *coccygis*); Gr. *κόκκυξ* (*kōkkuz*) = a cuckoo; so called from its resemblance to a cuckoo's beak.]

**Anat.**: Pertaining to or connected with the coccyx, as the coccygeal bones, the coccygeal artery, the anterior and posterior coccygeal nerves, &c.

**coccygeal gland**, s.

**Anat.**: A gland varying in size from that of a lentil to that of a small pea, occupying a hollow at the tip of the coccyx.

**cōc'-cūg'-ē-ūs**, s. [COCCYGAL.]

**Anat.**: The muscle which retains the coccyx in its place, and prevents it from being forced backward during the expulsion of the fæces. (*Dunghison*.)

**cōc'-cūg'-mōrph**, a. & s. [COCCTRO-MORPH.]

**A. As adj.**: Belonging to or characteristic of the Coccygomorpha (q.v.).

**B. As subst.**: Any individual of the Coccygomorpha.

**cōc'-cūg'-mōr-phæ**, s. pl. [Mod. Lat., from Gr. *κόκκυξ* (*kōkkuz*), gen. *κόκκυκος* (*kōkkugos*) = a cuckoo, and *μορφή* (*morphē*) = form.]

**Zool.**: In Huxley's classification, a group corresponding to the Piciarian birds, without the awitts, goatsuckers, and woodpeckers.

**cōc'-cūg'-mōr-phic**, a. [Eng. *coccygomorpha*; -ic.] The same as coccygomorpha (q.v.).

**cōc'-cūn**, s. [Lat. *coccinus*.] A red or scarlet colour.

"The marchandises of purpur and silk and coccyx." — *Wycliffe*: *Apocal.*, xiii. 12.

**cōc'-cūn-tēs**, s. [From Gr. *κόκκυξ* (*kōkkuz*) = a cuckoo.]

**Ornith.**: A genus of birds, family Cuculidae, sub-family Cuculinae. *Coccyzus glandarius*, the Great Spotted Cuckoo, is a native of Africa, but a straggler has been met with in Ireland.

**cōc'-cūx**, s. [Lat. *coccyx*; Gr. *κόκκυξ* (*kōkkuz*) = a cuckoo, the beak of which it resembles.]

**Anat.**: The lowermost portion of the vertebral column, consisting of four, or more rarely five or three, divided terminal vertebrae, which become more or less united into one with the advance of age. They have been called *united vertebrae*.

**cōc'-cū-zī-nēs**, s. pl. [From Mod. Lat. *coccyzus*, and fem. pl. adj. suff. *-nēs*.]

**Ornith.**: Hooked-billed Cuckoos. A sub-family of birds, family Cuculidae (Cuckoos). The nostrils are linear, the bill curved, with the margin of the upper mandible dilated; the tarsus is naked and lengthened; the tail very long and cuneated.

**cōc'-cū-zūs**, s. [From Gr. *κόκκυξ* (*kōkkuz*) = a cuckoo.]

**Ornith.**: The typical genus of the sub-family Coccyzine (q.v.). The species are natives of America. *Coccyzus americanus*, the American Yellow-billed Cuckoo, has occasionally visited Britain.

**cōch'-ēr**, s. [Mid. Eng. *coche* = coach; *-er*.] A coachman.

**cōch'-ēr-īngs**, s. [COCHERINGS.]

**cōch'-ī-nēal**, s. [In Fr. *cochenille*; Ital. *cocciniglia*, from Lat. *coccineus* = of a scarlet colour; *coccus* = a berry, kernel (q.v.).]

1. **Comm.**: Properly the dried female of the Cochineal Insect, *Coccus cacti*. [COCHINEAL INSECT.] A single pound of cochineal is supposed to contain no fewer than 70,000 distinct individuals. It is used in dyeing scarlet, and in the manufacture of scarlet and carmine, the colour being brought out and fixed by chloride of tin.

2. **Hist. & Law**: The Spaniards first discovered its value in 1573. It was introduced into Europe about 1523 and into India in 1795. Formerly there was a duty on cochineal in-

ported into England, but by 8 and 9 Vlt., c. 90, passed in 1845, it was abolished.

**cochineal fig, s.** A cactus, *Opuntia cochinealifera*.

**cochineal insect, s.**  
*Entom.*: *Coccus cacti*, the cactus meant being the *Cactus opuntia*, which grows in Mexico and other parts of Central America. *Cactus cochinealifera*.

COCHINEAL INSECT ON CACTUS.

*illifera* is another plant on which the insect feeds. The cochineal insect has been introduced from America into Spain and Algeria.

**coch-lê-a, s.** [Lat. *cochlea* = a snail, a snail's shell; from Gr. *κόχλιος* (*kokhlios*) = a mollusc with a spiral shell, used for dyeing purple, murex.]

- 1. *Mach.*: An ancient engine of a spiral form; a screw-jack.
- 2. *Hydraul.*: A spiral pump for raising water, introduced by Archimedes into Egypt.
- 3. *Anat.*: The anterior division of the internal ear. It consists of a gradually tapering spiral tube, the inner wall of which is formed by a central column or modiolus, around which it winds. (*Quain*.)

**coch-lê-an, a.** (Mod. Lat. *cochlea*) (q.v.), and Eng. suff. *-an*.] The same as COCHLEAR (q.v.).

**coch-lê-ar, a.** [From Lat. *cochlear* = a spoon.]

- 1. *Anat.*: Pertaining in any way to the cochlea (q.v.).
- 2. *Bot.*: (*Of cultivation*): A term used when one piece being larger than the other, and hollowed like a helmet or bowl, covers the rest, as in *Aconitum*, some species of peronate plants, &c. (*Lindley*.)

**coch-lê-âr-l-a, s.** [From Lat. *cochlear* = a spoon, which the hollowed out leaves somewhat resemble.]

*Bot.*: A genus of plants, order Crucifera, sub-order Pleurorhizæ, and the tribe Alysiæna. The seed vessel (a silicula) is oval or globose, with turgid valves, having a prominent nerve in the middle; the seeds are many, not margined, tuberculate; the calyx is patent. Two very distinct species are British: *Cochlearia Armoracia*, the Horse-radish, and *C. officinalis*, the Scurvy-grass. Two other supposed species have been added, *C. anglica* and *C. danica*, but they are properly only varieties of *C. officinalis*. The name Scurvy-grass was given because it was supposed to be of great value as an antiscorbutic. If eaten fresh it is stimulant and diuretic, but is feeble if allowed to dry before being taken.

**ochlearia oil, s.**  
*Chem.*: The essential oil of Common Scurvy-grass, *Cochlearia officinalis*. It boils at 160°, and consists of methyl-ethyl-thio-carbinide  
$$N < \begin{matrix} CH(CH_2) \\ (C_2H_5) \end{matrix}$$

**coch-lê-âr-l-form, a.** [Lat. *cochlear* = a spoon, and *forma* = form, shape.]

*Bot., Anat., &c.*: Spoon-shaped. *Cochleariform process, processus cochleariformis*?

*Anat.*: A small passage which lodges the *tensor tympani* muscle of the ear.

**coch-lê-âr-ÿ, a.** [From Lat. *cochlearum* = a shell, a snail.] The same as COCHLEATE (q.v.).

"That at St. Donna, near Paris, both wheatly spira, and cochleary turnings about it."—*Brome's Vulgar Errors*.

**coch-lê-ate, coch-lê-at-ed, a.** [Lat. *cochleatus* = spiral or screw-formed.]

- 1. *Ord. Lang.*: Circular, spiral.
- 2. *Bot.*: Twisted in a short spire so as to resemble the convolutions of a snail shell, as

the legume of *Medicago cochleata*, or the seed of *Salicornia*. (*Lindley*.)

**coch-lê-ous, a.** [Lat. *cochlea* (q.v.), and Eng. suff. *-ous*.] Spiral like a shell-snail; cocleate. (*Derham*.)

**coch-li-dî-spêr-mâte, a.** [Gr. *κοχλίδιον* (*kokhliðion*) = a small snail, and *σπέρμα* (*sperma*) = a seed.]

*Bot.* (*Of seeds*): Concave on one side and convex on the other.

**coch-lî-ô-dôn-tôid, a. & s.** [From the stem of the second element of *cochliodus*; suff. *oid*.]

- A. *As adj.*: Pertaining to, or characteristic of the genus *Cochliodus*.
- B. *As subst.*: Any individual of the genus.

1. Ord. Lang.: Any species of the emfamily of birds described under No. 2.

2. Ornith. (pl. Cockatoos): The name given to the birds of the family Psittacidae, subfamily Cacatuinae, the same that was called by Swainson Plectolophinae. They have a large head, ornamented with a folding or prominent crest, a short very broad bill with the culmen of it very much curved. The tail is lengthened and broad, the feathers not narrowed. Besides their peculiar utterance "cockatoo," from which they derive their name, screamed out harshly, they are not able to acquire more than a few words, their imitative power being but slight. They inhabit Australia and the Eastern Islands, living in woods, and feeding chiefly on seeds and fruits, which their bills are well adapted to crush. They also eat insects. The species most frequently brought to England are the Great Sulphur-crested Cockatoo, Cacatua galerita, and the Small Sulphur-crested Cockatoo, C. sulphurea. They are white with yellow crests. They become thoroughly domesticated.

"Here are also—in the Mauritius herons white and beautiful—cockatoos, a sort of parrot, whose nature may well take name from xaxôv oôv, it is so fierce and so indomitable."—Sir T. Herbert: Travels, p. 383.

(2) A courtesan, a harlot.

II. Technically:

1. Her.: For the difference between a basilisk and an amphispin cockatrice, see BASILISK.

2. Scrip.: The word "cockatrice" occurs four times in the text and once in the margin of the authorized version of the Bible. In four of these passages, viz., Prov. xxiii. 32 (margin), Isa. xi. 8, lxx. 5, Jer. viii.

17, the word is תַּפְּסִי (tsiphosi), and in one, viz., Isa. xiv. 29, it is תַּפְּסָה (tsapha). Tsiphosi means that which is generated from a serpent, hence a serpent itself. Tsapha, which is from the same root, is a serpent's progeny. It evidently means a very venomous serpent, but it will be observed that no countenance is given in Scripture to the fable about the origin of the cockatrice, or to any other of the myths that of old clustered so thickly around that animal of now fallen fame.

Cock-â-yne, \*Coc-agne, s. [Fr. cocagne; O. Fr. cocaigne; lsl. cuacagna, cuacagna; from cuca = dainties, sweetmeats; from Lat. coquo = to cook; from the belief that the houses in this fabulous land were covered with cakes.]

*Naut.*: One who steers a boat. After the officer in command he has charge of the crew and all belonging to the boat. He must be ready at all times with his crew to man the boat.

" . . . his captain steered the boat as cockswain."—*Drummond: Travels through Germany, Italy, and Greece*, p. 70.

**cock'-täl**, s. [Eng. cock, v., and tail.]

A. Ordinary Language:

I. Lit.: A half-bred horse.

II. Figuratively:

1. A poor half-hearted fellow.

"It was in the second affair that poor Little Barney showed he was a cocktail."—*Thackeray: The Newcomes*, II. 155.

2. A kind of compounded drink much used in America.

"Did ye ever try a brandy cock-tail, Cornel?"—*Thackeray: The Newcomes*, ch. xlii.

B. *Entom* (pl. *cocktails*): A popular name for the beetles ranked under the tribe Brachelytra, viz., the Staphylinidae and their allies. The shortness of the elytra (wing-cases) enables them to turn up their abdomen, whence the name cocktails.

**cock'-üp**, s. [Eng. cock, v., and up.] A hat or cap turned up before.

¶ *Cock-up letter*:

*Printing*: A large letter standing above the rest in the line, and formerly, indeed occasionally even now, used for the initial letter of a book or chapter. (*Knight*.)

**cock'-wëed**, \* **cocke-weede**, s. [Eng. cock (1); and weed.]

Botany:

2. Some *Lepidium*. (*Britten & Holland*.)

**cock'-y**, a. [Eng. cock (1), s.; -y.] Conceited, stuck-up, impudent.

**cocky-baby**, s. A popular name for a plant, *Arum maculatum*.

**cock'-y-lëek'-y**, s. [COCKLEBEEKIE.]

\* **cock'-y-öl'-y**, a. [Prob. from *cock*, and *yellow*.] Only used in the compound *cocky-öbird* = a bird of bright plumage, a Yellow Hammer.

"The charming little cocky-öbirds."—*C. Kingsley: Two Years Ago*, ch. xv.

**cõ-cõ** (1), s. *compos*. [COCOA (1).]

**cõ-cõ** (2), s. [COCOA (2).]

¶ *Le Petit Coco*: A name given in San Domingo to a tree, *Theophrasta Jussieui*, from the pounded seeds of which bread is prepared.

**cõ-cõa** (1), s. [Jo Fr. *coco*, but Littré considers that the French word comes from the English one; Port. *coco*, probably a contraction of *maecoa*, *macaco* = a kind of monkey, to the face of which the cocoa-nut, with the three scars upon one end of it, was thought to bear a resemblance.]

I. *Of the forms cocoa and coco* (but of these *coco* exists only in the compound *coco-nut*, *coco-nuf*): The fruit of the palm described under 2. [COCOA-NUT.]

2. One of the best known and the most prized of all the palm-trees. It is the *Cocos nucifera* of botanists. [COCOA.] Its appropriate habitat is the coast of islands or continents, between 25° of Northern and the same parallel of Southern latitude; thus it abounds along the coasts of the South Sea Islands, of India, of South America, and other places. It is sometimes found inland, even to the elevation of 2,900 feet above the sea, but it does not abound or flourish away from the sea; thus while there are many millions of them along the sea-coast of India, considerable regions in the interior may be traversed without more than two or three cocoa-nuts being seen. The tree rises to the height of sixty to ninety feet. The stem is slender and marked by transverse rings, being the scars left by leaves now fallen. At Bombay and elsewhere the natives may be seen climbing up the cocoa-nut tree by means of those rings, and descending again with the fruit, their frail support against falling being a rope made into a large loop encircling their waist and the stem of the tree. Some palms have fan-shaped leaves, others are "feathery palm-trees." The cocoa-nut belongs to the latter category; its leaves, generally 12—15 in number, like gigantic ostrich-feathers, exist in a bunch or tuft at the summit of the unbranched stem. A tree produces about 80 or 100 nuts annually. The uses of the cocoa-nut tree are innumerable. For those of the

fruit see COCOA-NUT. The juice which flows from its wounded spathes is called in India *toddy* (q.v.), and may be fermented into excellent wine, and an intoxicating liquor made from it, *arrack*. Or the sugar itself may be separated, when it is called *Jaggery*. The unexpanded terminal bud is a delicate article of food; the leaves are made into thatch for dwellings, or into baskets and buckets, or materials for fences, or as substitutes for paper to write on. The midrib of the leaves serves for oars; their ashes yield potash; and from the reticulated substance at their base a coarse kind of cloth is manufactured. The hard case of the stem is made into drums, besides being used in the construction of huts; the lower part is so hard as to take on a polish making it resemble agate. The root is sometimes incised instead of the arca-nut, and the fibres made in Brazil into small baskets. (*Lindley, &c.*)

"The dream is past; and then hast found ago!  
Thy cocoon and banana, pains and yams,  
And homestead thatched with leaves."  
*Cooper: Task, l. 646.*

**cocoa-nut, coco-nut, coker-nut, s.**

1. *Ord. Lang., Bot. &c.*

(1) The fruit of the palm described under No. 2. The ovary contains three ovules, but two of these are uniformly abortive. They leave three scars on one end of the fruit, one of which is so soft that it may be pricked with a pin: from this the embryo comes. The other two are hard and impenetrable. Its use for food, and the delicious beverage it contains, are universally known. The fibres which surround the rind are made into a kind of cord, called *coco-rope*, which, from its elasticity and strength, is well adapted for cables. See also *Cocoa-nut Oil*.

(2) The tree furnishing the fruit. [*Cocoa* (1), 2.]

"The most precious inheritance of a Singhaless is his ancestral garden of *coco-nuts*. In a case which was decided in the district court of Galle, within a very short period, the subject in dispute was a claim to the 2/50th part of ten *coco-nut* trees."—*Tennessent: Ceylon, pt. vii., ch. ii.*

2. *Chem.*: The colourless, slightly opalescent fluid contained in the interior of the seed of *Coccoloba nucifera* is called the milk. It consists of 91.5 per cent. of water, 0.46 protein, 0.7 fat, 8.78 non-nitrogenous extractive matter, and 1.19 ash. The ash of the kernel of the *cocoa-nut* contains about 43 per cent. of potash, 8 soda, 4.1 lime, 9 magnesia, 13.6 chlorine, 16.9 phosphoric acid, 5 sulphuric acid, and 0.5 of silicic acid.

† The double *cocoa-nut*: A palm, *Lodoicea Seychellarum*.

Sea *cocoa-nut*: The same as Double *Cocoa-nut* (q.v.).

*Cocoa-nut fibre*: The fibre in which the *cocoa-nut* is enveloped.

"The beds are stuffed with *cocoa-nut fibre*, a material which is more expensive than flock."—*The Emigrant's Depot at Blackwall, in the Times, May 21, 1874.*

*Cocoa-nut oil*:

*Comm.*: The fatty substance extracted from *Coccoloba nucifera*, &c. A whitish peculiar smelling fat, melting at 25°, and remaining liquid for some time. It easily turns rancid when exposed to the air, and consists chiefly of glycerides of caprylic acid, C<sub>7</sub>H<sub>13</sub>COOH, lauric acid, C<sub>11</sub>H<sub>23</sub>CO<sub>2</sub>H, myristic acid, C<sub>13</sub>H<sub>27</sub>CO<sub>2</sub>H, and palmitic acid, C<sub>15</sub>H<sub>31</sub>CO<sub>2</sub>H. It was formerly thought to contain cocinic acid, C<sub>19</sub>H<sub>39</sub>O<sub>2</sub>, melting at 35°, but it has been found to be a mixture of lauric and myristic acid. *Cocoa-nut fat* is chiefly used in the manufacture of soap, the refuse of the nuts being formed into a cake for feeding cattle. Some of the fatty acids are said to be uncombined with glycerin. The more solid portion can be separated from the more liquid fats by pressure, and used for the manufacture of candies.

**cocoa-plum, s.** The name given in the West Indies to the fruit of *Chrysobalanus Icaco*.

**cō-cōa** (2), s. [Corrupted from Spanish-American, &c. *cacao* (q.v.).]

*Chem.*: A beverage prepared from the roasted seeds of *Theobroma cacao*. Its chemical composition, according to Mr. Wanklyn, is as follows: *Cocoa-butter* 50 per cent., theobromin 1.6, starch 10, albumen, fibrin, and gluten 18, gum 8, colouring matter 2.6, water 6°, ash 3.6, loss, &c., 0.3.

† Forms of *cocoa* are obtained at the shops as raw, roasted, and flaked nuts, and

*cocoa nibs*. The introduction of the method of preparing these is attributed to Sir Hans Sloane. It is always prepared with other substances. The nibs are the purest form in which it is supplied to the public. Next come *cocoa essence*, *cocoa extract*, *cocoatin*, and *chocolatine*, which are the ground nibs deprived of half their fat. Then come flaked and rock *cocoas*, which are composed of *cocoa*, *sugar*, and *arrowroot* or *sago*. Lastly, we have the so-called soluble *cocoas*, which consist of 40 per cent. of ground *cocoa*, the remainder consisting of *sugar* and *starch*. These are sold under various names, such as *homoeopathic*, *Iceland moss*, *Marsavilla cocoa*, &c.

**cocoa-butter, cacao-butter, s.**

*Chem.*: A yellowish white fat, having the consistency of tallow, a weak chocolate odour, and agreeable taste. Sp. gr. 0.96, melting point 80°C. It consists of glycerides of stearic, oleic, and probably other fatty acids. *Cocoa-butter* does not become rancid when kept. If pure it dissolves two parts of ether. It is also called *Cocoa-fat*.

**cocoa-fat, s.** [*COCOA-BUTTER.*]

**cocoa-root, s.** The root of *Colocadia antiquorum*. It grows in the tropics, where it is eaten. It is called also *Coco*.

**cō-cōa-tin'-a, s.** [Eng., &c. *coccoloba* (2), i-ephonic, and Lat. suff. -ina.]

*Comm.*: Pure *cocoa* deprived of 40 to 50 per cent. of its fat. (*W. Harkness, F.C.S.*)

† **cō-cō-drille, s.** [*CROCODILE.*]

"These *cocodrilles* ben serpentes."—*Monsieur de la, p. 124.*

*Bot.*: A tribe of *Palmaceae* (Palms). It contains some spiny and some unarmed genera. The typical genus is *Coccoloba* (q.v.).

**cōc-ō-las, s.** [Etym. doubtful.] A word occurring only in the subjoined compound.

**coccolas-panter, s.** A plant, *Rubus cœsius*.

† **co-co-loch, cock-loche, s.** [Etym. doubtful.] A term of contempt or reproach. (There is no evidence for Nares's statement that it was probably the same as *cockroach*.)

"Then clutch these,

Poor fly! within these eagle claws of mine,  
Or draw my sword of fate upon a peasant,  
A besogno, a cockroach, as thou art."

*Beaumont & Fleck: Four Plays in One.*

**cō-cōon'** (1), **cō-cōn, s. & a.** [Fr. *cocon*.]

*A. As substantive:*

1. *Entom.*, &c.: An outer covering of silky fibre or hair with which the pupæ or chrysalides of many insects, the silkworm for example, are protected. The term was first introduced into English entomology by Kirby. (See *Extract*.)

"But to the artificial coverings of different kinds, whether of silk, wood, or earth, &c., which many insects of the other orders fabricate for themselves previously to assuming the pupa state, and which have been called by different writers, *podæ*, *coçis*, *Auzis*, and *beams*, I shall continue the more detailed French term *cocon*, Anglicised into *cocoon*."—*Kirby & Spence: Introduct. to Entomology, Letter ii.*

† The making of cocoons is not confined to caterpillars of the Lepidoptera. Kirby uses the term of the silken case which spiders spin for the reception of their eggs, and the late Professor Owen did so of the structure constructed by the Rivulet Leech, *Hirudo vulgaris*, to contain its ova.

2. An egg-case of one of the lower Invertebrates.

"The eggs of the earthworm are laid in chitinous cocoons."—*Huxley: Anat. of the Invertebrates, p. 192.*

*B. As adj.*: Pertaining to an insect cocoon of the kind described under No. 1.

**cocoon-state, s.** The state of a cocoon or chrysalis, the pupa state of an insect.

"But it must not be forgotten that the males emerge from the *cocoon-state* some days before the females."—*Darwin: Descent of Man (1871), pt. ii., ch. xi., vol. 1, p. 407.*

*Zool.*: *Catoblepas gorgon*, the brindled gnu.

**cō-cōon', v. i. & t.** [*COCOON* (1), s.]

*A. Intrans.*: To form a cocoon.

*B. Trans.*: To swathe as in a cocoon.

**cō-cōon'-ēr-ÿ, s.** [Eng. *cocoon*; -ery.] A place where silkworms are kept and bred.

† **cō-cōs, s.** [Latinised from *coccoloba* (1) (q.v.).]

*Bot.*: A genus of palms, the typical one of the section *Coccoloba*. Both male and female flowers exist on the same spadix. The spathe is simple, flowers sessile, sepals 9, and petals 3, stamens 6, ovary 3-celled, stigmas 3, sessile, drupe fibrous. The juice of the unripe fruit of *Coccoloba schizophyllus* is prescribed in Brazil in slight attacks of ophthalmia.

† **cō-cō-wōrt, s.** [Etym. of *coco* doubtful, and suff. -wort.] A plant, *Capsella Bursa-pastoris*.

† **cōct, v. i.** [Lat. *coctum*, sup. of *coquo* = to cook.]

1. To boil, to cook.

2. To digest.

† **cōcted, pa. par. or a.** [*COCK*, v.]

† **cōct'-ÿ-ble, a.** [Eng. *coct*; *able*.] Capable of being cooked. (*Blount*.)

**cōc'-tîle, a.** [Lat. *coctilis*, from *coctus*, pa. par. of *coquo* = to cook, to bake.] Made by baking, as a brick.

† **cōc'-tion, s.** [Lat. *coctio*; from *coctus*, pa. par. of *coquo* = to cook.]

1. The act or process of boiling, or exposing to heat in liquor.

2. The act or process of digestion.

"The disease is sometimes attended with expectation from the lungs, and that is taken off by a *cocctio* and resolution of the feverish matter, or terminates in suppurations of a gangrene."—*Arbushet: On Diet.*

† **cōc'-tûre, s.** [Lat. *coctura*, from *coctus*, pa. par. of *coquo*.] The act or process of cooking, coction.

**cō-cūm, s.** [Prob. E. Indian.]

*Bot.*: *Garcinia purpurea*.

**cocoon-butter, cocoon-oil, s.** A solid greenish fat obtained from the seeds of *Garcinia purpurea*.

**cō-cūm-ÿg'-ÿ-a** (*g* silent), s. [Ital.]

*Bot. & Hort.*: A kind of plum (*Prunus Coccumigita*), found wild in Calabria, the bark of which is used in the intermittent fevers of that region, being preferred to cinchona.

† **cocur, s.** [*COKER* (1), s.]

† **cō-cūs, s.** [Corruption of *coccoloba* or *coccoloba* (q.v.), or the native name (?)] A term occurring only in the subjoined compound.

**coccus-wood, s.** A wood imported from the West Indies, and used for making flutes and other musical instruments. It is said to be the wood of *Brya Ebenus*, the Jamaica or American Ebony. It is not a genuine ebony, but a papilionaceous shrub or small tree.

**cōd** (1), \* **codde** (1), **cōd'-fish, s. & a.** [Etymol. doubtful. Ger. *gadde*; Lat. *gadus*.]

*A. As subst.*: A well-known fish, *Morhua vulgaris*, found on the British coasts, on the banks of Newfoundland, and elsewhere. For the ichthyological characters see *MORRUA*. They are exceedingly prolific, a single female having millions of ova. The Newfoundland fishery is of great importance, an immense number being taken every year. That on the Dogger bank and other places around our own shores is also important.

"Hake stokfyshe, haddock, cod and whytyma."—*Baebes Book, p. 174.*

*B. As adj.*: Of or pertaining to cod-fish.

"In the Gadidae, or cod tribe . . . almost the whole adipose tissue is concentrated in the form of oil contained in the liver."—*Perriss: Materia Medica.*

**cod-bait, s.**

1. The lug-worm (q.v.).

2. The cod-worm (q.v.).

**cod-bank, s.** A fishing-ground for cod.

**cod-fish, s.** The same as *COD* (1), s.

" . . . and enormous quantities of cod, haddock, whitling, coalfish, pollock, hake, ling, torsk, and all the various fish, usually called by the general name of whitefish, are taken. **cod-line, s.** An 18-thread, deep-sea fishing-line.

**cod-liver oil, s.**

*Med., &c.* : An oil obtained from the liver of the common Cod. There are three kinds known in commerce, viz., pale, pale-brown, and dark brown, the last possessing a very disagreeable taste and smell. Cod-liver oil was first recommended as a remedy for diseases of the lungs about the year 1833. Previous to that time, it had been used with much success in cases of chronic rheumatism. Its efficacy is ascribed by some to the presence of iodine and bromine, whilst others assert that it is due to the presence of a minute quantity of free phosphorus. Cod-liver oil is frequently adulterated with other fish-oils, especially shark-liver oil, but the latter can be easily recognised by its low specific gravity.

**\* cod's-head, s.** A stupid fellow; an idiot. "Such a hanging codshead to see no better."—*Denton's Ladies' Diet.*

**cod-sounds, s. pl.** The swim-bladders of cod, cured and packed for market. The palates also of the fish are included as tongues and sounds.

**codd (2), \* codd, \* codde (2), s.** [A.S. *codd* = a husk, a hod; Icel. *kodd* = a cushion; Sw. *kudda*; Wai. *cud* or *cod*.]

**I. Ordinary language :**

- 1. The husk, envelope, or pod in which seeds are contained. "He couldst to fill his wambe of the coddits which the hoggia oeten."—*W. Gifford's Lays* v. 12. "They let pease lie in small heaps as they are roaped, till they find the hawn and cod dry."—*Merrimer's Fishery.*

**II. Mach. :** The bearing of an axle.

**\* cod-piece, s.** A part of the front of the breeches, formerly made very protuberant and conspicuous.

"'Tis factio. Why, what a ruthless thing is this to him, for the rebellion of a cod-piece, to take away the life of a man!"—*Shaksp. Measure for Measure*, iii. 2.

**\* cod-ware, s.**

- 1. Grain contained in cods or pods, as pease, beans, &c. "Where rie or else wheat either barlie ye sowe Let codware be next therupon for to growe."—*Pusser*, ch. xii.
- 2. A pillowslip.

**\* cod-worm, s.** The same as Caddis, or Caddis-worm (probably because the larva makes a kind of case for itself).

"He loves the mayfly, which is bred of the cod-worm or caddis; and these make the trout bold and lusty."—*Walton's Angler.*

**\* codd, v. t. & i.** [Con (2), s.]

**A. Transitive :**

- 1. To enclose, or encase in a pod or husk.
  - 2. To shell peas, &c.
- B. Intrans. :** To bear seeds enclosed in a pod or husk. ¶ To *cod out* : Grain which has been too ripe before being cut, in the course of handling, is said to *cod out*, from its separating easily from the husk or cod.

**cod-da, s.** [Ital. *coda*; Lat. *coda*, *cauda* = a tail.]

**Music :**

- 1. The tail of a nota. (*Stainer & Barrett.*)
- 2. The bars occasionally added to a contrapuntal movement, after the close or finish of the *canto fermo*. (*Stainer & Barrett.*)
- 3. The few chords or bars attached to an infinite canon to render it finite; or a few chords not in canon added to a finite canon for the sake of obtaining a more harmonious conclusion. (*Stainer & Barrett.*)
- 4. The final episode introduced at the end of a musical composition to emphasise its close.

**codd-a-mine, s.** [Eng., &c. *codeia* (q.v.), and *amine* (q.v.).] *Chem.* :  $C_{20}H_{25}NO_4$ . An alkaloid which occurs in opium. It crystallizes in six-sided

prisms, melting at 120°. It is soluble in alcohol and ether and boiling water; it gives a dark green colour with strong nitric acid; with ferric chloride it gives a dark green colour and precipitates ferric hydrate.

**codd-ber, s.** [Eng., &c. *cod* (2), s.; and *ber* = *bers* (4), s. (q.v.).] A pillowslip.

"Item, fra Will. of Rend, & line of small hard elath. for covers to the king's coddbers, price elne 4s."—*Acct. Bp. of Glasgow, Treasurer to Ja. III., A. 1474; Borthwick's Mem. on Brit. Antiq.*, p. 184.

"Item liiii coddbers."—*Inventories A. 1516*, p. 24.

**codd-crune, s.** [Eng. *cod* (2), s. = a pillow; *crune* = *croon* = a murmuring.] A curtain-lecture.

**codd-dedd, \* cod-dyd, pa. par. or a.** [Con, v.] **A. As pa. par. :** (See the verb).

**B. As adj. :** Contained in or bearing pods, leguminous. "Coddys corne (coddis P.). *Lugumen*."—*Prompt. Para.*

"All codded grain belog a destroyer of weeds, an improver of land, and a preparer of it for other crops."—*Merrimer.*

**codd-dër (1), s.** [Eng. *cod* (1), s.; -er.] 1. One who fishes for cod. 2. A boat or vessel engaged in the cod fishery.

**codd-dër (2), s.** [Eng. *cod* (2), s.; -er.] One who gathers pease in the pods.

**codd-der-ar, s.** [Etymol. doubtful.] A vagrant, a vagabond. "To corsa, vasy, & so all manner of coddendaris, vagaboundis, & pyrr boddein."—*Aberd. Reg.*, A. 1588, v. 16.

**\* codd-ding, a.** [Etymol. doubtful.] Meaning doubtful, perhaps lecherous. "That coddling spirit had they from their mother."—*Shaksp. Titus Andronicus*, v. 1.

**Codd-ding-ton, s. & a.** [The name of a celebrated optician.]

**Coddington lens.**

*Opt. Instr.* : A spherical lens having a deep equatorial groove around it in the plane of a great circle perpendicular to the axis of vision. The groove is of such a depth that the stem connecting the hemispheres has a diameter equal to one-fifth of the focal length. This kind of lens was invented by Dr. Wollaston, who called it the periscopic lens. It was afterwards greatly improved by Sir David Brewster.

**codd-dle, codd-le, v. t.** [Etymol. doubtful.] 1. To parboil or soften by boiling. 2. To pamper, to fondle, to cocker.

**codd-dle, s.** [CODDLE, v.] One who coddles or pampers himself; an effeminate, luxurious person.

**codd-dy, a.** [Eng. *cod* (2), s.; -y.] Full of cods or pods, husky.

**coddy-moddy, s.** A name applied to a gull in his first year's plumage.

"The larus, with a brown and grey back and white breast, the *coddy-moddy*."—*Hill's Hist. Animals*, p. 457.

**codde (1), s.** [Lat. *codex*, *caudex* = a tablet.] A systematic collection or digest of laws, classified and simplified.

"... the broad distinction between a *code* and a *digest* was that the former destroyed some existing laws and confirmed others with which new laws were blended, while the latter merely collected and stated the law as it stood. A *code* would require the sanction of legislation, a *digest* would not."—*Times*, April 22, 1873.

¶ (1) *Code Napoléon* :

*Law* : The name given to a code promulgated in France in 1804, originally under the name of *Code Civil des Français*, but altered to *Code Napoléon* when the first emperor of that name came to the French throne. The term is sometimes used in a more general sense.

(2) *Code of Justinian* : [Named after Justinian, who was born of obscure parentage in A.D. 482 or 483; became emperor at Constantinople in April, 527; by means of his able generals, Belisarius and Narses, added Italy and Africa to his empire, and died Nov. 15, 565.] A code of law drawn out under the auspices of the Emperor Justinian. In April, 529, was issued a compilation of useful laws or constitutions from Hadrian to Justinian. In December, 534, a revised code was published, and was accorded the force of law. It was called "*Codex Justinianus repetita praelectionis*." In December, 533, a commission,

headed by the celebrated jurist, Tribonian, published an elaborate work called "*Digesta*" (things digested) and "*Pandectae*" (embracing all). This also received the force of law, and it was used to supersede the text-books of all old jurists. Just before the Digest appeared, there came first, by direction of Justinian, an abstract of the greater work. To this was given the name of "*Institutiones*" (institutes). New laws subsequently enacted were published under the name of *Novae* or *Constitutiones Novellae*, or *Authenticae*. They are often quoted as his "*Novels*," which word here must not be interpreted works of fiction. The expression "*Code of Justinian*," used in a general sense, comprehends the "*Code*" properly so called, the "*Institutes*," the "*Digest*," and the "*Novels*," used in a more specific sense, it is confined to the first of these four. The *Code of Justinian* is a very essential part of the civil law.

(3) *Code of Theodosius* : [Named after Theodosius II., generally called the younger, who was born on April 10, A.D. 401, and died emperor at Constantinople on July 28, 450.] The *Code of Theodosius* (*Codex Theodosianus*) was a collection of laws published in his reign. They came forth and acquired legislative force in A.D. 438.

**cod-dei'-a, cod-dei'-na, cod-deine, s.** [From Gr. *κώδεια* (*kōdeia*) = a poppy head.]

*Chem.* :  $C_{18}H_{17}NO_3$  or  $C_{17}H_{15}(CH_3)NO_3$ , methyl morphine. An alkaloid obtained by digesting opium with warm water, precipitating the meconic acid with calcium chloride, and concentrating the filtrate; the hydrochlorates of morphine and codeine crystallize out first, and may be separated by treating their aqueous solution with ammonia, which precipitates the morphine; the liquid is then evaporated, and the codeine is precipitated by caustic potash, and recrystallised from ether; it forms colourless prisms when crystallised from water, which lose their water of crystallisation at 120°; the anhydrous alkaloid melts at 160°. Codeine is a tertiary monamine; heated with soda lime it gives off methylamine,  $NH_2CH_3$ , and trimethylamine,  $N(CH_3)_3$ . Codeine dissolves in concentrated sulphuric acid without colour, if the solution is warmed to 150°C.; a trace of molybdic acid turns it a dirty green colour, becoming blue; and a drop of nitric acid turns it a violet-red colour.

**cod-dët-tä, s.** [Ital., dimin. of *coda* (q.v.).] *Music* : A few notes subjoined to the subject, though they do not really form an essential part of it, in order to lead melodiously into the counter-subject. (*Osney.*)

**cod-dëx (pl. cod-dëx-cëg), s.** [Lat. = (1) a trunk of a tree, the same as CAUDEX; (2) a book, a manuscript; (3) an account-book, a ledger.]

1. *Law* : A roll or volume, specially used in the subjoined compound terms.

(1) *Codex Justinianus* : [CODE OF JUSTINIAN].

(2) *Codex Theodosianus* : [CODE OF THEODOSIUS].

2. *Bibl. Criticism* : A manuscript of any portion of the New or of the Old Testament, especially of the former. The original manuscripts of the two Testaments have been lost, and there is little hope of their recovery. In our inability to obtain them for purposes of consultation, it is needful to fall back on other copies as few removes as possible from the original. When in copying the Scriptures the

ancient transcribers detected an error committed by some one of their predecessors, they did not simply erase it, but placed it as an erratum on the margin of their copy. As further transcriptions were made fresh errata were similarly noted, till at length the margin became greatly crowded. In attempting to restore the original text great value is attached to the acquisition of any manuscripts made in one of the earlier centuries, from the power it gives one of eliminating errata belonging to subsequent periods. Manuscripts are divided into two classes: *uncials*, written in capitals and with no spaces between the words [UNCIAL], and *curives*, written more in conformity with modern practice. The line between them should be drawn about the tenth century. In this respect the modern Biblical critic has the advantage of his predecessors. When the New Testament was rendered into English for the authorised version of the Scriptures, the Greek text used, that of Erasmus and Robt. Stephens, was based on MSS. more modern than the tenth century. Now some of much earlier data are available, prominent among which are the five noted below.

**Codex A** (called also *Codex Alexandrinus*): The Alexandrine, or Alexandrine, MS. of the New Testament. A MS. sent by the Patriarch of Constantinople as a present to the English king Charles I., and believed to belong to the middle of the fifth century. A correct edition of it was printed in 1860.

**Codex B** (called also *Codex Vaticanus*): The Vatican codex, or MS.; so named because preserved in the Vatican. A very valuable MS., belonging to it is thought, to the middle of the fourth century, if not even older. It was discovered in the latter part of the fourteenth century, but was a long time withheld from the examination of scholars. It was only in 1863 that it became practically accessible by the publication of a facsimile.

**Codex C**: The Ephraem manuscript, so called because some of the compositions of Ephraem the Syrian had been written over it. [PALIMPSEST.] It is supposed to be dated at least as early in the fifth century as Codex A.

**Codex D**: The manuscript of Beza, called after this eminent reformer, who presented it to the University of Cambridge in 1581. It is supposed to belong to the sixth century.

**Codex  $\alpha$  (Alpha) or Codex Sinaiticus**: [The Sinaitic codex, or manuscript; so called because Tischendorf, its discoverer, obtained it from the monastery of St. Katherine on Mount Sinai. The year of the great acquisition was 1859.] A most valuable New Testament MS., dating, it is supposed, from the middle of the fourth century. It is believed that it may have been one of the fifty copies of the Bible executed under the superintendance of Eusebius, Bishop of Caesarea, by order of the Emperor Constantine, in A. D. 331. An edition of it was published in 1865. In 1892 a palimpsest manuscript of the Syriac Gospels was discovered by Mrs. Lewis in the same monastery. When photographed and transcribed, it proved to be of the same type as the fifth century fragments hitherto known as the Cureton Gospels.

**cod'-fish**, *s.* [Eng. *cod* (1), and *fish*.] The same as *Cod* (1), *s.* (q. v.).

**cod'-fish-er**, *s.* [Eng. *cod* (1), *s.*, and *fish-er*.] A person or vessel engaged in fishing for cod.

**cod'-fish-er-y**, *s.* [Eng. *codfisher*; -y.]  
1. The business or trade of fishing for cod.  
2. The place where cod-fishing is carried on.

**codg'-er**, *s.* [Etymol. doubtful; perhaps from *cod* (2), *s.*, and hence, one eager to fill his bag or purse; or = *cadger* (q. v.).] (*Slang*)  
1. A miser; a covetous, parsimonious fellow; a hunk.  
2. A curious or strange person.

**cod-di-er-um**, *s.* [Etym. doubtful.]  
*Bot.*: A genus of plants, order Euphorbiaceae. *Codium pectin*, sometimes called *Croton pectin* or *Croton variegatum*, is often cultivated in stoves for its beautiful red leaves. It was brought originally from the Moluccas. The root and bark of *Codium variegatum* are acrid, but the leaves are sweet and cooling.

**cod-di-cal**, *a.* [Lat. *codex* (genit. *codicis*), and adj. suff. -al.] Of or pertaining to a code.

**cod'-y-cil**, *s.* [Fr. *codicille*; Lat. *codicillus* = a tablet, a codicil; a dimin. from *codex* = a tablet, a code.] A supplement or appendix to a will.

"A *codicil* is a supplement to a will, or an addition made by the person making the wills annexed to, and to be taken as part of the will itself, being for its explanation or alteration; to add something to, or to take something from, the former dispositions; or to make some alteration in the quantity of the legacies or the regulations contained in the will."—*Tombin: Law Dictionary by Oranger; Will*.  
"... the validity of the alleged last will, with eight *codicils*..."—*Times*, Nov. 14, 1875.

**cod-i-cil-lar-ry**, *n.* [Lat. *codicillaris* or *codicillarius* = pertaining to a codicil; *codicillus* = a codicil.] Of the nature of a codicil.
